CAR SEALERS
& CUT NIPPERS,

Address the manufacturer,

CHARLES MORRILL,
35 Warren Street, NEW YORK.

The Sunol Bicycle

·TRADE-MARK·

has met with a large sale every season since first placed on the market.

The reason why is apparent—it possesses merit.

The 1895 wheel is even a better one for dealers to handle than its predecessors. It has perfect frame and bearings—is strong—light—speedy. It recommends itself to riders.

Our Catalogue Tells All About It. Send For One.

ORANGE SPORTING POWDER, MANUFACTURED BY LAFLIN & RAND POWDER CO.

ORANGE RIFLE EXTRA, ORANGE SPECIAL, ORANGE DUCKING, ORANGE LIGHTNING.

The attention of TRAP AND FIELD SHOOTERS, RIFLEMEN AND DEALERS IN GUNPOWDER, is called to the new ORANGE SPORTING POWDER, patented April 17th, 1888, and branded ORANGE RIFLE EXTRA.

This Powder is quick and strong, and burns with such perfect combustion that the only residum left in the barrel after shooting is a dark oily substance easily removed While this Powder is not exactly SMOKELESS, it gives only a light bluish smoke, which is almost instantly dissipated, and interferes but little with the shooting of the second barrel, taking the place of the so called smokeless powders in this respect.

This brand of powder sells at the same price as any other brand of Rifle Powder and is superior to any made. No person who shoots can afford not to give it a trial, as after once trying it he will never use any other Powder when he can obtain the ORANGE EXTRA. Weight and quality guaranteed.

MILITARY, MINING AND BLASTING POWDER.

IT TAKES A PULL

to separate the plies of our rubber belting. A yoke of oxen can do it, but hard service won't, so strong is the friction. Our belting is uniform in width and thickness, consequently more of its surface comes in contact with a pulley. That means

NO WASTE OF POWER.

Rubber belting is never injured by water, hence it is best for out-door use, for wet localities, and for mills where the atmosphere is surcharged with moisture or steam, as in paper mills, tanneries, etc. Buy the durable kind, branded 1846-Para, Double Diamond or Carbon, made for 50 years by the

Sole Manufacturers,

Bellevue Pump Co., Bellevue, Iowa.

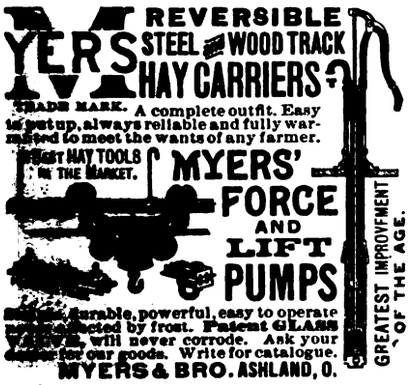
A Good Article Will Always Sell

THE above fact has been thoroughly demonstrated by the large sales on the "Perfection Elevator and Purifying Pump" in the last eighteen months, when every other business almost has been at a standstill.

The prospects for a booming trade on the **"Perfection"** for the coming season were never better.

"The proof of the pudding is the eating." Our proof of the "Perfection" is the orders we now have on our books for Spring delivery. Dealers place your orders at once for shipment in the next ninety days, to avoid delay in getting your orders filled promptly, and sell the best pump in the world. If you don't believe it, write us for our illustrated catalogue and book on pure water, which contains hundreds of testimonials from the best dealers in the United States.

We have made another improvement in our D. G. Fixture, as well as our new combination spout and receiver of cast iron. Our guarantee to purify the foulest well or cistern in ten days use, always stands good.



We are also manufacturing a new irrigation pump with capacity of one hundred to two thousand gallons per minute. Address us for prices. Mention this paper.

A Perfect Shelf Bracket

—MADE OF—

WROUGHT STEEL.

Light! Strong! Elegant!

As a result of long and careful study and much experimenting we are able to offer the trade a

STEEL SHELF BRACKET

which is far superior to anything of the kind heretofore produced, and which we believe to be a

PERFECT ARTICLE!

We base our faith in these assertions on the following points of

SUPERIORITY:

1.—The use of the **arched** or **angle** forms of steel in the wall and shelf plates, which gives **much more strength** with less metal than if made flat.

2.—The **Corrugation** of the brace, which renders it secure against buckling or bending sideways under the severest strain.

The application of these principles makes a **Light, but very Strong Bracket.**

Sole Manufacturers.

S. F. HEATH CYCLE CO.,

Minneapolis, Minn.

The AMERICAN WICK is made on scientific principles. The gum inherent in the natural cotton is taken out, and no expense is spared to produce a wick that will give THE GREATEST ILLUMINATION.

THE

AMERICAN WICK

Made by the

WICK DEPARTMENT

Of the STANDARD OIL CO. of NEW YORK.

Oil drawn up through the AMERICAN WICK burns with a large, clear, white light and the flame does not drop off in size as it does when a poor wick is used. When the cotton is clogged with its natural dust and gum the full illuminating power of the oil is not obtained and the complaint is heard that the light DROPS.

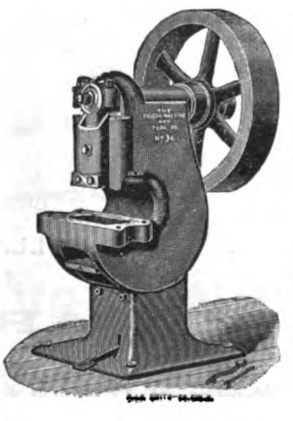
OHIO KNOCK-DOWN STOVE PIPE.

THE Ohio Stove Pipe is the only practicable, durable Smoke Proof Knock-Down Stove Pipe made that needs no direc tions for putting it together. The Ohio Stove Pipe's peculiar construction enables any person to easily put it together or take it apart. A number of the Ohio Stove Pipe Joints put together will make a continuous line (46 ft. long if desired) of perfectly firm, smoke-tight pipe that will not collapse.

The Ohio Stove Pipe is always shipped in crates of 25 joints of the following sizes:

4 in....per crate. 5 in....per crate. 6 in....per crate. 7 in....per crate.
4½ in.... " 5½ in ... " 6½ in ... "



Ask your jobber for this stove pipe; if he does not keep the Ohio, write us.

The Geauga Foundry & Manufacturing Co., Painesville, Ohio.

A Mistaken Notion.

It is a mistaken notion that a fine store in an eligible location, surrounded by attractive signs, is a superior advertisement; for the experience of the most enterprising merchants is that it pays better to spend less in rent and more on advertising.

The "Alligator Wrenches are forged solid in one piece, with tempered steel jaws They have ratchet teeth *cut diagonally* across one jaw, thus enabling them to bite with three teeth at once.

The "Curtis" Wrenches have the diagonally cut teeth of the "Alligator" on both jaws acting in opposite directions. The jaws are connected by swinging bolt and swinging link which gives a quick, sure grip. These Wrenches can be used in contracted space where no other wrench can.

"OLD PUT" GOODS.

"OLD PUT."

Manufacturers of the Famous Brand of "OLD PUT"

SHOE, BREAD, OYSTER, PUTTY, RUBBER, PAPER, AND CIGAR KNIVES, ETC.

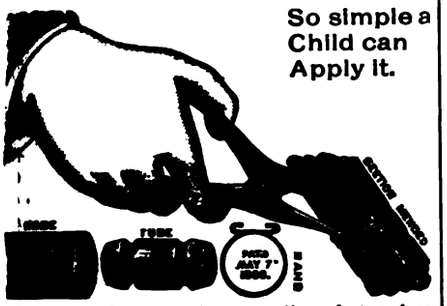
We have bought the entire business of the Putnam Cutlery Corporation, patents, trade-marks, good will, tools, machinery, and stock of goods, and shall hereafter manufacture the line of Shoe, Bread, Rubber, Cigar, and other Knives that have become famous under the "Old Put" brand. These goods will be made identically as they have been hitherto. It is impossible to make them any better; and we solicit your orders for the "Old Put" line of goods.

SAMUEL LEE.

LEE'S CELEBRATED

BUTCHERS' STEELS.

Lee's Butchers' Steels are made of better stock and are cut by a process that gives them a more even and better cutting tooth than any other Steel. They are hardened by a process that makes SOFT SPOTS an impossibility and they will keep in first-class working order a life-time instead of wearing smooth and losing their "bite" as other Steels do.



☞ Mr. Lee's sons, who have been making Steels for the past thirty years under their father's supervision, are now connected with us, and have complete control of making Lee's Steels.

No Disagreeable Odor. No Ashes Light and Heat in Abundance.

No. 327. No. 3 Lift Burner. Nickel Finish.
Height, 32½ inches. Spread of Base, 12¼ inches.

THE MILLER OIL HEATERS.

Just the Thing for All Time and Every Day Use. For Spring, Summer, Autumn and Winter.

They are an Assured Success, from the fact that the Lamps used are "The Miller Lamps" **THE LATEST AND BEST.**

IN THESE HEATERS YOU HAVE A HAPPY COMBINATION: The Best Light. The Best Parlor Heater. The Best Cook Stove.

They are Clean and Odorless. Require no more care than an ordinary lamp. Cylinders of Russia Iron, with Removable Nickel Tops, or with Combination Heating Drum and Grate for Cooking. The No. 3 **BURNERS** have a **FLAME OF 15 SOLID INCHES.** "**MILLER**" **HEATERS** have outside **SCREW ADJUSTMENT** for regulating the Wick and **PLUNGE MOVEMENT FOR EXTINGUISHING**; each one is supplied with an extra Flame Spreader so that Lamp can be used for **ILLUMINATING** when not wanted as a Heater. All of the Best Material and Workmanship.

They will heat a large room perfectly. A tea kettle of water heated in a few minutes by removing canopy.

Perfectly Safe. They Cannot Explode. Oil Never Gets Hot in the "Miller" Heater. A Good Companion for a Cosy Nook. A Comfort on a Chilly Morning.

A MOST IMPORTANT FEATURE.

☞All the weight of the Cylinder rests solidly on the **FOUNT** and not on the **BURNER** in these Heaters.

In **IMITATIONS** of these Heaters the Cylinder is supported on the **BURNER, a CHEAP and WEAK CONTRIVANCE,** which makes it necessary to **REMOVE THE CYLINDER** for lighting and which renders it impossible or very dangerous to use the Heater for cooking purposes.

Send for circular showing Heaters with ovens for cooking. We have 12 varieties.

These Lamps hold One Gallon of Oil. Will Burn 12 hours. Easily Lighted by Lifting Top of Burner.

—MANUFACTURED BY—

EDWARD MILLER & CO., MERIDEN, CONN., United States of America.

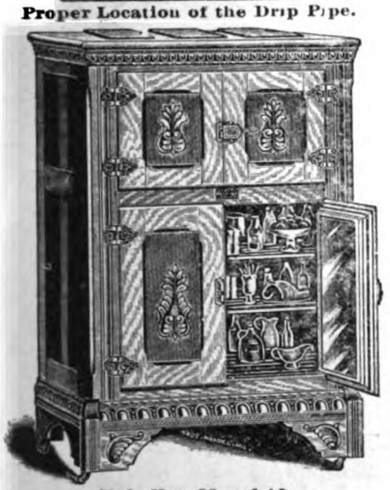
The Gurney Patent Refrigerator

Removable Galvanized Ice Compartment.

is the BEST SELLER, gives the BEST SATISFACTION and PROFIT to the dealer of any refrigerator on the market. BECAUSE—It has special FEATURES, "TALKING POINTS," SELLING POINTS, not found in other refrigerators.

1. By the use of a **Removable Galvanized Ice Compartment** the **"Gurney"** can be cleaned. This feature alone assures its sale.
2. Under the **"Gurney"** principles of construction the **lowest** average temperature is reached with the **greatest economy of ice,** as fully explained in our catalogue.
3. In the **"Gurney"** the ice does not come in contact with the zinc side walls, thus preventing condensation or "sweating" on the inside linings, an important feature of cleanliness and durability.
4. It is packed with Mineral Wool (the best non-conductor known).
5. It has the freest circulation and dryest air, there being a large space around the four side walls of the ice compartment, thus giving about six times the condensing surface of any other refrigerator.
6. In style and finish it leads all competitors



Proper Location of the Drip Pipe.

"Hardware's" Fifth Anniversary.

Five years ago to-day, the first number of HARDWARE was issued.

The brief period of time just completed, seems short enough in the measure of years; and yet it has been long enough for the realization in some sense of ideals; long enough to demonstrate the right to exist; long enough to justify a venture that may, to some, have seemed uncertain; and, above all, sufficiently long to prove that the Hardware trade would generously and willingly support a journal devoted entirely to the interests of that trade—a journal that sought to give it an intelligent, loyal and enterprising service.

The first issue of HARDWARE—modest as to size and promises—was received in a manner that foreshadowed the gratifying success these five years have garnered. It was hardly in the hands of the trade before the fact was demonstrated beyond question that there was a field for its endeavor—that it was needed as an exponent of a great trade that had theretofore been classed only as a department of the iron industry. Such response came in subscriptions, in advertising patronage, in encouraging and cheering endorsements, as enabled each issue to show an improvement upon its predecessor. And thus gradually from small beginnings, HARDWARE has grown in size and influence, until at the end of its first half-decade, it is able to command the generous and hearty endorsements as to its character and influence that can be found elsewhere in this issue—endorsements from scores of the leading houses in the trade; endorsements that no gold could buy, and that are made possible only because they were thought to be deserved.

It has been thought appropriate to celebrate this Fifth Anniversary by the publication of an issue a little out of the routine order. The number speaks for itself; if it does not win the commendation of our readers upon its appearance and merit, nothing that we can say would win it. We have but a word to say further in this connection. The heartfelt gratitude of all who have to do with HARDWARE, is extended in terms of the warmest sincerity to all who have made the record of these five years possible—to those who by support of a material nature, by voice, by pen, by loyal and earnest encouragement, have aided us from day to day and year to year; and this acknowledgement is the more especially due to those who gave this generous service at a time when the future of HARDWARE was largely a matter of faith and expectation.

Do Hardware Associations Pay?

A number of letters upon an interesting topic are found elsewhere in this issue. In the preparation of out fifth anniversary number, the thought occurred that, as the great movement toward organized association within the trade had occurred within the past five years, the discussion of results by men who have special knowledge upon the subject, would be of interest. A letter of enquiry was therefore addressed to the officials of the leading organizations, in which this question was directly asked: "What benefits have accrued to the trade through your Association?"

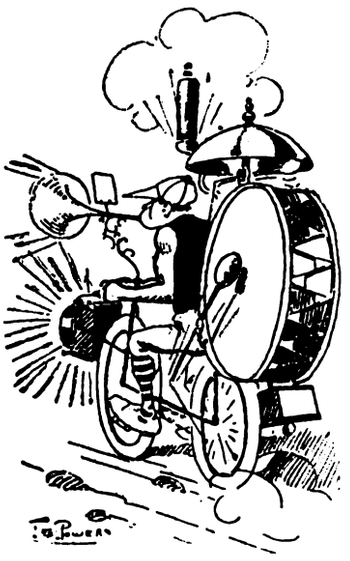
The subject is one in which HARDWARE has naturally an interest. The steps taken by its management to bring the Hardwaremen of New York together in an annual dinner, are matters of recorded history; its suggestion that an organization should grow out of the dinner, was a matter of logical conclusion; and the New York Hardware Club stands as a visible and magnificent result of that movement. From these dinners and this club, has come directly the great movement toward organization that has carried the entire trade before it within the past three years; have come the dinners and reunions that it is our pleasure so often to record; has come that feeling of fellowship and brotherhood that has carried its beneficial effects into the trade in a thousand ways.

How great these benefits have been, the letters in response to our enquiry best show. One writer speaks for the iron, steel and Hardwaremen of Western New

Digitized by Google

England; another for the retailers of Ohio; another for the manufacturers of vapor stoves; another for the manufacturers of America; and others for the Southern jobbers; the retailers of New England; and still others for other branches of the trade.

The verdict is unanimous. Only good has come from association and organization. Of course, the full measure of possible good has not been realized—was not to be expected. But sufficient has been accomplished to show that the trade is traveling in the right direction.



It is with pleasure that attention is called to several matters of especial interest in to-day's issue. Among these, Mr. Saxton's views upon silver and the money question will be found especially valuable. Mr. Maher talks about "Bargain Counters," out of a business experience of exceptional value; Henry Hopkins tells us more about "the good old days"—no better, by the way, than these good modern days; various officials of Hardware organizations discuss the good that has followed their creation; a writer of experience discusses several questions in a practical way for practical men; portraits are given of C. W. Dunlap, of the gentlemen who have the direction of the great sportsmen's exposition in charge, and of others well-known to the trade; the Hardware centre of New York is discussed; and these are accompanied by many other articles of a trade and general character. There is not a page that will not pay perusal; and those devoted to the business announcements of American manufacturers and jobbers are, in practical use to the Hardwareman, the most valuable of all.

An international exhibition of farming and agricultural machinery will be held in Vienna, Austria, May 4, 5, 6 and 7, 1895. Some American firms are expected to participate.

An advertiser should place his announcement where it will reach the men who purchase his wares. HARDWARE reaches the Hardware jobbers and retailers of America.

The Canadian tinware manufacturers have decided to make open prices on pie and jelly plates and pieced ware, withdrawing these lines from their Association list.

Suggestion for Law-Makers.

"Bicyclists must give sufficient warning of their approach when within 100 feet of a street or road crossing, by means of such sound-producing devices as shall be approved of by local authorities."—*New York World.*

Axe Making in the United States.

The following interesting article was prepared for HARDWARE by the president of the Standard Axe & Tool Works, Ridgway, Pa.:

Within the memory of men now living, the manufacture of axes was quite generally carried on by country blacksmiths, who employed the time when regular work was dull in making axes to sell customers. A good tool was required to stand in hard and frosted timber, and not every blacksmith was able to do the work. Those who possessed the most skill, found the demand for their axes increasing, and so it came about that the miscellaneous work of the shop was abandoned by an occasional wielder of the hammer, who devoted his time largely to the production of his specialty. He soon found that the mountain streamlet hard by the old shop could be harnessed by means of an "overshot" wheel, to drive a trip hammer to lessen his outlay of physical force, and to increase his out-put, and thus by degrees the modern shop was elaborated.

Until the power hammer came into use, the axe was formed either by punching a small hole through a bar of iron, and then gradually enlarged to form the eye of the axe; or the bar of iron was hammered thin in two places, after which it was folded together, so as to bring these cavities opposite each other to form the eye. In either case, as soon as the eye was formed, the cast steel was welded on to form the bit or cutting part of the axe, and the blades and head were given their respective shapes, to conform to the customer's design, according to the workman's ability.

It being difficult to punch a hole straight through a thin, wide bar of iron, that method of forming the eye was not greatly used, and was altogether abandoned as power hammers came into use and all axes were "plated" under the hammer. A few small shops still continue to make axes after this manner, but all manufacturers of importance now form the eye, either by the use of rolls or by means of punches. The punch seems to be growing in favor among manufacturers, but each method has its warm supporters.

In early times no attention was paid to finish. The one great aim was to produce an axe which would neither break nor bend when thin enough to chop easily. Clearly then, as now, the best maker of axes was the one who could bring about this result; but strife among manufacturers to secure trade, and the desire of buyers to get nicely finished goods, has gradually led to the production of tools which are beautiful and sometimes good. It is not to be implied that beauty of finish necessarily implies inferiority of quality. On the contrary, some makers study to combine in a high degree both quality and finish; but the decided tendency of the trade has been of late to please the eye, and at the same time produce something so cheaply that, if dealers could be deceived, would enable the deceiver to book large orders.

So marked has been the decline in prices at which axes have sold during the past decade, that the cause must be sought, in part, outside of the fact that materials are cheaper and that labor-saving machinery lessens cost of production. Often cheaper and unsuitable materials are used, and machine methods of manufacture are adopted, which are not warranted, some even going so far as to make axes entirely of soft steel, give them a nice finish and sell them to those who *will* have axes very cheap.

The time is at hand when this mad strife for cheapness and show will again give place to studied worth. We may never return to the plainness of the blacksmith's production, but necessarily the time is near when quality will be sought after as it has not been during the few past years, and when the merchant will look with more favor on those who seek to maintain quality, even at the risk of being undersold.

CONGRATULATION: ENDORSEMENT: GOODWILL.

There is nothing in the history of HARDWARE more gratifying to those having its interests in charge than the cordial good-will and friendship that find such generous, such unstinted, such emphatic expression in the words of commendation and congratulation found below. Letters like these contain more than formal words—they are the honest, outspoken words of business men who are guarded in their expressions; who mean just what they say, and have learned to say just what they mean.

When the announcement was made that the Fifth Anniversary of HARDWARE had been reached and that the occasion was to be celebrated by an edition a little out of the routine, these testimonials and congratulations poured in from all sides. An endeavor had been made to furnish a trade journal that should commend itself to the great Hardware trade represented; but no one connected with HARDWARE had had the temerity to dream that such generous views concerning it were harbored by the great houses and companies who speak their good will below. Nothing need be added here, except to tender to all the heartfelt thanks of HARDWARE, and to record the pledge that in the future an endeavor will be made to deserve, far better than in the past, these high encomiums of our friends.

TOWER & LYON.

HARDWARE: Accept our most hearty congratulations on the fifth birthday of your lusty boy HARDWARE. We have watched the child from its earliest infancy, and such has been our confidence in the creditable development of the boy, that it has been a pleasure to us to give him something to remember us by, on each appearance. You may be sure that if he does us as much credit in the future as he has in the five years of his infancy, we shall have no disposition to go back on him.

We congratulate you and your associates on your well-deserved success in producing a paper which has come to be so much of a necessity to the Hardware trade.

Very truly yours, TOWER & LYON.

New York, March 20, 1895.

THE UNION METALLIC CARTRIDGE CO.

EDITOR HARDWARE: We congratulate you on the phenomenal success of HARDWARE. It has done good and conscientious work for its patrons, and ranks among the leading trade journals. We have been with you as advertisers from the beginning, and expect to continue.

Yours truly,

THE UNION METALLIC CARTRIDGE CO.,
Wm. J. Bruff, Vice-President.

New York City, March 22, 1895.

HARTLEY & GRAHAM.

EDITOR HARDWARE: We desire to add a word to those that will be said by your many friends in your "birthday issue." HARDWARE fills a prominent place as an instructive journal and authority on all subjects pertaining to the trade you represent. May your second five years be even more prosperous than the first. Yours very truly,

New York, March 22, 1895. HARTLEY & GRAHAM.

SUPPLEE HARDWARE CO.

EDITOR HARDWARE: We notice that HARDWARE will have completed its fifth year of publication with this month. How quickly time passes, when we realize that April 10th, 1895, will be the fifth anniversary of your "wide awake" journal HARDWARE.

This paper has steadily grown in favor each year since the first number was issued, and we sincerely hope that as each year rolls around, you will not only add to your list of subscribers, and thus the value of your paper become more widely known, but at the same time add financial results to your exchequer as it deserves, as it increases its usefulness through the medium of additional subscribers.

We think the trade, each year, are beginning to appreciate more fully the advantages of keeping in touch with the various markets of the country as well as depending on a paper like yours, as well as similar journals, for information of new goods, which the energetic American manufacturers are constantly placing upon the market.

The ordinary merchant, it he does not desire to be a back number, must keep up with the progress of the times, and add to his assorted stock and perhaps discard old-time articles that have outlived their usefulness. Times change and the trade changes, and we think it best to keep the trade informed of the many changes that make your paper with other similar papers valuable.

Wishing you a prosperous continuation for the many years we trust you will be in existence, we are,

Yours truly,

Philadelphia, March 28, 1895. SUPPLEE HARDWARE CO.

THE ENTERPRISE MFG. CO. OF PA.

HARDWARE: It is a pleasure for us to be able to testify to the value of HARDWARE as an advertising medium. We have spent a large amount of money to advertise our goods in the past twenty-nine years, and we firmly believe that for the amount of money we have paid you, we have been amply repaid. We congratulate you that you have been so successful. You have every reason to be proud of your journal, and we trust you will have many happy returns of your anniversary. Yours truly,

THE ENTERPRISE MFG. CO. OF PA.

Philadelphia, March 23, 1895. T. Henry Asbury, President.

DANGLER STOVE & MFG. CO.

EDITOR HARDWARE: Anniversaries are always occasions of interest, in the lives of individuals as well as enterprises, and it is with special pleasure that we desire to congratulate you upon your phenomenal success.

We remember well the advent of the first issue of HARDWARE, and while we predicted success, we confess we were not prepared to see the unparalleled growth it has reached in so short a period, and as patrons of HARDWARE, we have been well repaid for any money we have expended in advertising. THE DANGLER STOVE & MFG. CO.,

Cleveland, Ohio, March 20, 1895. D. A. Dangler, President.

PECK, STOW & WILCOX CO.

HARDWARE: We have watched the progress of HARDWARE from its very inception. To say that its success is deserved, is to repeat an universal verdict. Hence we extend to you our hearty congratulations on the Fifth Anniversary of its establishment. Your paper has filled a place not hitherto occupied by Trade Journals. Its statements have been reliable, and the whole make-up of the sheet has been highly creditable in every department. The editorial work has been performed with a conscience, and you are in touch with living issues. The trade has needed and will sustain such a publication. Your circulation and influence will continue to increase, and may you long remain on the high road to prosperity.

THE PECK, STOW & WILCOX CO.,

New York, March 29, 1895. W. R. Walkley.

SAMUEL WINSLOW SKATE MFG. CO.

HARDWARE: We notice that April 10th you are to celebrate your fifth anniversary of HARDWARE, a paper which we believe is doing much good to the Hardware trade. We congratulate you on your great success and wish you many

948583

Digitized by Google

prosperous birthdays. Thanking you for the good we think you have done us, we remain Very respectfully,

The Samuel Winslow Skate Mfg. Co.,
Worcester, Mass., March 20, 1895. Otis W. Everett.

NEW JERSEY CAR SPRING & RUBBER CO.

Editor Hardware: This company was one of the first to enter your list of advertisers, and we expect to be among the last to retire. We feel that it is one of the publications we can't afford to stay out of. With the best line of goods, we naturally want the best medium for reaching the trade.

Yours truly,
John J. Voorhees, Treasurer.
Jersey City, N. J., March 21, 1895.

ALFRED FIELD & CO.

Editor Hardware: These are progressive days, when it takes only five short years for a Trade Journal to become full-fledged and strong. Such a condition, however, must mean something more than ordinary thrift and intelligence. It must mean that somewhere, modestly hidden from popular view, there is a mighty power at work, grinding up the various metallic substances, and moulding them into pellets that are so attractive, irresistible and beneficial, that people stumble over each other after them, and cry for more, *and more will have to come.*

It will not be long before the pressure will be so great that instead of fortnightly issues, weekly issues of Hardware will be a positive necessity to the trade.

We desire to say, Friend Hardware, that we have always found you entertaining, instructive, and reliable. The beaming countenance of your president shines on every page; the grave and sturdy thoughtfulness of your chief editor marks every line; and the conscientious work of your reporters make their statements most reliable. Being the only Journal whose love is not divided, you cannot be otherwise than successful in winning the entire Hardware heart. We can say, in all sincerity, that we have found you very useful to us, and we can most cheerfully recommend you to our friends in the trade.

We most cordially say in this—your Birthday number—that we wish you long life, and very great success and prosperity. Very truly yours,

New York, March 29, 1895. Alfred Field & Co.

COLDWELL LAWN MOWER CO.

Editor Hardware: You asked me the other day if we liked Hardware as an advertising medium. Why, of course we do, or we would not spend our shekels advertising in it. But I am too busy now to say more than that we think Hardware is enterprising, pushing, up-to-date, so to speak, and has a certain amount of get-up-and-get spirit about it, combined with a certain flavor of, "I give you your money's worth when you advertise with us," that we like it—not for fun or sentiment, but for real business, and so long as you continue thusly you can count our continuance.

Yours truly,
The Coldwell Lawn Mower Co.,
Newburgh, N. Y., March 25, 1895. Thos. Coldwell, President.

CAPEWELL HORSE NAIL CO.

Hardware; We have been liberal advertisers in your journal for years, and the results are so satisfactory that we expect to be much more liberal for many years to come.

Wishing you increased prosperity, we are,
Very truly yours,
The Capewell Horse Nail Co.
Hartford, Conn., March 23, 1895.

THE NATIONAL SAW CO.

Editor Hardware: It affords us great pleasure to speak for your paper, Hardware, the fact that we feel it is steadily increasing as to its merits as one of the leading Hardware periodicals. Since we have been with you, we certainly have had many inquiries derived through your advertisement, and know that increase of trade has resulted therefrom. We wish you all success in the futnre, and trust that your paper, Hardware, will steadily advance in its useful career. We remain,

Yours very truly,
The National Saw Co.,
Newark, N. J., March 21, 1895. F. B. Earle, Secretary.

THE YALE & TOWNE MFG. CO.

Editor Hardware: We congratulate you upon the attainment by Hardware of its fifth birthday. We believe it is rendering good service to the trade.

Wishing you continuous success, I am,
Yours very truly,
Wm. F. Donovan,
Vice-President and General Manager.
New York, March 23, 1895.

NORTH BROTHERS MFG. CO.

Gentlemen: Accept our heartiest congratulations on your Fifth Anniversary with our best wishes for many more.

The fact that we have used Hardware in advertising our lines of goods all these years is perhaps the best tribute we can pay to its value and usefulness.

Trusting that in the coming years Hardware may continue to grow in influence and strength as rapidly as in the past, we are, Yours truly,

Philadelphia, March 22, 1895. North Bros. Mfg. Co.

McKINNEY MANUFACTURING CO.

Editor Hardware: We have been apprised of the Fifth Anniversary Number of Hardware, to be issued on April 10th. We must congratulate you upon the growth, both in circulation and usefulness, of your paper in this short time.

We highly appreciate Hardware and look forward with much pleasure to its receipt every second week. We wish you well, but doubt if we could wish you anything better than that your success in the future may be as great as in the past. Very truly yours,

Allegheny, Pa., March 23, 1895. McKinney Mfg. Co.

BRIDGEPORT GUN IMPLEMENT CO.

The Hardware Publishing Co.: It gives us much pleasure to testify to our appreciation of the high standing of Hardware. We look forward to the receipt of your publication, and its articles in regard to trade are of much service to us.

Wishing you our congratulations upon your anniversary, we are, Yours truly,

The B. G. I. Co.,
New York, March 25, 1895. Per H. B. Cannon.

FOREHAND ARMS CO.

Hardware Publishing Co.: Since the issue of your publication we have been, with a brief exception, an advertiser in it, and we have found it one of the best mediums in placing our goods before the notice of the public. In the numerous inquiries we receive daily, reference is made to Hardware as often as to any other publication, which shows that Hardware is read by the dealers as much as any other publication. We regard it a very valuable medium for advertising. Yours truly,

Worcester, Mass., March 25, 1895. Forehand Arms Co.

WATERBURY FARREL FOUNDRY & MACHINE CO.

Hardware: By their fruits ye shall know them. I know you appear to have yielded fruit abundantly, and I congratulate you on your remarkable success as a five-year old. You have my best wishes.

Respectfully,
Waterbury, Conn., March 20, 1895. Wm. E. Fulton, Treas.

W. W. LAWRENCE & CO.

The Hardware Publishing Co.: We congratulate Hardware on arriving at its Fifth Anniversary; we also congrat-

Digitized by Google

ulate its editor on his success in making it such an interesting and valuable paper, and we particularly congratulate its president on the fact that, although he is *now a very old gentleman*, he still retains his youthful vigor in his competition with others for business and manages to more than hold his own. Yours truly,

Pittsburgh, Pa., March 21, 1895. W. W. LAWRENCE & CO.

PARTRICK & CARTER CO.

HARDWARE PUBLISHING CO.: We note with pleasure that HARDWARE'S fifth anniversary is near at hand.

We congratulate you on having attained so great success and believe that subscribers and advertisers appreciate HARDWARE'S value as a means of bringing the dealer and manufacturer in closer communication.

Our experience as advertisers with you has been of the most satisfactory character, and we can only say that we hope the next five years will see as great an improvement and progress as the past five. Yours very truly,

Philadelphia, March 25, 1895. PARTRICK & CARTER CO.

CHAS. WEILAND.

EDITOR HARDWARE: Regarding the usefulness and mission of HARDWARE I do not know what I can say to express my opinion to the trade more forcibly than the fact that I am and have been a constant advertiser in every issue of your paper since the incipiency.

In conclusion will say that the results derived through the advertisements in the columns of your paper have been very satisfactory. Wishing you every success, I am,

Very truly yours,

New York, March 21, 1895. CHAS. WEILAND.

C. T. WILLIAMSON WIRE NOVELTY CO.

HARDWARE: We offer our congratulations on your Fifth Anniversary. HARDWARE has had a remarkable success, by giving all the latest news in spicy, short items; and to present new goods to the trade we consider HARDWARE one of the best mediums known.

Trusting your future growth will far excel the past, we remain, Very truly yours,

Newark, N. J., March 21, 1895. C. T. WILLIAMSON W. N. CO.

STANDARD TOOL CO.

HARDWARE: We take pleasure in stating that during the four years we have had an advertisement in HARDWARE we have each year received better results. With the present policy that HARDWARE pursues we believe that we will still each year receive better results.

Yours very truly,

THE STANDARD TOOL CO.

Cleveland, Ohio, March 21, 1895. E. C. Palmer, Gen'l. Mgr.

L. S. STARRETT CO.

EDITOR HARDWARE: It gives us great pleasure to write that the fact of our continuing our advertisement in HARDWARE would prove that we consider your publication a good medium. Wishing you the best of success, we remain, Very truly yours,

THE L. S. STARRETT CO.

Athol, Mass., U. S. A., March 21, 1895. I. H. Page.

COBURN TROLLEY TRACK MFG. CO.

HARDWARE: We think well of HARDWARE. We have carried an advertisement in it the past year, which we believe has been of material benefit to us. Wishing you every success in the coming year, we are,

Yours truly,

THE COBURN TROLLEY TRACK MFG. CO.

Holyoke, Mass., March 19, 1895. Azro H. Coburn, Treas.

COLBY WRINGER COMPANY.

EDITOR HARDWARE: Will HARDWARE please accept our congratulations upon its Fifth Anniversary and best wishes for "many happy returns?" We find it not only reliable but interesting, and its very low price should make subscribers of each Hardware dealer in the country. The continuance of our patronage from year to year is probably the best evidence of our faith in its advertising pages. Wishing you all possible success, we are,

Very truly yours,

Montpelier, Vt., March 26, 1895. COLBY WRINGER CO.

THE PLUME & ATWOOD MFG. CO.

EDITOR HARDWARE: We take pleasure in the opportunity to congratulate you upon the approaching Fifth Anniversary of the existence of your very valuable paper. We think that you have reason to be proud of your very vigorous "child" of five years, and your success should be very gratifying indeed when you realize that it has been achieved by giving the public honest service and good value for their money. Yours truly,

THE PLUME & ATWOOD MFG. CO.

New York, March 26, 1895. R. H. Swayze, Secretary.

THE MONARCH CYCLE CO.

HARDWARE: We consider it a great pleasure to be permitted to add our little leaf to the volume of testimony which no doubt the rest of your friends will send you in commemoration of your forthcoming birthday. We have watched your growing career, from the bantling which started five years ago, to deserve the good wishes of the Hardware trade, and whose mission in the community was foreshadowed by the adoption of its suggestive name; and no trade paper has since been so welcome, so readable and gossipy within our recollection of a quarter of a century. May you long continue to flourish in this world of good things, which is a fitting reward for the diligent worker who knows his proper field of action and stays there as faithfully as HARDWARE has done during the five fruitful years which it now seeks to make famous by glorifying the birthday of its existence. Very truly yours,

New York, March 26, 1895. C. F. GUYON CO., Limited.

THE HOLMES & EDWARDS SILVER CO.

HARDWARE: We extend our congratulations to HARDWARE on its fifth birthday. We recognize in HARDWARE a magazine progressive and enterprising, and shall be glad to note as much advance in its character in the next five years as has been noted in the first five years of its history.

Very respectfully,

THE HOLMES & EDWARDS SILVER CO.

Bridgeport, Conn., March 26, 1895.

SAM'L C. TATUM CO.

EDITOR HARDWARE: We are much pleased to congratulate you on the progress made by your journal. We find it a representative paper and can always turn to its pages with interest. Truly yours,

THE SAM'L C. TATUM CO.

Cincinnati, O., March 25, 1895. By S. E. Hilles, Pres.

MILLER LOCK COMPANY.

HARDWARE PUBLISHING CO: Wishing you another era of prosperity even greater than you now celebrate, we are,

Yours truly,

MILLER LOCK COMPANY.

Philadelphia, March 26, 1895. Milton Jackson.

CHARLES MORRILL.

HARDWARE: Permit me to congratulate you on the Fifth Anniversary of the birth of HARDWARE, and to express my sincere appreciation of the many substantial merits of your publication and of the frequent evidences it has given during its somewhat brief lifetime that, before it has attained its majority, it will rank among the foremost of its class.

I can, without reservation, assert that the editorial work in its columns has been in no respect an indication of "infant industry." On the contrary its style, tone and character prove that the influences controlling it have been intelligent, vigorous and manly. I cordially hope that your

Digitized by Google

paper may live to a useful and robust old age and become, as it already promises to be, the leading journal in its particular sphere of usefulness.

In submitting this expression of my views and hopes, which I believe are entitled to some consideration, I do so under the promptings of a business experience of more than fifty years in the Hardware trade, in my specialty of dressing saws for all kinds of work. My experiences, like myself, are well known; and they are equally well known as an improvement over the old method of doing the work for which they were designed, just as your paper is an improvement over so many others of the same kind that have preceded it. And as my Saw Sets so greatly exceed the old hammer and hammer sets, or the punch and steel block, in perfecting an instrument of utility, so do your bright, powerful and clinching editorials excel the old humdrum literature of other days and other periodicals.

The comparison may be far-fetched, but it is not inappropriate I think when made from my view-point.

With renewed congratulations and repeated assurances of my esteem and good wishes, I am,

Respectfully,

New York, March 28, 1895. Chas. Morrill.

W. C. HELLER & CO.

Hardware Publishing Co: We have been advertising with you for some time and take pleasure in advising you that we esteem Hardware as one of the greatest mediums for the trade in which it is interested.

Our advertisements in your columns have given results that assure us that they are closely watched by the trade.

We tender you our congratulations on your Fifth Anniversary and wish you the success which a continuance of your present efforts will so richly deserve. We are,

With regards,

Montclair, N. J., March 29, 1895. W. C. Heller & Co.

THE SMITH & EGGE MFG. CO.

Hardware Publishing Co.: We congratulate you on having the good fortune of celebrating your fifth birthday and finding yourself in good health and still growing. We have been with you in a modest way ever since your start, and it gives us pleasure to say that we have found your paper pleasant and agreeable reading, and very useful as an advertising medium.

Trusting your good fortune in the past may continue with you in the future, we are, Yours truly,

The Smith & Egge Mfg. Co.

Bridgeport, Conn., March 27, 1895.

PREMIER CYCLE MFG. COMPANY.

Editor: Our advertisements in Hardware have been the means of bringing us more business from the Hardware trade than all other mediums combined.

Wishing you a prosperous birthday, and many happy returns thereof, we remain, Yours truly,

Premier Cycle Mfg. Company.

New York, March 28, 1895. H. Johnson, President.

THE CHARLES PARKER CO.

Hardware Publishing Co: We have with pleasure noted the growth and improvement of your publication, and have confidence that it is very beneficial both to the manufacturer and dealers. We assure you that you have our best wishes for your continued prosperity.

Yours truly,

The Chas. Parker Co.

Meriden, Conn., March 28, 1895. W. H. Lyon, Secretary.

SICKELS, SWEET & LYON.

Editor Hardware: Allow us to heartily congratulate you upon the close of five active years of successful trade journalism. We believe Hardware has been of great service to the trade, and we are pleased to know that the publishers have met with a very considerable degree of pecuniary success, as well as having gained for themselves the pleasant assurance of having established, in a comparatively short time, a fixed place for their publication, and the recognition of their journal as an authority in trade affairs. Wishing for you continued and increased success, we are,

Sincerely yours,

New York, March 27, 1895. Sickels, Sweet & Lyon.

BOSTON BELTING COMPANY.

Hardware Publishing Co: Our relations with Hardware have always been very pleasant and satisfactory, and we consider it one of the most wide-awake and up-to-date trade journals that come under our observation.

Wishing you continued success, we remain

Yours respectfully,

Boston Belting Co.

Boston, Mass., March 27, 1895. George H. Forsyth.

JOHN CHATILLON & SONS.

Editor Hardware: We are pleased to congratulate you on this, your fifth anniversary, upon the success you have achieved, and we hope you may continue to prosper. With your best wishes, we remain,

Yours very truly,

John Chatillon & Sons,

New York, March 28, 1895. Louis A. Tranberg, Secretary.

VAN WAGONER & WILLIAMS HARDWARE CO.

Editor Hardware: We beg to offer our congratulations on the occasion of the fifth anniversary of the establishment of your paper. We have watched the growth of Hardware with no little interest, and it gives us pleasure to assure you that, having been represented in your columns almost from your first issue, we have a feeling of pride and of satisfaction in your achievements.

You not only occupy a most useful and important field, but you occupy it in a manner most creditable to all concerned in the development of your enterprise. We are glad to be counted among the many friends you have won in Hardware circles, and we wish for you a continued career of prosperity. With cordial esteem, we remain,

Yours very truly,

Van Wagoner & Williams Hardware Co.,

Per Wm. H. Williams, Vice-President.

New York, March 27, 1895.

W. JESSOP & SONS, LIMITED.

Editor Hardware: The welfare of Hardware is assured so long as our friend Mitchell is connected with it. We see his name is still at its head. More than this, it is unnecessary to say. Another five years as proportionately successful as its last, will place it almost beyond the criticism of friends or competitors.

Yours truly,

Wm. Jessop & Sons, Ltd.,

New York, March 27, 1895. Per W. F. Wagner.

SAMSON CORDAGE WORKS.

Editor of Hardware: We note the birthday of the precocious five-year-old, and can only add that his appearance would indicate a more mature age. We have had our advertisement with you nearly from the beginning, and see no reason why we should not continue.

Wishing you many happy returns, we remain,

Yours very truly,

Boston, Mass., March 27, 1895. Samson Cordage Works.

ENERGY MANUFACTURING CO.

Dear Hardware: When we see a sturdy youngster who, by ability and *energy* has pushed himself to the front, we feel disposed to pat him on the back, and congratulate him on his success, and especially so when we have shared in the benefits of his exertion. You helped us wonderfully when we were introducing the Philadelphia Dumbwaiter,

Digitized by Google

and we daily feel the benefit of our card in your columns. We have been with you from the beginning, and would kindly ask you to consider we have a permanent lease on our space in your paper. Yours very truly,

Philadelphia, Pa., March 27, 1895. ENERGY MFG. CO.

LUTHER BOARDMAN & SON.

EDITOR HARDWARE: We take great pleasure in congratulating HARDWARE upon its fifth anniversary, and we trust it will advance as much in the coming five years as it has in the past. We consider it a bright, useful and up-to-date trade magazine and well worthy the support which has been given it. With best wishes for its future, we remain, Very truly yours,

East Haddam, Conn., March 27, 1895. L. BOARDMAN & SON.

JOSEPH H. SEED.

EDITOR HARDWARE: I must congratulate HARDWARE on its good looks and strong five-year-old healthy appearance, and hope it will increase in influence and usefulness as years roll by.

I have been one of HARDWARE'S patrons almost from the start, and have derived both pleasure and business from the connection, and intend to continue. Wishing you a very prosperous career, I remain, Your very truly,

JOS. H. SEED,
Water Filter Mfr., 21 & 23 Centre St.,
New York.

New York, March 28, 1895.

AMERICAN SCREW CO.

EDITOR HARDWARE: It gives us much pleasure to congratulate you upon the coming fifth anniversary of HARDWARE, and to remark apropos of its success that one of its numerous missions in its chosen field seems to have been to extract (for the Hardware Publishing Co.) gold from Hardware; and as this is almost the only similar recent achievement in that trade within quite a period, it would seem worthy of note.

We take it that there can be no better proof of the value of your journal to the general Hardware trade than the fact that you have such a high grade of advertisers, and, we understand, an equally satisfactory list of subscribers. Certainly your consistent regard for the interests of producers, as well as buyers, has proven to have been appreciated by both, and wishing you all success for the future, we are,

Yours truly,

AMERICAN SCREW CO.

Providence, R. I., March 30, 1895 Olney Arnold II., Secretary.

THE AMERICAN AXE & TOOL CO.

HARDWARE PUBLISHING CO.: We have been a subscriber to HARDWARE for a long time, and read each number with interest and satisfaction. It is not only ably edited, but its columns contain in every issue articles, information and statistics invaluable to the trade. We appreciate the fact that your efforts to establish a first-class periodical devoted to our interests have been crowned with abundant success, and we trust no obstacles will intervene in the future to prevent you from realizing to the fullest extent that success you so richly deserve. We congratulate you most heartily on your fifth anniversary, and we sincerely trust that long after all now engaged in the business to which your periodical is devoted shall have retired from the active pursuits of life, that HARDWARE will be found to be indispensably necessary to those who come after us.

Very truly yours,

THE AMERICAN AXE & TOOL CO.

New York, March 30, 1895 By Chas. W. Mackey, President.

JOSEPH DIXON CRUCIBLE CO.

PUBLISHERS HARDWARE: We understand that a special number of HARDWARE will be issued on April 10th in celebration of its fifth birthday. Congratulations are therefore in order, and we congratulate you most heartily. HARDWARE is one of the few trade papers that always receive a careful perusal at our hands. It is not only a review of general trade matters, but is an interesting catalogue of all that is new and of interest to the Hardware trade. An up-to-date Hardware dealer cannot, in our estimation, make a better investment than to send you a five-years' subscription while he can get it at the dollar price.

Yours respectfully,

JOSEPH DIXON CRUCIBLE CO.

Jersey City, N. J., March 30, 1895.

AMERICAN WHIP CO.

EDITOR HARDWARE: We find great pleasure in taking this opportunity of extending our congratulations upon your fifth anniversary, and can say that we have appreciated your paper very much indeed, and it is regarded as one of the standards in our office.

Quite frequently we are called upon by the dealers in our town to look over its pages, when they are wanting for something they don't happen to be able to find elsewhere.

We trust that the past prosperity of your valuable paper is only an indicator of its future greatness. With best wishes for its success, we are,

Yours very truly,

AMERICAN WHIP CO. Branch.

Westfield, Mass., March 30, 1895. Ira Miller, President.

TROY NICKEL WORKS.

HARDWARE: It is with pleasure that we indorse your publication. You are on our advertising list as one of the best. We will be glad to keep you in this position so long as you keep up the standard which you now occupy as an advertising medium. Yours truly,

Troy, N. Y., March 29, 1895. TROY NICKEL WORKS.

PIKE MFG. CO.

EDITOR HARDWARE: It gives us pleasure to offer our congratulations on the advent of HARDWARE'S fifth anniversary, and to wish its publishers many happy and prosperous "returns of the day." We are not large advertisers, yet we like to keep our name and our wares before the public, *in a modest way*, and have found HARDWARE a most efficient aid toward accomplishing that purpose. We believe the first number that came to our notice was received something over four years ago, and since that time we have laid each one aside until we could find time to look it carefully through, as we always discover much that is useful and interesting in its columns. Hoping that the next five years may bring you continued success, we are,

Yours truly,

THE PIKE MFG. CO.

Pike Station, N. H., April 1, 1895. E. BERTRAM PIKE, Treas.

PHILADELPHIA LAWN MOWER CO.

HARDWARE PUB. CO: We take pleasure in stating that we consider HARDWARE a thoroughly first-class, reliable trade journal, and heartily recommend it to all large jobbing houses and manufacturers of Hardware specialties. We have been with your paper for some years, and can trace many sales to its influence.

Respectfully yours,

THE PHILA. LAWN MOWER CO.

Philadelphia, March 29, 1895. W. E. Graham, President.

S. L. ALLEN & CO.

EDITOR HARDWARE: We have watched with interest the growth of your paper, and we have found the results of our advertising with you better than in any other trade paper. It seems to us that you are on the right track.

Yours very truly,

Philadelphia, March 29, 1895. S. L. ALLEN & CO.

POPE MANUFACTURING COMPANY.

HARDWARE: We are glad to note the progress and growth in popularity of your valuable journal, and we are sure the

Digitized by Google

many interesting features you introduce must be appreciated by your readers.

While little advertising seems to be needed this year to sell Columbia bicycles, we still feel that our advertising with you is productive of results.

With kind regards and best wishes, we are,

Yours truly,

Pope Manufacturing Company.

Wm. Bancroft, Adv. Manager.

Hartford, Conn., March 29, 1895.

ATLAS TACK CORPORATION.

Editor Hardware: We take pleasure in saying that, speaking as subscribers to, and advertisers in, Hardware, we consider it one of the most interesting and useful of the trade journals of which we are aware; and it has our most cordial good wishes for a long and prosperous career.

Yours truly,

Atlas Tack Corporation.

Boston, March 29, 1895. John H. Parks, Treasurer.

THE W. BINGHAM CO.

Editor Hardware: We consider Hardware one of the best trade journals published, and one which should be in the hands of every Hardware merchant in the country. Its columns are bright and newsy, and contain many ideas which can be used to profit by the man desirous of being up with the times. So far as we can judge, each of the Hardware journals occupies its own particular field and supplies a want which the others do not, and we think that Hardware has reason to be proud of the place it has made for itself in trade economy. Yours truly,

The W. Bingham Co.

Cleveland, O., March 30, 1895. J. B. Comstock.

EDWARD DARBY & SONS.

Hardware: We note your announcement that on the 10th day of April, 1895, you will issue a birthday number in honor of Hardware's fifth anniversary, and we take pleasurable pride in stating that for the past few years we have been a subscriber to Hardware, and we beg to remind you that it has our esteemed favor, and would recommend the same to any one desirous of a good, useful and commonsense trade journal, such as Hardware is, which is assured by the successful career which it has enjoyed for the past five years. Yours truly,

Edward Darby & Sons.

Philadelphia, March 29, 1895.

KEARNEY & FOOT CO.

Editor Hardware: In the fifth anniversary of your publication we certainly feel that you are to be congratulated, not only on the progress made, but also on the wise and pleasant reading which this publication affords. You ask us if we think Hardware a success. A glance at its many pages of advertising matter makes it unnecessary for us to answer this question.

Wishing you continued success, we remain,

Yours very truly,

Kearney & Foot Co.

New York, March 30, 1895. J. D. Foot, President.

THE STANLEY WORKS.

Editor Hardware: We are pleased to say that we think you are putting out a bright and readable paper, and we believe your success is well deserved. We congratulate you, and hope that when you are ten years old, you will have as much reason for receiving congratulations as you have on April 10, '95. Yours truly,

The Stanley Works.

New Britain, Conn., March 30, 1895. Geo. P. Hart.

E. BISSELL, SON & CO.

Editor Hardware: As one of your first patrons, we desire to congratulate you upon this fifth anniversary of the issue of your paper, which is now recognized as a valuable "adjunct" to the trade. Under its present able management it has been progressive and taken a high rank among the publications of the metropolis, a position it has won on merit only, which justly entitles you to feel proud of the great success it has achieved. With the best wishes for the future prosperity of Hardware, we remain,

Respectfully yours,

E. Bissell, Son & Co.

New York, April 2, 1895.

THE F. & N. MFG. CO.

Editor Hardware: Please accept our congratulations on the arrival of Hardware's fifth natal anniversary, with our hearty wishes for "many happy returns of the day."

As constant readers of and advertisers in that most excellent journal, we appreciate fully its value, both as a news gatherer and an eminently satisfactory advertising medium.

Long may Hardware flourish, and continue in the future, as it has done in the past, to maintain its position in the vanguard of Progress and Hustle.

"*Palmam ferat qui se meruit.*"

Yours sincerely,

The F. & N. Mfg. Co.

Richmond, Ind., March 30, 1895.

GIBBS MFG. CO.

Hardware: We extend congratulations upon your fifth birthday, and can assure you we have been well taken care of at your hands.

We liked Hardware from the start, and have no reason to think otherwise now. Very truly,

Gibbs Mfg. Co.

Canton, O., March 29, 1895.

THE NEW JERSEY WIRE CLOTH CO.

Editor Hardware: We congratulate you on the termination of the fifth year of your publication. It is one which we read with great interest, and which seems to us to increase in value with each issue. Yours truly,

The New Jersey Wire Cloth Co.

Trenton, N. J., March 29, 1895.

ATLAS MANUFACTURING CO.

Editor Hardware: It has been a source of great pleasure to us to notice the steady growth of Hardware. The paper is always a welcome visitor at our office, and we should hardly know how to get along without it.

Yours truly,

Atlas Mf'g Co.

New Haven, Conn., March 29, 1895. H. L. Bradley, Secretary.

EDWARD SMITH & CO.

Editor Hardware: We beg to extend to you our hearty congratulations upon the birthday anniversary you are so soon to celebrate.

We wish you nothing better, than that you continue in the good work you have already begun, and feel confident that you have still before you a most prosperous and honorable future. We have been much interested in your publication, and feel that there is nothing better in existence in your line. May we again extend to you our heartiest good wishes. Yours truly,

Edward Smith & Co.

New York, March 29, 1895. By S. V. V. Huntington, Mgr.

BUTTERFIELD & CO.

Hardware: In renewing our advertisement in Hardware, allow us to congratulate you on your success in securing the confidence of the business interests of this country in so marked a degree, in the short time of the existence of Hardware. Respectfully yours,

Derby Line, Vt., March 1, 1895. Butterfield & Co.

[*Other letters will be found upon a later page.*]

"IN THE GOOD OLD DAYS."

Sitting to-night enjoying the mellow warmth of a genial grate fire while the howling storm is beating against my windows, how it sends one's memory down the cobwebbed aisles of old Time's decaying mansion, finding in each one of its hidden recesses some one of the faces of those who twenty-five to thirty years ago made life attractive to the struggling merchant.

Those were the days when, like ancient Pistol, I felt as though I could safely say:

"Why then the world's mine oyster
Which I with sword will open."

How the lineaments of those who "linger lovingly in the sunny realms of memory" pass before me—those who assisted me in rolling up the prosperous days of my early "bosshood," when it were possible to figure up on each succeeding stock-taking the essential sum of money making which exhaled the aroma of an annual surplus, a balance on the right side of the proverbial ledger, which just now is more apt to be sporadic than prevalent.

One of the most welcome of the many friends among the manufacturers was that fine-looking specimen of robust manhood, George T. Lane, then of Lane, Gale & Co., Troy. No more congenial or practically unselfish gentleman ever graced the easy chair beside my desk with his genial presence. He was a perfect diplomat of a salesman, thoroughly conversant with all the details of his extensive business and full of resources against captious criticism; and very pleasant withal were the *tete a tete* dinners at "the Gilsey," which occasionally aided him to "blow in" the "2½ per cent. extra discount" which was frequently demanded but seldom conceded.

May life always show her sunny side to George T. Lane!

The elder Mr. Stephens, who at that time did most of the traveling for Stephens & Co., the rule manufacturers, was a quaint, good natured old soul, who rarely missed getting an order for three or four hundred dozens of rules, which was considered a very fair order to take when the discount was about "forty and ten" instead of the "eighty" and several tens which is the temptation to buy to-day. The old gentleman was quite an amateur phrenologist aud when we wanted to get a drive on any of the boys we would get "Pop Stephens" to examine his cranium, giving him a solid wink from the other eye as a starter, and he would make the victim's characteristics so interesting he never forgot them.

Another welcome face and thorough good salesman was R. A. Neal, of Peck, Stow & Co. (or was it Peck, Smith Mfg. Co. at that time, say 1865 to 1870?). He was a good, smooth, persuasive talker, an excellent judge of human nature and a man who made a study very quietly of the idiosyncrasies of others. He would go all over the house, upstairs and down, looking after his own stock, making notes of the stock of wrenches, steel traps, barrel bolts, coffee mills, spoons and steelyards which we had on hand and jotting down in his book an order in embryo, which later he would say, "You might as well have these sent down after the 1st, as you are so nearly out," and adding "bye the bye, they want a few files down to the factory. Suppose you enter up this order and send by boat," and he would read off an order for fifty or sixty dozen files for factory use, together with a gross of counter brushes No. 4 needed in the foundry. This reciprocal method of taking an order was always acceptable, and everything of that kind "goes." Then "settlements" were accommodating as well in those old days, "semi annual" to say the least. We always made a fair jobbing profit on all of "Peck, Stow's" goods.

Tom Gaynor was another one with whom I used to like to have dealings. At the time I am trying to recall he was agent for "The Stanley Rule & Level Co.," "Ten Eyck Axe Mfg. Co." and a number of other concerns. He was a graduate from Ellis Brothers, an old time jobbing house in the "fifties," and although originally "Tom" was rather a "rough diamond," he built up a very large and lucrative business for his respective agencies, for he was a rattling good salesman and was not troubled with too much conscientiousness about his competitors.

My old friend, Joe Van Cleft (of Newburgh), was also a graduate from Ellis Brothers, and Joseph has thrived very well on the lessons of frugality he learned while in their employ.

Thomas Douglass, of the Douglass Mfg. Co., well known to the buyers of those days, was another manufacturer whose methods of doing business seemed to be productive of a satisfactory profit. He was an eccentric character, but I always found him "as straight as a string" and we could invariably make money on his goods. He would do almost anything for a customer who would swear by his wares and endeavor to establish a reputation for them, which, I must say, early in their history they didn't always possess; but they gradually improved and when they sold later under the auspices of the Russell & Erwin Mfg. Co. they acquired a well deserved popularity which still holds the market under the name of his successor.

"Tommy" Rowland and his brother Linforth (Thos. B. Rowland & Sons) would occasionally run over from the Quaker City and talk shovels. Rowland's scoops always had a reputation equal to Ames' shovels and their lines of shovels and spades could be bought so as to sell at a profit, especially when sold under our own private stamps. They made many mining shovels for Lake Superior trade from patterns original with us and which gave us a very good hold on the trade of the "Upper Peninsula."

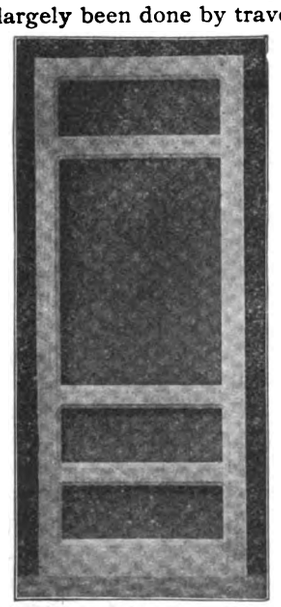
Some of our old "stamp mill" shovels were thrown in the auction room a year ago and must have been carried in the warehouse for a long time before they were sold for a very nominal price. Some buyers speculated with a lot of them, wondering, I guess, what that flat shovel was ever made for.

Those were the early days of the manufacturers of American hand saws, the prevailing brand in all New York stocks being Spear & Jackson's, then "as familiar in their mouths as household words," now only a memory. They were ordered by the New York jobbers through Orgill Brothers, corner Platt and William Streets, who had a regular "cinch," as the boys would say, selling this popular saw. But Henry Disston gradually worked in a few of his various grades, although it was uphill work until the war tariff with specific in addition to ad valorem rates favored the production. Then Richardson Brothers added their efforts and gave cheaper grades of saws in more reliable stock, much neater and better styles than the cheap imported "plugs," some of which were as stiff and unyielding as a spade, and eventually the really more modern and improved American styles crowded the foreign goods out of the market, the present race of carpenters knowing nothing of their merits or demerits.

Among those from whom we purchased our foreign Hardware, how the genial personality of John G. Witte looms up. He was a salesman par excellence; he made a study of the buyer, watched for him, kept after him, and once you accepted his invitation to "call at his office" and inspect his line of samples you were "a goner." On the morning of the day appointed you would receive a printed

Digitized by Google

card in your mail, showing you that with "John G. Witte you have an engagement for 2 o'clock." On reaching his office he was already awaiting your arrival with his assistants near at hand to show all his line of samples, which were one after the other passed up for inspection. During the investigation of their salable merits a glass of kimmel would be filled and quaffed, a 25 cent cigar would be extended to you and lighted and a very congenial, pleasant, enjoyable afternoon would be passed with no feeling of weariness resulting from the time so spent. His place was a museum of curios of all kinds and he was constantly on the alert for something new. So that no matter how many times you may have enjoyed his commercial hospitality there was always something new to make your visit one long to be remembered.



But enough for the present, for

"Lulled in the countless chambers of the brain
Our thoughts are linked by many a hidden chain.
Awake but one, and lo! what myriads rise!
Each stamps its image as the other flies."

Fine Screens for Good Houses.

In addition to stock sizes of Screen Doors and Window Screens, such as are now carried by nearly all Hardware stores, many of the more progressive establishments have, within a year or so, taken up furnishing good residences with fine screens made up to fit. Heretofore this work has largely been done by traveling representatives of concerns that make up screens exclusively for fine residences at extravagant prices.

Like bicycles and other specialties this line promises to "help out" in these hard times. It is especially attractive, as it yields good profits, there is no investment, and no risk of "dead stock."

The A. J. Phillips Co., Fenton, Mich., so well known to dealers in screens, are agitating this scheme. The plan is as follows: If a responsible dealer agrees to "push things" he receives a neat model of the removable sliding window screen, cuttings of finished woods and wire cloth, circulars, order blanks, catalogues, etc. When a dealer figures on a bill of Hardware for a new house, he figures on screens also. The orders are then sent into the factory, made up as quickly as possible, and the dealer puts up the work. The dealer is on the spot, acquainted with the customer, has reasonable prices, the finest of goods, and in every way has the advantage of the foreign traveler who solicits orders for such work from well-to-do people.

The A. J. Phillips Co. have a finely equipped department for doing this work promptly and well. A neat illustrated catalogue is sent to applicants from the trade.

Hardwaremen evidently flourished centuries ago as they do now. In a buried city that is being excavated at Santiago, Amattan, Central America, a large quantity of knives, swords, scissors and hammers were found at a depth of eighteen feet.

An Old Landmark.

The old corner of Greenwich and Dey Streets, which up to 1873, for nearly forty years, had been a Hardware land mark, was the crowning point of destruction in the extension of College Place, or "West Broadway," as it should undoubtedly be called.

I append an illustration of it as it last appeared as a Hardware store.

The writer of this column spent eighteen happy years of his commercial existence within its walls, and they were years that were considerably full of the usual vicissitudes of mercantile life. I can remember, in my early days, deciphering the names of many of my predecessors on the beams of the top loft where they were hidden in obscurity, and wondering if any of them would ever become famous; Frank Farwell, now of St. Paul (Farwell, Ozmun & Kirk), I remember was one of them; there were many others who made quite a mark in the Hardware world whose individualities I will dwell upon some day.

Who in that old time establishment received their first instruction on which to build their future moral edifice?

It was established as a Hardware store as early as 1836, by Hubert Van Wagenin, a descendent of one of the oldest of "Old New York" families and whose ancestors' names can be found among the ancient annals in "Valentine's Corporation Manual." John C. Tucker, who became a

clerk for him later, was eventually taken into partnership, and after the death of Mr. Van Wagenin succeeded to the business, finally becoming John C. Tucker & Co. by the admission of Thos. S. Smith (a nephew of Sidney Shepard of Buffalo), and Charles L. Curtis, who was the Tuckers' bookkeeper, and this was the firm with whom the writer in January, 1856, agreed to accept $125 as yearly salary, for a thorough devotion to the firm's interest.

The beginning of the Civil War in 1861 scared Mr. Tucker into disposing of their old business to his junior partners and retiring; he was president at the time of the "Minnesota Mining Co.," a company then engaged in copper mining and very successful, their $25 shares having sold as high as $156 each.

It is almost needless to add that the successors to the business during the next five years made larger profits than Mr. Tucker had enjoyed in the previous fifteen years put together. But he only stayed out of business a short time embarking again in a business with which he was entirely unfamiliar, but selling out in a year or two to join Mr. Saml. W. Sears of the old firm of Sears, Adriance & Platt, and forming the firm of Tucker, Sears & Co., but his connection with this firm lasting only a year or two, he failed to add very much to his invested capital.

Many a good story could be told of the honest eccentricities of this good old man, and one of these days I will manufacture history by retailing a few of them. H. H.

RECENT TRADE PUBLICATIONS.

The John P. Lovell Arms Co., Boston, Mass., are presenting the claims of the Lovell Diamond Cycles for 1895, in a handsome and artistic catalogue which has just reached this desk. The artist and printer have united, and in colors and gold combined, have reached a result that is artistic in the highest degree. Upon the front cover sparkles a Diamond, in which the date "1895" and a beautiful young lady rider, can be easily discovered. Full illustrations and description of their Diamond Cycles are given. Upon an inside cover is found a portrait of the veteran founder of this great house. In a note of introduction the company present their claims for the present year in the following words: "The time has come which we have been predicting for some years: The era of lower prices for high grade wheels. The time when the people are to get fuller value for their money. Lovell Diamond Bicycles were the first really high grade wheels that were sold at a reasonable price. For years their sale has increased by such leaps and bounds, and they have proved such a thorn in the side of the 'high price" manufacturers, that finally the high price people have had to come down to Lovell prices. . . . This year Lovell Diamonds will have a larger sale than ever. The policy of their makers has been vindicated. They are high grade wheels of superior construction. They will be sold this year lower than before. Lovell Diamonds will be much improved this year, over last. Some of the principal improvements will be:—A higher barrel crank shaft; narrower tread; improved ball bearings; stronger and lighter spokes; interchangeable pedals; improved wheel base; new style handle bars, and a larger sized steel tubing for the frame. Lovell Diamonds have always proved themselves specially good wheels. They have always been exceedingly strong and durable. They are manufactured with the greatest care, and under the direction of the highest grade of mechanical talent. The factory is one of the largest and most perfect in the world. Lovell Diamonds have always 'stood up' well in actual use. Last year was no exception, and their reputation has been well maintained on the road and on the track. This year they will do better than ever. They are very light weight; and yet great strength and perfectness of manufacture will make them for 1895, as they have been in former years, one of the principal favorites, if not the favorite, of the season."

Julius Andrae & Sons Co., Milwaukee, Wis., have just issued two attractive catalogues, one showing their "Andrae" Wheels, and the other illustrating and describing their line of Bicycle Sundries. Each is complete in its way, and supplies a great deal of information of interest to the trade. In their list of sundries may be found everything known as necessary to bicycle riders. Their catalogue of the "Andrae" is a handsome piece of work. It shows their "Light Roadster," "Lady Andrae," "Andrae Path Pacer," etc. The illustrations are accompanied by full descriptions. In a note of introduction the company say: "When the ancients said that a work well begun was half done, they laid the corner-stone of a doctrine which has lived and will live through all ages. It meant that in any undertaking in life we ought to use our best efforts and the utmost pains to make a good beginning. This has a more direct application to cycle construction than to any other occupation, amusement or serious business of life. The Julius Andrae & Sons Co., ever since their departure in the building of bicycles, have steadily sought to uphold the efficacious and most practical principle of the ancients and with science and skill have triumphed in bicycle construction. The result of their efforts is shown in the Andrae Cycle, a wheel possessing the combined features of beauty, lightness, strength and speed. Cycle building, at the present time, requires the best brains, the best thought and the most skilled workmanship possible. Prompted by the spirit of the times when the bicycle age was practically in its infancy, the Julius Andrae & Sons Co. began in a small way to carry out their plans to manufacture a high grade machine, and with ample capital and a careful application of new ideas they have scored advantages over many older and larger concerns."

Between dainty white covers, embellished in chocolate and gold, the Premier Cycle Mfg. Co., New York, announce in detail their 1895 line of Helical Premier wheels. The first page is given to an interesting description of their patented Helical Tubing, and on the second and third pages is printed the report of the Ordnance Department of the United States Government, showing the remarkable results obtained with Helical Tubing. Pages four and five contain a short account of the history of the Premier wheels and the special features embodied in their 1895 patterns. Following these pages are full descriptions of the Helical Premier Roadster, Ladies' Helical Premier and Helical Premier Racer with handsome wood cuts. A section of Helical Tube with one end of the steel ribbon unwound, is also shown, half-tone illustrations of the Johnson Adjustable Handle Bar, including a "ghost," or double exposure with bar in two positions, and other sundries occupy pages twelve and thirteen, while page fourteen is given over to some very wholesome advice to riders on the care of their machines. Page fifteen contains a photographic reproduction of the tubes used in the Government tests above referred to, and the balance of the catalogue is made up of short and pithy testimonials showing the popularity of Helical Premiers in different parts of the country. A copy of this catalogue will be mailed upon request accompanied by a two-cent stamp, and readers will find it well worth sending for, no matter whether they contemplate purchasing or not.

The McIntosh-Huntington Co., Cleveland, Ohio, have issued their bicycle catalogue for 1895, and it is a neat and attractive presentation of an attractive line of wheels. There are the "Sunol," "American K. O. S.," "American Q. O. S.," "Hercules," and "Stella." With some of these, the Hardware trade is already quite familiar. All are thoroughly illustrated and described in a manner that shows them to the reader just as they are. Full specifications are given. A great many sundries carried by this house are also shown. In a note to their friends in the trade, the company say: "We wish to take advantage of this opportunity to extend our sincere thanks for the recognition and liberal demand accorded our bicycles during the past season. The modern bicycle represents the height of American ingenuity and skill, and is now recognized by the masses as a necessity, being used largely as a means of rapid transit in their every-day vocation. It has advanced with rapid strides, until its usefulness and benefits impress the ladies as well as the men, who recognize in it a means of pleasing and healthful exercise. We invite a careful perusal of the following pages, which will give you a good idea of our wheels for '95, and should be pleased to correspond with you should you desire further information."

A. Tredway & Sons Hardware Co., Dubuque, Iowa, have issued under date of March 15, 1895, a handsomely bound catalogue of iron, steel, wood-stock, heavy Hardware, etc., handled by them, among which are blacksmiths', horseshoers', wagon-makers' and wood-workers' tools and sup-

Digitized by Google

plies, carriage and wagon Hardware, malleable castings, wagon and carriage wood-work, plough material, etc. The book contains 224 pages, and is bound in heavy stiff boards, red in color, with black lettering, and is a very artistic piece of printers' work. Illustrations and descriptions are found upon every page, and it is of course impossible to attempt an enumeration of the goods contained therein, as some eight or ten pages of the catalogue are required for the index alone. An attractive feature of the work is a portrait of Alfred Tredway, the head of the house. In a note of introduction the company say that the prices given in the catalogue are so far as is possible the manufacturers' standard lists, and are subject to more or less discount. They further explain that the catalogue is more of a help to their trade in knowing what goods they can furnish and as a guide in making up orders, rather than an indication of prices. They further say, "to the merchant trade we desire to say that our large combined stock of the class of goods shown in this catalogue and of shelf Hardware and tinware, enables us to fill the many orders which arise, including articles of both classes at an advantage over any house in the West, thus saving them the unnecessary expense of having shipments from two or three jobbers instead of one."

The Withington & Cooley Mfg. Co., Jackson, Mich., are sending out a leaflet headed "Special Lawn Tools." As they well say, spring is coming, and it is time to "prepare to groom the lawn." The articles which are shown upon this leaflet are indeed timely. There is a rake of a simple, tried, improved style, warranted to be durable, with handles of white-ash and six feet long. Other articles are their thistle or weed cutters, dandelion spud, and a floral set which, beside the dandelion spud, consists of a hoe, spade and rake. They explain that these tools are not toys, but are serviceable, of good material, well made and finely finished. The hoe and spade have steel blades, brightly polished. The rake is of malleable iron and of the latest pattern and finish. They will be pleased to send prices, etc. upon application.

The Withington & Cooley Mfg. Co., Jackson, Mich., have issued a handsome catalogue covering their entire line of Farm and Garden Tools. It is bound in black, green and silver, and handsomely illustrated throughout. Everything needed or that can be named under these headings may be found therein. The company say: "The maintenance of our standards of quality and finish of steel goods is a recognized element of our success as manufacturers of these lines. It is our aim to improve the grades of our goods where possible, and we exercise a constant vigilance over material, workmanship and design, that there may be no letting down in the quality of our products."

Vom Cleff & Co., No. 105 Duane Street, New York, have issued an attractive catalogue containing 106 pages, in which are thoroughly illustrated the French and German Hardware and cutlery of which they are importers and manufacturers. The work is bound in strong cloth covers. It is, of course, impossible to begin to give any enumeration of the many articles contained in this large work, the index of which alone fills several pages. Prices are given, and each article represented is well illustrated. The catalogue will be sent upon application.

The A. J. Phillips Co., Fenton, Mich., have just published a handsome catalogue showing their fly screens as applied to some of the finest private and public buildings in the country. A number of pages in fine half-tone are given up to illustrations of houses in Baltimore, St. Louis, Northampton, Mass., Detroit, Chicago and other places, showing the buildings to be thoroughly provided with goods of their manufacture. Their offer to Hardwaremen is found elsewhere in this issue.

Underhill, Clinch & Co., No. 94 Chambers Street, New York, are sending their friends a handsome little leaflet, which illustrates a number of augers manufactured by the Snell Mfg. Co., for which they are New York agents, with a list of other goods in that line. They announce that they intend to carry a stock in keeping with the wants of the trade, and that their prices will be such as the market creates.

Wallace & Sons, Ansonia, Conn., with warehouses at Nos. 29 Chambers Street and 5 Reade Street, New York, are sending their friends the handsome catalogue, an extended description of which was given in a recent issue of Hardware. It carries out in every sense the fine promise set forth in that advance notice, and is a credit not only to the house from which it emanates, but also to the Hardware trade.

The Rhode Island Perkins Horse Shoe Co., Providence, R. I., are sending out a price list of the Perkins Shoe, accompanied by several other matters of interest, among which are tables showing the relative cost of their special patterns of shoes compared with their regular standard patterns, figures concerning which were given in a recent issue of Hardware.

G. A. Supplee & Co., Nos. 265–267 North Ninth Street, Philadelphia, have issued a wholesale price list of bicycle accessories and tools handled by them. A glance through the catalogue shows about everything in the bicycle line anyone could desire, including bells, wrenches, stands, enamel, lubricants, air-pumps, repair kits, cyclometers, etc.

The Saml. C. Tatum Co., Cincinnati, Ohio, are sending out a convenient little pocket edition of a catalogue illustrating and describing their tools for the carpenter, cabinet-maker, carriage and wagon-maker, electrical man, etc. The articles embraced in this heading are illustrated and described.

The Bloomfield Machine Works, Bloomfield, N. J., have issued a leaflet illustrating their pumps, upon which they make announcement that they are now sole manufacturers of the Wolf Double-Acting Force Pump, and control all patented improvements upon the same.

The American Tube Works, Boston, are sending their friends a small but attractive catalogue of their seamless drawn brass pipe for plumbers. Prices, etc., are given, accompanied by a great many recommendations of the character and quality of their goods.

The Anthony Wayne Mfg. Co., Fort Wayne, Ind., have issued an attractive leaflet describing their Washing Machines, Ironing Boards, Clothes Wringers, etc. Prices are given. It will be found of great service to dealers who are at all interested in these lines.

The Illinois Safety Heating Co., St. Charles, Ill., have issued a comprehensive catalogue of the goods manufactured by them.

A practical method of preventing the gathering of steam upon store windows, when the stoves which are there on exhibition and lighted for the purpose of showing their qualities, become too hot, is followed successfully in London. The windows when clean are rubbed with glycerine, which is applied with a cotton cloth, while the glass is rather warm and entirely dry. This is followed by polishing the glass with a piece of canton flannel, until it shines, and the glycerine no longer appears.

The Egan Co., Cincinnati, Ohio, write as follows: "Hardware is a good paper, and we can recommend it to those that are interested in Hardware, for we believe it to be one of the very best and one of the strongest papers of its class ever issued."

PORTER TO PARTNERSHIP--No. X.

I care not how good a clerk a man may be, no matter what interest he may take in his employer's success, or whatever energy he gives to his work, he will find when he is in business for himself that he does more work and does better work than ever he did before. I candidly think I was a good clerk; I know I tried to do all I could for Mr. Ely, but the moment I began to buy and sell for myself I saw a thousand ways of increasing trade and profits that had never occurred to me before.

To sit down and wait for business did not suit me. A new railroad was working towards us, and new clearings made around us almost every day. I was on the alert to see each new family as soon as they arrived. If I had ever been tempted to put on airs as a clerk, there was no temptation to do anything of the kind now. The new settlers who came from the East were sturdy men, who appreciated a handshake and a hearty welcome, and no one except an idiot could but respect them for the fight they were making with fortune. Some of these men's wives were delicate women, with faces telling of education and refinement, and one instinctively took off his hat to them, though they were in calico gowns, as quickly as to the city ladies in silk.

Life teaches very little to him or her if it does not teach them that manhood and womanhood do not depend upon broadcloth or silks. No merchant who reads this but can find in his list of customers men whom he honors and respects most among the poorest of his acquaintances. There are some of us who run through life with our bow for fine clothes and a kick for all in homespun. But this only shows that the fool-killer is not attending to his work.

Having so many German customers, it was a constant aggravation to me that I could not understand their orders nor make myself understood. I could say "we gehts" with them all, and smile as broadly as they could smile, but when they struck out into a sentence I had to shake my head and call for Fisher. And I was not long in learning what a shrewd fellow Fisher was. Hearing his broken English had led me to imagine that his ideas were about on a similar level with his language, but a few weeks' companionship with him led me to see that his brain was all right, though his English might be poor.

The first incident that told me what he was made of was in a codfish dicker. We received a lot that were a little spoiled. My plan would have been to work them off as best I could, but Fisher came to me saying:

"Marks, what's de matther mit dose godfish?"

"They're a little strong."

"Shtrong! dey shtinks."

"Yes."

"You send dem pack."

"I don't believe we can; I got them a cent a pound under price because they were not first-rate."

"Den you must sold dem to dose Yankees; de Yarmans will not puy dem."

"Why, they are not so very bad."

"Pad! My Got, dey shtinks! Und I gan't sell dose."

"If you can't sell them I'll send them back."

"Dat ish right; send 'em back; I tells de Yarmans dis ish goot, und it will pe goot all de time."

A somewhat similar incident happened with some herring, and I saw that Fisher's idea of business was to sell everything on his word, and that his word must be good; I did not respect him any the less.

But the German language bothered me. I tried to remember what the people called each article, but I found I was not learning very fast in this school; I determined to go to work in earnest to learn the language. I dropped a line to a bookseller in the city, asking him about books on the German language, and as the result of my writing to him I bought a little German and English book; on one side of the page was an English word, on the opposite side the same word in German. I began at once, learning a page at a time, and going back constantly to review, at the same time practising my new words on the people during the day.

It was dry and dull enough at first, but gradually I began to catch a meaning when I heard two people conversing in German, and in two months I was able to talk a little and understand a great deal. In this way I taught myself a new language until I was able to handle German trade as readily as if I had been born on the Rhine.

All this time I was working early and late. I kept the books, did the buying for our store, sold the produce in the city, and managed the store. At the other store Mr. Ely was doing well, and we looked forward to our inventories with great anticipations.

And yet the somewhat strange part in all this was that though I was making money faster than ever before in my life, I was spending less than when I was working as a clerk. I don't know whether it was because I was so busy, or because I did not need anything, but the fact was I was hardly spending a dollar over and above the support of my mother. I determined early in December to go off for a week with my mother, and we had a pleasant visit at her sister's, but my visit was brought to a sudden end. A message came to me from Fisher:

"Mark, come home at once; Mr. Ely is dead."

I saw all my hopes dashed at once; there would be an end to the firm; his capital would be withdrawn, and my career as a merchant would come to an end. My prospects had never looked so bright as they did, just now when they were blighted forever. We started for home without a moment's delay, and during that dreary ride my brain seemed to be repeating one refrain: "It was too good to last."

A manufacturer in Europe did not find satisfaction in any of the usual methods for the lighting of his cloth mills. He tried gas jets, arc-lights and incandescent lamps, all of which failed to satisfy him, because they either did not give light enough or too much light, or cast shadows. He finally painted the walls of his room white, and beneath a certain number of arc-lights suspended reflectors. This drew the light up to the white ceiling, from which it was reflected to the room below, and this method of lighting is reported to have been a success.

A parcel carrier for the pocket is being used in England. It is a little article that can be carried in the pocket when not in use, and is always at hand when wanted. It is nickel-plated, contains lengths of nickel-plated steel chain twenty-four inches long, and will allow a weight of twenty pounds. It can be used for books, parcels, umbrellas, etc., and is said to be specially patronized by shoppers and school children.

Aluminum has been introduced into the Austrian army, the band of the Third Regiment of Infantry having used it in the manufacture of drums. It it said that the drums are not only neater in appearance than those of brass, but are much lighter and more melodious. It is reported that the entire Austrian army will soon be pounding upon aluminum drums.

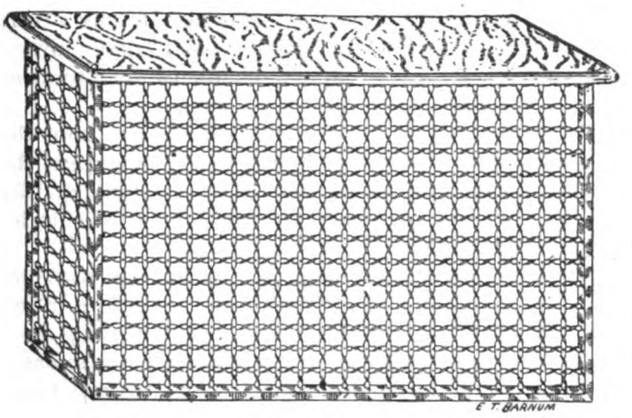
NEW GOODS IN THE MARKET.

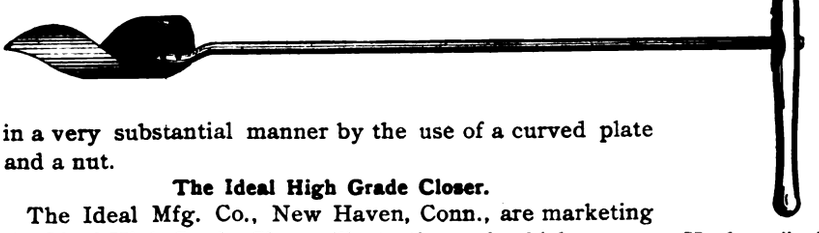
If you have anything NEW, let the world know it by illustrating it in these columns.



NO CHARGE WHATEVER is made, direct or indirect, as our interest lies in showing the readers of "HARDWARE" where the LIVE manufacturers and wholesalers are, and what they are doing.

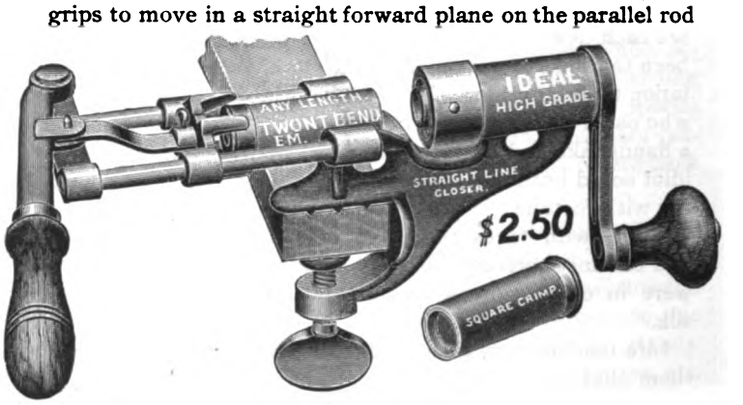
When your NOVELTY or SPECIALTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

The Hardwaremen everywhere read this department; it is to your interest to make prompt use of it.



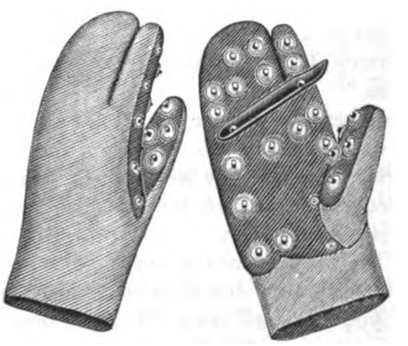
Barnum's Radiator Screens.

E. T. Barnum, Detroit, Mich., has brought out a light and ornamental Radiator Screen to cover the pipes in drawing rooms and apartments. The demand for such an article has been large since the great increase in the use of steam and hot water for heating purposes. These screens are made of twisted, quarter-twisted, or crimped brass, polished steel, bronze, or copper, and any size mesh, finish, and material desired.



New Post Auger.

The Crescent Machine Co., Letonia, Ohio, are placing upon the market a new and novel Post Auger, illustration of which is here shown. This Auger is designed to bore a four-inch hole in advance of driving the posts with a maul. The manufacturers claim that it will make a hole deep enough for a post in from one to one and a half minutes in clean soil, and that it will work in any soil except where it is too stony. After the hole is made it requires but very little exertion to drive the post in, thus greatly reducing the hard labor of setting the post. Furthermore, the post need not be sharpened at all carefully, and yet drive easy and straight, and set firm. It is operated the same as a common auger by turning the handle, and when the blade is filled with earth it is withdrawn, the ground core removed and the operation repeated until the desired depth is reached. The blade is made of cast steel, well sharpened and securely riveted to stem. The handle is secured in a very substantial manner by the use of a curved plate and a nut.

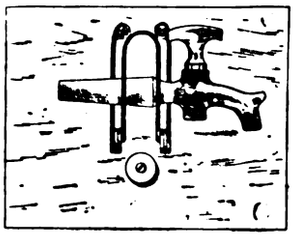


The Ideal High Grade Closer.

The Ideal Mfg. Co., New Haven, Conn., are marketing the Ideal High Grade Closer, illustrations of which appear here. The makers state that "the frames are all made of semi-steel, and are warranted not to break. The Closer heads are all made of steel case hardened, and the crimping pins are of the best crucible steel, hardened as hard as fire and water can make them. The whole implement is made in the best manner, and each one is guaranteed. The defects in the pivoted lever with a grip attached for pushing in and holding the shell have long been acknowledged; they will bend the shells if great care is not exercised, and they are limited to certain lengths of shells. There have been attempts at making a simple and perfect working straight line closer, but none has thus far supplanted the pivoted lever and grip, on account of its simplicity and the handiness of the lever. We believe we have overcome all previous objections. Our arrangement is simplicity itself; the movement is positively in a straight line and we have preserved the action of the pivoted lever by the simple addition of the link attached to and causing the grips to move in a straight forward plane on the parallel rod bearings. The head grips are so arranged that the shells cannot slip and they positively cannot twist up out of alignment and spoil the shells; there can be no bending of shells against the guide, as it is located a trifle below the body of the shell, which, while being crimped, has bearing only in the grips and the point of contact where work is being done. With the 'High Grade' closer you are not limited to any one length of shell, but you can crimp the shortest and longest equally as well. With this closer you can crimp more than one-third faster than with any other hand bench closer. In all other closers the operation of putting in and taking out the cartridge consumes as much time as it takes to do the work. The illustration shows implement fastened on to a strip of wood which should project beyond the table or bench, thus bringing the whole implement forward of the bench, leaving all open underneath for the cartridge to drop into a receptacle."

Blair's Husking Mittens.

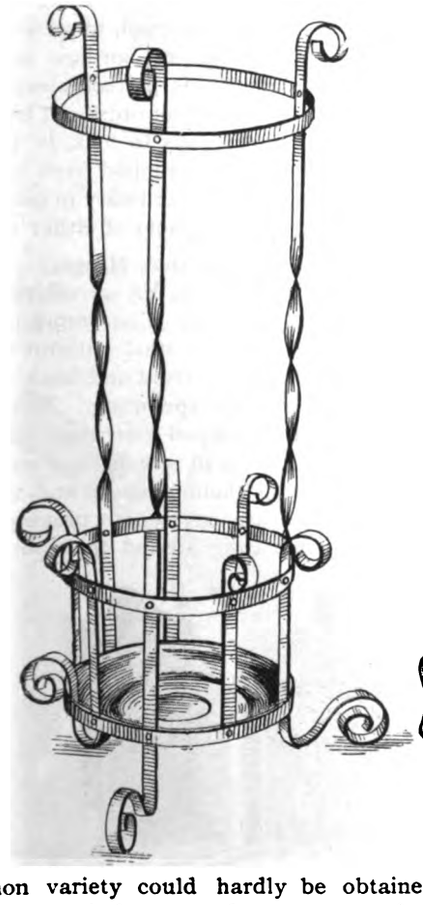
The Blair Husking Glove Co., Bucyrus, Ohio, have introduced an improved Husking Glove called the "Husker of Huskers." The manufacturers claim that this glove is the best wearer for the price on the market. It is made of duck, the wearing parts, joints and seams being covered with leather, and protected with steel disks. It is further stated that these gloves are comfortable to the hands, and being extra long, protect the wrists. No. 025, drab or brown colored leather palms, $4.50 per dozen; No. 050, brown duck covered with brown leather, $4.50 per dozen;



Digitized by Google

No. 125, calfskin, $6 per dozen. Various points about these gloves may learned by reference to their half-page statement elsewhere in this issue.

Massey & Thompson's Sample Holder.



Massey & Thompson, Monroe City, Mo., are putting on the market their new Sample Holder which is shown in the accompanying illustration. The manufacturers state that "the advantages of this patent Holder are readily seen by any Hardwareman, as the sample displayed is easily taken

off and a new one put in its place, thus keeping the goods bright and new. The Holder keeps the sample from marring the front of the box. They are simple and inexpensive, and every Hardware store using shelf boxes or drawers should be supplied with them. They are made in three sizes, packed one hundred in a box with screws. Send five cents in stamps for a sample."

Wrought Iron Umbrella Stand.

The Wrought Iron Novelty Co., Philadelphia, Pa., are offering the trade a very attractive wrought iron Umbrella Stand with brass pan. It is 26½ inches high and 8½ inches in diameter and sells at $9 per dozen, which the makers claim "enables dealers to offer a high class and artistic stand handsomely finished at a price that even the most

common variety could hardly be obtained for. These stands are entirely new and are very popular with buyers."

The XLCR Wire Fence Governor.

The illustrations appearing here represent a wire fence governor marketed by the XLCR Wire Fence Governor Co., Muncie, Ind. It is described as "simple in construction, being composed of one piece of metal as in Fig. 1, with a square head as shown in Fig. 2. To apply the governor: construct the fence in the usual manner, using an ordinary post well braced for the end, it being unnecessary to bore holes in same. To tighten the wire, place the slot in the governor, over the wire as far as it will go; fit the wrench to the square head, revolve the governor, drawing up the wire on the spool to the desired tension, then slip the projection on the arm over the wire, and you are ready to go ahead and tighten up another wire. When it is desired to release the tension, simply give the governor a half turn or more in the opposite direction." It is stated that the gov-

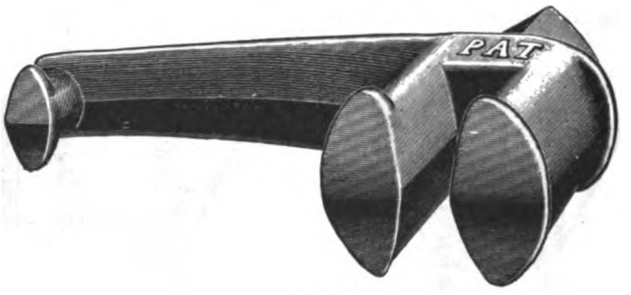


FIG. 1.

ernor "is applied to the wire itself, thus doing away with a square end post and the boring of a hole for each wire in same, which is the case with the end governor. Furthermore, as it can be applied to the centre of a line of fencing, and as it winds from both sides, it will be readily seen that it does not require the 'pull' nor the number of revolutions, necessary with the end governor. It can be used on old wire fences, where the wires have become loose or sagged, by simply placing a governor where it is desired to

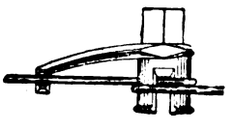

FIG. 2.

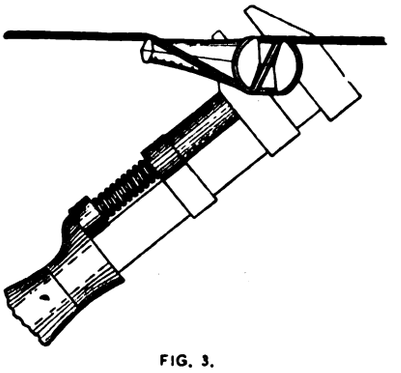

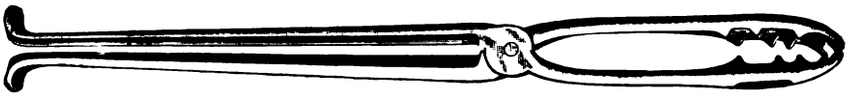

FIG. 3.

take up the slack. It will be found invaluable for this purpose alone, saving the labor and time required to reconstruct old fencing, besides the saving of crops by preventing small stock from getting through at them. It can be used on any kind of wire, anything that the slot will admit. Also, on anything not a fence, where a tension may be required, such as wire clothes lines, guy wire, etc."

Improved Pig Forcep.

The Decker Mfg. Co., Keokuk, Iowa, are placing on the market an Improved Pig Forcep, illustration of which is shown here. The company claim that this forcep "is the

best instrument of the kind that is made, for the reason that scientific principles are carried into its construction. The handles not crossing like those of shears, there is no danger of pinching or bruising."

The Matchless Coffee Pot.

The Hill & Whitney Mfg. Co., Boston, Mass., are offering the trade the Matchless Coffee Pot. This coffee pot has a movable filtering receptacle which admits of first steeping the coffee and then filtering it. The manufacturers explain that "by at first placing the filter at the bottom instead of suspending it from the top of the pot, the following advantages accrue. The grounds and water are quickly and perfectly combined and remain together, steeping as long

Digitized by Google

as is desirable. Slow pouring of the water upon the grounds is obviated and the full strength of the coffee is acquired in the shortest possible time. When sufficiently steeped by raising and suspending the filtering receptacle at the top of the pot the infusion is quickly separated from the grounds and made ready for use. By using a filter practically of as large an area of the pot a close texture of cloth can be used, permitting the use of fine ground coffee, resulting in economy of time and material and the production of a clear extract, free from all grounds or sediment.

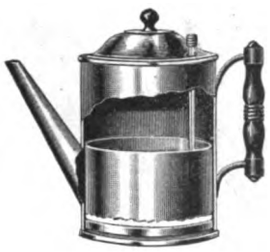

FIG. 1.

FIG. 2.

By daily renewals of the filter, at a cost of one-fifth to one-eighth cents each cloth, a uniform and excellent beverage can always be obtained, free from all disagreeable taint, a result impossible of attainment by any other means, as most persons are aware who have used bags, or textile filters of any kind." Fig. 1 of illustration shows the filter in position. Fig. 2 shows the filter raised. Price, two-quart pot, $1.25; three-quart, $1.50.

The Magic Dish Drainer.

The Leach Roaster & Baker Co., Paxton, Ill., are manufacturing a novel and handy kitchen utensil, the Magic

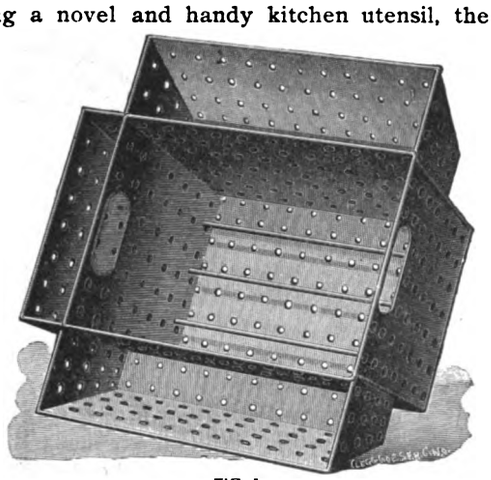

FIG. 1.

Dish Drainer. This device is constructed of perforated sheet metal and is intended to be placed in the sink. The

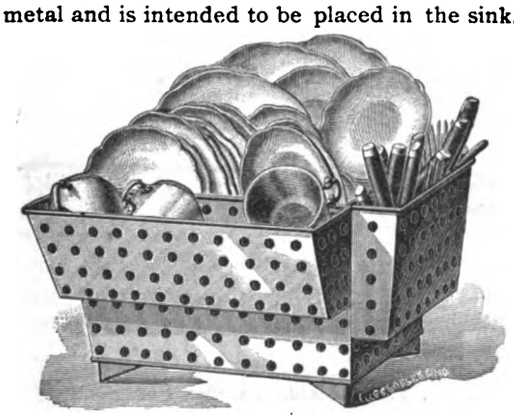

FIG. 2.

dishes are placed in the drainer after having first been washed, and hot water poured over them, and in a few seconds' time they can be removed ready for use, or be put away without wiping. There are separate compartments for large and small dishes, which lessen the chance of breakage. It can also be used advantageously to carry dishes from kitchen to china closet.

Peerless Automatic Safety Sash Lock.

The Specialty Introduction Co., P. O. box 1053, New York, are putting on the market the Sash Lock here illustrated. The part of the lock which is fastened on the lower sash has a knob or thumb piece, which is raised to unfasten the lock. When the upper sash is raised or the lower one lowered, the lock fastens automatically. This is brought about by the lever being automatically raised as it comes in contact with the part of the fastener on the upper sash, and by being held in a locked position by the thumb piece

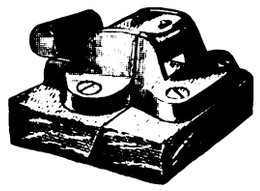

FIG. 1.

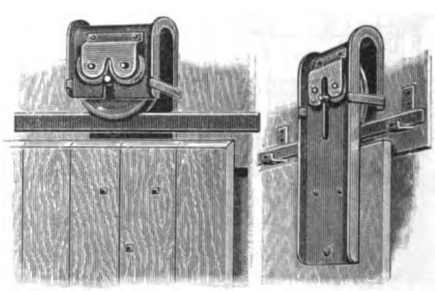

FIG. 2.

engaging in notches on the rear side of the lever. The act of raising the thumb piece as described above, releases it from the notches on the lever, and unfastens the lock, so that either sash may be moved. The lever is furnished with three notches, so that the lock fastens as soon as the lever comes in contact with the part of the fastener on the upper sash, even though the sashes are not closed within three-eighths inch. The two parts of the lock are beveled on the inside so that they may come together at the top but not at the bottom, and the pointed piece at the centre of the part on the upper sash is beveled from back to front. This construction is intended to draw the meeting rails of the sash together when the lock is fastened, to prevent the window rattling. The fastener has no springs, and the makers state that the mechanism is perfect, simple and strong and having nothing to get out of order. They further claim that the fastener never fails to lock, is burglar proof and cannot be forced apart, nor slipped from the outside. It fastens to the window in the ordinary manner and does not interfere with the free movement of either sash.

Terry's Covered Safety Barn Door Hanger.

The Terry Mfg. Co., Horseheads, N. Y., are offering the Barn Door Hanger here illustrated. The frame of the hanger is made of one solid piece of steel without rivets, and the steel hoops connecting the front and back of the frame are to prevent the hanger spreading. The small wheels acting as bearings are stamped from steel, and the rivets forming the axles of the small wheels have enlarged centres with a view to giving them strength and ease in working. The small wheels are covered to prevent dirt, chaff, ice, etc., from accumulating around them and pre-

venting them from working easily. It is stated that the axle of the large wheel comes in contact with the revolving surfaces of the four small wheels continually, and that it does not rub against the side of the hanger frame. A slot in the hanger frame prevents the door from jumping the track, as it allows the large wheel to remain on the track when the door is raised, and also allows the large wheel to be removed or replaced easily without spreading the frame. There is but one size hanger made, as the makers claim that it will carry any sized door any required distance, and con-

Digitized by Google

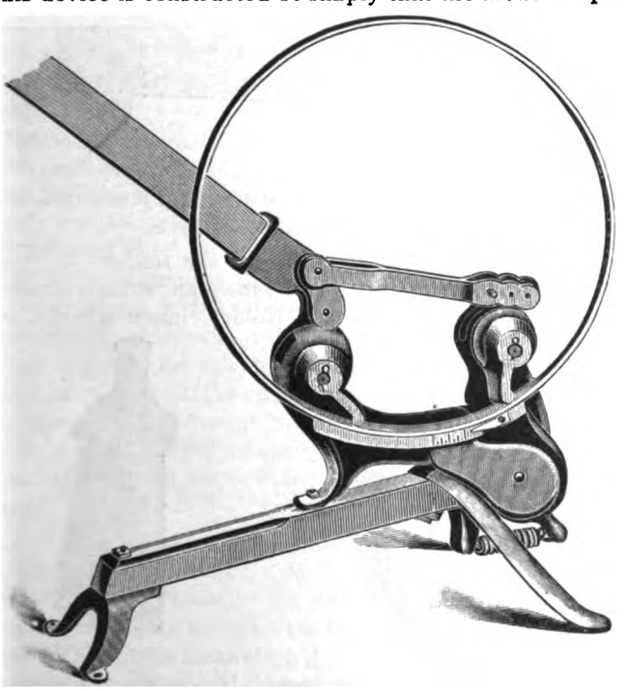
sequently a dealer need carry but one size to have a complete stock.

The Gem Rubber Stamp Holder.

The C. T. Williamson Wire Novelty Co., Newark, N. J., are preparing a novelty for the trade in the shape of a rubber stamp holder, which will be ready early in April. It

has a spiral spring brace and a screw thread and requires no tools for attaching. These holders can be sprung open to admit several sized handles and can be placed on the desk or wall where most convenient. They come in two sizes, in nickel and tin. Size 1, No. 2, tinned, 35 cents per dozen; No. 2½, nickel plated, 55 cents per dozen; size 2, No. 4, tinned, 40 cents per dozen; No. 4½, nickel plated, 60 cents per dozen. One dozen in a box. A discount to the trade.

A New Curry Comb.



The Decker Mfg. Co., Keokuk, Iowa, are introducing a Close Back, Continuous Spring Bar Curry Comb. The makers state that "in placing our new square No. 94 Curry

Comb upon the market, we do not hesitate to claim for it the good will and praise of all horsemen. It has a close back and sides. No dust can fly out through the top or at the ends."

The Rockford Tire Shrinker.

The Love Mfg. Co., Rockford, Ill., are manufacturing the Rockford Tire Shrinker, illustration of which is here given. This device is constructed so simply that the mode of oper-

ating it can readily be learned from the illustration. It can be successfully worked by one man, which is a decided advantage over machines requiring two operators. Bringing down the lever grasps the tire and does the work; raising the lever opens it. The amount of shrinkage is shown by an index finger. The tire need not be removed till it is upset as much as necessary. The Shrinkers are made in four sizes, No. 1 being intended for custom work and the others for heavier tires.

The Bissell Spring Announcement.

As has been the custom of the Bissell Carpet Sweeper Co. for several years past, to get up some special scheme each season that will tend to stimulate the sale of Bissell Carpet Sweepers, for the coming Spring season they have just formulated a "Trial Plan," which will furnish a means to every merchant to sell Bissell Sweepers in much shorter time and at less expense than any way heretofore offered. Then, too, the features embodied in the plan will arrest attention to a dealer's store and show window and thereby draw customers into the store, thus making sales of other articles that would not otherwise have been made. The show card and circular matter included in the scheme is

very novel, and a neat half-tone card, entitled "Mother's Two Treasures," for distribution, will appeal to the approval of all the carpet trade.

The line of woods comprehended in their Spring announcement and from which the "Grand Rapids," "Gold Medal," "Superior," "Cosmopolitan," and "Furniture Protector" will be made, consist of curly birch, quartered sycamore, antique, Old English, natural, and 16th century in selected quartered sawed oak, elegantly finished.

The attention of the trade is directed to the last announcement of the Bissell Co., Grand Rapids, Mich., or New York, as one of considerable value, and dealers should not delay in corresponding with the Bissell Co. for further particulars.

The Kansas City Implement Dealers' & Hardware Club held their regular meeting and supper at the Midland, March 10. John F. Lee, the national president, and Burt W. Lyon, secretary of the Missouri division of the Travelers' Protective Association, were guests of the club. These gentlemen addressed the club on the work of the T. P. A.

An electric restaurant is to be one of the features in the great exposition to be held next year in Amsterdam. Visitors will be served automatically with a complete dinner, and all they will have to do will be to press an electric button, eat the food, and pay the bill.

A new company has been organized to operate under the charter of the old Sunbury Nail Bar & Guide Iron Co., Williamsport, Pa. The mill will be started about May 1st, and will give employment to some eighty-five men.

ILLUSTRATED BICYCLE NOVELTIES.

MANUFACTURERS and DEALERS are invited to make FREQUENT USE of these columns.

Anything NEW in BICYCLES or BICYCLE NOVELTIES should be sent us immediately. NO CHARGE, direct or indirect, is made, as our interest lies in SHOWING THE HARDWAREMAN what is going on in THE BICYCLING WORLD.

When your NOVELTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

Bicycle Padlock.

The Union Lock & Hardware Co., Lancaster, Pa., are offering the trade the Bicycle Padlock, which is here illustrated. It is made of solid bronze metal in nickel-plate and plain finish. It has a spring shackle and is self-locking. The key guide is of the revolving order, and the key as in Fig. 2 is of flat spring steel, rolled, milled and nickel-plated. "All the working parts, springs, bolts and tumblers are of phosphor bronze wire and metal. The chain and ring are of solid steel, possessing, it is claimed, a tensile strength of 350 pounds. The manner of fastening the chain to the lock is the knuckle joint system, which is entirely new. The lock is made in fourteen styles, six of which have the chains covered with pure gum tubing. This lock is introduced in response to the demand for a lock combining strength with lightness, compactness and beauty."

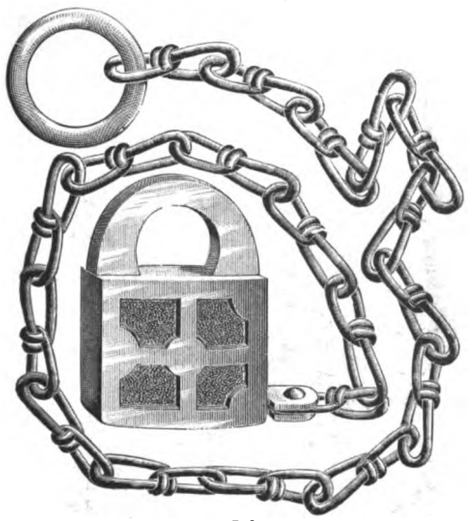

FIG. 1.

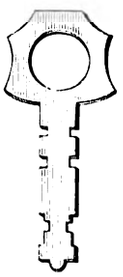

FIG 2.

The Speeder Cycle.

Fig. 1, of the illustrations here given, shows the Speeder Cycle, manufactured by the Speeder Cycle Co., New Castle, Ind. Fig. 2 shows contents of sprocket wheel with left-hand plate removed. "It will be observed that the gear wheels are so arranged as to constitute a perfect roller bearing and centering device, thus obviating the tendency to friction and wear on case and shaft in their revolutions." The Speeder is described as follows: "The frames of the Speeder are made of the best quality weldless steel tubing, steel drop forgings throughout, finished in black, and reinforced at the joints. Head, 10 inches; wheel base, 43 inches; tread, 5¾ inches. Handle bars are made of ⅞-inch tubing, either raised or drop pattern. Wheels are 28 inches, and fitted with Marion wood rims. The spokes are made of piano wire, sustaining an average tensile strain of 1000 pounds each. The bearings are made of the finest tool steel throughout, as well as cones, and are perfectly dust-proof. The cranks are made of a special high grade steel, 6½ and 7-inch throw, fastened with crank-key and lock-nut. The pedals are Indianapolis, rat-trap or rubber, and are perfectly dust-proof. Indianapolis pattern chain. Garford or Sager saddles. All the bright parts are nickel-plated on copper. All wheels are shipped with Morgan & Wright tire, unless otherwise instructed. Depth of frame, 22 inches; weight, from 25 to 26 pounds. Price, $125."

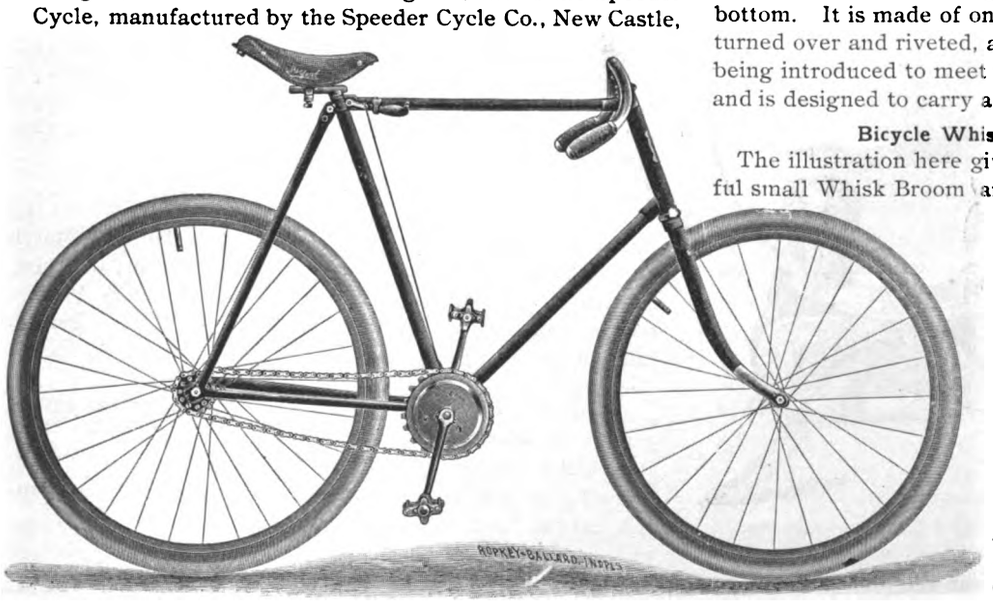

FIG. 1.

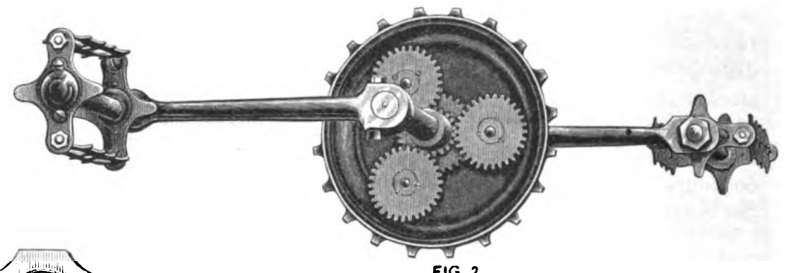

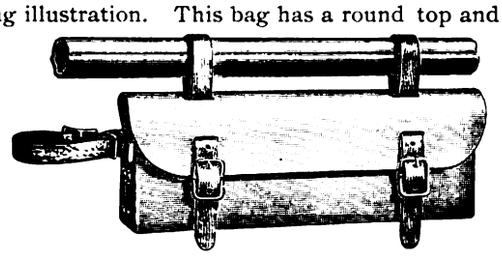

FIG. 2.

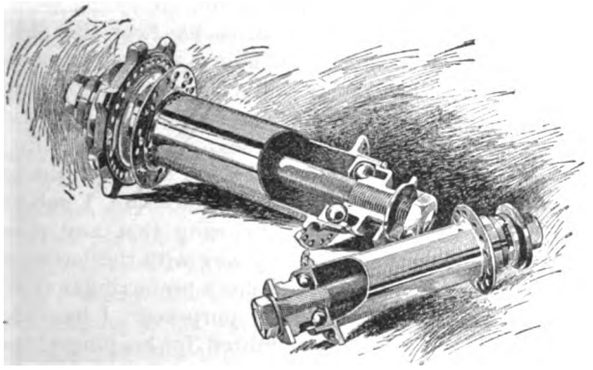
Bicycle Tool Bag.

The J. J. Warren Co., Worcester, Mass., are introducing a new leather Tool Bag for bicycles, as shown in accompanying illustration. This bag has a round top and square bottom. It is made of one piece of leather, the ends being turned over and riveted, and has no seams whatever. It is being introduced to meet the demand for a low priced bag, and is designed to carry a full kit of tools.

Bicycle Whisk Broom and Holder.

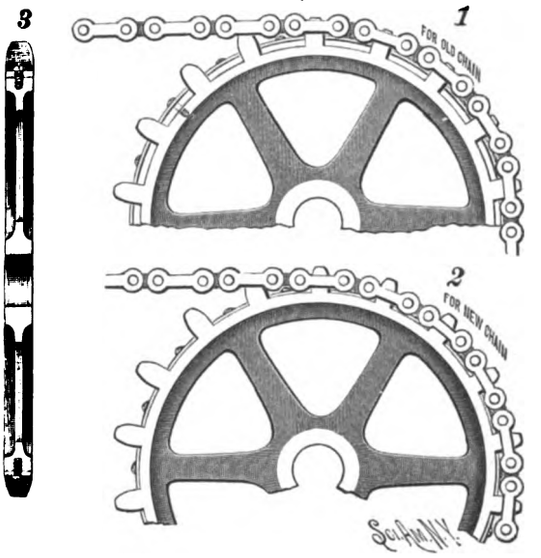
The illustration here given shows an attractive and useful small Whisk Broom and Holder, manufactured by the J. J. Warren Co., of Worcester, Mass. It consists of a small, first quality whisk broom, fitting closely into a neat leather case, which by means of two straps is fastened to the head of the wheel. It is impossible to jolt the broom from its posi-



Digitized by Google

tion, and the wheelman who has one on his machine will find himself enabled to make a presentable appearance after a long and dusty trip.

Columbia Barrel Hubs.



One of the improvements of the 1895 Columbia is the Barrel Hubs. "These hubs are both stronger and lighter than the old style. It is interesting to note that the plain forgings for the new hubs weigh 35⅞ and 12¼ ounces, rear and front, respectively, while the finished hubs weigh but 6½ and 2 ounces, and are as light as any hubs made. The diameter of the centres of the two hubs are 57-64 inch for the front and 1 9-32 inches for the rear. The flanges project but 5-16 inch. The spoke holes on the sprocket side of the rear hub are made with a buttonhole arrangement, a great convenience in placing or removing spokes. The flanges on this hub are 2⅞ inches apart, which is ¼-inch wider than last year. Increasing the angle of the spokes gives a firmer brace to the rim. This is evidence that the Pope Manufacturing Company deem the strength of the rear wheel of such vital importance that they will not sacrifice it by narrowing the hub to meet a like shortening of the crank shaft in providing for a reduction in tread. The number of spokes has been increased from 32 to 36 to give still greater strength to the rear wheel. The Columbia is probably the only 1895 wheel having removable ball cases in the front as well as in the rear hub. This setting in of the ball cases greatly enhances the value of the hubs. Damage to cases does the hubs no injury, and danger of cracking, common to case hardened hubs, is elim-

inated. Besides, the cases take the hardening better than would the whole hub. The cases and cones are turned from a solid bar of the best quality of steel for the purpose, the machining in this operation giving them a wonderful uniformity. They are naturally much superior to cases and cones stamped from sheet steel. The shape or curvature of their working surfaces is carefully designed, carrying the balls with the least possible friction, and admitting of ready and accurate adjustment. They are brought to a finely polished finish, and hardened for wear. The largeness of the hubs permits the introduction of 5-16-inch balls in the rear wheel, which tends to make the bearings run more smoothly than ever. Direct application of oil to the bearings is made through the cones. Four holes—for this purpose as well as for the spanner wrench when adjustment is necessary—enter through the edge of the cone into an angular groove. A sliding spring cover protects these openings. The shafts are 5-16 and ⅜-inch in diameter, front and rear, respectively."

Improved Sprocket Wheel.

Murphy & Kolb, Lockport, N. Y., are introducing an improved Sprocket Wheel. This wheel is manufactured by placing a small plate between the teeth of the wheel, which is held in place by a small screw. "When the chain becomes lengthened, all that is necessary is to unscrew the plates and place underneath them a small piece of paper. For the first time the thickness of a postal card will be sufficient. This increases the circumference of the wheel and makes the chain fit the wheel at all times. When it does not fit one will find that the wheel runs hard; the chain will pull on one tooth only, and the friction will wear the teeth still faster. This device does not add to the weight of the wheel, and will save the rider a new chain every six months." The makers state that "this device has been tried since last season with a chain that was called worn out, and was stretched two inches in fifty links. It was made to

run as easy as a new chain, thus proving that as long as the chain fits the wheel there will be no increased friction, or extra power to run it, thus doing away with the snapping of the chain when in motion. The filling in the adjustments also deadens the rattle of a wheel, which is a good feature. This device must be applied to the rear sprocket also, but it requires only one-half as much packing as in the large one."

The Steward & Romaine Expansion Bolts.

The Steward & Romaine Mfg. Co., Philadelphia, who manufacture Single and Double Expansion Bolts exclusively, and whose business dates back for the past fourteen years, state that they are now furnishing only their Single and Double Lock Nutted Expansion Bolts, having for some time stopped sending the old style of bolts, on account of the imperfection in same, of the nut slipping away from the cases, which does often give a great amount of trouble to the parties using the same. Their present Single and Double are lock nutted in such a manner that they are held together so completely that the expansion part can be inserted in a wall intact, and there is no trouble of connecting when the bolt is inserted through the material to be fastened up. The testimonials held by the firm would fill a good sized book, reaching from Los Angeles, Cal., on the west to Portland, Me., on the east, and the City of Mexico, Mexico, on the south. England and Canada are also included. They will furnish catalogues on application or loan cuts to those proposing new catalogues.

J. R. Nutting, of Sickels, Preston & Nutting Co., Davenport, Iowa, and HARDWARE'S Davenport correspondent, had arranged to spend his winter holiday in Washington. Accompanied by his wife, he reached the national capital, but soon after arrival, Mrs. Nutting was taken seriously ill with the grip, and for several days her life trembled in the balance. The result was favorable, and Mr. and Mrs. Nutting were enabled to return to their home in Iowa, where the lady, we are happy to say, is upon the road to complete recovery.

Fred. J. Allen, of the newly-formed Hardware firm of Allen & Allen, No. 1608 Ridge Avenue, Philadelphia, has been looking about New York for additions to stock, and making the acquaintance of the trade in this city.

MR. SAXTON ON THE SILVER QUESTION.

EDITOR HARDWARE: The silver question is at present a disturbance the world over, and especially in these good United States. Almost everybody is searching for a plan that will keep silver in use as a medium of exchange and as a basis of values. Just why there has been this tenacious movement, I have been unable to find out. It appears to me that the only rational demand for the employment of silver as currency, beyond for subsidiary uses, should come from the silver mine owners. I can readily understand it would be an excellent arrangement for them to always be able to depend on a good firm market for their production, but I cannot understand why anyone else should want to make it a basis of their exchanges and transactions, any more than copper, brass and other important metals. The demand of the silver contingent that there shall be free coinage at the ratio of 16 to 1, I consider the most preposterous impudence ever inflicted on an intelligent people. Such a law would mean that the silver producers could take fifty cents' worth of silver to our mints and go away with the purchasing power of a dollar, or, in other words, double their investment by this simple operation, and leave the people to pocket the loss when the crisis came, as it surely would come. Why should any people sanction such a crazy outrage as this, is beyond my comprehension. Are the intelligent people of the United States so anxious to be swindled, that they are willing to join in such an iniquity to accomplish their own ruin?

There are, however, a good many well-meaning people in this country who really think plenty and great abundance of circulating medium will mean better times. and who are set up in the fallacy that the government can create values, and that anything the government stamps with its insignia is worth *per se* what the government stamp calls for. Suppose the government could create values, and set their dies or printing presses to work turning out money, who is going to obtain it? There are only two ways of obtaining money or property, viz.: working and earning it, or stealing it. But the fact is, all the governments in the world cannot create a single cent. All whose gray hairs put them back to our war period, know the fallacy of governmental creation. They know that our greenbacks were simple promises to pay, whose values oscillated up and down according to the government's ability to make good its promises. The only difference between the greenbacks and free coinage 16 to 1 is in degree. In one case it was all promise, and in the other there is partial security. I am of the opinion that there is not any real demand or occasion for more circulating medium, than that supplied by the present world's stock and future product of gold. How much actual money is employed in the world's business? I do not know; but judging from my own limited experience, I much doubt if ten per cent. of the business done by wholesalers is transacted in actual money. Retailers and manufacturers, etc., no doubt, employ a larger per centage, but what they employ, in its natural circulation keeps rotating and doing double and triple duty all the time. So that a thousand dollars in a community will do the work of ten times that amount.

Now, while my views are as above stated, I am not unfriendly to silver as money, provided it can be placed on a par with gold, and kept there. One would naturally say the proper way to accomplish this, is to increase the ratio, and make it 32 to 1, or whatever is the proper existing ratio; but as silver in these later days is such a fluctuating metal, it will appear after a time that the parity is again broken, and, besides, who wants to lug around our present cart-wheel doubled in size? What way is there, then, if silver must form a part of our currency, to so use it, and maintain its parity with gold? I have a very crude idea that the best, least expensive, and least disturbing plan would be to make the government a gain and loss account in silver. I should have the government purchase silver at lowest market prices to the extent of the country's needs, controlled by proper legislation, or after the Congressional experiences we have had, a commission would be preferable. Then the government should issue silver certificates, each denomination calling for sufficient silver at the market price on the day of demand, that would equal the value of such denomination in gold. The government in this operation would stand between the business interests of the country and a fluctuating market in silver. Sometimes there would be gain and sometimes loss, but would it not be far better for the people in case of loss, to make the loss good by uniform taxation, rather than have their business interests disturbed as they have been during the past two years, causing untold individual losses from one end of the country to the other, paralyzing trade and commerce everywhere, and totally upsetting confidence. In this latter case all is blank uncertainty; in the former case, the worst that could come would be a slight increase in taxation, levied in a way that would not be burdensome to anyone. Under our system of protection, and specially McKinleyism, the strong point of those who have been its beneficiaries has been that the tax on each individual has been so hidden, that very few realized they were helping make millionaires, while they were growing poorer. In the silver plan suggested, the taxation to cover any losses would be legitimate taxation and for the benefit of all concerned, and could never approach the great steal of the protected industries. At any rate, I submit it in embryo for what it is worth, knowing that any plan of mixing up the government in any way with the business of the country is objectionable and much preferring that silver be only employed for subsidiary purposes. I have, however, not yet seen any plan submitted for keeping silver on a parity with gold, that would hold water and that did not involve fiatism, and to this I am unalterably opposed, as in my judgment it only postpones the evil day.

New York, March 30, 1895.

Joseph D. Jewett and Walter C. Vaughn announce that they have formed a copartnership under the firm name of J. D. Jewett & Co., and have removed from the old stand at No. 19 Pearl Street, to their new store, No. 168 Washington Street, Boston, where they offer a complete line of builders' Hardware, general Hardware, cutlery and tools. They say: "With our better facilities and additional lines, we hope to receive increased favors from our friends, and assure them of prompt and careful attention."

W. S. Estey, No. 65 Fulton Street, New York, announces that after March 1, 1895, the business heretofore conducted by him, will be carried on by a newly-formed organization known as the Estey Wire Works Co. It is needless for us to add that this change is in the direction of an advance, and that the energy heretofore shown at No. 65 Fulton Street, will be still displayed, and will be crowned by even greater success than that of the past.

Gurney Patent Refrigerators.

Now that spring is upon us the thoughts of all good housekeepers turn to refrigerators. The Gurney Refrigerator Co. carry a full line of refrigerators, from the smallest for the bachelor's flat, to the largest for use in hotels, in their Eastern establishment at Nos. 105 and 107 Hudson Street, New York, which enables them to fill orders at a moment's notice.

The refrigerators made by this company are described as possessing many advantages. The removable galvanized ice compartment, which is a feature, allows of the refrigerator being kept perfectly clean. "By its use the necessity is overcome of permitting any of the vapors arising from the provision chamber to enter the inner walls or pass through end flues, depositing unwholesome gases and food particles in inaccessible places that cannot be got at and cleaned, as is true of all the old style refrigerators. In the Gurney refrigerators the air from the provision chamber rises, passes directly against, and through holes, in the four side walls of the ice compartment. The ice compartment can be lifted out when necessary, and it and the refrigerator made as sweet and clean as a milk pan. In the Gurney system, it is not necessary, as in the old style refrigerator, for the warm air of the provision chamber to go through the slow process of passing through small end flues. In this system the galvanized ice compartment practically partakes of the same temperature as the ice which it contains. The warm air from the provision chamber arises and strikes the galvanized ice compartment, is lowered in temperature, falls to the provision chamber, displacing the warmed and lighter air, which rises to the ice and in turn falls to the provision chamber. The ice compartment is also perforated with holes, which admit the air to the ice from the front, back and both ends, and passes the cold air down through the ice to the provision chamber. The preservation of food placed in a refrigerator depends largely on dry air. To secure this, a refrigerator must possess free circulation and a large condensing surface. In the Gurney the two side walls and both end walls of the removable galvanized ice compartment, practically partaking as it does of the same temperature as the ice, forms a condensing surface many times larger than any of the old style refrigerators, many of which rely on the ice only for condensation. In the Gurney the ice is not permitted to touch the zinc side walls and hence there is no condensation between the inner walls. An examination of the inner walls of any of the old style refrigerators will plainly show the unhealthy effect of this condensation deposit. The Gurney gets its condensation on the four side walls of the galvanized ice compartment, which formation runs into the drip pan and passes off through the waste pipe. The walls of most refrigerators are packed with charcoal or the space between the walls is left without packing of any kind. In the Gurney system the walls are packed with mineral wool, which is the best non-conductor known. A comparison of the heat conducting powers of mineral wool, charcoal and air space is as follows:

Mineral Wool	100
Charcoal	140
Air Space	280

"The Gurney refrigerators are constructed in the best possible manner and of fine material and finished in style."

During the month the Rice & Sargent Engine Co., Providence, R. I., have received three orders for steam engines. One is a tandem-compound of 300 horse power, with cylinders 14 and 26 inches and a 42-inch stroke, independent condenser, to run at 100 revolutions a minute in the Pembroke Mills, Suncook, N. H. The Lawrence, Mass., Lumber Co. have ordered a 200 horse power engine, 20x42, 80 revolutions, and the Oakdale Mfg. Co., of Providence, a 75 horse power engine, 12x30, 110 revolutions.

Keating Successful Opening.

"Nothing succeeds like success. The Keating, 365 days ahead of them all." This is the sign emblazoned on the west wall of the store at No. 65 Merrimack Street, Manchester, N. H., and which met the gaze of more than six hundred visitors who attended the Keating Wheel Co.'s opening some evenings since. The rooms had been tastily decorated with American flags, and a handsome sign erected over the entrance, around which were placed in advantageous positions small flags and transparent lights. The occasion was something of a novelty, in that it was the first formal bicycle opening ever given in that city, and proved an unqualified success. There was a goodly number of callers in the afternoon, but in the evening the room was crowded until nearly 12 o'clock. The merits of the wheel were thoroughly explained by the gentlemanly and courteous manager, Frank R. Parker, and his assistants, James T. Parker, J. H. Fitzgerald and Walter B. Sherer, who are to be found there permanently, and Moses Sherriff, Charles F. Sawtell and David Flanders, the latter gentleman presiding over the refreshment branch and dealing out lemonade and cigars to all comers. To demonstrate the excellent qualities of the Keating, two wheels were exhibited. One had been ridden nine thousand miles by Charles F. Sawtell, and the other eleven thousand miles by Charles Colburn, and the bearings on either showed no signs of wear. A score or more new wheels and the display of sundries were looked over by the many callers with an evident degree of satisfaction, and Mr. Parker was the recipient of hearty congratulations on all sides. The art of riding the silent steed will be taught by Capt. Moses Sherriff, and W. B. Sherer and James T. Parker will be in charge of the repair shop.

While searching the cells in a Chicago police station recently, a small home-made cell stove, manufactured by a prisoner, was found. The stove was an ingenious thing. The top had been taken from a condensed milk can, which had been filled with grease, the slow accumulation of settlings from soups and from the stubs and waste of candles. A strip of blanket had been unraveled and twisted into a big wick, which was imbedded in the grease. When the wick was lighted it made a strong blaze. It was used to warm the coffee at night.

The first samples of American Humbers were received and placed on exhibition at the New York depot of Humber & Co., America, Ltd., No. 318 Broadway, March 25th. They proved to be well worth waiting for, as they are wheels of great charm. While distinctively Humbers, the modifications made in order to Americanize them have been such as to satisfy experts that the Humber standard has in fact been improved upon by the American branch of the firm.

The Supplee Hardware Co., Philadelphia, Pa., are distributing a neat little card, printed in red, bearing the following announcement: "April showers will make the grass grow. Have you bought your Lawn Mowers? If not, write us." In the lower right hand corner is a calendar for the month of April.

The Star Nickel-Plating Works, No. 428 Walnut Street, Philadelphia, announce that they have purchased the stock and machinery of the Curtis-Child Mfg. Co., and intend to manufacture the Solid Comfort Saddles recently made by them.

The Empire Knife Co., West Winsted, Conn., have commenced work on a brick building, 80x26, to be used as a cutlery shop.

Digitized by Google

THE DEMORALIZING BARGAIN COUNTER.

The ruling spirit in the mercantile world in these, the last days of the Nineteenth Century, since Christ came to proclaim the brotherhood of man, is Cheapness, and his throne is upon the Bargain Counter.

Before this tyrant every interest must bow. He exacts tribute from manufacturer, merchant, miner, planter, farmer, salaried official and wage earner. He has even become the controlling influence in national politics, and governs every school of political economy.

Campaigns are lost or won upon a mere question of figures, and parties vie with each other in promising the voter cheaper products at special bargain counters.

It is not surprising that the wage workers of the whole world are in a state of unrest bordering upon anarchy. They see that the steady tendency of the age is to lessen the cost of production. They are taught that all other costs have a limit beyond which they may not go, except the cost of flesh and blood as paid for in wages. These must decline to meet the prevailing cry for cheaper products, but there is no mile-stone to mark the place where they may say "thus far and no further."

There was a time when consumers demanded good goods and at reasonable prices. Employers could then pay fair wages for a fair day's work, and merchants paid tribute to quality, knowing that price was but one factor in a sale. But less than a generation ago there came into trade circles a new class of manufacturers whose sole idea of gaining and holding trade was by underselling all competitors. They ignored every question as to quality and harped solely upon their prices. If the buyer pointed to the inferior finish, the poorer workmanship, the doubtful quality, he was met with but one answer: "Look at the price!"

Two classes of dealers welcomed these new producers, those who saw greater profit in selling inferior goods at old prices, and another class who was able to foresee that "cheapness" would become the gospel of trade.

Both classes found the venture a paying one. In one place the careless or confiding customer accepted the poorer goods at the same prices he had been paying for better wares. The other stores were plastered over with notices of "bargains," and people hastened there to do their buying.

The advent of the "Cheap John" manufacturer, and the eagerness of people for bargains, compelled other producers to reduce their prices in order to hold their trade. As the campaign proceeded they cheapened the material, they slighted the workmanship and they reduced wages.

Trade in every line became a keen hunt for something lower priced, in order that to-morrow's announcement might be lower than to-day's. This spirit has permeated every branch of commerce, and "bargains" are the one lodestone that attracts all sorts and conditions of men and women.

Wherever the bargain counter has a home, it has monopolized the talent and brains of all concerned in its management. But where can one go and not meet it? It has its special organs in the great Sunday papers, and its glaring invitations to those who worship cheapness are the controlling influence in Monday's shopping.

Who shall be so foolish as to rail against economy? Is it not the crowning Christian virtue? Why shall not the workingman's wife make her few dollars go to the farthest possible length in her purchases? The answer is ready: Because her keen scent after bargains is the controlling influence in reducing the wages of her husband and sons and daughters. If she must have cheaper goods, these others must do their share towards it by working for less wages, so that the wares may be offered at less price than before.

Of what value is it that the wage earners form "Unions" to keep wages at a higher level, when their own households are searching the columns of the Sunday paper for lower priced goods!

When one reads the piteous and heart-rending stories of starving sewing women, do not the loud announcements of the dealers, "Finished Garments At Less than the Cost of the Cloth," at once appear before his eyes? Is not one the complement of the other? There is nothing on earth so cheap as flesh and blood, for it now touches a limit of cost of production; everything else does.

How can there be perennial bargains if wages and material are not perpetually scrimped? And as a bargain ceases to be a bargain to-morrow if not at less price than to-day so must wages drop lower and lower to meet the demand for cheaper wares. In the political economy of the next generation there will be one axiom made more prominent than all others: "Cheap Goods Make Cheap Men." Satan must surely rejoice when he sees the whole world uniting in the one cry of Cheap! Cheap! Cheap!

One operator in coal wants the best customer of another operator. Every other inducement failing he cuts the price. Then the other retaliates; the fight goes on and coal is sold at a loss. The wages of the miners are reduced, as he is told, in obedience to the laws of trade, and the cutting in prices goes on its merry way.

Is it any wonder that the miner and his fellows get together and demand that the laws of trade shall so adjust themselves that a scant living at least is assured to workmen? Why shall one dealer, whose business ability is measured by his readiness to undersell his competitors, make a standard of wages that means a lack of the common comforts of life in one hundred thousand homes?

When a dry goods dealer advertises a garment a few cents under the price of his neighbor is there a single woman who stops for a moment to consider her sister in the garret who has to work for less that this may be done? Is the saving made by the buyer a matter of actual concern to her? It very rarely is. But to produce the article so that it could be sold at this lower price women went hungry to their wretched beds.

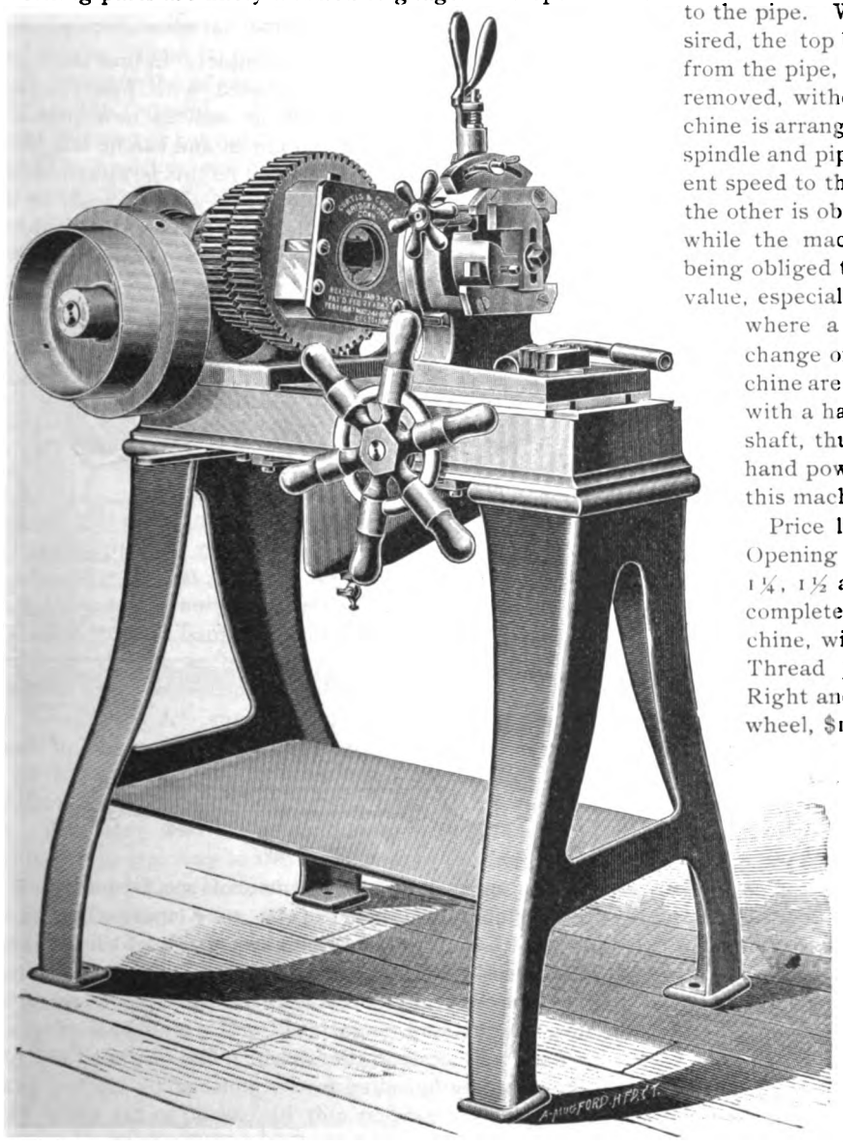
If one did not know that every bargain offered meant sorrow to wage workers somewhere in this wide, wide world, if not at his very doors, he might rejoice that so much could be bought for so little money. But any article is sold too low when the man or woman who made it was not paid living wages. And when the wage earner's purchasing power is reduced every other interest must necessarily suffer.

The gauge of the times is the condition of the wage earner. Give him fair wages, increase his power to supply himself with the comforts and even the luxuries of life and his demands for these will accelerate the wheels of business in every line and bring prosperous times for all interests.

But the bargain counter must have cheaper goods; it encourages bankruptcy; it offers a premium for inferiority, but it increases its advertising space. Nothing is out of its line, from summer silks to mess pork, from pianos to liver pills.

But O, ye bargain hunters, how can ye close your ears to the despairing cries of men and women who work from dawn till midnight and barely keep themselves in bread, though bread is now so cheap!

Is it nothing to you that these toilers are without joy, without hope? Only despair is theirs. Only a dark to-day



Digitized by Google

followed by a doubtful to-morrow. They are the slaves of the modern Moloch, the Bargain Counter, that monster who knows no mercy and serves no God but Cheap John.

Toledo, Ohio, April, 1895. WM. H. MAHER.

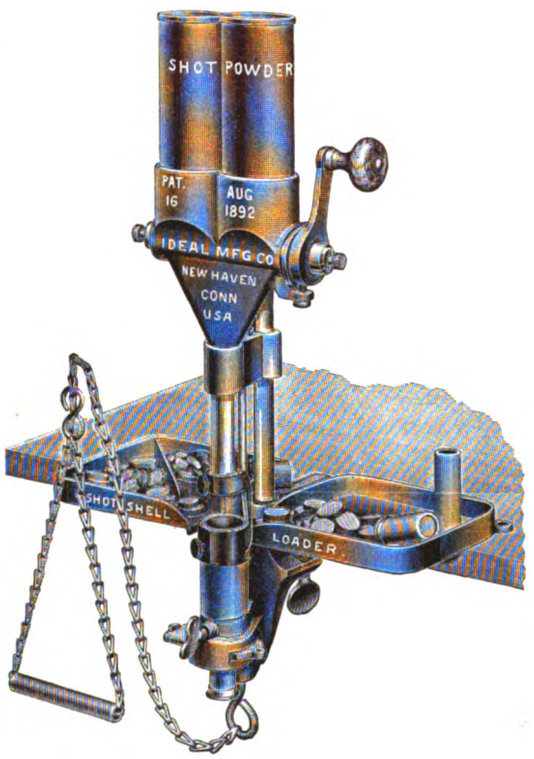
Curtis & Curtis' Power Pipe Machine.

Curtis & Curtis, Bridgeport, Conn., manufacturers of pipe cutting and threading machines, in order to meet a demand for a machine in which the pipe revolves and the dies are stationary, and wishing to please everyone as far as possible, have designed and placed on the market the machine herewith illustrated. "All its parts are made interchangeable so that any part can be duplicated by simply naming them. The gears are all cut from the solid block, and all working parts are finely finished to gauge. To operate the

machine, the pipe to be cut off or threaded is run through the hollow spindle of the machine from the left, passing through the self-centering guide chuck shown at the left of the spindle and the self-centering vise at the right, and the die-head. The pipe is then clamped by turning the screw in the vise, which not only clamps the pipe, but brings it central with the dies; by turning the hand wheel shown on the front of the machine, the die-head is moved so that the cut-off tool comes opposite the point on the pipe where it is desired to cut, and can there be clamped in position. The back stop shown on the right side of the die-head is run down over the pipe, and the pipe cut off by turning the wheel on the side of the die-head. All this cut-off arrangement is self-contained and allows a moment within ways, so that if the pipe should be slightly bent or out of round it would move with it, and thus facilitate the operation. Should it then be desired to thread this end of the pipe, the lever shown on top of the die-head is thrown over to the proper graduation on top of the machine, which brings the dies to the standard size for the size of pipe to be cut. Should there be found, as often occurs, that the fittings to be used varied from the standard, the proper allowance can be made with this lever so as to cut over or under standard size. Should there be a number of pieces of the same size to be cut, as in making nipples, the block, into which the lever engages can be set to size, and the lever simply snapped back into it each time without resetting. This feature is of particular value where the machine is operated in a dark room or where unskilled labor is employed. The die-carrying head is then advanced by turning the hand-wheel shown on the front of the machine, operated through a rack and pinion under the die-head, and the dies lead on to the pipe. When the dies have advanced as far as desired, the top lever is thrown back, which frees the dies from the pipe, the die-head is drawn back and the pipe is removed, without running back over the thread. This machine is arranged with two sets of gearing for rotating the spindle and pipe, each of which is adapted to give a different speed to the machine. A change of speed from one to the other is obtained by simply moving a convenient lever while the machine is running at full speed and without being obliged to stop. This feature will be found of great value, especially in changing from threading to cutting off, where a higher speed is desirable. Thus, with a change of belt speed on the cone, four speeds of machine are attained. When desired, we fit the machine with a hand-wheel, which is attachable to the cone-shaft, thus allowing the machine to be operated by hand power. Solid pipe or bolt dies can be used with this machine when desired."

Price list: No. 20 Power Machine, with Cut-off and Opening Adjustable Dies to Thread ¼, ⅜, ½, ¾, 1, 1¼, 1½ and 2 inch, both Right and Left Hand; price, complete, with Countershaft, $200. No. 21 Hand Machine, with Cut-off and Opening Adjustable Dies, to Thread ¼, ⅜, ½, ¾, 1, 1¼, 1½ and 2 inch, both Right and Left Hand; price, complete, with Hand-wheel, $195. No. 22 Hand and Power Machine, with Cut-off and Opening Adjustable Dies, to Thread ¼, ⅜, ½, ¾, 1, 1¼, 1½ and 2 inch, both Right and Left Hand; price, complete, with both Countershaft and Hand-wheel, $210. Can furnish Bolt Dies for these machines, if desired.

A meeting of the safe and lock manufacturers was recently held in Cleveland, Ohio, at the Hollenden. An effort was made to keep their presence and their errand secret, and in this they succeeded to a certain extent. Prices and sales constituted the major portion of their discussions, and it has been stated that a movement is on foot to organize a combination for the better regulation of prices. Among those present were E. C. Hall, H. Urban, G. B. Hanndey, R. T. Pullen and G. F. Cook, of Cincinnati; H. S. Donahue, of Pittsburg; C. C. Loring and George Demon of Boston, and George L. Remington, of Philadelphia.



In the Hardwaremen's Exchange page of this issue will be found a card in which a cutlery salesman of experience, ability and a peculiar adaptability to the work announces that he is open to an engagement to travel. Any letter addressed to this office to "Cutlery Salesman" will be sure to reach him immediately.

The Kenton Hardware Mfg. Co., Kenton, Ohio, have received a large consignment of aluminum, which is to be used in the manufacture of bicycles.

A Yankee Concern.

The Ideal Mfg. Co., New Haven, Conn., is truly a live Yankee manufactory. Mr. Barlow, the manager, is sharp and keen, always alive to the interest of his constituency, which consists of shooters of rifles, pistols and shotguns, and the general trade that supplies them with the various implements for making ammunition. The Ideal Tools have become things of necessity to shooters in all parts of the world, these goods being recognized as staple articles by such Hardwaremen as deal in sporting goods. Mr. Barlow seems to anticipate the desires and requirements of the sportsmen in advance, and he is continually bringing out new articles or improving on the old. It is but a short time since we announced and described the Ideal Shot Shell Loading Machine. It has proved a good one and a ready seller, yet the company have made some radical changes in it for the better. The upright rod, which was square and acted as a guide for the rammer, is now a round steel rod, and there is a rammer guide located on the shell receiver (see cut), so that the rammer is guided positively central and direct. It is claimed for this machine that "it is the most simple and the cheapest machine made." Wm. Wag-

ner, of Washington, D. C., who loads all of the shells for President Cleveland, loaded last year with this machine over 150,000 shells, and those that the President used on the recent ducking trip were loaded on this machine. It certainly has the endorsement of those who are well qualified to testify to the merits or demerits of a machine for loading shells. A list of these names is now before us, and they are well-known among arms and ammunition manufacturers and dealers. The new High Grade Closer, Universal Powder Measure, and all of the various implements for shooters is fully illustrated and described in the Ideal Hand-Book No. 6, which is just issued by the company. It is a well written pamphlet of ninety pages, containing much matter of interest for shooters and dealers, and none should be without it, as it has become a recognized authority on matters pertaining to rifles, pistols, shotguns, powders, bullets and general ammunition, and it can be had by simply asking for it. We would advise all who are interested, to write for one to the Ideal Mfg. Co., of New Haven, Conn.

Rathbone, Sard & Co., Albany, N. Y., have opened their stove works. One shop is now in operation and employs one hundred men.

The "Acme" Hose Coupler.

A new article of genuine merit is the patent "Acme" Hose Coupler, advertised on another page by the Adams & Westlake Co., Chicago. "Everyone who has had experience knows how unsatisfactory the old screw couplings are. They take time, cut and bruise the fingers, and the constant twisting of the hose soon wears it out and makes it worthless. All this is avoided by the use of the 'Acme'

NO. 2. DISCONNECTED. NO. 1.

Couplers, which are remarkably complete, in that they provide for everything and can be used with hose already equipped with screw couplings, as well as new hose. A faucet tip (No. 3) screws on the faucet and can be left there permanently or removed at will. To this is attached the hose end, equipped with the No. 1, if a new hose, or the No. 4, if the hose has the old style screw couplings and the owner does not care to bother about removing them. It

NO 3.

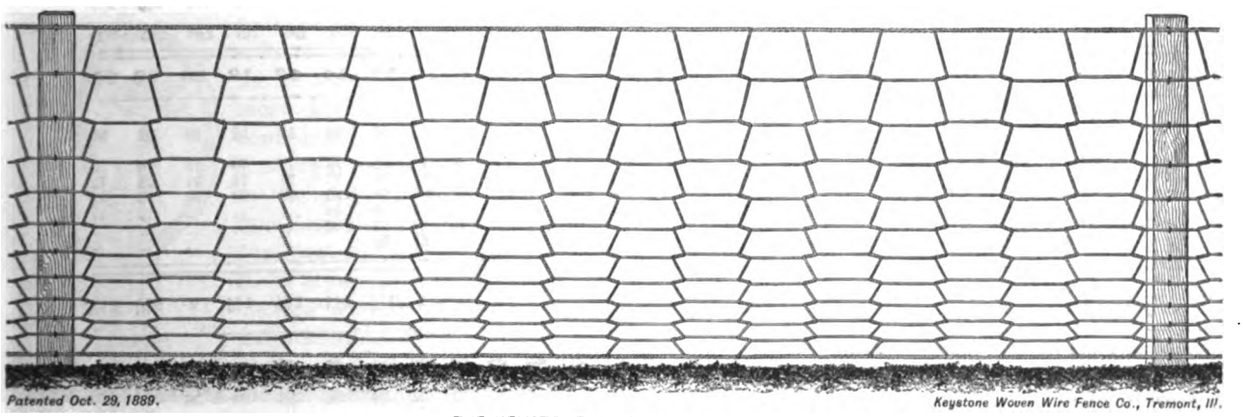
NO. 4.

will be noticed that the male end is caught on the projecting edge of the female, the two pieces brought together, lever turned and a water-tight coupling results, without any wear of twist of the hose. The operation is practically instantaneous. The No. 2 is also designed for new hose and goes with nozzle, when No. 4 is used as an intermediary. The No. 4 is used with nozzles and takes the place of No. 1 when used with the old style couplings. A very clever device is the 'A. & W.' Hose Band, which is made of brass

HOSE BAND.

and can be applied without the use of special tools. It is quick and effective, and can be used more than once. Florists write in terms of the highest praise of these goods, and unsolicited testimonials are being received in every mail." The Adams & Westlake Co. have placed advertising in all the leading magazines for May and June, and anticipate a lively demand therefrom. The "Acme" Coupler will undoubtedly be called for very often.

From trustworthy sources we learn that the Hardware manufacturing industry in New Britain, Conn., is within twelve or fifteen per cent. of what it was when the recent cyclone of hard times struck us. Items like these are reassuring, when they come from sources which are not to be doubted.



E. C. Simmons, president of the Simmons Hardware Co., St. Louis, recently said to a prominent manufacturer that the business of his company for the first three months of 1895, had exceeded the business for 1894 by $1,000,000. Croakers Keep Off The Grass!

The New York State Association of Hardware Jobbers met at Albany some days since and discussed questions relating to the trade, after which they were dined at the Fort Orange Club by President Charles H. Turner, of the Albany Hardware & Iron Co.

The Keystone Woven Wire Fence.

We are in receipt of the sixth annual catalogue issued by the Keystone Woven Wire Fence Co., of Tremont, Ill., which shows a complete line of farm fencing. One of their leading styles is shown in the accompanying illustration, and is described as follows: The top and bottom bars consist of two heavy wires (No. 12) twisted together. The intermediate bars, as well as the cross or stay bars, are also made of No. 12 wire. As will be seen by reference to the illustration, the cross or stay wire is twisted first with the two wires in the top bar, then it passes down across all the intermediate bars, and is twisted with each at the intersecting points. It is then twisted with the two wires in the bottom bar about twelve inches, when it passes upwards, uniting with the intermediate bars in the same manner, and is again twisted with the two wires in the top bar about twelve inches, when it passes downward as before described. Among the advantages claimed for this style of fencing are the following: "It does not cause snow drifts; it cannot burn up or rot down; it cannot be blown away in a storm, like board or rail fences; it does not cut, cripple or kill stock, like a barbed wire fence; it does not shade crops nor draw plant food from the soil, like hedge fences; it does not become loose from the effects of the wind, like a picket fence; it does not harbor weeds, vermin and insects, as do stone, rail and hedge fences; it takes but little room; that is an important advantage over hedge and rail fences. The stay wire being continuous and twisted into the cables from one stay to the other makes the fence perfectly smooth and leaves no chance for the stay to unravel and become detached from the horizontal bars. Our stay or cross wire is very heavy and as the horizontal bars are dependent on the stay wire to, make a fence all fences in which a small, light stay wire is used are in this respect inferior to the Keystone. Our stay or tie wires are twisted with the horizontal bars at intersecting points, thus making the most perfect connection; making it impossible to slip the stay wires out of place. In this respect the Keystone is superior to any fence in which the stays are only wound around the horizontal bars, thus allowing the stays to slip out of position, which destroys the utility and appearance of the fence. The Keystone has ample provision for the changes in temperature. The horizontal bars are abundantly strong and the spaces between them narrower than in any other farm fence that we know of. In addition to the style here illustrated the catalogue shows several different heights of the same kind of fencing, also a practical device for stretching the same, and gives much useful information on fence building. The goods manufactured by this company are described as a profitable line for dealers whose customers are largely among the farmers." For further particulars see their statement on page 19 of this issue.

THE KEYSTONE WIRE WOVEN FENCE.

The Pennsylvania Hardware Co., Reading, Pa., will add a stamping department to their plant in a short time.

The "Guarantee" Wringer.

The Lovell Mfg. Co., Erie, Pa., are pushing with very gratifying success their Guarantee Clothes Wringer, some features of which may be learned from their full page statement upon page 95, this issue, where may also be seen a fac simile of their guarantee. In giving a history of this line of goods the company say: "For two years or more past we have had calls from both retail and jobbing Hardware tradesmen for Wringers, 'made with those old fashioned soft rolls, such as were put into Wringers twenty years ago, many of which did good service in family use for six or eight years.' To this we have always answered, that we could furnish such wringers if dealers and their customers would be willing to pay prices corresponding with their cost, as they did in the good old times of twenty years ago. Of late this call has become so urgent and dealers have so fully expressed their willingness to pay any reasonable price that might be necessary to secure such a wringer that we have decided to meet this demand by bringing out the Guarantee Clothes Wringers. The rolls in these wringers are made by the same company who made 'those old fashioned soft rolls of twenty years ago,' and are the very best that it is possible, with our thirty years of experience, to produce, regardless of cost. Only the very finest grade of rubber is used in their construction. Better rolls could not be produced if one hundred dollars each were offered for them. We guarantee them to be better rolls than were ever put into any wringer before, even in the good old days of twenty years ago. Notwithstanding the fact that the finest grade of rubber costs substantially the same now as it did twenty years ago, we will be enabled through improved methods in the manufacture of both rolls and wringers to sell them at much lower prices than wringers were sold for in those good old days when the retail price for a wringer with ten inch rolls was never less than $8.00, and the retail dealer paid $72.00 and upwards per dozen for them. Every roll put into these wringers will bear our trade mark moulded into the surface of the roll, and we guarantee every roll bearing this trade mark to be made as described above. We have made the prices on the wringers in which these rolls will be used as low as it is possible to make them and leave us a reasonable manufacturers' profit." The company have issued a handsome catalogue, describing and illustrating their goods in full, and will be pleased to send the same upon application.

The American Indicator Co., Lawrence, Mass., are placing upon the market a new Cyclometer to register 10,000 miles, and repeats, or can be set back to zero. It has a handsome black dial, illuminated hands, and is a very handsome and desirable instrument. Retails for $1.75.

The Nubian Iron Enamel Co., Cragin, Ill., have issued their tasty little desk calendar for April, May and June, 1895. It is full of good things, as usual.

Price List Tacks, Nails, Brads, Etc.

Some space is here given to the Revised Hardware Price List of Tacks, Nails, Brads, etc., adopted March 25, 1895, and announced in full as follows by the Atlas Tack Corporation:

For ½-pound papers where prices are not given, add 2 cents per pound to List. For ¼-pound papers where prices are not given, add 4 cents per pound to List. Any of the above kinds, Tinned or Coppered, not specified, 20 cents per pound advance on above prices. American Cut and American Carpet have same Bulk List as Swedes Cut and Carpet. For 5-pound bulk boxes, add ½ cent per pound net.

Myers' Spray Pumps.

The subject of spraying fruit trees and small fruit, has been thoroughly discussed and written up in all its details and different phases, in fruit growing periodicals and agricultural journals, and every fruit growing State has its own experiment station, agricultural society or college, from which documents and bulletins are issued free to its residents on application, giving results of experiments, different formulæ for all kinds of insects and trees, in the most improved and scientific manner, containing complete information, describing the different insects, the formulæ to use and how and when to apply it, thus establishing the fact that spraying does pay, and is necessary to insure crops. F. E. Myers & Bro., Ashland, Ohio, are making a specialty of pumps for such purposes, and we take pleasure in illustrating three of the many styles, which they are offering to the trade.

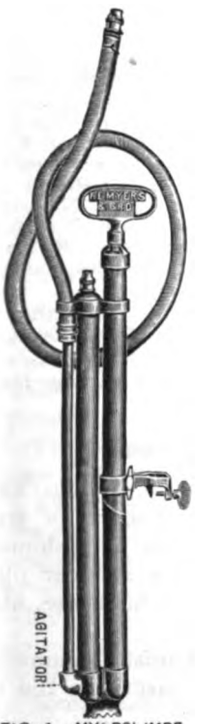

FIG. 1. MYERS' IMPERIAL BRASS SPRAY PUMP.

The first shown (Fig. 1) is known as the Myers Imperial Brass Spray Pump. It is compact, unusually strong, and of large capacity; has an adjustable fastener for any height or shape of pail; removable cap so buckets can be taken out without disarranging the pump; double leather buckets, ground brass valve seats and superior valves, and fitted with agitator and latest combination nozzle, fitted for sprayer or pipe extension.

Fig. 2 is the Myers Fountain Knapsack Spray Pump, which is constructed of the first quality of galvanized iron,

FIG. 2.—MYERS' FOUNTAIN KNAPSACK SPRAY PUMP.

with round corners, removable strainer and tight lid. It is fitted with adjustable straps so as to be carried on the back, or it can be carried by the bail as shown by the dotted lines. It is tapped at both right and left hand lower corners, and fitted with brass female ends, to which the hose is attached, either one or two strings of which may be used at one time. When one hose only is used, the other opening is closed with a metal plug furnished for that purpose. The hose and bulb are made of the best white rubber, and protected at each end by coiled wire, to prevent breaking. The valves are made of brass and will not corrode, and have large openings which permit the free flow of water, and shut off instantly when under pressure. The nozzle is made of brass, nickel-plated, has fifty small openings, and throws a spray six feet wide at a distance of twelve feet. The

FIG. 3.—BARREL SPRAY PUMP FITTED WITH EXTRA LARGE AIR CHAMBERS.

pump holds five gallons, and weighs fifty-two pounds when full.

The third (Fig. 3) is the Myers Barrel Spray Pump. It is constructed with base adapted to be fastened on sinks and platforms, so it can be used for a house force pump, in cisterns, shallow wells, or at any place where a neat, powerful force pump is required. When used for house purposes it is furnished with a discharge spout, elevated to the proper height. The cut shows the pump fitted with extra large air chamber. The cylinders, buckets, valves and valve seats are of brass.

The pumps have proven themselves, also, a decided success for whitewashing, the high pressure put on the fluid causing it to penetrate all unevennesses and crevices in the surface. Write to F. E. Myers & Bro., Ashland, Ohio, for their spray pump catalogue.

A telegram just received at the New York office of the Bissell Carpet Sweeper Co. reads: "Judge Severns has just handed in his decision in favor of the Bissell Carpet Sweeper Co." This refers to a suit brought by the Bissell Carpet Sweeper Co. against the Goshen Sweeper Co., of Grand Rapids, Mich., for infringement on their famous broom-action patent. The results, after a hard fight, are exceedingly gratifying to the Bissell Co.

The Withington & Cooley Mfg. Co., Jackson, Mich., have issued an attractive little circular illustrating and describing their potato and other hooks shown in a recent edition. They say that with these—"by hook and by crook"—corn is cut, clams are dug, manure is pulled, potatoes are dug, hops are cultivated, paper pulp is pulled, weeds are eradicated and crushed stone is handled.

E. De Forest Shelton has been appointed temporary receiver of the Franklin Brass & Bronze Co., No. 111 Chambers Street, New York, in a suit brought by the Ousatonic Water Co., judgment creditors for $700. The company was incorporated in April, 1893, with a capital stock of $30,000.

The Supplee Hardware Co.'s Advance Step.

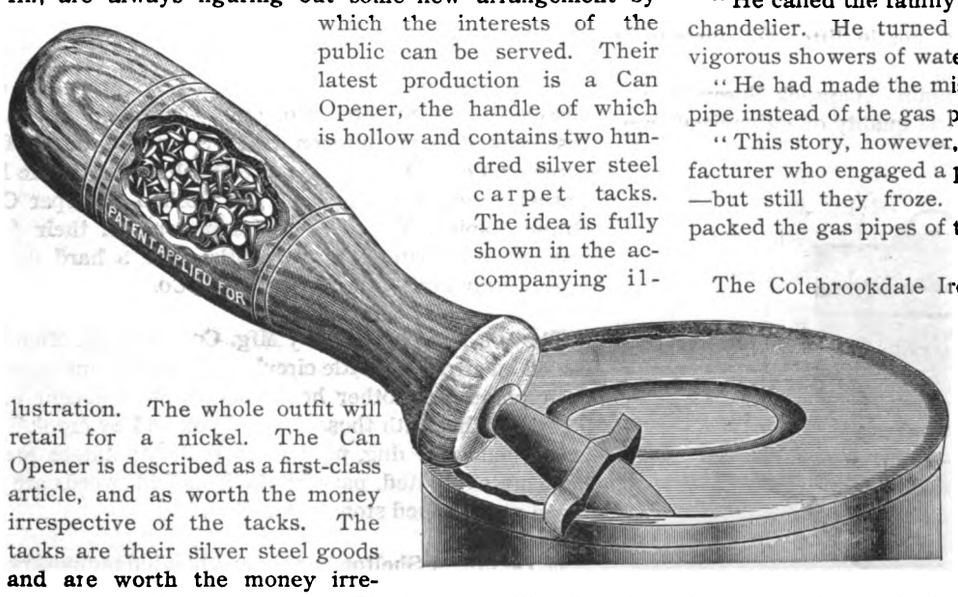
We are able in this issue to make an announcement that will prove of considerable interest to the trade, it being the consolidation of two of the large jobbing houses of Philadelphia.

A short time since William W. Supplee, president of the Supplee Hardware Co., in an address given at one of the banquets of a Hardware gathering, used as his text "In union there is strength."

It appears that his house are believers in this motto to such an extent that they have consolidated their interests with those of Buehler, Bonbright & Co., acquiring by purchase the entire stock of Hardware, cutlery, etc., of this house, together with their good-will, all trade marks, etc., etc., possession being taken on March 27.

The Supplee Hardware Co., by this movement, secure the services of the traveling force previously connected with Buehler, Bonbright & Co., securing the services of the office force and store force, which, together with their already large force in their own establishment, will place them in an excellent position to satisfactorily cater to the wants of the trade, possibly to even a better extent than they have done in the past.

The retiring firm of Buehler, Bonbright & Co. will be represented in the Supplee Hardware Co. by the election of James S. Bonbright, who has been head of the firm of Buehler, Bonbright & Co. for years past, to membership in the board of directors.



The Supplee Hardware Co. are possibly too well known to make necessary any words from us regarding their house. While laying claim to the youngest jobbing house in Philadelphia, they have, since their start in a small way, occupying only a portion of the building at No. 623 Market Street, so increased their business that for some years they have been not only recognized as a leading jobber in their city, but as one of the leading jobbers in the country.

The firm of Buehler, Bonbright & Co, date back to 1827, having been founded by Martin Buehler in that year, and afterwards known successively as Martin Buehler & Bro., Buehler, Howard & Co., and for the last twenty-seven years as Buehler, Bonbright & Co.

This consolidation strengthens an already strong house, and is a marked advance step of a practical business character.

Can Opener and Carpet Tacks.

The Grand Crossing Tack Co., Grand Crossing, Chicago, Ill., are always figuring out some new arrangement by which the interests of the public can be served. Their latest production is a Can Opener, the handle of which is hollow and contains two hundred silver steel carpet tacks. The idea is fully shown in the accompanying illustration. The whole outfit will retail for a nickel. The Can Opener is described as a first-class article, and as worth the money irrespective of the tacks. The tacks are their silver steel goods and are worth the money irrespective of the can opener. The jobbers will sell to the merchants for $4.00 per gross. They will be packed in hinge cover boxes, one-half gross in each box. The company already have assurances that their goods will prove first-class sellers.

Covert Mfg. Co.'s Specialties.

The Covert Mfg. Co., West Troy, N. Y., have issued, under date of January 1, 1895, the following list of specialties, upon each of which there is a discount of 45 per cent. There is an additional 2 per cent. for cash:

Breast Chains: Short Snaps, Giant, New Patent, Bull Leads.

Cattle Ties: Jute, Snap and Thimble No. 524; Jute, No. 524 XX; Cotton; Jute, O.K. Hemp.

Chains: Breeching, Halter, Heel, Post, Rein, Stallion, End Irons, Cart Breech, Girth, Web.

Halters: Hemp, Rope; Jute, Jute 7-16, Web, Web Adjustable; Rope, Adjustable, Jute; Rope, Adjustable, Hemp; Rope, Adjustable, Sisal; Rope, Grazing, Manila; Rope, Grazing, Jute; Combination Adjustable.

Halter Leads: Hemp; Hemp No. 132, with Ring; Hemp No. 138, with Ring; Hemp 38, No. 532 and 533; Cotton.

Hammock Ropes: Jute, Manila.

Hitching Cords: Black, Braided; Hitching Post; White, Cotton.

Horse Ties: Jute, Two Snaps and Thimbles; Jute, One Snap and Thimble; Jute, No. 525 XX; Jute, One Snap and Thimble; Hemp; Hemp, One Snap and Thimble; Jute, O.K.; Web; Cotton Snap and Thimble; Cotton One and Thimble.

Irons: End Cart Breech.

Jack: Troy Patent Jack.

Lariat Tether: Manila, Jute, Picket Pins; Post, Hitching; Pants Stretcher, Rod Post Hitcher.

Snaps: Bull, Centre Breast Chain, Double; Harness Loop, old pattern; Trojan No. 20; Jockey No. 25; Lengthening, R. E., No. 38; Lengthening, R. E., No. 7; Martingale Loop; Open Eye, old pattern; Open Eye, Trojan; Open Eye, Giant; Round Eye, old pattern; Round Eye, Giant; Round Eye, Trojan No. 20; Round Eye, Jockey No. 25; Swivel Loop; Swivel Loop, No. 50, R. E.; Swivel Loop, No. 40, R. E.; Swivel Loop, No. 9, R. E.; Swivel Loops, Heavy, R. E., 1 inch; Snaps and Thimbles, Yankee Loop (Steel Spring); Yankee, R. E. (Steel Spring.)

Soldering Coppers, Soldering Irons, Stales (See Halter Leads), Strap Eyes, Safety Gate Hook, Thimbles, Tuck Loops, Weight Cord, Weight Hitching, Baling Irons, Boot Interfering.

See the Covert Mfg. Co.'s advertisement on page 101 of this issue.

Two English Yarns.

A gentleman who has recently returned from England, regales a HARDWARE reporter with these bits of trans-Atlantic trade gossip: "There was an Englishman who prided himself upon his ability as an amateur plumber. He decided to put gas connections into his house, and do it himself.

"He went to work with a great flourish; hammered, and soldered, and fitted away: and at last came the hour of final triumph.

"He called the family into the parlor, beneath the great chandelier. He turned the taps, with taper in hand—and vigorous showers of water gushed forth over them all.

"He had made the mistake of connecting with the water pipe instead of the gas pipes!

"This story, however, is matched by that of a manufacturer who engaged a plumber to pack all his water pipes—but still they froze. The able workman had simply packed the gas pipes of the establishment."

The Colebrookdale Iron Co., Pottstown, Pa., have purchased from N. R. Streeter & Co., Groton, N. Y., their line of Mrs. Potts' Cold Handle Sad Irons, No. 80 Troy Pattern Polishing Irons, and Pottstown Sad Irons. They have also purchased the machinery for the manufacture of the same, good will, etc.

Mr. Hebler, a Swiss army officer, has patented a new bullet, the penetrating qualities of which are said to be much greater and consequently more deadly than used in the celebrated Mauser or Lebel rifles.

PRACTICAL TALKS TO HARDWAREMEN.

CARRIAGE AND HARNESS.

Since the intense strain is somewhat abated, under which the Hardwareman has been for the past two years, there is a strong tendency, owing to shrinkage in values, to increase the sales by the addition of new lines of goods. Naturally we hear principally of the successful ones, but there are sound teachings in failures.

In looking about for new lines to add, the merchant will make his selection, standing squarely on his knowledge of general conditions. Too many fail to consider, or attempt to study, these conditions. There is as much individuality in stores as there is in people, and as one person is better fitted for success in a particular field than another, so is a store in one locality more likely to meet with success in a new line than another store in a different locality. This may be illustrated by a review of the Carriage and Saddlery trades, with the object in view of pointing out the favorable and unfavorable conditions attending the addition of either.

In Ohio, a few years since, it was no uncommon sight to see long lines of carriages and buggies strung behind a team of horses on their way to the Ohio River, there to be loaded upon steamboats and shipped South.

At every cross-road there were carriage-shops busy all winter making, trimming and painting stock, in readiness for the spring rise in the river. In the towns, carriage and saddlery Hardware constituted, in value, at least half of the Hardwareman's stock. The carriage makers received good prices for their finished work; the merchant ran little risk in collecting his accounts, and the wholesaler in the East could sell and collect thousand-dollar orders with comparative ease.

The demand for finished work, brought into the field a new element: the Factory.

The owners of the small shops, accustomed for years to the existing conditions, could not realize a change possible, and struggled on in vain. The factories sold finished-work at what was cost to the cross-road shops, the owners of which, after losing nearly all they had, gave up, of necessity; either turning their shops into general repair shops, or becoming salesmen for the factories.

Some Hardware merchants, wiser than their fellows, took the hint conveyed in their first losses and immediately commenced reconstructing their business; instead of abusing the factories for the loss of their trade, they opened negotiations with them, trading their carriage cloth and trimmings for finished work, and turning their warehouses into repositories.

The history of the saddlery business parallels the carriage making industry. The saddlers in the towns had fewer and fewer demands for fine hand-made harness. The factories made "hand-made" harness also.

Again the town merchants added to their stock factory-made harness, reducing their stock of saddlery hardware to the minimum.

A certain firm, under energetic management, was pushing ahead, ever on the alert for new lines. They had heard of the success of a neighboring firm with their buggies and harness, and reasoned "if they can sell them why can't we?"

This neighboring firm was located in a large town with a good farming trade; their store was where the farmers congregated.

The first mentioned firm, on the contrary, were located in a city just large enough to throw them out of contact with the farmers, who, when wanting vehicles, went to the implement houses. This firm paid no attention to the study of conditions, and bought farm-wagons, buggies, carts, double and single harness; with commendable energy advertised on fences and sides of barns for ten miles out, even sending a man to drum up the farmers, but the farmers would not draw. Sales made to a few sly ones at nearly cost, failed in their purpose, and finally the vehicle and harness end of the business was abandoned.

Imitation, is a bad substitute for penetration. Those who decide to adopt a plan another dealer found profitable, do not always meet with the success they think their follow-the-leader plan deserves.

SUGGESTIONS FOR WINDOW SIGNS.

The merchant's show windows are generally considered one of his best mediums for advertising, though his efforts are usually confined to the arrangement of goods for display. The height of the modern show window presents a large expanse of plate glass, which is generally neglected, although the glass affords splendid advertising space.

If any signs at all are used they are suspended as near as possible on a line with the range of vision. The judicious use of the top of the window may attract the attention of passers-by on the other side of the street; with this end in view the means used may be bolder than that intended for close inspection.

Presuming the reader to be familiar with the use of whiting-signs on the outside of the window, the following plans are suggested for use on the inside:

A strip of black screen wire about two feet wide, extending the width of the window, may be used as an invisible background in making a sign. Suppose it is desired to advertise weather strips, the shape of the letters may be outlined on the screen with white chalk, before the screen is hung, and may be about twelve inches high, using the word "Weather Strip" to form the letters, fastening to the screen with fine black wire. If a more striking effect is desired than that produced by the stained moulding it may be painted white. When the sign is completed it can be rolled up and carried to the window, where it should be suspended near the top and close to the glass. Wires running from the top of the window to the sign will prevent it from sagging.

Screen wire can also be used to advantage to divide a wide window into two parts, with the wire forming an invisible partition, hanging from the top and tacked to the bottom of the window. Upon this small, bright articles may be fastened, such as spoons, scissors, drill bits, etc.

To a person outside the window the screen is not noticeable, while the articles attached seem to hang in mid-air, having the advantage of being seen from both sides.

Very effective glass signs may be made by using a large light, 18x40 inches, pasting upon this four inch, white gummed letters. If painters' goods are being advertised the centre may be used for the wording and each end for a design, made by combining paint colors cut from a sample card.

These signs can be suspended by using brass jack chain of suitable size (No. 14) and in length the same as the width of the glass. To each end of chain fasten an "S" hook. The hooks will clasp the edges of the glass and hardly show from the front. With such a holder at each end of the glass the sign can be fastened to pieces of sash chain, hung from hooks in the ceiling of the window, but *close to the glass.*

Brushes, glued to the glass, make very ornamental designs, the neatest way to glue them on being to cut a piece of paper the width and length of the handles, glue this to the brush and then to the sign.

Circular pieces of glass may be used for signs, which should be at least two feet in diameter. They can be sus-

Digitized by Google

pended by using three-quarter inch brass curtain rings, which, when pressed with a pair of plyers, will close in just the right shape and sufficiently tight to press the glass on each side; short pieces of jack chain connect the rings and the whole makes an ornamental margin to the sign. If the top of the window is square the round sign should be hung nearest the top, with the rectangular one a little below.

SHOP TALK.

One morning when, by mistake, we had arrived at the store ten minutes before the arrival of the boss with the keys the men were amusing themselves relating their experiences with various customers.

"Why is it," asked the Tool Man, "that so many people get 'twisted' with corkscrews and screwdrivers?"

"Nature of the tool," suggested the Cutlery Man.

"Whatever the reason," continued the Tool Man, "I have observed the almost universal confusion of a screwdriver and corkscrew. It is an everyday occurrence, with ladies as well as men, only a lady asks for a corkscrew and a man for a screwdriver, and then look at you so surprised."

"Or when they want a 'lid lifter," said the Stove Man, "nine people out of ten ask for a 'stove lifter.'"

"Did you ever notice," remarked the Cutlery Man, "how a man or a woman express themselves when at a loss for a name?"

"What's in a name anyway?" interrupted the Tool Man. "The woman who asked for 'clear' tacks got what she wanted as quickly as though she had asked for 'tinned' tacks. Such requests give opportunities for mental gymnastics, and thus relieve the lethargic tendencies incident to continuous routine work."

Without apparently observing the interruption the Cutlery Man continued:

"The other day a lady came rustling into the store; she was one of those nervous, bustling little women, and she wanted a pair of 'twinchers.' Noticing my blank look she said, 'You know, like this,' making a motion with her thumb and forefinger that at once suggested 'tweezers.' When a man wants an article he can't name he gets out a pencil, tears the back from an envelope and proceeds to give an 'idea.'"

"A lady gave me an idea," again remarked the Stove Man, "on selling gas stoves. While showing them to her she asked some question to which I confessed ignorance. To my surprise she said, 'Well, you may send me this one. I asked Mr. —— (naming a competitor) that question and he told me so much I did not know what to believe, but I *do* believe you.'" SHOP MAN.

The "Lu-Mi-Num" Catalogue.

The St. Louis Refrigerator & Wooden Gutter Co., Main Street and Park Avenue, St. Louis, Mo., stand pre-eminent as manufacturers of the "Lu-Mi-Num" bicycles. The company state, in a handsome catalogue just at hand, that "thousands of 'Lu-Mi-Num' bicyles are now in use in all parts of the country, giving the utmost of satisfaction to riders of all classes, and more thousands are wanted. Skeptics and doubters have become converts and enthusiasts, and the 'Lu-Mi-Num" has taken its place along with the ball-bearing and pneumatic tire as one of the great and essentially important improvements in the art of cycle manufacture, and perhaps the greatest step yet taken in the rapid evolution of improvement." They further state that "the metal used in the manufacture of these machines is a transformed aluminum, having the same relation to the aluminum of commerce that steel has to iron. Any one at all familiar with metals will see the force of this comparison at a glance. Iron is a natural metal produced from ore. Steel is iron transformed by mechanical and chemical processes into a new and artificial metal, possessing new and more valuable qualities, and also retaining all the best qualities of iron; but in the process of transformation these qualities are so greatly improved as to render the relationship of the two metals scarcely distinguishable, except from the fact that they are both the product of the same original ore. Steel is merely improved iron, and 'Lu-Mi-Num' is merely improved aluminum. Aluminum in its common forms or with its common alloys—in other words, the aluminum of commerce—is not at all suited for use in cycles. The metal aluminum has many characteristics peculiar to itself, and is thoroughly well suited for many purposes; but it is wholly lacking in the necessary life, resilience, stiffness, hardness or strength required in the parts of a bicycle. The more a person knows of aluminum the less likely he is to believe in our claims. One who is informed regarding the metal knows that endless labor and money have been expended in endeavors to construct bicycles from aluminum, and that the results have been failure. Therefore, when he reads that we have an aluminum bicycle, claimed to be far stronger than steel, he shakes his head and says either 'fools' or 'liars.' On the other hand, the man who knows really nothing of the metal is ready to believe the most sweeping fairy stories, and is wholly apt to expect altogether too much. He cannot see why we do not build a roadster at ten pounds weight or a racer at five pounds. The point on which we wish to inform the public most clearly and definitely is that the metal we use is not used or known by any one else. Our metal is an alloy consisting of about 96 per cent, purest refined aluminum, and about 4 per cent. of other substances, the whole combined and treated by an entirely new process, both chemical and mechanical. The result is a metal which is, bulk for bulk, about the same strength as the best wrought iron, and only one-third as heavy. Weight for weight, our metal shows about double the strength of any steel which can be made up into cycle tubing and brazed together, and it actually shows a higher tensile strength and modulus of elasticity, weight for weight, than any steel."

The catalogue they have just issued is a handsome and instructive work, thoroughly illustrated, and will be sent on application.

The Humber This Year.

Humber prices are attracting attention this year. Now that the standard bearers of Beeston have organized a branch in this country, genuine Humbers can be purchased at prices lower than ever before, but the firm still has the unique distinction of making a wheel at $100. Their Roadster, a 21 pound wheel, at $110, is the lowest priced article in their catalogue, and, further than this, they wish it to be emphatically understood that there is no deviation from their list figures. "Humber prices when set are fixed for the season," say the firm, "and they are as immutable as the laws of the Medes and Persians. We pride ourselves on giving value for value, and a Humber at $110 is full value,—one hundred and ten dollars' worth. All discounts were deducted before fixing the list price, and a cyclist in buying this wheel is getting much more for his money than if he purchased one of the class listed far in excess of its value in order that buyers may be enticed by a show of making discount."

E. J. Hussey & Co., No. 80 John Street, New York, are circulating an attractive little booklet describing their line of store ladders. The bicycle stepladder is the latest addition to an already large line. It is described as "the best ladder with wheels or rollers. This ladder can be used in any store, and putting it up necessitates no changes or alterations. It has a firm foundation and does not hang, and is carried upon two wheels that run on a track." It is stated that the ladder is perfectly safe, being steadied at the top by hooks, and never tips or wiggles.

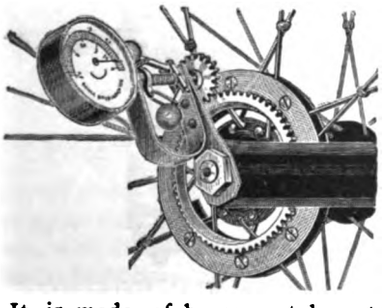
The National Shoe & Leather Bank.



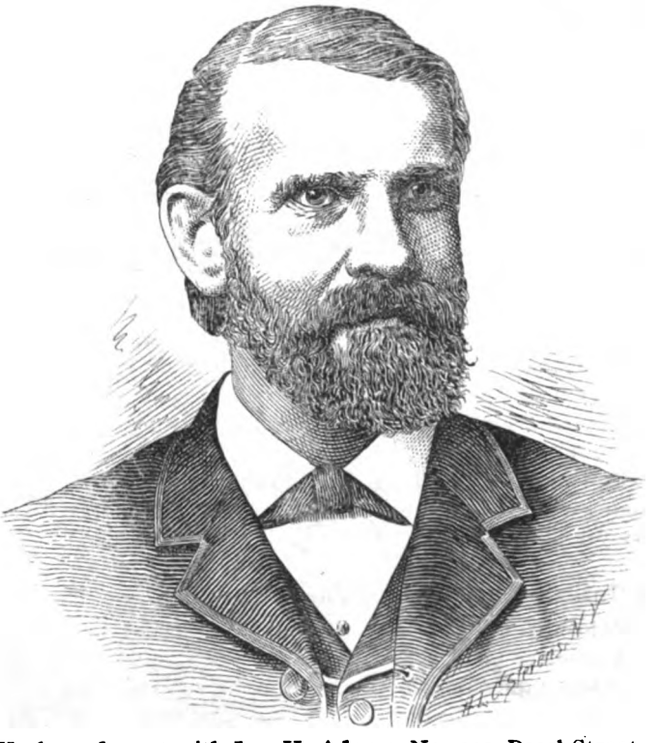
The long established and well-known National Shoe & Leather Bank, New York, is now in a better condition to serve the community, and especially the Hardware district in which it lies, than it was ever before in its honorable and successful career. Located at the corner of Broadway and Chambers Street, it is within the immediate reach of the Hardware interests, and is but a few doors from the Hardware Club, where that trade each day congregates.

Under the new management into whose hands the Bank has recently passed, it has been made stronger and better than ever before. Every doubtful asset has been elimivated from its accounts, and additional capital has been subscribed in an amount that more than makes this up. In the recent accession of the new officials, may be found the best possible guarantee of its future, John A. Hiltner succeeded the late George L. Pease as vice-president, and John I. Cole takes the responsible position of cashier. Francis B. Griffin, well-known as a prominent member of the Hardware trade, became a director. The most modern methods known to the banking world, for the safety of deposits, and investment of funds, have been provided. The bank is one of the oldest institutions of its kind in New York, and under the new management, its future is sure to more than equal its usefulness, success and high reputation of the past. It will be conducted in accordance with the newest, safest, and most approved banking methods of the present day. Its deposits now amount to over $3,000,000.

John A. Hiltner, the new vice-president, was until lately the assistant cashier of the Fourth National Bank, with which he had been connected for six years. He is a native of Philadelphia, having been a member of the sugar firm of Perkins & Welsh, in that city, before his entry into the banking world of New York. He has had a wide mercantile experience, and is well posted in the up-to-date methods, which will be applied to the management of the National Shoe & Leather Bank. John I. Cole, the new cashier, is fully experienced in banking methods, having been for eleven years employed by the Fifth Avenue Bank. For the two years prior to his appointment in the Shoe & Leather Bank, he acted in the capacity of chief assistant to the National Bank Examiner. Francis B. Griffin, one of the new directors, is a member of the firm of C. E. Jennings & Co., of this city, and is well-known to the Hardware trade, The other directors are: William C. Horn, James G. Cannon, John A. Hiltner, John P. Hegeman, Theodore M. Ives, Joseph S. Stout, John M. Beach, Thomas Russell, Alonzo Sloate, John M. Crane and Haley Fisk.

A New Speed Indicator.

The illustration here shown is a Speed Indicator for bicycles and sulkies. It gives the speed from four minutes to one and one-half minutes. It is very sensitive, simple and accurate, and can be tested by anyone without special



appliances. It is made of brass metal parts, the gears being fiberoid to render them noiseless. The American Indicator Co., of Lawrence, Mass., are the inventors and manufacturers, and will be pleased to send descriptive circulars on application.

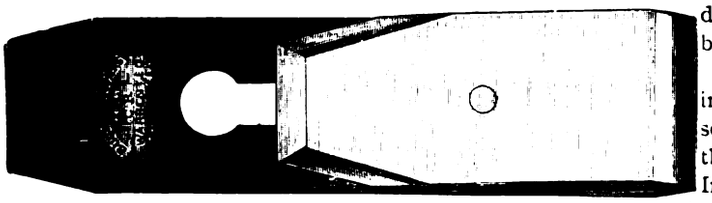
HARDWAER "Prices Current" are reliable.

C. W. Dunlap: Fifty Years in Hardware.

A half century is a long period for the pursuit of one vocation, and C. W. Dunlap, of New York, is one of the few men who are permitted to point to a record of this character. In 1894 he completed his fiftieth year as an active Hardwareman; and may still be found in active labor at his headquarters, No. 88 Chambers Street.

Mr. Dunlap was born in Hartford, Conn., in 1830, and in 1844, when a boy of fourteen, he entered the Hardware store of John S. Gray & Co., in Hartford, where he remained for three years. He then came to New York, and found employment in the house of Wolf & Bishop, on the corner of Gold Street and Maiden Lane. In 1851 he purchased the stock of a retail Hardware dealer on Fulton street, Brooklyn, and went into business on his own account. He continued there for three years, and in 1855 he went to Milwaukee, Wis., having made arrangements with the firm of Colgatt Bros., a Hardware jobbing concern. The climate not suiting his constitution, he returned to New

York, and went with Jos. H. Adams, No. 242 Pearl Street. The firm was afterwards known as Adams & Coombs. In 1858 he left this concern and engaged in the Hardware commission business with his brother-in-law, Henry Burtis, under the name of Burtis & Dunlap. The firm was succeeded by Dunlap & Mead. Soon after this he went to Binghamton, N. Y., and was for a short time with ex-Lieutenant Governor Jones, interested in the manufacture of scales, and now for nearly thirty years he has been engaged in the manufacture of kitchen Hardware and garden tools, at his present location, No. 88 Chambers Street.



Death of George H. Sickels.

George H. Sickels, of Albion, N. Y., brother of Robert Sickels, of Sickels, Sweet & Lyon, who recently died at Albion, N. Y., was at one time connected with the Hardware trade. He furnished the capital for the Hardware firm of T. Clay & Co., Davenport, Iowa. This firm was succeeded in 1863 by Sickels & Preston, Geo. H. Sickels retiring, Mr. Sickels, now of New York, buying his interest. The Davenport firm continues as Sickels, Preston & Nutting Co. Mr. Sickels spent most of his life in Albion, though at one time he was connected with a large paint and oil company in Chicago. He was of a kindly disposition, and made many friends, and was greatly loved and respected by all who knew him. As a mark of respect to his memory, all the business houses in Albion closed on the day of the funeral.

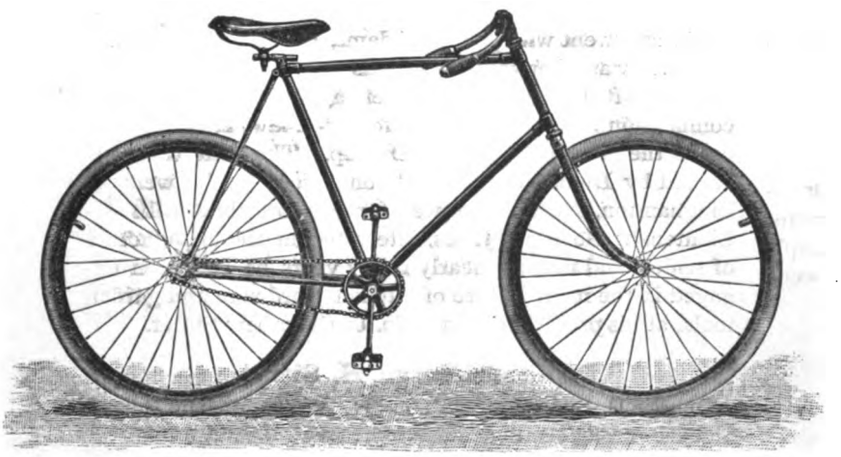
Buck Bros.' Iron Planes and Chisels.

Owing to the general use of Iron Planes, there seems to be in the minds of some an idea that Wood Planes are going out of use. Buck Bros., Millbury, Mass., inform us that the demand for the old English pattern Cut and Double Irons of their manufacture still keeps up, and they believe there will always be a use for wood planes on many kinds of work. Their Irons are made in all the sizes of Cut,

Double and Plane, the same pattern as the English, and are warranted equal to the best imported iron.

Chisels with beveled edges have become very common in the market the past few years, and to many the knowledge of such Chisels is of comparative recent date. Buck Bros. have made Beveled Edge Chisels for many years, and at the Centennial Exposition in Philadelphia in 1876, their Beveled Edge Chisels, with other tools, were awarded a prize. There is considerable difference in the bevels put



on Chisels by the various manufacturers. The bevels on the edges of Buck Bros.' Chisels are wide and deep, entailing hard manual labor, as they are entirely hand work and especially trying to the wrists of the grinder, and great care must be exercised that the temper is not drawn when beveling the thin edges.

The tools made by Buck Bros. are known by the Buck's Head stamped upon them, and have been known for more than forty years for their fine cutting qualities.

McIntosh-Huntington Wheels for 1895.

The McIntosh-Huntington Co., Cleveland, O., first interested themselves in bicycles about five years ago. At that time it was a question whether or not the sale of the

bicycle belonged to the Hardware trade—a question that has since been demonstrated to the entire satisfaction of every one, and in a manner well-known to all our readers. After deciding to institute a bicycle department, a new difficulty arose, and that was the selection of a suitable name for their leading machine. The name "Sunol" was finally decided upon, in honor of the great race horse which at that time led all others. From this fact was developed their motto, "The Sunol Leads," which has been so prominent a phrase in the company's advertising, which has been so extensive that every one is familiar with it. At first the sale of the "Sunol" was limited, as is the case with all strictly new machines. Perseverence, however, and a fixed purpose of furnishing dealers with a bicycle upon which no expense had been spared, in order to make it strictly first-class, finally overcame the keen competition, and in the second year they found that their bicycle department had assumed such proportions that it could no longer be handled as a line of goods in the general Hardware trade, but must be separated. This they therefore did, and set aside for the purpose two entire floors of their building—one for a salesroom and another for stock.

Since then the department has steadily grown in size and importance, until to-day the number of wheels sold each season is very large indeed. We have told in a few words the experience of one of the leading houses of the country. In the illustration the No. 8 1895 model is shown. The McIntosh-Huntington Co. have just issued their catalogue, which tells all about it, and notice of which may be found elsewhere in this issue. Interested parties will do well to send for and study it carefully before deciding upon their 1895 line. The catalogue also describes their line of other high-grade machines, and also medium grades.

Goodell's No. 6 Breast Drill.

The H. H. Mayhew Co., Shelburne Falls, Mass., are offering to the trade Goodell's No. 6 Breast Drill which is herewith illustrated. The chuck is three-jawed and has a capacity from 0 to ½ inch. It is double geared, one gear remaining "idle" and acting as an anti-friction bearing when the other is at work. All gears have cut teeth. It has two speeds and can be changed from fast to slow by turning the thumb-screw at "A" until the letter representing desired speed is nearest the chuck. The breastplate is adjustable and its position can be changed if desired. The makers state that it "is by far the most complete tool of the kind on the market." Price, per dozen, $48. Each drill packed in a wooden box. Those who know the high char-

acter of the goods made by the H. H. Mayhew Co., need not be told that any guarantee as to quality, etc., given by them, will be carried out to the letter.

The Standard Axe & Tool Works, Ridgway, Pa., have put on an increased force, to turn out axes to the full capacity of their new plant. This is a healthful indication that the good times are close at hand.

THOMAS JESSOP,
LATE CHAIRMAN.

WILLIAM JESSOP,
FOUNDER.

WILLIAM JESSOP,
PRESENT CHAIRMAN.

BRIGHTSIDE WORKS.

Jessop's Steel.

Above is a view of William Jessop & Sons, Ltd. Brightside Steel Works, Sheffield, England, with portraits of three generations of the Jessop family who have controlled the business since it was founded in 1793. The quality and reputation of "Jessop's Steel" for tools, etc., is still unrivalled. The general manager of the American agencies is Mr. W. F. Wagner, and the principal warehouse in this country is at No. 91 John Street, New York City.

Price List National Saw Co.

The National Saw Co., with general offices at Newark, N. J., have under date of April 1st, 1895, issued their Price List of Saws, with discount sheet, which replaces all prices and quotations heretofore given. It is a handsome book of near two hundred pages, illustrating and describing every form, size and style of saw known to the ingenuity of man. The great variety may be understood when it is remembered that the company operate the works of Richardson Bros., Newark, N. J.; Wheeler, Madden & Clemson Mfg. Co., Middletown, N. Y.; Harvey W. Peace Co., Brooklyn, N. Y.; and Woodrough & McParlin, Cincinnati, O. The high character of their goods is too well-known to require mention upon that point. In addition to describing their great line of saws, the company also show many other articles made by them, among which may be mentioned slaw cutters, currier blades, turning webs, felloe webs, fay webs, butcher webs, billet webs, plastering and brick trowels, swages, butcher blades, saw screws, saw handles, cabinet scrapers, wall scrapers, butcher block scrapers, baker scrapers, mitre rods, etc., etc. About all that a Hardwareman needs to know on the saw question is found in this book, with a great deal of information upon other subjects besides.

B. D. Washburn, dealer in Hardware specialties, No. 149 Congress Street, Boston, makes elsewhere in this issue an announcement that should interest the trade. He has become so thoroughly interested in the real estate business that he offers to dispose of his Hardware line at a sacrifice. The great discounts upon these goods are announced upon page 115 of this issue, and are well worthy the attention of dealers,

The Atlas Tack Corporation, Boston and New York, have issued, under date of March 30, 1895, a Shoe-Finders' price-list of shoe nails, shoe tacks, etc.

Digitized by Google

THE HARDWARE CENTRE OF NEW YORK.

In the olden days when a visiting Hardwareman desired to see the leading members of the trade, either for business or social purposes, he took a couple of days to it, and went up and down the streets of the Hardware district looking for numbers and signs, climbing stairways and riding in elevators, finding his men in when luck favored him and more often finding them out, and, in short, developing the muscles of his legs at the expense of his temper and peace of mind. This was the condition that confronted the Hardwareman from elsewhere prior to that pleasant June day in 1894 when the doors of the New York Hardware Club were thrown open to the trade.

In those dark ante-Club days the resident Hardwareman who felt in need of a lunch carried himself wearily to the nearest restaurant, crowded himself into a corner, ate as little as he could keep alive upon, and hurried back to his store or office in no very pleasant frame of mind. If it was necessary for him to call upon his neighbors in the business, he made the rounds of Chambers, Reade and Warren Streets, uncertain as to his finding the parties for whom he was in search.

All this has been changed. When the Hardware visitor comes to New York, about the first place he seeks is the corner of Broadway and Murray Street, where the magnificent Postal Telegraph Building looks down upon lower New York, and within which he finds a temporary home in the rooms of the Hardware Club, introduced by the word or card of some friend, if he does not happen as yet to be a non-resident member of that great organization.

And it is to this same common center that the resident Hardwareman hies himself at the lunch hour, sure of accommodations, food and service of the best kind; sure of meeting the visitors from out of town, and, above all, most certain of greeting his neighbors in the trade of New York. It would be impossible to mention the amount of important business that is transacted within those club rooms each day.

No wonder, therefore, that we call the Postal Telegraph Building on Broadway and Murray Street "The Hardware Center of New York."

The location is convenient to the trade; the club has had much to do in making it permanently the center, and the building in which the club is housed is certainly one which any organization or any trade might feel proud to call its home.

On the page opposite we give a view of the building, the top floor of which, as will be seen from the lettering, is occupied by the Hardware Club. Two express and several way elevators carry the visitors to the club rooms, the way elevators being especially useful to club members who are located in the building, and their guests.

It is not surprising that there should be many members of the club housed within the building. Two causes lead logically to this result.

It was only natural that when this great and magnificent structure was thrown open for occupation many of the Hardware and allied trades should seek their homes within it, that they might be near the club and within immediate reach of the many out-of-town Hardware and metal men who were sure to visit it daily. On the other hand, those who were tenants of the building, even though not of those trades, naturally sought membership in the club because of its convenience. It is therefore but natural that the elevators are constantly carrying visitors between the club room and the offices down below.

A glance at the bulletin boards in the lower corridor shows that many of the trades above named have followed the natural business instincts to be near the club, some of the leading members thereof being as follows:

American Axe & Tool Co.
Home Rubber Co.
Middlesex Rubber Co.
Empire Brass & Metal Works.
Pittsburg Wire Co.
American Forcite Powder Mfg. Co.
Sterling Steel Co.
Imperial Electric Lamp Co.
Eaton, Cole & Burnham (Iron).
Geo. J. Crossman (Hardware agent).
Pohli Air Lift Pump Co,
Ship Copper Plating Co.
St. Louis Register Co.
Bridgeport Brass Co.
Bundy Mfg. Co.
Bordeaux Dynamo Brush Co.

Fortune favored the Hardware Club in the selection of a permanent home. The governors of that organization were looking about for a location: and, although many were suggested to them, it was deemed that patience was the better part of wisdom, and that no step should be taken until the right one was possible.

At the right moment, there came the knowledge that a great building suitable as to location, size, elegance of finish, and character, was to be constructed on the corner of Broadway and Murray Street, where both rivers, the City Hall Park, and all lower New York, could be overlooked. The fact that the Postal Telegraph Cable Company was to erect it, was a guarantee that everything would be first-class; and when the plans were examined, and the fact learned that the officers of the company were not only willing to make good terms to the club, but also to fit the floor up just as the club desired, the negotiations proceeded rapidly, and long before the building was completed, the New York Hardware Club was set down as a tenant for ten years.

A glance at the opposite page will show just what the Postal Telegraph Building is. It has a frontage of 70 feet on Broadway, and 156 feet on Murray; with an L in the rear measuring 50 by 30 feet. It is fourteen stories high, the top floor being occupied by the Hardware Club. The frame is of steel; and the walls of Indiana limestone to the fifth story, gray brick being used above this, with appropriate trimmings. The interior is in keeping with the exterior, and is handsomely finished throughout, the woodwork being of birch. The floors are of cement tiles.

On the ground floor, with entrance from both streets, are found the receiving and delivery offices of the company—and more elegant entrances and offices cannot be found upon the continent. The finishes are in marble, and the great staircase, in material of the same sort, is in an artistic sense, one of the most attractive that can be anywhere seen. In all the floors, whether fitted up for the use of tenants or telegraphic purposes, nothing has been omitted to add to comfort, convenience, light, air, warmth and service—in short, an ideal office building of the modern type.

The officers of the Postal Company, many of whom are members of the Hardware Club, have shown their desire to aid the club in all possible ways. This same good will extends to the trade generally. Tenants who have found homes within this great building speak of its comforts and convenience in the highest possible terms.

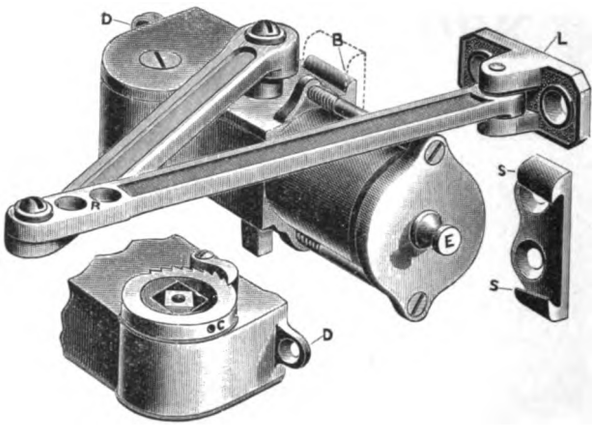
Douglas Emulsion Knapsack Sprayer.

The illustration here shown is of the latest (1895) Knapsack Spraying device of the W. & B. Douglas Co., Middletown, Conn., and Nos. 85 and 87 John Street, New York city, and No. 197 Lake Street, Chicago. It has for its object the mechanical mixture of kerosene and water or any two liquids desirable to use. The kerosene is placed in the small tank holding 1¼ gallons, which is attached to the main reservoir by two clips at the side near the top. A quarter-inch hose connects the kerosene tank with a brass pipe connecting with the cylinder of the pump just below the ball valves. A stop cock is provided to regulate the flow of kerosene. The flow of water is regulated from the thumbscrew at the top of the tank. The kerosene tank is readily detachable from the main reservoir, making sprayer as convenient as the ordinary style, where mixture of liquids is not desired. "The home manufacture of kerosene emulsion has not been generally successful. The Missouri Agricultural Station says experiments with this invention show that kerosene and water are so thoroughly mixed in the act of pumping that the kerosene is as harmless to

foliage as in a prepared emulsion of the same strength, and the Delaware Station recommends the Emulsion as the most efficient machine for the use of ammoniacal carbonate of copper."

Price, complete as shown in cut (copper tanks), $20. Liberal discount to the trade.

The Douglas Co. make a full line of barrel and hand-spraying pumps, and every up-to-date agricultural and Hardware house should have their special catalogue and hints on spraying.

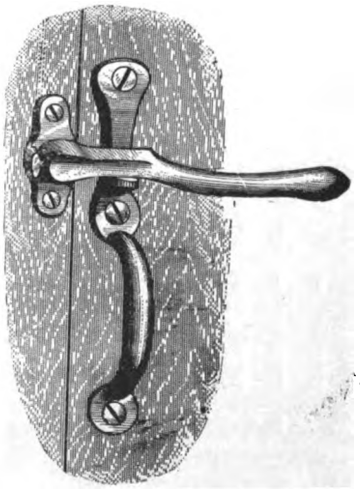


Royal Door Spring and Check.

The illustration here given shows the Royal Door Spring and Check, manufactured by John Toler, Sons & Co., Newark, N. J., and for whom W. H. Quinn & Co., No. 103 Chambers Street, New York, are the sole agents. This is a new device for closing doors and checking them by compressed air, instead of liquids. The points of superiority claimed for these springs are as follows: "Easiest attachment; does not require a skilled mechanic to put them on; doors open easily; no liquids to freeze up or leak; easy adjustment, compact, strong, durable, and at a price much lower than any check in the market." The list and sizes are as follows:

No. 1, for light screen doors	$2 40
No. 2, for medium inside doors	3.30
No. 3, for vestibule or hall doors	4.30
No. 4, for large store or church doors	5.60
No. 5, for extra large doors	7.00

Discount, 40 and 10 per cent.



The following are the directions for attaching: "Place the shoe, S, in an upright position six inches from back of door and flush with the top, fasten securely, and slide the check into the shoe until the lugs, B, fit solid; then put in the end screw, D, and bring the arm, L, down to the tran-

som rail till it rests firmly; then put in the screws and the spring is ready for adjustment. In adjusting the spring the thumbscrew, E, regulates the air check. If the door slams, tighten it up; if it checks too soon, loosen it. It should check about three inches from the closing. If the spring is weak, increase the tension by turning up the ratchet wheel, C, one cog. Care should be taken that the spring is not made too strong. If the spring swings the door easily it is strong enough. Regulate the closing by the screw, E. In case that the transom rail has a raised molding, shorten the arm, R, by placing it into the next hole. Also in putting the arm on the pintle see that it is securely fastened and rigid. The checks are reversible for right or left-hand doors by simply changing the arms from one side of the pintle to the other." Attention is called to advertisement on page 113.

"Ideal" Refrigerator Fastener.

Brabson Bros., Newark, N. J., are placing upon the market the new "Ideal" Refrigerator Door Fastener here shown. It has a handle and wedge combined, suitable for right or left hand doors; is described as simple, durable, practical. They are packed in boxes of one dozen each, so that dealers can handle them in better shape than if shipped loose. They also make a line of hinges, for all

kinds of refrigerators, and will be pleased to send prices and descriptions upon application.

The Chamberlin Cartridge & Target Co., Cleveland, O., are distributing the price-list of their celebrated high-grade cartridges, Chamberlin nitro-powder cartridges, Walsrode powder cartridges, and the Blue Rock targets, traps and pulls.

THE GREAT SPORTSMENS' EXPOSITION.

The week of May 13th to 18th will witness an event unprecedented in the history of sports in this country. The influence will be wide and far reaching, as the movement is receiving the hearty endorsement of the more educated and intelligent classes. The chance to see and learn about every branch of sport, will be unrivaled, and those who do not attend will miss the most interesting exhibition of its character ever held in this city. Every arrangement for the comfort of visitors has been made—reduced railroad fares, etc. The official catalogue is now being arranged, and it will present to the manufacturer and exhibitor a valuable means by which their specialties may be placed before the visitors and buyers. The Board of Trustees have shown an earnestness of purpose that deserves to be crowned with complete success.

TREASURER DRESSEL.

It is with pleasure that we here present the portraits of a couple of gentlemen who have worked early and late to make this Exposition a success. J. A. H. Dressel, the genial treasurer, is well fitted to fill that post. He is a native of New York City, born in 1853. He is well-known in business, military and Masonic circles, being prominent in all three. Mr. Dressel is the general agent of the Union Metallic Cartridge Co., and for the past fifteen years has been closely allied to the interests of Hartley & Graham. He is treasurer of the Interstate Manufacturers' & Dealers' Association and also chairman of the executive committee. His Masonic connections are numerous. He is a member of the Anglo-Saxon Lodge 137 of the F. and A. M., also of the York Chapter and Council. He is a thirty-second degree Mason, a Noble of the Mystic Shrine, a Knight Templar and belongs to all the Scottish rite bodies and Commandery, and is a member of the Aurora Grata Club of Brooklyn. Mr. Dressel's military career is so well known that it will only be repeating history to record it. He has served long enough in the Twenty-second Regiment and the Seventy-first Regiment of New York and the Thirteenth Regiment of Brooklyn to become a veteran in each. In 1887 he was commissioned a captain by the Governor of New York, and as a supernumerary is still on the rolls of the State militia. He has a cordial manner, a keen perception, and is a tireless worker.

J. A. H. DRESSEL, TREASURER.

SECRETARY WEBSTER.

Frederic S. Webster, the secretary of the Sportsmen's Exposition Association, is a man eminently fitted to hold such a position, both from his wide knowledge of natural history, and his close acquaintance with sportsmen generally. He is a keen sportsman himself; is forty-six years old, being born in 1849. In 1868 he found employment with the dry goods firm of William I. Peake & Co., New York. He remained with the company four years, and during the time he was employed there filled positions of trust, collecting for the house and acting as disbursing clerk to the numerous employees. At the end of four years his physician ordered him to take a rest on account of poor health. He took his gun and went to the woods, and here his love for natural history was aroused and he made it his life-study. He studied for eleven years at Rochester, N. Y., under Doctor Ward in Ward's Science Establishment. From Rochester he went to Washington, and became an expert in his profession, mounting many zoological groups for the National Museum. A year prior to the World's Fair his services were in great demand by the Bureau of Animal Industry, for whom he made a set of wax models showing all the diseases of the horse. These were exhibited at the World's Fair. In 1892 he returned to New York and embarked in his present business. Mr. Webster is a member of the Biological Society of Washington, D. C.; Rochester Academy of Science, Rochester, N. Y.; American Ornithologists Union, Society of American Taxidermists, associate member American Kennel Club, secretary Pointer Club of America, delegate of the Northwestern Beagle Club, formerly secretary of the Washington City Kennel Club, and one of the legislative officers of the American Kennel Club.

FREDERICK S. WEBSTER, SECRETARY.

Hon. George M. Landers.

Hon. George M. Landers, vice-president of the Landers, Frary & Clark Co., who was well known as one of the leading manufacturers of New England, died of heart failure, at his residence in New Britain, Conn., on March 25th, at the age of eighty-two. His illness was brief, and it was only a few days before his death that he was a visitor in Hartford, where he met and greeted his old friends in the hopeful and felicitous way that had always characterized his visits. His death is regarded as a public loss throughout the State, which has long been the beneficiary of his public services.

Mr. Landers was born in Lenox, Mass., on February 22, 1813, the son of Marcellus and Marietta Hoyt Landers. His grandfather was Capt. Asahel Landers, who served in the Revolutionary army, and was with Gen. Anthony Wayne at the capture of Stony Point. His father was in the war of 1812. The boy was but seven years of age when the family removed from Lenox to Hartford, Conn., where the father became a teacher in the public schools. On the death of the father, in 1824, the lad returned to Lenox, and there resided until 1830. At the age of sixteen he commenced to

learn the trade of a carpenter and joiner. In 1840 he engaged in the manufacturing business with Josiah Dewey, and in 1853 organized the Landers & Smith corporation. In 1862 the firm of Frary, Carey & Co., of Meriden, was bought out, and the firm of Landers, Frary & Clark was organized for the manufacture of Hardware and cutlery. Table cutlery was added to the line of coat and hat hooks, etc., already made; the Aetna Works were built, and the business grew steadily. These works were destroyed by fire in 1874, but were immediately rebuilt on a larger scale. Mr. Landers, it is needless to say, was an active figure during these years of busy advance, and lived to see a great corporation, which now occupies so important a position in the Hardware and cutlery world, with its capital of $500,000, employing 600 men and more. When he retired from active labor in connection with the company, he had the satisfaction of knowing that in the hands of his son, Charles S. Landers, it would be held up to its present high standard, and kept in the foremost rank of the manufacturing world.

As a public man, Mr. Landers took deep interest in affairs, and held many positions of responsibility and trust. He was a staunch Democrat all through his life. He was first elected a member of the House of Representatives in 1851, and the last year of his service in that body was in 1874. It was in that year that he was advanced to higher fields of political service in Congress. He first became a member of the State Senate in 1853, and twenty years afterwards was elected for the third time as a member of that body from the First District.

Mr. Landers was first elected to Congress in 1875, and was re-elected from the First District in 1877. He represented his constituents with ability of a high business value, and his service was of decided importance. He carried into his Congressional career the same personal qualities that had characterized his public life in the State, and when he retired from Washington surroundings, he was esteemed and honored by his associates in Congress, by party opponents not less than by party friends.

Mr. Landers took a deep interest in local politics, and held many important offices. He was one of New Britain's first board of water commissioners; was also a member of the first board of sewer commissioners, and through his efforts the first sewer bonds were issued and several sewers constructed. He held the position of park commissioner in 1869, and in 1882 he was chairman of the committee that had charge of the erection of the present Normal School. For a number of years he held the position of director of the New Britain National Bank, resigning in 1878 to accept the office of bank commissioner. In 1887 he was again made a bank commissioner of the State, receiving the appointment from Governor Lounsbury.

He was one of the incorporators of the New Britain Institute, in which he always took a deep interest, and was also its first vice-president. Mr. Landers was also an incorporator of the New Britain Gas Light Co., holding the position of president of that company until the time of his death. He was also one of the incorporators of what is now the Berlin branch of the Consolidated road. He was for a number of years a director of the New York & New England Railroad. Mr. Landers was married to Catherine Pearl, of New Britain, in 1839. Mrs. Landers died several years ago.

Mr. Landers was one who attracted by his personality, and won the confidence of his business and public associates by his strength of mind, fairness, even temper, and geniality of character. He had the advantages of a robust frame, while a temperate life had kept his strength unabated, and his mind clear to the last hour of his life. He will be long remembered, not only by those who knew him best and loved him best, but also by the community for which he was able to do so much, and by that great body of manufacturers of New England among whom he so long and successfully labored.

W. W. Lawrence & Co.'s Paints.

W. W. Lawrence & Co., Pittsburgh, have opened a branch house in Buffalo, which move has been made necessary by the extension of their trade, and the increased popularity of their goods. They now possess exceptional facilities for the manufacture of high grade goods; and, differing from many houses, have no fancy names or trade marks on their goods, or, as they explain it: "We consider our own name the best trade-mark we can use. Our policy is to impress on buyers and consumers that when the name W. W. Lawrence & Co. is found on a keg of white lead, a barrel of linseed oil, or a can of color, paint, varnish or stain, that this is the best possible guarantee that the buyer and consumer can have that the goods contained therein are exactly what they should be, and what they purport to be."

The company are sending their friends a handsome card, ten by twelve inches in size, and printed in colors and silver. It is headed: "The Best Paint," and shows a can of the ready mixed Lawrence Paints. It is a handsome adornment to any store or shop into which it may find its way.

ARE HARDWARE ASSOCIATIONS BENEFICIAL?

SOUTHERN HARDWARE JOBBERS' ASSOCIATION.

EDITOR HARDWARE: In reply to your question, "What benefits have accrued to the trade through our Association?" I will answer you briefly, as follows: At the time of the formation of our Association there existed (and still exists) what is known as the "Southern Railway and Steamship Association," which comprised all the railroads traversing the section of the South west of the Potomac, east of the Mississippi and south of the Ohio rivers. The classification governing the freight traffic of these roads was unsatisfactory, unequal and unjust. The discrimination against many articles in the Hardware line as compared with articles of like bulk, weight and value in other lines of merchandise was so marked that the idea was conceived of forming ourselves into an Association for the purpose of presenting our grievance to the Railroad Association, believing that "In union there is strength." And as we were paying more money for freights than any other branch of the commercial world, we might in this way get the relief that was justly due us.

At our first meeting a committee was appointed who took the matter diligently in hand, and after two years of hard work and careful watching were at last rewarded by a revision of classification, which, while not entirely satisfactory in every way, was such an improvement over the old classification as to give us a saving of many thousands every year.

In addition to this, many advantages have accrued by our coming together annually. We learn to know each other as friends, not as competitors. Many jobbers did not know their neighboring competitor even in their nearest city, and often when they met a competitor in their own town they would prefer to take the other side of the street.

Our annual meetings have done much to bring about a more agreeable condition, and teach us that our neighbor is just as honest as we, even if he does dare to sell Hardware; that while we have always accused him of being a fearful cut-throat, he was simply meeting our prices in order to remain in the procession.

Our meetings also give us the opportunity of exchanging ideas and methods of business, such as "employment and government of traveling salesmen," "terms upon which goods are sold," and many other items of vital importance to the trade generally.

At our last annual meeting in Richmond we were accorded the pleasure of meeting in friendly conference a large number of manufacturers and their representatives, which we regard as having been profitable as well as pleasant, as we think it highly essential that we should know the manufacturer, as this gives us confidence often in the goods he manufactures. Now as I have answered in a measure what we have done, I will state briefly what we *would like* to do.

There should unquestionably be some means devised by which the present haphazard condition of demoralization, general stagnation and ruinously low prices will be stopped. It is exceedingly unpleasant for a jobber at each annual stock-taking to find that his stock is the same in tonnage and 25 per cent. off in value, yet this has been the sad experience for the past two or three years. Of course a few articles may and should be charged to tariff tinkering, while others which are in no way affected by the tariff have suffered even worse.

The jobber is willing and anxious that the manufacturer should make money, as he is one of the principal foundation stones of the prosperity of this republic.

The retailer is willing that the jobber shall make a reasonable margin on his invested capital and cost of doing business. All he wants to know is that he buys his goods as cheap as his competitors. The consumer is willing to pay a reasonable price for his wares, provided he gets reasonable wages with which to make the purchase.

There seems to be a general willingness all around, yet all are living on short rations which are purchased from the savings of former years.

Now, what we would like to do is to devise means for the cessation of the present conditions and bring about harmony, thus insuring prosperity. It costs the jobber as much to sell screws bought at 87½ per cent. discount now as it did when bought at 75 per cent. discount two years ago, yet he has got to sell in order to get the same amount in profit either twice the quantity or at double the margin of profit, neither of which can possibly be done.

The present state of affairs cannot exist. What association or individual will be first to prescribe the remedy?

Yours very truly,

Knoxville, Tenn., April 2, 1895. W. P. SMITH, Secretary.

OHIO HARDWARE ASSOCIATION.

EDITOR HARDWARE: Your favor of March 27th has been received, and in the name of our Association I beg to thank you for the interest you are taking in the same.

Your wide-awake paper has done a great deal of good to the Hardware trade at large, and I believe benefited the retail trade more than the jobber, inasmuch as it has awakened him from the sleep of indifference to a sense of responsibility for the conditions of trade in his district; to a watchfulness for improved conditions; to the consciousness that he is an important link in the endless chain of trade and distribution of merchandise between manufacturer and consumer.

If this chain is broken or clogged, confusion is the inevitable consequence.

Our Association cannot stop competition, and it has no such purpose—indeed, such a purpose would be death to its existence.

But we want to make friends of our competitors, instead of looking upon them as bitter enemies.

We want to live and let live, and therefore are endeavoring to induce manufacturers and jobbers to stick to the legitimate channels of trade, rather than to continue the ruinous old method, to sell to the trade and their customers at the same time.

A few days ago I received a letter from one of our dealers in the State, asking me if there was not a possibility of stopping certain jobbers from interfering with their trade. They had sold to one of his customers among factories one or two Coe's genuine wrenches at 50 and 10 per cent., and, of course, wanted the same price from him, who was buying many goods from the same jobber.

This dealer certainly had just cause for complaint, and cases of a similar nature happen every day.

Manufacturers and jobbers who continue such practices must blame themselves if the Retail Dealer resents such treatment and stops trading with his own competitors. Our Association, through personal intercourse and correspondence, have a fine opportunity to learn and observe.

We recommend the formation of local associations for the purpose of stopping abuses and to a certain extent regulating prices, agreeing upon time of closing stores, etc. The constant changes in prices of such staples as nails, glass, etc., make it almost impossible to realize cost out of these items without some local understanding, which should never go beyond the small retail wants.

Digitized by Google

Many towns have adopted this plan, and are reaping benefits from such local associations never before dreamed of.

Only the large cities seem to think that such ideas are only good for small towns, but soon will they learn from the cities of Philadelphia and Boston that they have missed their opportunities only too long.

When the manufacturers of carriage bolts last month threatened the adoption of a new list (of carriage bolts) very much lower than the present one, our Association joined with the jobbers of the country in protesting against such a list, and no doubt these pleadings counted with the manufacturers, for the dreaded list was not adopted.

What an opportunity for the Hardware dealers of the State, to be able by united action to present a front against abuses of any kind or poor legislation; by united action to plead for improvements in laws beneficial to their interests.

It will not be long before every dealer of the State will be a member of our Association, for those who have had the pleasure of attending our meetings in Columbus will spread the gospel of modern Hardware fellowship over the State, and Dayton will have to extend its hotel facilities to take care of the Hardwaremen who will there assemble next February to enjoy the Hardware meeting.

Yours very sincerely,

THEODORE BUTLER, Secretary.

Akron, O., March 29, 1895.

NEW ENGLAND HARDWARE DEALERS' ASSOCIATION.

EDITOR HARDWARE: You ask me under date of March 27th to reply to the following question: "What benefits have accrued to the trade through the New England Hardware Dealers' Association?"

If you had deferred asking this question for a year or two longer it is possible that I might then be able to answer it more in accordance with my wishes, but at present I shall be obliged to admit that thus far it has not, in my opinion, fulfilled the desires of its founders, or been of any very great practical advantage to any of its members. I regret very much to make this admission, as I am a firm believer in organizations of this nature; but if I am to say anything it must be the truth, and thus it appears to me at this time of writing.

The objects of this association, as stated in its constitution, are social intercourse and the discussion of all matters of interest to the Hardware trade.

Its social feature has been a great success from the start, as the meetings have always been well attended, and the members have thereby been able to get acquainted each with the other, and I think we have all formed a more favorable opinion of the bone and sinew of the Hardware trade than we had before we had been brought together in this Association.

The discussion of matters of interest to the trade has developed a wide difference of opinion in some cases and an unanimity in others, as might be expected, but has, on the whole, I think, had a tendency to enlarge our ideas and give us a somewhat more favorable opinion of the business in which we are engaged—viz., that of dealers in Hardware.

We have had a schedule of prices on a few leading articles, such as nails, lead, zinc, etc., that for a time worked satisfactorily and secured a better profit than formerly, but which, in consequence of outside and inside competition, we have for the present given up.

We have been fairly successful as regards numbers, as we include in our membership a representation from nearly, if not quite, every Boston firm, together with most of the dealers in the surrounding cities and towns, as well as quite a number from other parts of New England.

I presume that you, and probably your readers, will agree, from what I have written, that we are a pretty successful organization, and so from a certain standpoint we are; but—and this I think is the thing most needed to make an association of much practical benefit—we have not succeeded in establishing such confidential relations among the trade as we hoped for, and leads me to write as I have at the commencement of this article.

"In union there is strength," but "a house divided shall fall;" so I say that a union, an association of business men, will never be of any great benefit as such, until a feeling of confidence in and friendship for each other shall have so bound them together that they shall act as one man in the interest of all.

Perhaps this is expecting too much of human nature, but I can see that already something has been accomplished in this direction during the short period of our existence, and I sincerely trust that time will smooth all difficulties and that we shall be, as I feel that we can be, a fully successful organization.

I am very glad that you have started this subject for discussion, for, as you say, it is an important one, and I hope to see many other articles in the issue of HARDWARE referred to in your letter. Yours very truly,

HIRAM G. JANVRIN,

President New England Hardware Dealers' Association.

Boston, April 1, 1895.

WESTERN NEW ENGLAND IRON, STEEL & HARDWARE ASSOCIATION.

EDITOR HARDWARE: Replying to your favor of the 24th ult., asking "What benefits have accrued to the trade through this Association?" would say: In answering this question it may be a fancy of mine only, but to my mind the benefits derived from this Association are beyond dispute. First, the good fellowship and friendly feeling which now exist among its members have destroyed all the jealous feeling which heretofore existed. We now meet either at our regular meeting or in each others' offices to talk to each other as friends, and not as business enemies. We are not afraid to say to each other what this man or that man owes us, or what price we are getting for this article. Secondly, we have established a schedule of prices, and find that it is much better and more satisfactory to have a uniform price, and knowing that our competitor's price is the same as ours. By so doing, we can act more independently and get a profit out of certain lines of goods that have been used as leaders, and sold heretofore without any profit whatever. Then again, our salesmen on the road have a minimum price which they cannot deviate from, and are not subject to the misrepresentations which are often made to them by their customers in order to secure a lower price. As regards established or fixed prices by any Association, they must be made upon a low basis, otherwise they will be a temptation to give thirteen for a dozen or to cut prices in some other way. There are many ways to get around all these things, if one is so disposed. Thirdly, as to our Credit Bureau; too much cannot be said in its favor. It has saved the members of this Association a great many hundred dollars, which would have been lost, and each member is at all times posted as to the delinquent and unworthy debtors. The information we get from this bureau is valuable, and grows more and more so each year. An Association of this kind can be made a success if it is founded on the right basis, and will give the members a broader and more liberal view of things.

One other thing presents itself to me, and that is that an Association of this kind can work closer with the manufacturer, and get the manufacturer to make quantity price on standard goods or such goods as are used as leaders. It is only just that large buyers or those who will buy large quantities of any one article, should get a special price; to illustrate this, I will take the article of Horse Shoes; the dealer who buys ten kegs of horse shoes can buy them just as cheap as the man who buys ten thousand kegs. Is there any justice in that? There are many other things, equally unjust, which can be regulated by an Association which individuals cannot regulate. Concentrated action, loyalty to

Digitized by Google

the Association and to each other, will create a friendly feeling amongst the members, and be productive of good results. Each one will try more and more to do by others as he would want to be done by.

Yours respectfully,
R. S. WOODRUFF,
Secretary.

New Haven, Conn., April 1st, 1895.

VAPOR STOVE MANUFACTURERS' ASSOCIATION.

EDITOR HARDWARE: Your inquiry is duly received, as to "What benefits have accrued to the trade through our Association?" In reply, would say the Vapor Stove Association is not a "Combine" or a "Trust," but is an Association of manufacturers of Vapor Stoves, holding many and fundamental patents on burners used in this class of stoves, being, however, similiar in the design and style.

Realizing the importance of placing upon the market a line of Gasoline Vapor Stoves that were in all respects absolutely safe, convenient in construction, and at a price that would come within the reach of the masses, we conceived the plan of organizing the "Vapor Stove Manufacturers' Association of the United States," which was done in 1884, and a design adopted for the different styles, kinds and sizes of the stoves, ranges, etc., we were to place upon the market, each manufacturer using his own burners and devices, for which he held patents.

This Association has since held regular semi-annual meetings to compare notes and recommend such changes and improvements as might be suggested by an Association of progressive manufacturers, and also to make any changes, either in the lists or discounts on these stoves, as the condition of the trade might suggest.

The Vapor Stove Association has been of immense benefit to the trade and to the consumer, on account of the combined mechanical skill and business judgment, and appreciating the importance of supplying these stoves at prices that were just, and within the reach of all, thereby securing the confidence of the trade, and is probably the only association of manufacturers that has ever been able to work successfully, which is only possible where the basis of such an organization is fundamental patents.

There can be no better evidence of the fact that this Association has worked to the interest of the trade and consumer, than the annual increase in the output of these stoves, which in 1884 was some thirty or forty thousand, while it has now reached nearly *four hundred thousand stoves* annually.

Respectfully yours,
D. A. DANGLER,
President.

Cleveland, Ohio, April 1st, 1895.

HARDWARE SOCIAL CLUB OF WESTERN MASSACHUSETTS.

EDITOR HARDWARE: Yours of the 29th received, and in reply would say that although the experience of our Association has been very limited, having organized less than a year ago, I think I voice the opinion of every member in saying that we have all been benefited, both socially and financially, during the short time we have been organized.

It has done away with all petty jealousies, and established a feeling of good-fellowship that is alone worth all the trouble and expense of conducting the business of the Association. We have been able to correct some abuses in regard to cutting prices on a few leading articles, and have also lately established a credit system on which we rely very much for our mutual protection.

All houses dealing in Hardware, iron, steel and agricultural implements in Western Massachusetts are eligible to membership in our Association, and although we have not extended our borders beyond the cities of Holyoke, Chicopee, Westfield and Springfield as yet, we are in hopes that others will soon see the benefits to be derived from our organization, and join us in our endeavor to correct those abuses which have not only reduced our profits, but have also deprived us of the genial society of our neighbors and competitors.

One feature we have adopted, which we consider of great value in bringing out the members to our monthly meetings, is a good supper at every meeting. It not only goes to prove the old saying that "The way to a man's heart is through his stomach," but it has also proved to be an important factor in our attendance, and our meetings are looked forward to not only for the benefits which may accrue to our business, but also from the fact that we are sure to enjoy a pleasant evening in finding out what good fellows our competitors are.

And now, Mr. Editor, trusting that I have not encroached on your space too much, I will close by saying that with what little experience we have had, we are all enthusiastic and firm believers in Hardware associations, if conducted on the right principles.

Very truly yours,
J. DOUGLAS LAW,
Secretary Hardware Social Club of Western Massachusetts.

Springfield, Mass., April 1, 1895.

HARDWARE MERCHANTS' AND MANUFACTURERS' ASSOCIATION OF PHILADELPHIA.

EDITOR HARDWARE: Replying to your query as to "What benefits have accrued to the trade through your Association?" as secretary-treasurer of the Hardware Merchants' & Manufacturers' Association I beg leave to say that nearly a decade ago some eighteen men, "good and true," that were engaged in the Hardware business in this city, conceived the idea of uniting themselves into an association for the advancement of their interests. It was a great deal like the lion and the lamb making common cause together, for, previous to the time named, a feeling very far from friendly had existed among many of these gentlemen; nothing was too bad for any one of them to believe of his neighbor. The fierce competition and rivalry in the open sea of trade

"Where man
Wrestles with man for some slight palnk, whose weight
Will bear but one,"

naturally breeds and fosters such a feeling as this.

The Hardware Merchants' & Manufacturers' Association was formed, and the beneficent results obtained from the union have been much greater than expected or even hoped for. Now, although the sharpness of competition is not a whit abated, instead of working against each other (and thus indirectly working against ourselves), our aim has been to labor for the betterment of the trade of which we are representatives, to correct in so far as possible its inherent abuses, and to resist in solid phalanx any new evil which threatens.

Aside altogether from what we have accomplished in this direction, aside from the innumerable measures we have planned and carried into effect, our Association has elevated the *morale* of the trade; it has swept away all narrowness of thought and made us more inter-dependent; it has opened our eyes to the fact that in "the milk of human kindness" there is a smaller percentage of *aqua pura* than one would naturally presume. Our membership, starting with a dozen and a half, has now passed the hundred mark and includes nearly every wholesale Hardware merchant and manufacturer in this city and vicinity. We have a system of our own in reporting customers who are unworthy of credit, and this alone is of incalculable service to us in avoiding customers, to sell to whom would mean a permanent investment of our capital. We will employ a salesman from a competing house only when we know that he is free from his contract and obligation to that house. The song that has been so often sung by traveling salesmen—sung in every possible key and with variations *ad fin.*—a song that would make "the hills," ancient as they are, seem young in point of antiquity, that some salesman from a rival house is offering their wares at certain low prices, which prices he had either to meet or lose the order, is often nailed at once

Digitized by Google

as an incorrect statement by a brief friendly call on the rival house, our fellow-member.

After an active existence of nine years, I feel no hesitancy in saying that all our members are well satisfied with the results obtained. We make no combination on prices, or, in fact, on anything else, but simply trade as in honorable and friendly competition. Mutual confidence exists, and we are assured that when we are enabled to look back on our business career and note what has been done to make trade pleasant and profitable, the formation of the Hardware Merchants' & Manufacturers' Association will mark as one of the best features of the closing of the nineteenth century. T. James Fernley.

Philadelphia, April 3, 1895.

HEAVY HARDWARE JOBBERS' NATIONAL UNION.

Editor Hardware: In answer to yours of March 29th I send you a circular issued by the Heavy Hardware Jobbers' National Union, October 22, 1892. This answers your question: "What benefits have accrued to the trade through your Association?" better than I could do it personally. The members of this Association have realized many of the benefits referred to in the report of the committee. There has been but one meeting held since the date of the circular. The next meeting is to be held at Louisville, the 19th of this month, and it is expected this will be the largest ever held. Yours truly,

Chicago, Ill., April 2, 1895. S. D. Kimbark.

The circular to which Mr. Kimbark refers is as follows:

At the eleventh meeting of The Heavy Hardware Jobbers' National Union, held in Chicago, October 22, 1892, a committee was appointed to prepare for the benefit of those in interest, a brief statement showing the aim and object of the Association, as there seemed to have been same misapprehension regarding the same:

Chicago, October 22, 1892.

"After four years' experience we are satisfied that the Association has done a large amount of good, mainly in making the members better acquainted, and thus removing many of the jealousies and misunderstandings existing between jobbers located in competing territory. We have agreed to continue the Association, not for the purpose of controlling either the buying or selling price of goods, but for social and legitimate business purposes, and especially to be in a position to combat any evils that may arise in the management of our business, or what we consider wrong in the method of selling adopted by any manufacturers of goods we handle, and with this end in view, we invite all the jobbers in Iron and Heavy Hardware to join us."

J. J. Parkhurst,
Gaius Paddock,
George Deming,
} Committee.

STRONG ENDORSEMENT FROM SAMUEL A. BIGELOW.

Editor Hardware: Answering your question: "What benefits have accrued to the trade through your Association?" I must infer you expect an individual opinion, as I am not at present connected officially with the New England Iron & Hardware Association.

This Association was originally formed "to promote friendly business relations, confidence, and good will among its members."

There seems to be an unwritten law that a Hardware competitor must necessarily be an enemy, to be shunned or to be feared, but never met as a friend. This feeling has been born and nourished by our predecessors and is a legacy handed down to us, to pass on to our successors. These feelings, so deeply rooted in the past, are not easily banished. It requires time to bring the full results, and it was a pride and pleasure when our early labors resulted in our first monthly dinner. Meeting monthly for nearly two years, we know each other better, and are freer to discuss and adjust many abuses which before our organization would have been simply impossible. The old feelings are being gradually overcome, and many strong friendships have been formed. We are gradually becoming more united, and it has been possible to work together for our mutual benefit. Enthusiastic and inexperienced at first, we attempted too many radical reforms, some of which we were unable to carry out. Notwithstanding our failures in the past, we are encouraged to continue our good work, and look with bright hopes to the future.

The close application necessary to details in a Hardware business successfully conducted naturally gives the Hardware merchant but little time for recreation or for visiting his neighbors. His ways are his own ways, and he naturally thinks they are the best, and after a series of years spent in burrowing among price lists and racking his brains with discounts, he is inclined to become conceited and narrow minded. In fact, he begins to hate himself. The monthly dinners of the Association take him away from the tedious routine, and bring him in contact with others. He learns their ways and compares them with his own. He talks over his troubles with his competitors, and often finds he has been deceived and that he has been following a "will o' the wisp." He also finds that Hardwaremen have souls and big hearts, like other men, and that they are not deficient in the ability to enjoy life, and it will not be surprising if he becomes satisfied that a Hardwareman may be a jolly good fellow. All these revelations may come to nim, and he will return refreshed and with new interest in his work, and with new life, and with a feeling that he has been amply repaid for being dragged away from his daily routine.

At the last meeting of the New England Iron and Hardware Association they had among their guests a prominent and representative merchant from the South. He came a long way to bring greetings from the South to the North, and even his enthusiastic reception did not tell one-half we felt for him as a man and for the cause he represented, and no one present could help feeling the benefit that must come from Hardwaremen meeting together.

The enthusiasm of everyone who attended the first meeting of the National Hardware Association at Cleveland in December last illustrates the widespread feeling of the necessity of organization. Everyone seemed satisfied that local associations should be formed in every city, to care for local issues, and that the National Association should encourage and promote their formation; that the whole Hardware interest of the country should be united, not against manufacturers or against any individual interests, but for the correction of abuses and for the elevation of the Hardware trade to the high position to which it is entitled by the magnitude and the importance of the interest it represents. Samuel A. Bigelow.

Boston, April 6, 1895.

The Glidden Varnish Co., Cleveland, O., in their illustrated card upon page 86 of this issue, graphically show the feelings of the man who neglected his opportunities in the varnish line. Not content with mental torture, he rigged up a machine which in the illustration referred to applies the punishment where it will do the most good. It will bear studying; others may take lessons thereby and escape the pangs of future regrets. The company will supply the moral on application.

It is stated that an industry in which aluminum and aluminum bronze are bound to find their way is in the manufacture of wire screens. A screen of these metals is invulnerable to the attacks of mosquitoes and flies, and has the advantage of never rusting, so as to give the enemy a weak point to attack.

It is reported that the St. Louis Stamping Co. will soon move into a new plant at Granite City, Ill.

Congratulation: Endorsement: Goodwill.

[*Continued from page 42.*]

NICHOLSON FILE COMPANY.

HARDWARE PUBLISHING CO: We send you our birthday greeting for your anniversary.

HARDWARE is a success—its five years' history has been a record of progress and improvement. We congratulate you upon what you have already achieved, and see in it an augury of most gratifying results for the future, with a long continued succession of pleasant birthdays. Accept our renewed good wishes, and believe us.

Very truly yours,
NICHOLSON FILE CO.
Sam'l M. Nicholson,
President.

Providence, R. I., April 3, 1895.

AUSABLE HORSE NAIL CO.

HARDWARE PUBLISHING CO: Referring to the coming anniversary of your paper, we think that we patronized it when it was an infant in arms. Even then it exerted an influence on the trade it designed to reach, unparalleled in the annals of trade journalism.

We congratulate you that the infant has grown to be a "lusty five-year-old" and that its *precocity* is so marked.

We value HARDWARE very highly as an advertising medium, and trust that it may soon emerge from childhood into the full strength of manhood. We are confident that this will be the result, and that each step of its adolescence will be marked by increased power and influence.

Please accept our best wishes for its continued prosperity.

Yours truly,
AUSABLE HORSE NAIL CO.
By A. Bussing,
President.

New York, April 3, 1895.

PUTNAM NAIL CO.

EDITOR HARDWARE: We have your announcement that HARDWARE will issue a birthday number in honor of its fifth anniversary, and we take great pleasure in congratulating you upon its success.

We have found it of use in disseminating truths in regard to the Putnam Hot Forged and Hammer Pointed Nail. It being devoted exclusively to Hardware, we notice that you have taken a great deal of time and pains to bring out new products and give them ample illustration.

Wishing you renewed success, we remain,

Truly yours,
PUTNAM NAIL CO.
W. W. WHITMARSH, Treas.

Boston, Mass., April 2, 1895.

SCHOVERLING, DALY & GALES.

HARDWARE: We desire to congratulate you on your approaching fifth birthday. Certainly you ought to be proud of the advance that you have made, the high position which you have taken in such a short time. We have every reason to be satisfied with our advertising in your paper, and we wish you many happy returns of the day.

Yours truly,
SCHOVERLING, DALY & GALES.

New York, April 3, 1895.

E. T. BARNUM.

EDITOR HARDWARE: We have found your paper a bright, up-to-date advertising medium, covering well topics of interest to the Hardware trade, and would heartily recommend it to those desiring to reach the largest number of dealers in that line.

Very respectfully,
E. T. BARNUM.

Detroit, Mich., April 4, 1895.

GILBERT & BENNETT MFG. CO.

EDITOR HARDWARE: We extend to HARDWARE our congratulations on its fifth anniversary. You have reason to be proud of its success, both as a journal of interest and usefulness to your readers, and as a profitable medium to the numerous advertisers. From the fact that our card has been constantly published in its columns from the first number, it must be concluded that we have found it a satisfactory medium. Wishing you continued prosperity, we are,

Yours truly,
THE GILBERT & BENNETT MFG. CO.

Chicago, Ill., April 2, 1895.

SARGENT & CO.

EDITOR HARDWARE: We did not expect that HARDWARE would reach more than one birthday. True, it cried lustily enough at birth, but we have known many other youngsters of similar names which never reached maturity; so we had a mental conviction that HARDWARE, like the others referred to, was born to die young. We were surprised when it pulled through its second year, but since then we have expected it to live, and we would now be disappointed if it should be anything else than a live trade journal, showing evidence of skill and enterprise, and deserving all the success which it has attained at its fifth birthday.

Yours very truly,
SARGENT & CO.
Ladd.

New York, April 4, 1895.

HENRY DISSTON & SONS.

HARDWARE: We think our opinion of HARDWARE is contained in the fact of our having carried an advertisement in your paper for a period of four years, and as our recent contract has expired, would request that you mail a new one in duplicate terms, rates and space same as in last agreement.

Yours truly,
HENRY DISSTON & SONS.
A. S. BUTTERWORTH.

Philadelphia, Pa, April 4, 1895

LANE BROTHERS.

EDITOR HARDWARE: With reference to HARDWARE it is, from the nature of our business, exceedingly difficult to trace up and ascertain from what source we receive most benefit as an advertising medium; but one thing we know—we *get the trade*, and have good reason to believe that HARDWARE has in the past been one of the best mediums for our large trade and the popularity of the Lane goods.

Truly yours,
LANE BROTHERS.

Poughkeepsie, N. Y., March 29, 1895.

BUCK BROTHERS.

PUBLISHERS HARDWARE: We appreciate the great value of your paper as an advertising medium, having very frequent applications for price lists from Hardware dealers throughout the country, who mention the fact of having seen our advertisement in HARDWARE.

Wishing you continued prosperity, we are,

Yours truly,
BUCK BROTHERS.

Millbury, Mass., March 29, 1895.

IDEAL MANUFACTURING CO.

HARDWARE PUBLISHING CO: We note that your fifth birthday is near at hand and that you propose to celebrate in a truly laudable manner by an extra sized issue, which must of a necessity do you lots of good as well as the advertisers that are with you. Although the Hardware trade is a field that has long been ploughed and planted, you have every reason to feel proud of the results attained in the past five years. While the Hardware trade is not exclusively for sporting goods, we feel that these people are realizing the value of entertaining our line, and we recognize your medium from time to time and have found it satisfactory.

Trusting that you may continue to prosper and that your shadow may never grow less, we are,

Yours respectfully,
IDEAL MFG. CO.
Dictated by J. H. Barlow.

New Haven, Conn., March 30, 1895.

Reminiscent: The Iron Store of Yesterday.

Editor Hardware: How different the Iron Store of today is from that of thirty-five or forty years ago.

Did space permit the recital of changes that have taken place within that long period the younger members of the trade might think that fiction had been utilized to embellish the story; but the veterans will verify the few that I recall below, and some of them can doubtless add many interesting items in the same line.

In the fifties an Iron Store was what the name implies, and carried little besides, except steels, horseshoes and nails, some wagon and plow material and blacksmith tools.

Now, with the same sign up, it deals in such a variety of materials and tools that it is almost as variegated as a millinery store, and keeping track of the stock is a task almost as complex as the repairing of a watch would be to a street paver.

In the early days I speak of Hardware, and Iron Stores were not established in every little hamlet, as now; railroads did not reach every village, and a purchase of goods entailed, in many cases, long hauls in four and six-horse wagons; hence, when country customers wanted goods, they usually went for them, and when they found what they wanted were generally too well satisfied to kick about any little question of overcharge, drayage or packing.

Ah, those good old days, when Mahomet went to the mountain, and the latter stayed at home and saved the price of mileage tickets and hotel bills!

Then a set of wagon tires consisted of five bars of odd lengths, three of which had to be welded together, and then cut in two to make the hind wheel lengths. Strange that some one did not think until years after to have them cut into proper lengths at the mills. Not longer than twenty years ago I knew a blacksmith, not over middle age then, who, when an apprentice, aided by another boy, hammered old wagon axles down to sizes suitable for making horse and hinge nails, not twenty miles from this city.

Before the sixties the sale of English tool steel exceeded that of the American article about fifty to one. Now, in my judgment, the home steel leads by one hundred to one. In those days English files and rasps held this market. Now, except fag ends of old stocks, toothless with age, I doubt if a dozen could be found here with the aid of a search warrant.

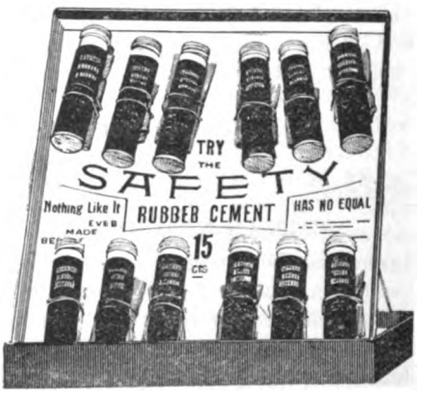
Although machine-made horse nails, black and unpointed, were sold then, the hand-made nail was mostly used. Many hands were employed making them here and they sold at 28 cents per pound. They were very roughly made, and it took the shoer fully as long to finish and point as to drive them.

Sledges and hand hammers (Atwood's) of English make, were the only ones sold here for many years. They were made of iron and were steel faced and sold wholesale for about 13 cents and 16 cents respectively. What a contrast, both in price, quality and finish, between them and the finely finished steel American hammer of the day. Here is a copy of a bill I sold in 1864:

12 sets Buggy Wheels @	$12.50 per set
2 Doz. Prs. Rough Buggy Shafts @.. ...	12.50 per set
4 sets 1 inch XX Buggy Spokes @	3.75 per set

None but dealers in these goods realize the altitude of these figures now.

I have seen twenty dollars per ton paid for coal in this city in the fifties. In 1863 or 1864 I have known twenty dollars being paid for hauling a dray load of merchanise to the L. & N. R. R. depot here; the charge now is only fifty cents, and I have seen a half mile in length of teams, hauling to the depot at the former price. Contra, in the seventies, I have known a freight rate of thirteen cents to be offered on heavy casked Hardware, from Birmingham, England, to St. Louis, via New Orleans.



And what changes there have been in the ranks of those whose brains and industry have built up and kept in the front rank the Iron and Hardware trade of Louisville. Some have departed full of honors and years; the youths have reached middle age; the young men have become gray; stalwarth recruits have joined the ranks and promise to become worthy successors of the elder ones. May we not hope, that the younger participants in the struggle for precedence will keep in view the high standard of example set them by their predecessors, and that their success in life will be as marked.

I tender congratulations on your having reached the fifth milestone on your journey. May your trip for the balance of the journey be prosperous and pleasant, and may your stopping place at the end be all you could desire.

Louisville, Ky., April 6, 1895. Jno. J. Slattery.

Campbell's Cycle Cement.

Among the new things in Bicycle sundries that have won attention this season, must be prominently mentioned Campbell's Cycle Cement and repairing outfit. Although placed upon the market only three weeks ago, the demand has far exceeded the manufacturer's capacity. It is put up in neat counter display boxes, and is described as "an ornament to any counter, and sells itself on sight." It is added that the Cement is made by a new and superior method, and for it the makers claim the following advantages: "Easy to apply. Quick to dry. Sure to mend every time. Is especially adapted for bicycle tires, and at the same time a sure and quick cure for hot water bottles, rubber syringes, rubber coats and boots, that have become leaky. It is put in a tight screw-top can, thus preventing its leaking out, which is a great advantage to a person carrying it in a tool bag. The can, together with rubber patching and emery paper, is attached by a neat contrivance to the show box, and can be easily detached when sold." The outfit is manufactured by the Hugh Campbell Co., No. 45 Union Street, Boston, Mass., and is for sale by bicycle and Hardware dealers throughout the country. Prices and advertising matter will be mailed on application.

This card, which has just found its way into this office, is sufficiently explicit to explain itself: "We have money to burn, but we ain't going to burn it. Don't be despondent! Brace up and be a man. Look up your wants and send your orders to Troy Nickel Works, Troy, N. Y."

C. S. Van Wagoner, president of the Van Wagoner & Williams Hardware Co., was injured at the Cleveland works some days since by being struck in the leg by a flying piece of iron. While the wound is not dangerous, it is feared he will be confined to his bed for a week or two.

The Chicago plant of the Monarch Cycle Co. is running at full capacity. The company say that they have already disposed of as many wheels this year as they did for the whole season of '94. The output for this season is expected to nearly treble that of last season.

IN THE HARDWARE BUSINESS SINCE 1816.

In his moving to and fro among the children of men—Hardwaremen—in search of divers bits of information, a HARDWARE reporter came upon the interesting fact that the business of White, Van Glahn & Co., Nos. 15 and 17 Chatham Square, New York, could be traced back to a beginning in the year 1816. This does not carry far enough back to make sure that they supplied Henry Hudson or Peter Stuyvesant with powder and pewter pots, but it carries them within hailing distance of the early Knickerbockers of New York.

A call was made upon the present head of the house, E. C. Van Glahn, who, although old enough to be a governor of the Hardware Club, does not date his birthday close to the year 1816. Mr. Van Glahn was willing to give all the information as to the early days within his power, but confessed that it would be but little, and came altogether from second and third hands.

As near as he could come to it, the business was established in 1816 under the firm name of L. & T. Seymour,

composed of Lewis and Thaddeus Seymour, who were brothers. Within a few years after the establishment of the business, Thaddeus was killed by being thrown from a wagon. Lewis Seymour was the father of William N. Seymour, and soon after the death of Thaddeus, the firm of W. N. Seymour & Co. was formed. The partners of this firm at various times were W. N. Seymour, J. W. Dominick, J. H. White, J. E. Brush and R. L. North. The firm was continued under the style of W. N. Seymour & Co. until February 1, 1888, when it was succeeded by White, Van Glahn & Co., owing to the sudden death of James H. White, who for the last ten or twelve years previous to his death was the sole owner of the business.

Mr. White had been a member of the firm for more than fifty years, and was probably one of the best known Hardwaremen of New York City. A few years previous to his death he had admitted into partnership his son-in-law, William B. Haulenbeek, who was drowned about three months previous to Mr. White's death—which event was no doubt hastened by the shock of his loss.

As above stated, White, Van Glahn & Co. succeeded to the business in February, 1888, the active management passing into the hands of E. C. Van Glahn, who had spent eight years in learning the iron business in the employ of Phelps, Dodge & Co., a better school than which it would be difficult to find. His active energy and keen perception of the needs of the trade, have had their effect, and the house has certainly more than held its own. For eighty years it has occupied its present premises—the ownership of the building, which was erected by the elder Seymours in 1813, going with the business; has enjoyed uninterrupted prosperity; and in the last few years has increased its business very largely, having enlarged its capacity by taking in an adjoining five-story building, and carrying a much larger stock than formerly. While the concern was for many years nominally a retail house, the business is now more of a jobbing nature, and for that reason has materially increased.

While age goes with this house on Chatham Square, the scenes of busy activity noted there each day are far from any suggestion of mildew. With the infusion of new blood, the old and tried has been retained, many of the old men

remaining with the house, one having been there fifty years with August next, another forty-three years, two for thirty-seven, and several for more than twenty.

In those early days, this point was right in the best portion of New York, Henry and Madison Streets and East Broadway being among the most fashionable residence streets. The sales then were mostly of shelf Hardware and things in the house-furnishing line; and some families there are who have continued their trade, through father and sons and grandsons, from the time of beginning until to-day. There is hardly a day passes that does not see some old-time friend drop in to discuss the changes of the past; to recall memories when the Bowery was indeed a bower; when Italy and China and Russia had not taken possession of the regions roundabout; when the elevated trains were not even yet an idea in the minds of their inventors; when Brooklyn Bridge lay in unsought iron in the distant hills; when New York was young and fair, and Brooklyn a little hamlet across the river.

There is in the possession of the house a relic which we are permitted to reproduce in exact size and fac-simile upon this page. It is the catalogue issued by the Seymours in 1853, the front cover and one page of which are given.

Review of the Markets.

Money: Rates have hardened somewhat, but there is not an extensive demand for money. The tone of the market is reported as a little better. Otherwise affairs remain upon about the same footing as last quoted.

Hardware: It is the general opinion that trade shows encouraging signs of improvement, and a considerably better state of affairs is confidently expected. The fact that most of the orders are small and of a miscellaneous character shows that stocks all over the country are low, but it also shows that dealers are not at all inclined to restock. They would rather get small lots and order often. Reports from many houses show that sales exceed those of last year. Seasonable goods, including wire netting, garden tools, coolers, bicycles, refrigerators, etc., have the call.

Hinges: Jobbers have no inclination to speculate in these articles, consequently there is only the current demand.

Wire Nails: The wire nail market is in a peculiar position. Orders for prompt delivery are not coming in as fast as expected, and consequently the mills are accumulating stocks. The mills are working steadily on orders for future delivery. Lots for prompt delivery are fetching 85 cents. Lots for future delivery are quoted at 90 cents.

Cut Nails: The market shows considerable improvement. The tone is firmer and there is an increased movement of goods. Prices are, for carload lots on deck, 80 cents; small lots, out of store, 90 cents. Prices are a little better.

Cutlery: The domestic cutlery trade in cheap lines is very good just now. The German knifemakers were out on strike from near the beginning of the year until March 1st, and after working a couple of weeks have gone out again. The general opinion here is that it will take some time to settle the difficulty. During that period the home manufacturers will have but little competition, as most of the cheap imported cutlery comes from Germany. Prices have risen 5 per cent. already.

White Lead: The low price of lead in oil indicates that the consumption of the article will be large. English lead in oil is quoted 3¼ cents for April delivery. The old makes bring from 6½ to 7 cents There is more inquiry in dry lead; several large lots have been announced at 4½ cents less 2 per cent., and 5 cents is the price quoted for English dry lead. In Red Lead, there have been more inquiries in domestic brands for contract delivery, and an improvement is perceptable in new contract orders. Prices are firm at 4¼ to 4¾ cents as to quantity, the usual discount allowed. Litharge: The renewal of operations on the part of many of the factories, which have been shut down, has created a large demand. English is bringing 4.75 and 4.90 as to grade, date of delivery and quantity. Domestic grades are reported at 4¼ and 4¾ cents. Zinc: Spring trade bids fair to be good. Prices remain unchanged at 3¾ to 4¼ cents for jobbing parcels. The quotations for German are 4¾ to 4⅞ cents as to quantity and make.

The prices quoted below are for small lots. Round lots, except Tobin Bronze, can be purchased at lower prices:

Clapp & Co., bankers and brokers, New York, in their weekly letter, say: "Nature has no equal as an equalizer of values. The variations of human action and international exchange are sometimes as important as those of soil, season and temperature. It takes something more than a favorable crop surplus to make a permanent place for a nation's product in international markets. The general feeling in business circles, as reported by our correspondent in thirty-odd States, indicates a decidedly better sentiment prevails, and that many kinds of business show an improvement. Money is in better demand. European centers are taking more interest in our securities. Evidently the tide has turned. Cotton has advanced about a cent a pound since Congress adjourned. Railway securities are in active demand, low priced ones in particular. The advance seems healthy. Dividends have been declared and officials have acted wisely in continuing to pay small dividends. The next change may show a small increase, and none of the best properties, such as New York Central, St. Paul, Rock Island, Burlington, Northwest, Jersey Central and Western Union will likely go on to the non-dividend list. Reading is more active, indicating the coal delegates have arranged for less friction in values."

THE DAVENPORT TRADE.

The anxiety caused by the long continued drought is over. A copious rainfall on the 30th ultimo has dispelled our fears, and now we can think of it and write about it. Commencing with the year 1894 we had only about one-half our normal amount of moisture, the exact figures for twenty years being normal 34.78 inches; for 1894, 18.52 inches, this being twenty-five per cent. below the year 1886, which next to last year was the dryest for twenty years, and being just one-third as much as we received in 1876.

The drought continued through January, February and March of this year, drying the earth down to the depth of six feet, down below the roots of all vegetation, the soil becoming a dry fluffy dust, the surface being so light that the winds carried it to and fro like dry leaves; seeds planted, however deep, were literally uncovered in a few hours; farmers despaired of planting; the heat became intense, registering 82 in the signal service office here, and was reported as high as 88 in different sections of the State.

This was our condition on March 29th—discouraging indeed. A total failure of crops last year in many sections, a partial failure in all, no surplus left to feed or sell; many wells, cisterns and creeks dry; boring wells 150 to 200 feet deep not uncommon; even the Father of Waters lower than ever known at this time of year, and we were sweltering in a temperature and humidity of atmosphere seldom experienced in the month of August. The welcome rain of one and three-tenths inches came on the thirtieth, which has resulted in the resuming of planting, stimulating business, dispelling our fears.

Now referring to your question: "What would you suggest as the most potent remedy for existing evils, and the surest method of placing the Hardware business of our conntry upon a solid foundation ?"

If we could correctly answer these questions, our time would be much more valuable as philosophers, than dispensing nails at a profit of five cents per keg; and even if we had the recipes for sale, we question if we could place them, without first giving a liberal Hardware discount, then making a quantity "special" and beyond this a "confidential" 5 per cent. for the prestige of selling a favored few, agreeing to an excessive freight allowance, and granting a dating, approaching the setting sun of eternity.

We know of no potent remedy for existing evils, and do not know of any sure method of placing the Hardware business on a solid foundation. However, as an improvement upon the present methods, we might suggest:

First: Commercial papers, such as Hardware, discontinuing printing prices.

Second: That manufacturers of Hardware refuse to sell their wares to venders of disreputable or unknown goods, to be given away as premiums, thus making standard, staple articles appear cheap and diverting the sale of same from legitimate channels.

Third: Abolish quantity prices. A jobber purchasing at a lower price on account of quantity, demoralizes the market by reducing his selling price, which price the less fortunate buyer is compelled to meet and invariably does meet, consequently the large quantity buyer has realized no greater profit whatever from his apparent advantage and the smaller buyer appeals to the manufacturer for a rebate to enable him to hold his trade. His appeal is earnest and honest, and the fairminded manufacturer recognizes it as such, and being aware of the necessity of allowing the rebate or losing a valuable customer, allows it, and a new and lower price is established. Again Mr. Quantity succeeds in getting a concession; again cuts the price; again the price is met; again the rebate is allowed; again the market recedes another point. This has been the result for years, and will continue just as long as quantity prices are encouraged.

Fourth: It would be better if manufacturers would not sell

Digitized by Google

their culls and off-trade goods that so closely resemble the genuine articles to unscrupulous dealers, knowing that they will be offered ultimately to consumers as genuine, thus creating a feeling of distrust against legitimate dealers, on account of disparagement in prices.

Fifth: Manufacturers should not allow their goods to come in competition with themselves, by attempting to sell both the wholesale and retail trade. The jobber makes a price to the retail trade, the retailer appeals to the manufacturer for a lower price and gives as a reason, that he can buy as low from a jobber; the manufacturer must undersell the jobber or lose the trade, the jobber in turn must again meet the manufacturer's price or not sell, and so the prices are forced down.

Sixth: Export prices should not be less than domestic. Too often goods are bought for export, that never leave the wharf, are kept at home and used as market disturbers.

Seventh: Dispense with the commission man who divides his commission for the sake of making a sale, regardless of its effect upon the markets.

Eighth: And most important of all, is the matter of over-production. There are two many goods made, not only in Hardware, but in most lines of goods that are manufactured in this country. A manufacturer finds his margin of profits diminishing; he concludes that by doubling his out-put he can reduce the percentage of cost; he increases the capital stock of his company or borrows the amount from unsuspecting friends, and immediately offers for sale two times the quantity that he has experienced difficulty in placing the previous season, and expects to reap a large profit corresponding to the decrease in cost of production; not once stopping to think what his competitors' would be doing, while he was increasing his output. He finds, too late, that others have attempted the same plan, and the result is smaller profits, increased expense account, no dividends, dissatisfied stockholders, shutting down of mill, workmen out of employment, resulting in the present unpleasant and unsatisfactory condition of things.

In addition to the changes suggested, it would be well if jobbers would have a little more respect for each other's territory; would make their selling prices in their own offices, scan credits more carefully and occasionally read and always remember the Golden Rule. Yours truly,

Sickels, Preston & Nutting Co.

THE PHILADELPHIA TRADE.

The beginning of April finds the oldest inhabitant in demand, as we are all asking: "Did we ever have such a cold spring before?" The weather has been uniformly backward, cold and disagreeable, and even at this writing it is very far from the traditional April day, and it is really encouraging to note that in spite of this, trade has been fair, and just now shows a decided upward turn, which we hope will be permanent. Salesmen generally report an increased demand, mail orders are quite frequent, spring goods have already moved in large volumes with the probability of a very sharp demand after a few days of warm weather, which is reasonably soon to be expected.

Prices are without immediate change, and there seems to be a general belief among manufacturers and jobbers that we have seen the bottom of the pit, and that low prices will soon give way to higher values. Already there is some hardening in the prices of raw material, and it is a curious contradiction that the Wire Market does not respond, but an increase in the demand is almost sure to bring higher prices in this line also.

The Bicycle trade is simply booming. The old idea that a bicycle is a toy is utterly exploded. Now the clergyman visits his parishioners on a bicycle; the physician goes around with his medical case strapped to his machine; both men and women use it freely for pleasure and recreation, and business men find it the quickest and cheapest way to run errands and solicit business. Last summer, when the heat was so great, and horses were utterly prostrated by it, we received a letter from a customer in the pine woods of Jersey, where the thermometer is usually most ambitious. It seems he has a trade among the canneries in that section, and it was necessary that he should visit them, so we were surprised one day during the torrid heat to receive a letter from him, saying: "Why don't you send me that new tire for my bicycle; it is impossible for me to do any business without it. The heat is so great that I cannot use a horse, but on my machine I can go through the woods on bypaths and solicit trade." Such is the value of the bicycle, and now that its usefulness has been established, it has already been decided that the retail Hardwareman is the one to handle the business. and the demand this year for them has been simply immense. The manufacturers are crowded with orders, and we find it almost impossible to supply the demand.

We are very glad to be able to congratulate Hardware upon its fifth birthday, and take pleasure in recommending its methods, which have been to the betterment of trade generally and not in the line of making increased competition.

We wish we had more time to discuss the question "as to the surest methods of placing the Hardware business of our country upon a solid foundation." Answering the question in fewest words, we would say, adopt net prices. We are convinced that this will work to the advantage of everyone, from the manufacturer down to the smallest retailer. The trade papers lately have been full of complaints from the retailer about manufacturers quoting prices direct to the consumer, and the reason that manufacturers are enabled to do this is that it is the custom for manufacturers to issue lists, and the consumers have been educated up to the point of knowing that these lists are simply lists and not prices, and then when the manufacturer is asked by the consumer for a quotation he also asks for a discount to be named, and this of course cuts out the dealer. If net prices were used it would be much less easy for the manufacturer to quote the consumer, and better prices and large profits would be the result, and we hope the day is dawning when net prices will be the rule. A day or two ago a manufacturer was complaining to us that a jobber had spent hours of time and a great deal of correspondence in order to save 2½ per cent. on a certain purchase, and the entire net amount at issue was only about $5; and it is safe to say that the jobber lost $10 worth of time and money in fighting it out, and then didn't get it. Two and a half per cent. or 5 per cent. looks much larger than it really is, and the use of net prices would enable the dealer to have better control of prices and would lessen interference of manufacturers. Respectfully,

Biddle Hardware Co.

THE BOSTON TRADE.

While there has been no extra boom in the month just past, there seems to exist a better feeling among the trade and orders for seasonable goods have been very satisfactory.

From reports among the trade there has been an increase in the volume of business over the previous year, but purchases are made because the goods are wanted, rather than from speculative reasons.

The increased demand seems to have little effect upon prices, and goods are being offered at the low quotations made during the dull months. The manufacturers show little inclination to advance prices, and it seems to be the opinion of the majority that we shall see low prices for some time to come.

That portion of the trade who pay special attention to builder's Hardware, report an increased activity in this class of goods and we confidently expect a good season's business in this line.

Screens, doors and lawn mowers are selling rapidly, and the demand for this class of goods seems to be for a better grade than in years past.

Frye, Phipps & Co.

THE CHICAGO TRADE.

We are very glad to report that since the cold snap and blizzard which we had in February trade has shown a distinctly better feeling, and orders during the last three weeks have been coming in in a very satisfactory way Prices, of course, on almost all lines of goods are extremely low, and it takes a great many more goods to make the same volume of business of a year and a half or two years ago, necessitating, of course, a great deal more work for the same or a less return. We find, however, that comparison of the March business of this year as against March of last year shows a very favorable and satisfactory increase, and this feature of the business we trust will be of a more lasting character than was the spurt we had last year about the same time. We certainly think the indications point in this direction.

Woodrough & Hanchett Co.

THE BALTIMORE TRADE.

Before speaking of the trade in general, there are just a few words of explanation we would like to make concerning a letter we sent you some time ago. We were over-sanguine, attributable to our youth or some such cause, and under its influence donned the prophet garb and ventured to foretell coming events. We had scarcely seen the words in print before we repented of our rashness.

Travelers in Eastern lands assure us of a strange phenomenon. About an hour before daybreak faint streaks of light gleam across

Digitized by Google

the horizon visible but a few moments, then darkness sets in again. This is called by the natives *Subhi Kazib* or "false dawn," to distinguish it from the *Subhi Sadik* or "true dawn" which follows. Some such mirage must have allured us into our roseate hued prophecy of a month ago. False dawn it was, followed so quickly by darkness:

"Wishes are bypaths to unhappiness,
And in the vale of tears they terminate."

We had hoped for a revival of trade. Transient lights gleamed along the horizon, and for a time the false dawn was mistaken for the true.

During February and the early days of March, darkness set in. How black and cheerless it was, the letters of your correspondents at that time portray. Indeed, under the pressure of dull times it requires consummate skill to write a cheerful trade letter. Somehow the words run along minor chords: the writer may intend to be merry, the musician may mean to give us a waltz, but the reader detects in the dirge-like monotone a measure void of mirth. Under the pressure of such a spell do you wonder at our silence?

But the night is passed. Dawn is here. A genuine awakening has taken place all along the line. Trade has revived to such an extent as to warrant a belief that it will be lasting. The improvement really dates from the adjournment of Congress a month ago. Its growth has been gradual, giving all the more promise of durability. Those fungous plants of the mushroom variety which spring into full being during a night are generally of a poisonous character. One of the best evidences of improvement in local circles can be had by a visit along the water front. The activity on the wharves and at the freight depots is so marked as to merit more than passing notice—the increase in railroad earnings over the corresponding period of last year. But, perhaps, the most conspicuous favorable feature is the general air of confidence expressed by visiting merchants. They seem to regard the business outlook as encouraging, and realize a turn in the tide of values is at hand. The advance in wages voluntarily ceded to the coke workers on the 1st inst. did much to help along the strengthening process inaugerated in the Pittsburg section. Restore the price

(And the Reader.)

Three Drummers went drumming into the West,
(Out into the West as the sun went down,)
Each drummed for the firm which paid him best,
(And their names were Robinson, Jones and Brown.)
Now Robinson drummed for the Smashem Bros.,
And Jones quoted prices on Lumber,
But Brown he knew
A thing or two,
And drummed like fun for the Humber (American).

Three buyers sat each in his easy chair
(With a smile on his face as the sun went down,)
For each had been drummed by the Debonair
(By the festive Robinson, Jones and Brown.)
But Robinson drumming failed to win,
Though fibs he told without number,
And Jones the sinner
Thought he was the winner,
Till Brown sold each Buyer the Humber (American).

Send for Catalogue and learn how he did it.

Humber & Co., America, Ltd., 318 Broadway, New York.

of Bars and Billets to a fair figure, and manufactured articles will naturally fall into line. The surface indications point that such will be the outcome of the present unrest, provided mal-legislation does not set in.

Noticeable changes have occured recently in the following lines: Bolts changing list and discount, taken throughout making a decided advance. Tacks show an advance even more marked. Wrought Butts list and discount changed to obviate inequalities; safe to say will show a comfortable advance. These together with other changes less prominent are indicative of an effort, at least, to put prices on a more remunerative basis.

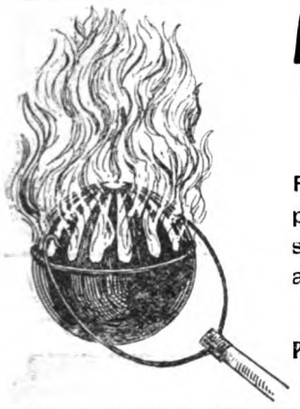
prosperous record has been outdone. Crucible sales lead the advance, followed by pencils, stove polish, lubricating graphite, and so on, down the line, to about even figures on less important articles.

There is but little else to communicate, as there have been no disturbing inflnences nor fluctuating orders. The situation is one of sound health and and steady growth, without necessary special advertising. We are naturally large advertisers, but have not deviated materially from regular methods to produce special results. Jos. Dixon Crucible Co.

Meeting of the Western New England Association.

Quite an important meeting of the Western New England Iron, Steel & Hardware Association was held Friday, April 5th, at New Haven, Conn. This was a meeting of considerable interest, and nearly every member was present. The most important subject for consideration was the revising a schedule of prices which was adopted about nine months ago, and has been kept and maintained by every member without exception. It has given profits on certain lines of goods which has been sold heretofore as leaders with no profit whatever. The Association had as their guests, Mr. McBarron, Mr. Butts and Mr. Bangs, of the Boston Association, who gave illustrations of how the Boston Association was maintaining prices, and the good that both Associations were doing the Hardware trade in general throughout New England. A committee from both Associations was appointed to visit some of the heavy Hardware dealers in New York City, for the purpose of getting them to organize and work in harmony with the two New England Associations. A most enjoyable dinner was served at the Republican League Club House, after which the meeting adjourned, to meet the second Friday in June.

The officers of the Western New England Association are L. L. Ensworth, president, Hartford, Conn., who is one of the oldest and best known heavy Hardware dealers in Connecticut; S. S. Hunter, vice-president, of the firm of Hunter & Havens, Bridgeport, Conn.; R. S. Woodruff, secretary is the junior member of the firm of C. S. Mersick & Co., New Haven, Conn.; C. C. Lewis, treasurer, Springfield, Mass., is a thorough heavy Hardwareman, and does a large and extended business throughout Northern and Western New England.



Robert L. North, who died recently at his home No. 1,850 Aldine Street, Lake View, Chicago, was a member of the Hardware firm of Larrabee & North, Chicago. He was well-known in New York, having been a member of the Seventh Regiment. He was at one time a member of the former firm of W. N. Seymour & Co., Hardware merchants, No. 17 Chatham Square, which was succeeded by White, Van Glahn & Co.

Asbestos in its original state is a fibrous mineral indigenous to Canada and other places, and is sent over here in lumps like pieces of raw slate on the top and bottom, while the sides are covered with a fluffy substance—the fibre, when it is pulled from the bulk.

Geo. C. Wright, formerly salesman for Wm. Jessop & Sons, Ltd., has accepted a position with the Carpenter Steel Co., and no longer represents the former firm.

The announcement is made that the Bryden Horse Shoe Co., Catasauqua, Pa., are preparing catalogues of the racing plates and trotting shoes which they are about to manufacture of aluminum. They have bought the rights of Covington & Kent, of New York, who are the patentees. W. J. Kent will directly supervise the manufacture, but orders should be sent to the Bryden Horse Shoe Co.

"Go for the Russian Thistle! Clean it out, or it will clean you out." This urgent warning is found upon a leaflet issued by the Withington & Cooley Mfg. Co., Jackson, Mich., who stand ready to furnish a Thistle Cutter by which this good work can be done.

Aluminum letters can be fastened to window glass with the same cement that is used for porcelain letters, but the aluminum must be thoroughly washed in benzine first to remove the grease.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Stores, Etc.

Augusta, Me.—J. H. Cogan & Co., Hardware, etc., will take up bicycles, and are improving the interior of their salesroom with that object in view.

Chicago, Ill.—Horton, Gilmore, McWilliams & Co., Nos. 172 to 176 Lake Street, are putting on the market a new high grade bicycle, which will be known as the Garden City.

Dolgeville, N. Y.—W. H. Fabille, bicycles, commenced business, accepting agency for the Columbia and Hartford bicycles, as well as for the Spaulding and Credena wheels.

Jacksonville, Ill. — Hayden & Gay, the leading Hardware and bicycle dealers, have added a full line of Wilhelm "Apollo" bicycles to their line of wheels.

Madisonville, Ky.—Walter Pratt, bicycles, will open new store in the Hog Eye Block.

San Francisco, Cal.—The Clipper Bicycle Co. have incorporated, with J. C. McBride, G. F. Hanson, F. C. Bachmuster, H. G. Stephenson and A. J. McLode, as directors. Capital stock, $21,000.

Saratoga, N. Y.—The Sterling Bicycle Co. will establish a branch on Spring Street. The company have leased the Casino for that purpose. Mr. Roland will be resident manager. A riding school will be carried on, and a rental business conducted.

Shelby, N. C.—W. H. Miller, Publisher the *Aurora*, desires agency for a good bicycle. Correspondence with manufacturers invited.

Springfield, Mass,—W. E. Kinney & Co., bicycles, have commenced business, accepting agency for the Rochester wheel.

Syracuse, N. Y.—Merrion Andrews is reported to be endeavoring to organize a company or form a copartnership to manufacture a new bicycle gear recently invented by him and for which a patent application has been made. It is claimed that the new gear only adds about six pounds to the weight of the wheel, but that its increased speed more than makes up for its weight.

Terre Haute, Ind.—William A. Hunter, livery stable, No. 614–618 Ohio Street, will add a bicycle department, handling the Victor, Frasier and Outing bicycles. The new department will be under the management of Alley Baker, formerly of the bicycle firm of Baker & Watson.

Washington, D. C.—B. H. Steinmetz, hatter, No. 1237 Pennsylvania Avenue, has added a department for bicycling apparel, tennis goods, etc.

Washington, D. C.—M. A. Tappan, sporting goods, No. 1013 Pennsylvania Avenue, is preparing to open a bicycle repairing department. He is carrying the Spalding wheel, and a full line of sundries.

Worcester, Ohio.—H. A. Rich, of Fort Wayne, Ind., and J. P. Bough, of Goshen, Ind., have formed a copartnership, and have opened new Hardware store and will take up bicycles.

Changes and Removals.

Fort Wayne, Ind.—Fred Borneman, sporting goods, bicycles, etc., Main Street, reported sold out to John Troutman, who will continue the business.

Parkers Prairie, Minn.—Saunders & Post, Hardware, bicycles, etc., partnership dissolved.

St. Paul, Neb.—N. I. Bollenger, Hardware, bicycles, etc., sold out to Theo. J. Steen, of Boolus, Neb.

Thomson, Minn. — Cameron & Smith, Hardware, bicycles, etc., partnership dissolved.

Washington, D. C.—Cline Bros., bicycles and sporting goods, agents for the Victor, will remove April 1st to larger quarters at No. 909 Pennsylvania Avenue, N. W., their present location being at No. 715 Thirteenth Street.

Wellington, Ill.—Galloway & Son, Hardware, bicycles, etc., succeeded by Galloway & Evans, Mr. Galloway, Sr., retiring from the business, and Harry Evans purchasing a half interest.

New Goods and Improvements.

Ansonia, Conn.—John McEnery and E. E. Trumppour have invented an improved bicycle stand, and are reported to be endeavoring to organize a company, or effect a partnership by means of which the invention may be put upon the market.

Creston, Ind.—The Fuller Hardware Co. has been incorporated by M. E. Fuller, A. R. Fuller and Roy A. Fuller. Capital stock, $50,000. Will take up bicycles. Correspondence with manufacturers solicited.

East Norwalk, Conn.—C. H. Aisthorpe, bicycles, etc., is preparing to move into larger quarters, now being erected for him. The second floor of the building will be occupied as a bicycle riding academy. A bicycle repairing busines will also be conducted.

Greenfield, Mass.—W. S. Clark is putting on the market a new manufacture of liquid tire cement, for cementing tires for bicycles having both steel and wood rims.

Saratoga, N. Y.—Charles N. Hulbert, bicycles, will remove from his present store, No. 334 Broadway, to No. 352 Broadway. He is building an addition, which will be used as a bicycle repair shop.

St. Paul, Minn.—Farwell, Ozmun, Kirk & Co., sporting goods, Hardware, etc., have moved into new building on East Third Street, extending from Broadway to Pine Street, covering area of 94 by 203 feet, with six stories and basement. This is a corporation, of which the following are the officers: F. P. Strong, president; O. A. Bostwick, vice-president; R. A. Kirk, treasurer; W. T. Miller, assistant treasurer, and F. A. Bostwick, secretary.

Winnetka, Ill.—J. T. Calrow is putting on the market a new bicycle chain lubricant.

Correspondence Solicited.

Bamberg, S. C.—C. J. S. Brooker will take up bicycles. Correspondence invited with manufacturers of wheels and sundries, looking to accepting agency.

Beaufort, Ga.—R. H. Allen, harness, etc., invites correspondence with manufacturers of bicycles and bicycle sundries, looking to accepting agency.

Beeville, Tex.—Burrows Bros., general merchandise, desire agency for a good bicycle.

Bel Air, Md.—Phineas F. Ball, Hardware, etc., desires propositions from manufacturers of bicycles and bicycle sundries.

Bethany, Mo.—Cole & Pile, Hardware, etc., invite propositions from bicycle manufacturers, looking to accepting agency.

Blocton, Ala.—J. A. Cates, general dealer, desires agency for bicycles, and invites correspondence with manufacturers.

Caldwell, Tex.—Wallney & Stokes, harness, etc., are thinking of taking up bicycles. Correspondence with manufacturers solicited.

California, Mo.—R. Kiely, Hardware, etc., is preparing to take up bicycles.

Cleveland, Tenn.—Hall Bros., Hardware, are preparing to take up bicycles. Solicit propositions from manufacturers of wheels and sundries.

Dayton, Ky.—Roy McClanahan invites propositions from manufacturers of bicycles and bicycle sundries, looking to accepting an agency.

Ellisville, Miss.—H. S. Gunn, sporting goods, Hardware, etc., intends adding bicycle department, and to that end invites correspondence with manufacturers of bicycles and bicycle sundries.

Havre de Grace, Md.—J. N. Spencer, general dealer, will add bicycles. Desires correspondence with manufacturers.

Middleboro, Mass.—Fayette W. Hayden, bicycles, preparing to open a new store.

Miscellaneous.

Big Stone Gap, Va.—G. W. Lovell & Co., Hardware, etc., will take up bicycles.

Carlisle, Pa.—E. C. Bushman, bicycles, has opened a new store in the Odd Fellows' building.

Cincinnati, Ohio.—The Pickering Hardware Co. have been appointed sole agents for Cincinnati for the Columbia and Hartford bicycles and bicycle sundries. This department of the business will be under the management of Herrman Bumileer.

Dabney, Ark.—Daniel Dabney, Hardware, bicycles, etc., new store opened.

Leavenworth, Kan. — Christiansen & Burns, manufacturers of the bicycle sled, are reported to be endeavoring to organize a company to form a partnership to increase the capacity of their present business, in which there is said to be large profits and a sure investment. They have appointed C. J. Whipple & Co., Waterloo, Iowa, as their selling agents for the United States and Canada.

Minda, N. Y.—Fletcher C. Peck is reported to be organizing a company with a capital stock of $20,000, to establish a bicycle factory.

Westboro, Mass.—The Humber Limited Bicycle Co. have nearly doubled the capacity of their plant recently, and are now running night and day.

The "OHIO" Ice Cream Freezer

(Gooch's Patent.)

A Wonderful Success.

Greatest improvement ever made in Freezers.

IT IS WORTH LOOKING UP!!

Improvements are being made in all lines of manufacture, Why not in Ice Cream Freezers?

"Tickled to Death."

TO THE TRADE.—We are making the "OHIO" Ice Cream Freezer, which is new and good, of full size and excellent finish. It is far superior to any other. It works to perfection and pleases everybody. Nothing like it in the market. We have undertaken the manufacture of this Freezer on account of its great merit. If you deal in Freezers you would like to see it. Send for Sample.

The Guarantee Wringer.

WARRANTED FOR 5 YEARS.

DO YOU KNOW

That the Vital Part of a Clothes Wringer is the Rolls, and that CHEAP WRINGERS must necessarily have CHEAP ROLLS?

The "Guarantee" Wringer has the Best Roll it is possible to make.

By actual test the TRADE MARK **"GUARANTEE"** ROLL, run **474** hours, 53 revolutions per minute, under a pressure of 450 pounds.

The Rolls used in the Cheap clothes wringer under the same conditions last from 3 to 30 hours.

The "GUARANTEE" Wringer will last ten years for ordinary family use. The Cheap clothes wringer will last from 1 to 6 months.

FAC SIMILE OF **RED** TAG

Dealer must send this tag to the Manufacturer, when making claim for Roll.

From whom Purchased.....

Date.....

The Rolls in this Wringer are the and are Warranted for 5 YEARS for regular family use. If either of the Rolls are worn out within that time, return the Wringer AND THIS TAG, and a new Roll or Rolls will be furnished without charge

The ANTHONY WAYNE MFG. CO.,

Fort Wayne, Ind.

AND

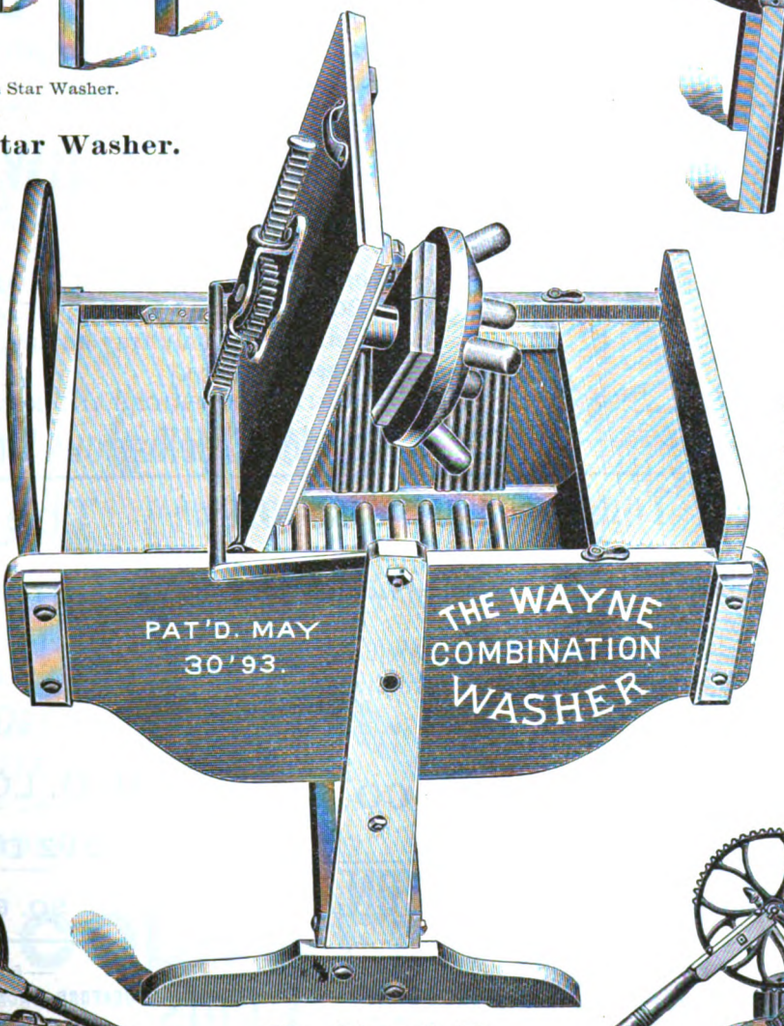
St. Louis, Mo.

SOLE MANUFACTURERS.

No. 2 and 3 Western Star Washer.

The Western Star Washer.

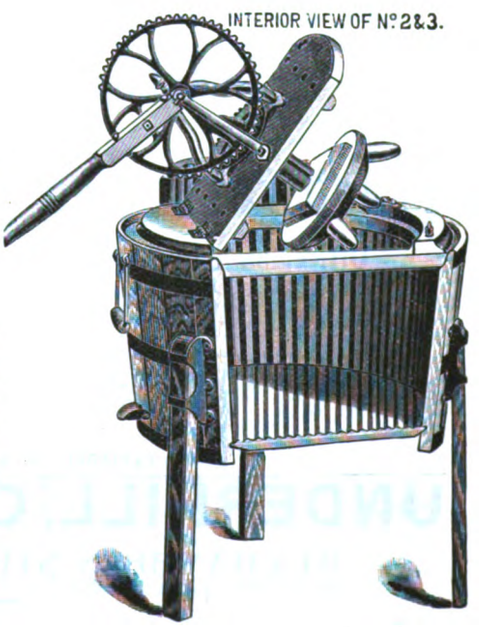
This machine is too well known all over the country to require any extended remarks in regard to its utility. It has been in the market too long, and is known by thousands of housekeepers to be the standard family machine. The make-up and finish of our Western Star will be the same as heretofore, and will not be excelled by any other make.



Write for discounts.

No. 5 Wayne American Washer.

The Wayne American Washer.



This machine we got up at the special request of some of our Western customers. It is of the same make and finish as our No. 2 Anthony Wayne. Staves and bottom are corrugated; in fact it is the No. 2 Anthony Wayne reversed.

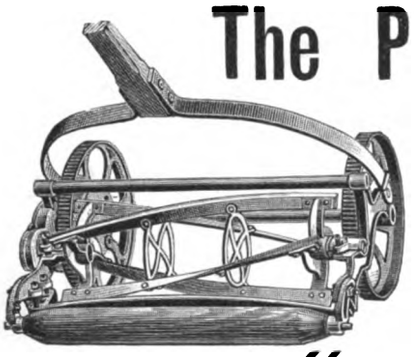
No. 11 and 12, Wayne Combination Washer.

Our latest and best invention in Washing Machines, the Wayne Combination Washer. It combines the reciprocal Pin-Wheel motion with an oscillating movement of the whole sud box. Works fully one-third easier than any other machine that operates with a Pin-Wheel agitator, takes less water, is more simple in construction than any other machine on the market. Well made of the best yellow poplar, finished in excellent style. A thirty days' guarantee goes with every machine sold.

The No. 2 Anthony Wayne Washer.

This machine is of the same size and capacity as No. 1 Anthony Wayne, but instead of the loose crate, the staves and bottom of it are corrugated. It is made and finished the same as the No. 1, and warranted to do good work. Parties wanting a cheaper machine will do well to try this before buying any ot her.

All of the above styles are kept in stock and sold by



The Albany Hardware Co.

ALBANY, N. Y.

Anthony Wayne, No. 1.

This machine is our old stand-by much improved; the crate inside is independent of the tub and can be removed after the washing is done. The machine is of the same capacity as the No. 2 Western Star, is made out of white pine, painted and grained an ash color and finished in every respect first-class. It will wash five shirts at a time clean, without the use of a washboard, and is fully warranted in every respect.

Capewell Horse Nails,

"THE BEST IN THE WORLD."

— THE TESTIMONY OF —

SILAS S. PUTNAM,

THE **Pioneer and Veteran** **Horse Nail Maker.**

241 Neponset Ave., Dorchester, Mass.
Boston, January 18th, 1895.

The Capewell Horse Nail Co.,
Hartford, Conn.

Gentlemen:—In reply to your inquiry, I will say, that having had over forty years' experience as inventor, and manufacturer of Horse Nails, and having invented and patented the Putnam Horse Nail Machine, I am thoroughly conversant with the various methods and machinery employed in making Horse Nails, and I have no hesitation in saying that I consider the "Capewell" process far superior to any other known system, and that nails so made, have no equal in those qualities which are requisite in high grade Horse Nails.

I find the "Capewell" Horse Nails, while stiff enough to make the best driving nail, still are sufficiently soft to clinch well, and will hold the clinch.

These nails are very tenacious, their tensile strength, after many tests on the testing machine, proving greater by from *Forty to Fifty* per cent. than that of any other Horse Nail made.

I believe the "Capewell" Horse Nail to be **the safest to use, the best to drive, and the best to hold the shoe.**

You are at liberty to make use of this letter as you may see fit.

Yours truly, SILAS S. PUTNAM.

MADE BY **THE CAPEWELL HORSE NAIL CO.,** HARTFORD, CONN.

SEE NEXT PAGE.

Digitized by Google

Capewell Horse Nails,

HAVE THE LARGEST SALE OF ANY HORSE NAILS IN THE WORLD.

G. J. CAPEWELL,

The Inventor of the Capewell Process.

CAPEWELL NAILS ARE:

"THE BEST DRIVING NAILS,"
"THE BEST NAILS TO HOLD," and
"THE SAFEST NAILS TO USE."

They Never Split in Driving.
They Never Crimp in the Hardest Hoof.
They are Flexible to Clinch, and the Clinch holds against any Strain in Service.
Their Perfect Points make a Clean Cut Hole in the most Brittle Hoof.
They are Absolutely Uniform in Length, Breadth and Thickness.

They are Made from the Best Swedish Iron Rods, specially imported, the quality of which is improved in compactness, tenacity, and uniformity of temper, by the Capewell process, **Controlled Exclusively by this Company.**

As demonstrated by actual mechanical tests at Chicago, **the Tensile Strength of the Capewell is One-Half greater than that of any other Nail made.** Thus it is that Capewell nails never break under the heads, but hold the shoe until it is worn out.

"American Trackless" Sliding Door Hangers

THESE HANGERS ARE:

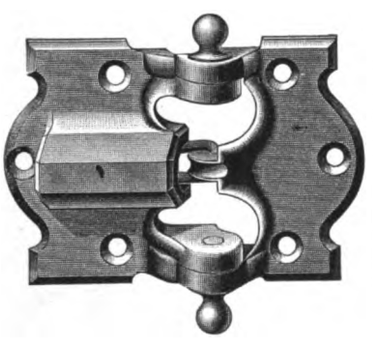
Trackless.—The use of a track above or below and the special framing which it necessitates are obviated.

Wheelless.—There are no whee's to bind by reason of warped or sagging track. The movement is perfectly parallel and prevents binding.

Noiseless.—The hangers work noiselessly and the operation is extremely easy.

Quickly Put Up.—They are put together at the factory, and being very simple in construction, they can be put up in one-third of the time required for other Hangers, thus effecting a large saving in time and expense.

Easily Adjusted.—They are provided with a **gravity stop,** to be placed overhead between the doors, which allows the door to be drawn out of the pocket giving easy access to the adjusting screws by which the door can be raised or lowered and adjusted plumb.



Substantial.—The different parts are made to carry three times the weight of ordinary doors of the sizes given below.

Compactly Packed.—They are packed (fully assembled and ready to be put up) one set in one crate, including all necessary bolts and screws.

No. 1. Full sets for Double Doors, each 2 to 4 feet wide.....List, $10.00
No. 2. Full sets for Double Doors, each 4 to 6 feet wide.....List, 16.00

Half sets for Single Doors, half price.

Highest Award

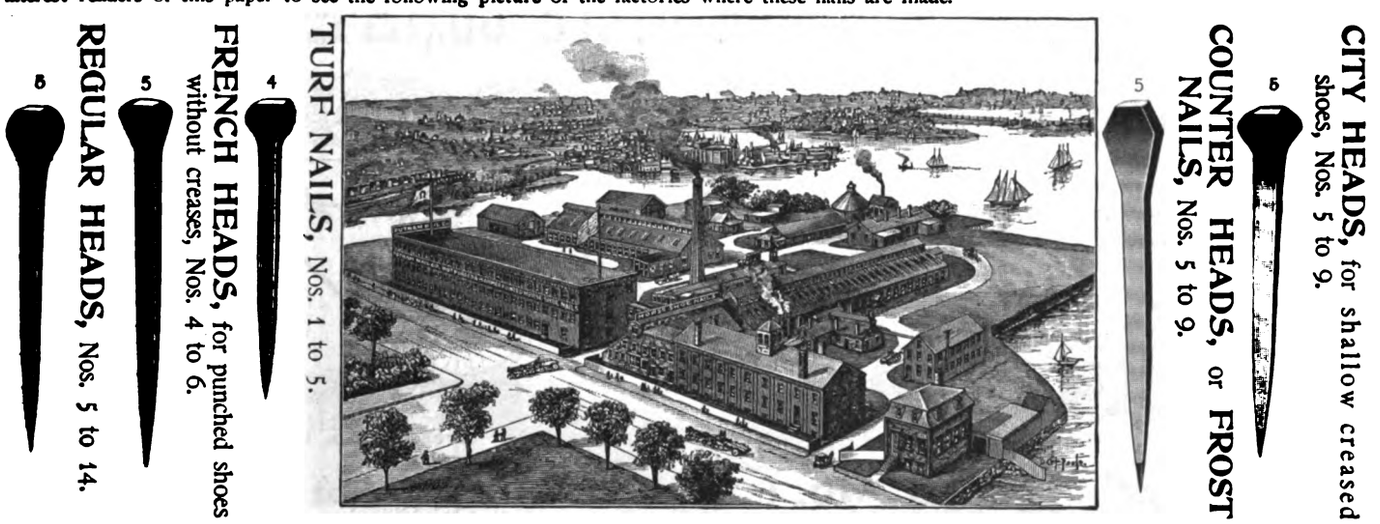
FOR

Supreme Excellence.

TO

The PUTNAM Hot-Forged and Hammer-Pointed Horse NAILS,

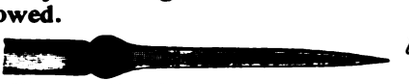
Philadelphia, - - - - - 1876.



Chicago, - - - - - - 1893.

San Francisco, - - - - 1894.

A BIRD'S-EYE VIEW OF THE GREAT FACTORIES



Where the Putnam Nails are Made.

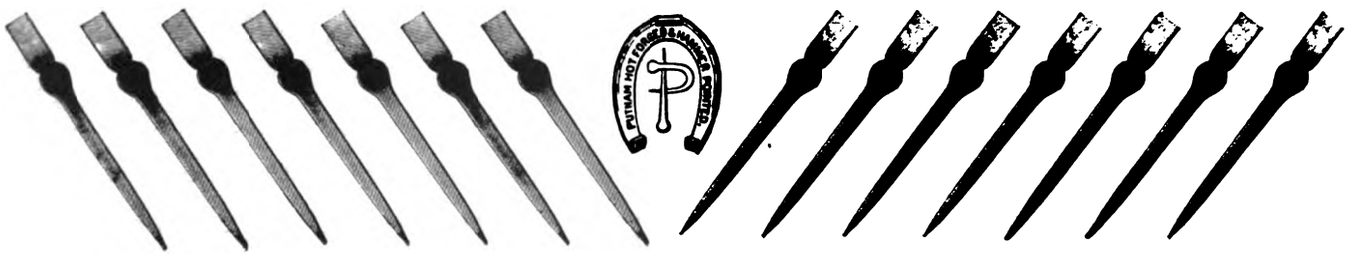
For many years the name "**Putnam Nail**" has been a **familar household word** in the homes throughout America. It may therefore interest readers of this paper to see the following picture of the factories where these nails are made.

The Putnam Nail Company's Factories at Neponset, a suburb of Boston, Mass. Ten acres of ground are occupied by this plant, and about 160,000 square feet or nearly four acres of floor space in the buildings. More than four hundred people are employed. The daily product exceeds eight tons of nails that are sent to every part of the world.

The Putnam Nail is the only exclusively Hot-Forged and Hammer-Pointed Horse Nail in the world. In its manufacture the old hand process is followed.

Forged from end of rod,  *by hammers only.*

It is impossible for a Putnam Nail to **Split, Sliver** or **Break** when it is driven into the horse's hard hoof because in the process that is employed in their manufacture the metal is firmly welded into a perfectly sound, tough nail that is **absolutely safe** and outwears all others.



SEE THAT YOUR HORSE IS SHOD WITH PUTNAM NAILS.

They are not sheared but have smooth edges clear to the point.

DANGEROUS NAILS. There are Nails called, by their makers, "hot-forged," which really are also "cold-rolled" and "clipped." The process of their manufacture is liable to separate the fibres of the iron and cause the nail to split.

Examine your nails. If the **edges** are smooth for the whole length, they are the **Hot-Forged Putnam.** If they show marks of the shears near the point, they are cold-rolled and sheared.

PUTNAM NAIL CO., Neponset, Boston, Mass.

The Automatic Refrigerator

has more good points and does better work than any other, and for that reason is a better seller. Our illustrated catalogue for 1895 tells all about the line. Its advantages are:

Perfect circulation.
Large condensing and purifying capacity.
It has no flues to cause it to smell bad.
The trap is inside where it cannot be misplaced or lost.
The drip pipe may be cleaned without disturbing anything in either chamber, and is entirely out of the way.
It has nine walls to protect the ice and to maintain a uniform temperature in the cooling chamber.
It has woven wire provision shelves that are superior.
It has superior hardware.
It is more capacious and convenient.
Flavors of foods will not mix.
Last but not least, it's different, and will bring new customers and new trade.
We want the leading dealers to handle our goods and but one dealer in a place.
The goods are made of ash, and well finished.

PERSISTENT

Enterprising people are beginning to learn the value of advertising the year round. The persistency of those who are not intimidated by the cry of "dull times," but keep their names ever before the public, will surely place them on the right side in the end. Think over the persistent advertisers you know.

THE BERRY CLOTHES SPRINKLER

Patented.

Fills automatically and will enable you to iron your clothes immediately after sprinkling, if you so desire.

For starched clothes it is unsurpassed.

It is an excellent sprinkler for house plants.

It is capital for laying the dust while you are sweeping.

Long used carpets can be made much brighter by putting a few drops of ammonia in water and sprinkling before sweeping. Retails for 25 cents. Libe al discount to the trade. Send for price.

—Send for description, price lists, etc.—

The Conroy patented New Automatic Refrigerator Door Fastener, with lock and key.

Manufacturer of Refrigerator and Ice House Fasteners Hinges and Faucets.

THIS FASTENER is the most complete one ever invented The door will push to more easily with this Fastener than any in the market. The Fastener will tighten the door by the door closing. It is the most substantial; nothing about it to get out of order By lifting the handle quarter circle the door will open, and if it sticks it will release it It has a new and improved lock, absolutely secure. Made for flush or raised doors, composed of brass or bronze metal in any finish desired, plain or ornamental.

"Excellent Cream!"

WHITE MOUNTAIN FREEZER

Improved for 1895

With which the finest quality of cream can be produced in Four Minutes.

As features of especial merit we claim:

A STRONG, waterproof tub, bound with heavy, galvanized iron hoops that fully protect the tub, and do not fall off; the gearing completely covered, so that nothing can get between the cogs. Cans full size and made of the very best quality of charcoal tin plate; beaters of malleable iron and tinned; all castings attached to the tub nicely galvanized to prevent rusting. It is the only Freezer in the world having the CELEBRATED DUPLEX DASHER, WITH DOUBLE SELF-ADJUSTING WOOD SCRAPING BAR, by the use of which cream can be frozen in less time, yet finer and smoother than can possibly be produced in any other Freezer now in use.

Get the Best. All Leading Jobbers Sell Them.

STANLEY'S PATENT
HAND-Y LEVEL.

The shallow grooves along the two sides of this Level give the owner an excellent grip on the Tool. In climbing ladders, walking on stagings or on the frame of a building, the peculiar form of the Level imparts a feeling of steadiness to the workman who carries it. For ascertaining a Plumb, it can be brought to a perpendicular position with remarkable ease and accuracy.

No. 16. Hand-y Plumb and Level, Cherry, Polished and Tipped.....$1.25

ORANGE SPORTING POWDER, MANUFACTURED BY LAFLIN & RAND POWDER CO.

ORANGE RIFLE EXTRA, ORANGE SPECIAL, ORANGE DUCKING, ORANGE LIGHTNING.

The attention of TRAP AND FIELD SHOOTERS, RIFLEMEN AND DEALERS IN GUNPOWDER, is called to the new ORANGE SPORTING POWDER, patented April 17th, 1888, and branded ORANGE RIFLE EXTRA.

This Powder is quick and strong, and burns with such perfect combustion that the only residum left in the barrel after shooting is a dark oily substance easily removed While this Powder is not exactly SMOKELESS, it gives only a light bluish smoke, which is almost instantly dissipated, and interferes but little with the shooting of the second barrel, taking the place of the so called smokeless powders in this respect.

This brand of powder sells at the same price as any other brand of Rifle Powder and is superior to any made. No person who shoots can afford not to give it a trial, as after once trying it he will never use any other Powder when he can obtain the ORANGE EXTRA. Weight and quality guaranteed.

MILITARY, MINING AND BLASTING POWDER.

LAFLIN & RAND POWDER CO., - 29 Murray Street, New York City.

BRANCH OFFICES:

The Best Adjustable Screen is appropriately called

THE "HANDY."

MADE IN EIGHT SIZES.

A FEW OF ITS SUPERIOR POINTS ARE:

1st. EASE IN HANDLING.—The hook-shaped pull-bars fastened securely in the centre of the sliding ends afford a ready hold for convenience i placing and removing the screen at the operator's will.
2d. When placed under the sash, it will readily adjust itself to windows in square or out of square.
3d. The Screen is made of hard wood, natural color, finished in oil, and is the neatest, lightest and strongest screen made.
4th Has Box Panels, making both sides alike.

Manufactured by **Pennsylvania Screen Co.**

Sole Agents, **John H. Graham & Co.,**
113 Chambers Street, New York.

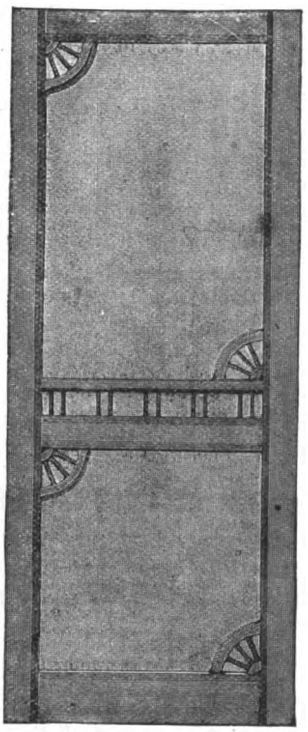
Continuous Roofing Tin.

CONSIDER EVERYTHING and see if you don't find it cheaper and better to use "TANDEM" than to use any other equal grade of roofing

It is easier to lay than ordinary roofing and it makes a better roof.

Our "TANDEM" is made in sheets 20 and 28 inches wide and 96 inches long. The seams are locked together, end to end, making a straight continuous course containing 100 square feet. The seams are soaked on both sides during the coating process, and are as strong and impenetrable as the solid sheet. Such courses are particularly useful in gutters and valleys.



It is ready to use the moment you unroll it. No re squaring, no trouble, no lost time, no waste tin. Every inch of it goes directly on the roof in absolutely straight courses.

It affords a saving of labor and solder. A square of it will cover more roof than a square of 20x28 loose sheets. These are the reasons why every roofer should use it.

There are other points worth considering: (1) While all the plates are full weight (I C thickness), the shipping weight of a square of "TANDEM" is less than that the same quantity of 20x28 sheets. (2) We can ship direct to where the goods are to be used. If you're working away from home this saves freight charges double handling, and time If you care to know more about "TANDEM" CONTINUOUS ROOFING TIN write us. Prompt shipments can now be made

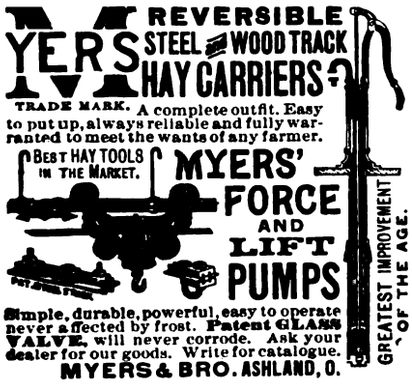
Bellevue Pump Co., Bellevue, Iowa.

A Good Article Will Always Sell

THE above fact has been thoroughly demonstrated by the large sales on the "Perfection Elevator and Purifying Pump" in the last eighteen months, when every other business almost has been at a standstill.

The prospects for a booming trade on the "Perfection" for the coming season were never better.

"The proof of the pudding is the eating." Our proof of the "Perfection" is the orders we now have on our books for Spring delivery. Dealers place your orders at once for shipment in the next ninety days, to avoid delay in getting your orders filled promptly, and sell the best pump in the world. If you don't believe it, write us for our illustrated catalogue and book on pure water, which contains hundreds of testimonials from the best dealers in the United States.



We have made another improvement in our D. G. Fixture, as well as our new combination spout and receiver of cast iron. Our guarantee to purify the foulest well or cistern in ten days use, always stands good.

We are also manufacturing a new irrigation pump with capacity of one hundred to two thousand gallons per minute. Address us for prices. Mention this paper.

Sole Manufacturers,

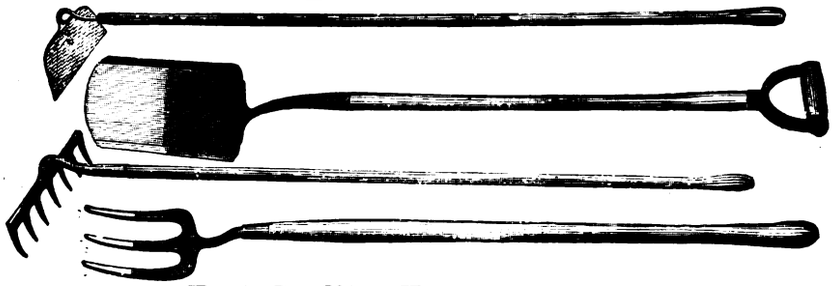
S. F. HEATH CYCLE CO.,

Minneapolis, Minn.

The AMERICAN WICK is made on scientific principles. The gum inherent in the natural cotton is taken out, and no expense is spared to produce a wick that will give THE GREATEST ILLUMINATION.

THE

AMERICAN WICK



Made by the

WICK DEPARTMENT

Of the STANDARD OIL CO. of NEW YORK.

Oil drawn up through the AMERICAN WICK burns with a large, clear, white light and the flame does not drop off in size as it does when a poor wick is used. When the cotton is clogged with its natural dust and gum the full illuminating power of the oil is not obtained and the complaint is heard that the light DROPS.

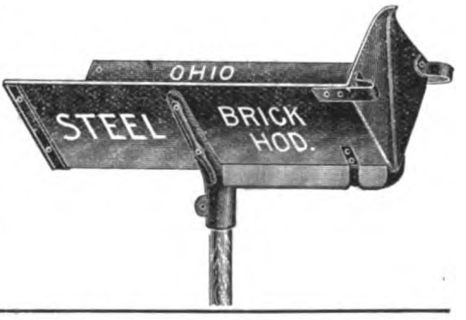
OHIO "WATER TIGHT"

STEEL MORTAR and BRICK HODS



OHIO "Water Tight" Steel Hods are from 25 to 50 per cent. lighter when in use than the common wooden Hod.

Ohio "Water Tight" Steel Hod bodies are positively Water Tight. These bodies are the only ones made, folded from a single piece of sheet steel without cutting the metal, are reinforced on the edges and at the dumping point By our special devised machinery we are enabled to furnish the strongest, lightest, most durable and only double end mortar and brick hods offered to the trade.

Our improved Malleable Iron Fork and Wooden Shoulder Saddle make it easier for the user to carry, or to attach a piece of cloth, should he so desire, to the under side of the saddle than the old style.

With our improved one piece Malleable Iron Fork and socket for holding the hardwood handle and taking up the shrinkage, a broken handle can be readily replaced, and hods shipped knocked down.

PAINESVILLE, OHIO.

A Mistaken Notion.

It is a mistaken notion that a fine store in an eligible location, surrounded by attractive signs, is a superior advertisement; for the experience of the most enterprising merchants is that it pays better to spend less in rent and more on advertising.

The Toledo Machine & Tool Co.,

Excellent Condition of the Hardware Club.

When that time was reached when it became necessary to furnish and fit the rooms of the New York Hardware Club, it was thought the part of wisdom to discount the future, to a small extent. The board of governors were authorized by the Club to issue bonds to the extent of $15,000, for the purpose of making certain that sufficient funds should be in hand to properly equip the Club, and with the assurance that at an early date these bonds could be retired. It was found necessary to issue these to the extent of but $11,000, all of which were taken by the members of the Club, and many more of which could have been placed if necessary. It was, of course, thought that a year or so might elapse before the time would be reached when any portion of these bonds would be retired. The Club rooms were opened in June last, and now, within ten months from that date, $5000 of these securities have been called in and retired. It may be taken for granted that this step has not been taken without ample funds left in the hands of the board of governors, to meet all present requirements.

We call attention to the above fact, simply for the purpose of showing that the Club is in a first-class financial condition, and that it has realized a measure of financial success far beyond the expectation of its founders. At the last election of members there were within five of the limit of 500 resident members, and since then there have been enough names posted to more than make these good. If there is any club in the country of the size and importance of the Hardware Club, which can make a like exhibit, both as to financial condition and membership within the first year of its actual practical existence, we would be glad to hear of the same, and to chronicle its good fortune.

Rapid Transit in New York.

It will be several years at least before the proposed underground road can be completed even if there are no insuperable obstacles experienced, and in the meantime why should not our present elevated roads be developed to their full usefulness? The committee of experts appointed by the Rapid Transit Commission have pointed out that by constructing a third track on both the east and west sides of the city, improved express service could be rendered at short notice. There is also no reason why the principal ferries should not be connected with the elevated system, and the public thereby greatly benefited. When travelers arrive at the Pennsylvania depot in Jersey City, walk on board the upper deck of a ferryboat on the same level, cross West Street on a bridge and then have to descend to the level of the street and walk two or three blocks in a jostling crowd, perhaps in the rain and lugging a handbag, they are very apt to ask themselves the question, Why are not the elevated roads extended to the ferries and a passenger enabled to step from the ferryboat directly to the elevated trains? With third track express service and ferry connections, the present elevated system could be of vastly greater usefulness to the public than at present, and by the time the underground road is constructed there would be traffic enough to tax all our transit facilities to their utmost.

We are compelled, by sad experience, to urge all parties who send HARDWARE electrotypes or cuts of any character for illustration, either in our reading or advertising columns, to be very careful in regard to the wrapping and tying of the same. Hardly a day passes without the loss of some cut of this character, which we know has been started in this direction, but becomes lost in the mails, through insecurity of wrapping. There is constantly on exhibition in the New York post-office a miscellaneous lot of articles of this character, for which no owner can be found, and for which somebody is perhaps anxiously waiting. A strong manila envelope with a clasp at the end, such as can be purchased in almost any stationery store, is by far the best medium by which cuts of this character can be sent. By paying attention to this suggestion, and seeing that the cuts are securely wrapped, no matter in what covering they may be sent, our friends will confer a great favor upon HARDWARE, and save incidental loss and annoyance to themselves.

Mr. Haines on American Hardware in Europe.

Editor Hardware: Your esteemed favor asking me to give you my impression regarding the future business, of not only Bicycles, but of American Hardware in general in European countries, is duly received.

It is a very large question, and one that can be looked at and studied from several "Points of View." You are aware that for many years American manufacturers have been shipping many kinds of Hardware, such as carpenters' tools, files, auger bits, carriages, lawn mowers, harvesting machines, steel forks, hoes, rakes, etc.—in fact, in many sections of Europe the American goods bring higher prices than any other make, and are regarded as superior both in prices and durability. This is not only the case in non-producing countries, but, because of absolute superiority, American goods everywhere take precedence.

I wish to remark in passing, that this trade is not secured by making low prices, or by the American manufacturer cutting the wages of his employees; but as a matter of fact it is brought about upon the same principle of the artist whose pictures were being criticised by fellow artists, and wonder expressed as to the means used to produce so superior an effect. Artist Number Two claimed that he used the best materials and took exceeding pains; the difference was discovered in the fact that Artist Number One, while using the same materials, mixed them with brains; and so it may be said of the American manufacturer.

One of the serious drawbacks in our export trade is found in the fact that American manufacturers do not, or will not, understand the necessity of paying special attention to little details, such as fully prepaying postage; also properly packing in small as possible spaces; also making invoices in full detail to what the goods invoiced really are; taking out proper papers for the country to which the goods are destined; and seeking lowest possible rates of freight. All this, and many others go to make up the favorable or unfavorable impressions regarding the American manufacturer on the mind of the foreign buyer. Non-producing countries are universally in favor of American goods; but now the "alarm cry" is very general among the manufacturers of the old world especially on bicycles, and many dealers freely express themselves and admit the extraordinary fact that "Pushing Yankees" are not as formerly, content to export such goods as cannot be produced in the old world, but are bent upon sending "Coals to Newcastle."

It is also a fact that wherever American bicycles have been placed in Europe, they easily stand in the lead. The English and German mauufacturers have already taken alarm and the *Ironmonger* admits that their manufacturers have practically lost the American market, which they so tightly held only a few years ago, and tells them we are invading France, Italy, Scandinavia, and are fast making small inroads in the larger producing countries of both England and Germany.

They admit that the American bicycles are the lightest and easiest running, which is practically saying they are the best in the world. The cyclist papers of both England and Germany are making continued, but very weak, attempts to prejudice their buyers against American wheels. They claim that they are not built strong enough to withstand reasonable usage, but unless they can bring some stronger argument than this to buyers against the American wheels, they will have decidedly up-hill work to deter the buyer of the wheel from seeking the best; and very many of these people who condemn the American bicycle know nothing about them, but have got that pre-conceived idea that a thing to be good, serviceable or durable, *must be heavy*, and our experts as well as general riders who ride for the pleasure of it, almost universally express themselves saying, "We believe American bicycles are the best."

In my mind there is no doubt but that the field is open to American manufacturers. Whether we will capture it remains to be seen. Whether American manufacturers are ready to do what is obviously necessary to prove the superiority of our manufactories, and in what this necessity consists so far as I can judge I must leave for a future communication. Yours truly,

Indianapolis, Ind., April, 1895. S. A. Haines.

Does Not Believe in Net Prices.

Editor Hardware: Your Fifth Anniversary Number of Hardware we have read—reading matter and advertisements—we think with profit, and re-read and scan it more as we have opportunity.

Accept our congratulations and good wishes.

We wish to say a few words as to Net Prices, which we do not consider practicable at all on many goods, to say the least. The point made by your worthy correspondents, the Biddle Hardware Co. (of whom we have been customers for many years and hope to be many more), it seems to us, is not well taken, though appearing plausible reasoning. If lists subject to discounts are discarded, and net prices adopted, net price lists would constantly have to be made and revised, which could be sent to the consumer as easily as lists subject to discounts; and we would say right here that manufacturers should not send discount sheets to consumers, and it would be better not lists, but leave the dealer to deal with the consumer, thereby taking work off his (the manufacturer's) hands, and allow the dealer a sufficient discount to make it to his interest to advertise and push the sale of his goods in every legitimate way. We are retailers, not jobbing enough goods to call ourselves jobbers, and don't say even that manufacturers should interfere with the jobbers' trade by catering to the retail trade. The manufacturer can better get his goods pushed by giving the jobber a fair show, and the jobber doing the same by the retailer. Each would have fewer accounts to keep, less customers in number to look after, consequently fewer "lame ducks" to lose their profits by. If the manufacturer sends lists subject to discounts to the consumer, it can do no harm, unless he quotes him discounts, unless discounts are too small or lists too low for a decent trade discount. But if only net lists were printed and the manufacturer sends them to consumers, then this surely "cuts out" the dealer. There is much more we would say on the subject but it is 11 P.M., time for bed. Hoping that the Hardware business of the country may be placed on a firmer foundation at least, in the near future (though the foundation appears to be built on sand and giving away yet) whether it be gotten so in accordance with our plans or wishes, or those of others, we are, Yours truly,

——— ——, April 16, 1895. Fair Play.

Bicycle Shows of 1896.

The Board of Trade of Cycle Manufacturers have made the following official announcement regarding the cycle shows for 1896: It has been decided that it would be for the best interests of the Board of Trade to secure, if possible, the Second Regiment Armory and Battery D building on Michigan Avenue, Chicago, where the cycle show was held in January last. Negotiations were at once entered into with the National Cycle Exhibition Co., of Chicago, and as a result, President Spalding entered into an agreement with that company whereby the Cycle Board of Trade sanctions the holding of the Second Annual Cycle show in the above building for the week of January 4 to January 11, 1896. The action of the President has been approved by the Executive Committee of the Board of Trade. The show will run from Saturday to Saturday. Negotiations are already in progress for the National Show to be held in New York, January, 1896.

The use of the metric system is to be obligatory in Turkey after March 1, 1896.

What Mr. Jennings Found in the West.

Charles E. Jennings, the well known and popular Hardwareman, of C. E. Jennings & Co., No. 79 Reade Street, New York, has recently returned from an extended trip in the South and Southwest. When seen by a HARDWARE reporter he was bubbling over with interesting information. On his journey Mr. Jennings stopped at Atlanta, New Orleans, Houston, San Antonio, El Paso, Los Angeles, Pasadena, San Francisco, Salt Lake City, Utah and Denver, Col., the total distance traveled being close to seven thousand miles. Mr. Jennings has before traveled extensively, having been through Europe, Mexico and the West Indies, but none of these places compare favorably in his eyes with Southern California, which appears at its best about now. The climate is delightful and exhilarating, and the landscape at this time of the year presents a panorama of lovliness hard to be equaled. The orange trees loaded with fruit, the semi-tropical foliage, and the myriads of beautiful flowers, the warm sun and cloudless skies, lead a wanderer from New York to fancy himself in fairyland. Mr. Jennings found business in a much more prosperous condition than he had been led to expect. The raising of fruit is, as is well known, one of the leading industries of California, and the failure of the orange crop in Florida has greatly benefited the California growers this year. Of late years vegetables have assumed a prominent place among the products of the Golden State, and now many car-loads are shipped to Chicago and other cities. Experiments have lately been made in shipping carloads of flowers from Los Angeles to Chicago, with success. Pasadena is a beautiful little city, and is a favorite, as a winter resort, for the rich of St. Louis, Kansas City and Chicago, many of the residents of the above cities maintaining charming villas there. Gold mining in Colorado has received an impetus, since the cheapness of silver has caused its mining to be abandoned by many. The production of gold during the present year bids fair to exceed the largest estimates yet made. These predictions are based upon the discovery of some wonderful veins of gold in Colorado.

Leadville, Col., often spoken of as the "Magic City of the Clouds," and the largest mining camp in the world, seems to be the center of the mining industry of Colorado. It is a city of 20,000 inhabitants and is situated at an altitude of 10,185 feet above the level of the sea. Leadville is well supplied with smelting plants. In 1892 the entire production of these plants reached $11,509,643. In 1892 the mines of the Leadville Mining District produced in gold, silver and lead $8,160,388. The bullion produced in 1893 from Leadville ores contained 21,627 ounces of gold and 6,676,687 ounces of silver. The mines extend under the entire city, and two of the shafts are in the heart of the city. Manitou, Col., is famous for its springs which possess wonderful healing qualities. It is located at the base of Pike's Peak and is surrounded by beautiful scenery, some of the most noted spots being the Garden of the Gods, Glen Eyrie, Seven Falls South, Cheyenne Canon, and Rainbow Falls Ute Pass. While in Salt Lake City Mr. Jennings met George H. Sargent of New York.

More Ancient Hardware History.

EDITOR HARDWARE: Hubert Van Wagenin, formerly in partnership with John C. Tucker in the "forties" in the old Hardware store, corner Dey and Greenwich Streets, the destruction of which was noticed in the anniversary number of HARDWARE, died in New York, September 11, 1850, at the age of 54, and was buried from his residence No. 54 Dey Street. At that time all the side streets west of Broadway, from Cortlandt to Canal Streets, were filled with private residences, many of our then leading merchants living very near to their places of business, and many of the generation previous having lived over their stores. Hubert Van Wagenin's father, William Van Wagenin, in 1791 opened a Hardware store at the corner of Pearl (then called Queen Street) and Beekman Slip (now called Fulton Street). He lived to be 76 years old, and died in 1846, a few years only before his son Hubert. The name of Van Wagenin, from 1750 to 1850, shines in the annals of Hardware history in this city as the family were well represented among the earliest dealers.

The old stand so long occupied by Osborn & Swan, at No. 33 Fulton Street, was established in 1750 by Hubert Van Wagenin, the father of William, who, until his death in 1806 always resided over his store. The store was well and favorably known in that part of the city, by having a "sign of a golden broad-axe," often mentioned in the journal during the Revolutionary period. His eldest son, Gerrit Hubert, was partner with him for a number of years, dissolving the partnership in 1791; and when the old gentleman died in 1806 this son continued the business on his own account, and afterward with his son Hubert as an associate, until 1820, when this business passed out of their hands and they were succeeded by others.

Gerrit H. Van Wagenin was vestryman of Trinity Church, and when a separate parish was formed in 1811 of the congregation of St. George's Chapel in Beekman Street, he was one of the first wardens elected. The old church building was destroyed by fire in 1814.

A correspondent of the *Tribune* a few years ago contributed an item of church interest by stating that about the year 1813 the Rev. Dr. Wm. Smith, who in the Episcopal Church is thought deserving of the title of the "Father of Chanting," secured its introduction in St. George's Chapel in Beekman Street. The innovation created the greatest surprise and indignation among the old people, and glances were exchanged as much in anger as in horror between the occupants of the pews; until old Mr. Gerrit Van Wagenin, a warden of the church, unable to suppress any longer his overflowing anger, arose and exclaimed: "Away! away! with your Jew jibberish, we want no such nonsense in the House of God! give us the psalms and hymns as of old!" and he walked out of the church. Old Mr. Walton of the famous Walton House, arose saying, "I go too," and directly the main body of the congregation followed his example; one old gentleman walked toward the chancel saying: "Well! is God or the devil to be in command?" By persistent effort, however, the voracious chronicler goes on to relate, Dr. Smith almost forced the prejudice to wear off in time, until at length the new service began not only to be endured, but to be popular as well.

Dr. Smith wore the black gown, and preferred the complete range of the church to the pulpit. He used to call the pulpit an "abominable box," being too confined for his energetic preaching. He died in 1821 and lies buried in Trinity churchyard, near the monument of Alexander Hamilton. H. H.

Entrekin's Cutter, Punch and Plyer.

S. W. Entrekin, Harrisburg, Pa., elsewhere in this issue calls attention to his Combined Cutter, Punch and Plyer. He states that it is a good selling tool, and one that should be in the hands of all sewing machine agents and users of sewing machines. The trade prices he gives are extremely low for an article so well made and containing so many tools in one—a knife, awl and plyer. A great many Hardware dealers are handling them, and Mr. Entrekin would be pleased to hear from all who are not. Some valuable hints as to prices, etc., will be found in his card upon page 47 of this number.

It is reported that the nail mill at Sunbury, Pa., will be put in operation by a number of capitalists of that place. "It is proposed to turn out 300 kegs of nails per day, which will give employment to upwards of seventy-five men and boys, and the company's pay will exceed $3500 per month."

Death of T. P. Burke.

Tyree P. Burke, a well-known Hardwareman, died at the Hotel Gerlach, New York, on April 13th, after a brief illness. Death was caused by peritonitis. His funeral occurred on Sunday, April 14th at the Judson Memorial Church, Washington Square, and the interment was at Pembroke, Ky.

Mr. Burke was born in Indiana, at Madison, on April 9th, 1844. He received his education in the public schools of that place, and then entered the employ of Gray, Kirkman & Co., in Nashville, Tenn. He then entered the employ of the Simmons Hardware Co., St. Louis, and some years ago came to New York, and in company with W. S. Dodman, formed the firm of Dodman & Burke. This was followed by T. P. Burke & Co., James Surpless being the junior partner. A consolidation with J. C. McCarty & Co. followed; and when, at the end of three years, Mr. Surpless retired, and formed the firm of Surpless, Dunn & Alder, Mr. Burke continued still with J. C. McCarty & Co. In January last, because of failing health, and a desire to leave

T. P. BURKE.

the road, Mr. Burke retired from the firm, and became New York agent for the Rhode Island Perkins Horse Shoe Co., Providence, R. I., and the H. P. Nail Co., Cleveland, Ohio. He was a member of the New York Hardware Club, and of Kane Lodge, F. and A. M. He was of a genial, generous nature, trusted and loved by all who knew him, and counted his friends by the hundreds, in all parts of the country.

Annual Meeting Joseph Dixon Crucible Co.

The annual meeting of the stockholders of the Joseph Dixon Crucible Co., Jersey City, N. J., was held Monday, April 15th, at the company's general office at Jersey City. Minutes of meeting of 1894 were read and approved. The detailed statement showing the millions of lead pencils, cakes of stove polish, crucibles, etc., manufactured, met the hearty approval of stockholders present, which manifested itself later on by the unanimous re-election of the board of directors and officers. Out of a total of 7345 shares, 6393 shares were represented in person or by proxy. The full number was cast for each of the following gentlemen: E. F. C. Young, John A. Walker, Daniel T. Hoag, Richard Butler, William Murray, Alex. T. McGill, Jerome D. Gillett.

After the stockholders' meeting had adjourned, the newly elected board organized and unanimously re-elected: E. F. C. Young, president; John A. Walker, vice-president and treasurer; George E. Long, secretary.

The Joseph Dixon Crucible Co., established in 1827, are the most extensive manufacturers of Graphite products in the world. Their manufactures comprise Plumbago Crucibles, Graphite Facings, Retorts and other goods used in foundries and smelting works; Lubricating Graphite, Graphite Greases, Graphite Paints and Dixon's celebrated American Graphite Pencils, and Carburet of Iron Stove Polish. These goods find their way and meet ready sale in all the cities and towns of the civilized world.

Mr. Simmons Did Not Say It.

In the April 10th issue of Hardware it was stated upon the authority of a prominent manufacturer, that E. C. Simmons, president Simmons Hardware Co., St. Louis, had said "that the business of his company for the first three months of 1895, had exceeded the business for 1894 by $1,000,000." As Mr. Simmons is a constant reader of Hardware, this paragraph fell under his eye. He immediately addressed a courteous note to this office, denying that he had made such statement. "It is not correct," he explained, "and entirely out of line of truth. I have never made a statement of that kind, and beg you to correct it in the next issue." The correction is cheerfully made, the only regret being that the reported increase of sales cannot still stand before the world as an evidence of better times.

Mr. Sargent Returns.

George H. Sargent, of Sargent & Co., New York and New Haven, has returned from his trip to the Pacific Coast, after an absence of two months and more. His trip was solely for pleasure, and when asked by a Hardware reporter concerning business in that section, he asked to be excused from expressing an opinion, as he had kept that question out of his thoughts altogether. Mr. Sargent went via New Orleans and stopped at San Francisco, Portland, Seattle, Tacoma and other places. On the return trip he visited Salt Lake City, Denver and St. Louis, arriving in New York on Sunday, April 14th.

National Saw Works Fire.

The entire plant of the Cincinnati branch of the National Saw Co., with the exception of the polishing shops, was wiped out by fire on Tuesday night, April 16th. The exact loss is not now known, but it is fully covered by insurance. Temporary quarters have been secured, and the business of the company will receive no serious check. Orders will be promptly filled from the Newark and Millbrook branches. The works in Cincinnati will be rebuilt with all possible haste. The loss is estimated at $125,000.

Merrill Watson, of Chicago, has recently accepted the New York management of the Central Expanded Metal Co., of Pittsburg. Mr. Watson is an old newspaper man, having been city editor of the Cleveland *Herald* and editor and manager of the *Age of Steel*, published in St. Louis. After leaving journalism, he was closely identified for four years with the St. Louis Expanded Metal Co., so he will have a large amount of useful experience to apply to his latest venture. Mr. Watson has resided in Chicago for some time, and while there, was connected with the electrical industry, and was the Chicago representative of the Diamond Rubber Co., of Akron, Ohio. He expects his family here some time next week, and will reside in East Orange, N. J. He is a man of ability, of genial nature, and is a welcome addition to the New York Hardware trade.

An English bicycle company has recently sent three hundred wheels in one order to Russia.

PORTER TO PARTNERSHIP.—XI.

I arrived home in the evening and found our store draped in black. To my mind it was the funeral of all my hopes as well as of the head of the firm. Mrs. Ely met me as if I were her son. Usually she was a woman of reserved dignity who kept all but her own relations at a quiet distance, but sorrow is a leveler of pride and pierces through any thin covering to the real person below.

I sat with Mrs. Ely all that night. My own troubles were nothing compared with hers. I had been mourning over the loss of business prospects, but when I saw her in the presence of her dead, I was ashamed of myself. The refrain of a great many songs and prayers is merely "money," but when the hand of God falls on a loved one, all the wealth of the world would be gladly given to bring him back. No doubt we have to be taught this lesson year by year.

After the funeral Fisher and I met Mrs. Ely's brother. There was a will and the affairs were left in good shape, but the question was, What would we do? I had no money, consequently I had nothing to say. Mr. Fisher spoke first.

"Must de shtore shut up?"

"What do you propose?" asked the administrator.

"Nossings. But must de shtore shut up?"

"That is for us to decide."

"Vhat you say, Marks?"

"If I had any money in it I would say a good deal, but the money is all yours and Mrs. Ely's."

"Mein Gott! ish de pusiness not yours yust so much as ours?"

"The business is all over; there must be a new start."

"Vell, ve vill shtart him."

"What do you propose to do in behalf of Mrs. Ely?" I asked the administrator.

"My wish would be to go on with the business just as it is, and make no change."

I began to brighten up. "Will you feel safe to do that?"

"Yes; Mr. Ely suggested it among the last directions he gave. Do you feel able to take the place?"

No, I did not, but I said I would do my best.

"Marks ish all right," said Fisher, enthusiastically; "any Yankees dat can shpeak de Yarman ish all right. No tomfool can learn dat lankwitch."

We all laughed at Fisher's standard for a smart man, but went to work arranging matters and soon had everything satisfactorily shaped. The old signs were to swing over the door and the old name would still be ours.

It seemed to me as if I had never done any work before, I was so eager to be doing something now. "It all depends on you," said Mrs. Ely, when I told her what we decided to do; and I felt that she was right. But I knew I could pull it through. My own opinion is never well to flourish a "new broom" too much, no matter if it does sweep clean. We are a people of to-days and to-morrows; yet, after all, we pride ourselves on our yesterdays. I like to see on billheads and letter-heads, "Founded 1850," or "Organized 1840," because I think it a proper pride to show the world that the house has stood a storm or two, and is going.

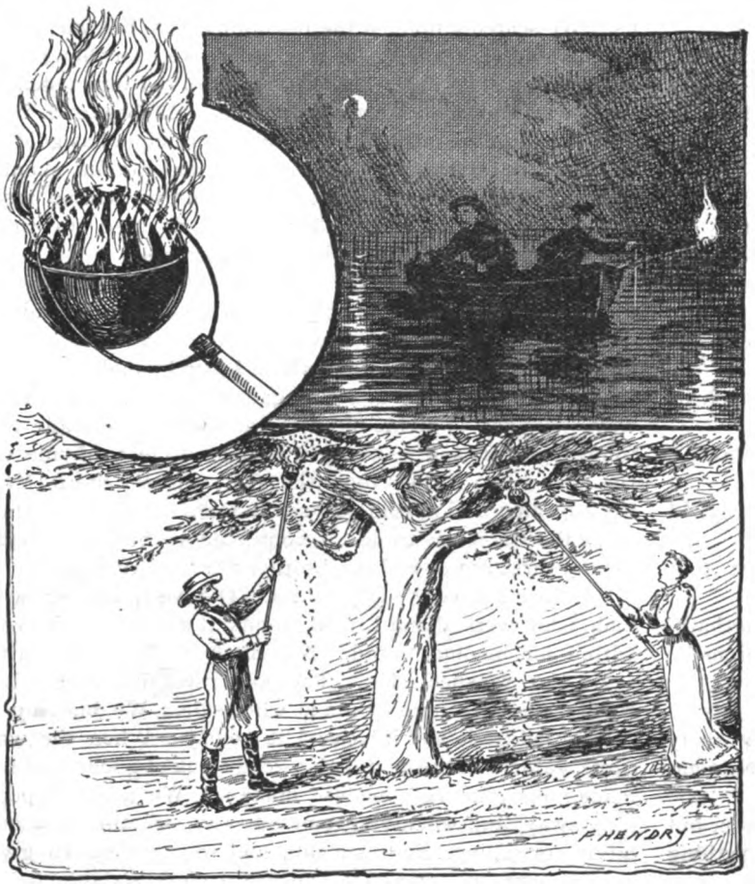
I had changes to make, but I made them without any flourish perceptible to outsiders. I organized our two stores into good working trim. They were just far enough apart so that the trade of one did not interfere with the other. I flooded the country with hand-bills and I represented our goods exactly as they were. The ordinary handbill is not a very elaborate affair, nor is there much thought wasted on it. As I pick them up in country stores I am astonished that so little care is taken with the printed matter sent out by retail dealers. Like almost everything else, if worth doing at all it is worth doing well. I gave as much thought to a hand-bill that I was going to throw around the streets as I would if there was to be but one printed, and that one going to the nicest lady in the land.

It is unnecessary, perhaps, to say that we prospered; no one working as we did could help but prosper. We made new friends daily; our goods were always just what we said they were; our prices were reasonable and the same to everyone alike, and we took special pains to be accommodating. The times were good; new railroads sprang up every year, and our town was a center for shops and workmen. Following the railroads came manufacturing enterprises, and almost in a night our country town turned into a sprightly city, with smaller towns tributary to it all around us. We scarcely noticed the beginning of it, but we had a good wholesale trade under way before we ever thought of wholesaling. By little and little we worked into a steady trade with the small towns around us, and began to buy goods in large quantities. One ruling principle has guided us from the start, and this was that our profits should lie in the business year by year. We built no palatial residences, we owned no fancy horses, we devoted our time and our money as we made it to our business.

I began to feel the effects of close work, and one day put up a little valise full of samples and started on the road as a drummer. My success was fully up to my expectations, and I had a younger brother whom I saw I could work into a salesman for the road, so I began to lay my plans that way. We had to divide our retail and wholesale trade the following year, and we thought it about time to divide up the business. Fisher took the Germantown store, Mrs. Ely's brother and myself our retail store, and my brother and I the wholesale trade. I continued to buy the goods for the three stores and my brother did the traveling.

"Did we succeed?" do you ask. Did you ever know a man who worked hard, sold goods at a profit, and lived within his income, to fail? Not many such, I venture to say. Yes, we succeeded. The same rules that are good at retail are just as sure to win at wholesale. We built up a substantial trade and increased it yearly. When the war came we were in the field with a good stock of goods, and we made money as everyone else made it. We are still pegging away, and when you come our way, whether you are buying or selling, give us a call, and we promise to give you a hearty welcome. If you are a clerk striving for a foothold, take courage, and be sure that no man who ever deserved it failed to succeed.

Quoted from a clerk who is supposed to know all about it: "There is such a difference in the way men and women buy. A man will come in and tell you what he wants, ask how much it is and pay for it. A woman asks the price of an article, then tries to beat you down, and may wind up by not buying or else paying the figure after a prolonged kick."



The Pittsburg Reduction Co. are ready to furnish hardened aluminum alloys in plates which have a specific gravity of 2.72, and only a very few per cent. of hardening ingredients, with a tensile strength of 45,000 pounds, an elastic limit of 55 per cent. of the ultimate, an elongation of 8 per cent. in two inches.

Col. E. L. Roche, president of the Bartow Hardware Co., Bartow, Fla., has been appointed State Commissioner for South Carolina to the Cotton States Exposition at Atlanta.

The Asbestos Torch.

The Asbestos Torch is an article which Smith & Whittier, No. 116 North Street, Boston, are successfully placing upon the market. It is a new device for ridding fruit and ornamental trees of insect pests, for use at night in driving away mosquitoes and other insects, night fishing, etc., some of its uses being noted in the illustration accompanying this. The cup is completely filled with asbestos, which is saturated with oil and lighted, and will burn for about an hour before the oil is consumed. The asbestos remains uninjured by the flame, and can be used indefinitely for an absorbent. The makers say: "The Asbestos Torch is sure death to the tent caterpillar and cocoons of moths, and all other troublesome insects and grubs that infest trees, shrubs and plants. If properly applied, the flame cannot injure the tree or plant, and this torch will save annually many dollars and much vexation. It may be made useful in other ways, and one or two placed on verandas or other exposed places would banish the mosquitoes during the sultry summer evenings. For night fishing it will be found far better than the clumsy pine torch. It met with great favor from seedsmen and fruit growers last season." Further information can be obtained by application to the manufacturers, at the address above given.

The "Acme" Hose Coupler.

The Adams & Westlake Co., Chicago, have been very successful in marketing their "Acme" Hose Coupler. It is made of heavy brass throughout and described as "standing the roughest usage to which it may be subjected." Its simplicity is a great point urged in its favor; with "no screws to get out of order—nothing to get damaged or broken, two positive motions and you have a water-tight joint."

The makers add: "It is made for new hose, and also for hose fitted with old screw couplings. No necessity to discard old couplers—our couplers can be used with them with perfect satisfaction.

"Fasten a waste nut in a prominent place in your store, then screw on a common faucet. Next attach a short piece of hose fitted with our couplers. It will sell the goods. You will be astonished to find how many people must have them. Try it, and be sure to keep your stock up or you will run out and the other dealer will make the profit. Remember you do not tie up any money in samples. The waste nut is free, the faucet you can put back in stock, likewise the couplers. If you are a hustler have some bright men canvass your section. They can make good money and you more. Let them carry the goods with them, and when they make the sale have them put on the couplers with the A. & W. Hose Bands; no tools required; anybody can apply them. Simplest thing on earth."

Burditt & Williams' Thirty-fifth Anniversary.

One of the old landmarks of Boston, Mass., is the venerable building, No. 20 Dock Square, whose towering sign, "A Hardware Store For a Hundred Years," is familiar to everybody. April 2nd was the thirty-fifth anniversary of the day when two active and ambitious young men, Charles A. Burditt and Joseph Williams, put up the sign of Burditt & Williams at the above number, and, with the assistance of two other young men, began their business career. The original parties to this enterprise, augmented by J. A. Munroe, who later joined the firm, celebrated this anniversary at Young's Hotel on the 2nd. Though scarcely feeling bowed with age, Messrs. Burditt and Williams find that their firm has become the oldest in the city in their line, and can look back upon years of remarkable change and growth. In the firm's earlier days foreign Hardware was an important part of the stock, but is now entirely supplanted by that of home manufacture, and plain iron and brass have been superseded by elaborately finished bronze. Forty people now find busy occupation where four were ample in 1860, and the amount of business in a month now often exceeds many times that of the entire first year of the firm's establishment. It was an occasion well worth especial commemoration, and it was thoroughly enjoyed.

"I make more money out of heating stoves than most Hardware merchants do," remarked a St. Joseph, Mo., second hand dealer. "The reason is that I frequently sell the same stove three or four times at a profit. See that baseburner sitting over there? I sold that in the fall of 1892 for $22, bought it back a year ago for $9, sold it last winter for $18 and took it in again a few days ago for $7. It is in pretty good shape yet, and ought to realize me $10 or $12 next winter. A great many people sell their heating stoves in the spring because they have no place to store them, or because they make up their mind to buy a new one when winter comes again. But when cold weather arrives, they come back and buy the same stove again or one just like it. I have one stove here which I have sold five different times and taken back as many times. It cost me $11 in the start and I have made $87 out of it already."

On the morning of Tuesday, April 2nd, the workshops of the Illinois Safety Heating Co. were partly destroyed by the disastrous fire which visited St. Charles. A number of valuable drawings and patterns of the company's new heater were consumed. Temporary quarters have been secured, and the company hope to get samples ready for exhibition within three or four weeks. The fire is supposed to have been caused by tramps, lodged in an adjoining mill, and $75,000 worth of property, mostly owned by stockholders of the company, was consumed.

The day of the roller skate seems once more at hand.

American Export Trade.

The following points of valuable information have been taken from a letter published in a recent number of the *Cincinnati Commercial-Gazette*, by James P. Gardner, an expert upon the topic which he so ably discusses:

While previous to 1890 some export trade had existed between this and some portions of foreign countries, it did not include all, and only a small portion of it went to Spanish and South American countries. Previous to reciprocity there were high duties on the products of this country, which deprived us of a large amount of trade in South American countries. Under reciprocity treaties our exports greatly increased, and would have continued to increase had they not been set aside. The value of our exports from June 30, 1892, to June 30, 1893, was $831,030,785; from June 30, 1893, to June 30, 1894, was $869,207,941, an increase in 1894 over 1893 of $38,177,156, a very gratifying showing considering the condition of affairs in this country during the last two years. The total value of our exports from June 30, 1892, to June 30, 1894, was $1,700,238,726. There was exported in agricultural implements, animals, paintings, statuary, books, maps, brass manufactures, $80,890,773; breadstuffs, $367,087, 212; building and fire brick, broomcorn, brooms, brushes, candles, carriages, horse cars, passenger and freight cars, chemicals, medicines, clocks and watches, $26,783,215; hard and soft coal, copper ore and manufactured copper, $53,166,041; coffee, cocoa, etc., $231,013; cotton and manufactures of, $425,790,772; eggs, fertilizers, stone and chinaware, fish, flax and manufactures of, fruits, furs and fur skins, $35,375,061; glass and glassware, glucose and glue, gunpowder and other explosives, manufactures of hair, hay, hops, manufactures of rubber, all kinds of inks and scientific instruments,. $31,602,854; iron ore and manufactures, $59,320,084. Of this there was machinery, hardware, sewing machines, stoves and ranges and other manufactures the value of $48,399,113. Jewelry, manufactures of gold and silver and of lead, lamps of all kinds, leather and manufactured liquors, marble and all kinds of roofing and musical instruments, $36,471,790; of this there was of leather and manufactures of, $26,195,000; musical instruments, $2,792,222; naval stores, $14,078,249; oil cake, animal, mineral and vegetable oils, $30,969,221; illuminating and lubricating oils and paraffine, $82,993,299.

Gold and silver ore, plated ware, cosmetics, paints and colors, manufactures of paper, $6,616,933; provisions of all kinds, $283,663,854; quicksilver, seeds, manufactured silks, distilled spirits, soap and other items, $23,956,723; electrotype plates, straw and palm leaf goods, sugar and molasses, confectionery and manufactured tin, $8,204,158; tobacco, $54,867,140; of this there was in leaf tobacco $46,977,133; toys, trunks, valises, whalebone, vegetables, wines and other articles, $6,686,751; logs, lumber, staves, etc., $41,-481,565; house furnishings, furniture and other articles, $12,826,925; manufactured wool, zinc and other articles not elsewhere stated, $8,203,253; steamers and sailing vessels sold to foreigners, $223,174.

There was exported to the United Kingdom and her possessions, $860,495,731; other countries in Europe, $223,465,-380; Germany, $154,308,025; France, 93,841,319; Mexico, $18,976,653; Central America and British Honduras, $7,732-241; Cuba, $38,303,896; West Indies and Bermuda, $33,310,-695; Argentine Republic, $9,610,993; Brazil, $26,229,404; Colombia, $5,207,741; China, $10,222,928; other countries in South America, $18,916,442; Asia, Oceanica, Africa and other countries, $31,184,490. There was a decrease in 1894 of the exports of wheat of 28,705,879 bushels, and an increase in the exports of wheat flour in 1894 of 3,392,292 barrels. There was an increase in the export of corn in 1894 of 19,287,567 bushels; an increase in the export of agricultural implements, animals, coal, leather and manufactured cotton goods in 1894 of $37,775,000. There was also an increase in the exports of furniture, organs and pianos, carriages, horse and steam cars, and various products of iron and steel and other articles of a very pleasing amount in 1894.

Of all these articles there was carried in cars and other land vehicles, $83,797,683; in American steam and sailing vessels, $88,640,205; in foreign steam and sailing vessels, $1,339,912,656. From statements it will not be difficult for the American people to appreciate the importance and value of our export trade, and its benefits to this country in building up our industries and furnishing employment for thousands of workmen. They as well furnish the strongest evidence of the great value reciprocity has been to this country, and will be if continued in force in future years, in increasing our exports to an amount larger in excess than what has been done, such as our people little realize or may do so till they have the evidence that it will be so.

OUR MERCHANT MARINE.

The statement here given of our exports in American vessels during these few years, and of what was sent in foreign vessels, shows that our merchant marine is to all intents and purposes destroyed. The amount exported in American vessels is so small it should wake our people up to the great need of not allowing time to pass by and not make a decided change in this condition of our affairs. The action taken by this Convention is so decided and unanimous that our members of Congress and Senators will not fail to see that something must be done, and that very soon. Ship-building is one of our important industries, and would be so to a greater extent in the investment of capital and furnishing employment to thousands of workmen not now having it, if effective laws were passed restoring our merchant marine to what it was many years ago. Our country has obtained a great reputation for the superiority of its manufactures over those of foreign countries, as was well illustrated in our very fine exhibits in the World's Fair in 1893. In this, as in all other matters, they are not content with what they have done, but are determined to improve over it in every way. That our inventive genius is such that the great advances made are a marvel in themselves will be admitted by all who are informed of such matters.

As in the past, Americans will go on conquering and to conquer in all these material interests till they will have attained still higher ground, and America shall stand as the highest emblem of the great genius of her people in all things in the elements of a great country, and will send out her beacon-light as the greatest, grandest and most glorious country in the world. Well may all be proud of the grand position this country has attained in all its educational, social and material interests in saying they are American.

James P. Gardner.

The Gilbert & Bennett Co. are Ready.

The Gilbert & Bennett Mfg. Co., Georgetown, Conn., No. 44 Cliff Street, New York and No. 148 Lake Street, Chicago, have recently installed at their Georgetown plant new boilers of 250 horse-power capacity, and a 150 horse-power engine. They now have six engines at Georgetown besides, and extensive water power. They have also recently added a new two-story building, about 150 feet long and 40 feet wide, which is being utilized for storage and manufacturing. The company, having thus increased their facilities, are now prepared to make prompt shipments of their specialties, including Poultry Netting, Window Screen Wire Cloth, Pearl Wire Cloth, "G. & B." Web Wire Fencing and Galvanized Wire Cloth.

The nail manufacturers of Canada have fixed the price of cut nails at $2.10 per keg delivered at any point in Canada in ten-keg lots. Does this mean that the association will sell direct to retailers?

Hardware and Shakespeare.

The sad-eyed Thespian who was temporarily out of a job, leaned against the sunny side of the City Hall, and held to the lapel of a HARDWARE reporter. as he disposed of Shakesperian lore at ten knots to the hour.

"Did it ever strike you, me son, that the immortal Bard of Avon knew something about the Hardware trade?"

"I have never looked into it," said the reporter; "can you find anything of his that will bring the American retailer and jobber into mutual ——"

"None of the sordid views of your trade, me boy. Let us approach the theme from the poetical side. In every play we find evidences of his knowledge of your trade."

"For instance——?

"For instance, hear Iago speak of 'Bells in your parlors;' hear Touchstone talk of 'As the ox hath its bow, sir, the horse its curb, and the falcon her bells.' Boyet in *Love's Labor Lost* says that mocking tongues

> Are as keen
> As is the razor's edge invisible,
> Cutting a smaller hair than may be seen.

"Cassius talks of 'strong links of iron,' Of traps, Polonius says, 'Ay! springes to catch woodcocks.' It was Shakespeare who created the expression 'Dead as a door nail.' In *Henry IV.* we hear the king talk of 'A watchcase or common 'larum bell.' In Macbeth:

> Go bid thy mistress, when my drink is ready
> She strikes upon the bell.

"In the *Taming of the Shrew* we read:

> In ivory coffers I have stuffed my crowns,
> In Cypress chests my arras, counterpoints,
> Pewter and brass, and all things that belong
> To house or housekeeping.

"Is that all?" asked the reporter, edging away.

"All! I could quote you for the hour, me gentle boy. In one place you find mention of 'a pewterer's hammer;' again, 'a brazen candlestick;' a 'gate of steel' and 'joints of steel:' and 'like a rib of steel to make strength stronger;' 'pins and poking sticks of steel;' 'the necessary bits and curbs for headstrong steeds;' and again: 'His man with scissors nicks him like a fool.' Oh, there is no end to them. In *Trolius and Cressida* is the line: 'And buckled in a waist most fathomless.' We read of spurs, hammered iron, a crow-bar, chains, bolts, wire, the testing of iron, of spoons, mattocks, a pickaxe, hinges——"

"What was the list on these?" asked the reporter eagerly.

"Of hobnails, doornails, a fire shovel; a poker comes into a *A Winter's Tale;* knives and forks; buckets and riveting hammers. In other places——

But the reporter had made his escape safely.

Views of an English Iron Authority.

J. S. Jeans, secretary of the British Iron Trade Association, and a writer on engineering subjects, is visiting the United States in company with S. Price-Williams, England's great expert on railroads. Mr. Jeans is undoubtedly the best authority on the iron and steel industry in Great Britain. When interviewed recently by a HARDWARE reporter, at the Fifth Avenue Hotel, Mr. Jeans said: "The prime object of my visit is to find out, by close investigation, how far ahead of England the United States are in the cheapness of production of steel, and what the chances are for a successful American competition." Continuing he said: "More steel can be purchased to-day for a sovereign ($4.86+) in the United States than in England. One of the reasons for this is that the industry here is not so handicapped with trade associations as it is in England. There the trade associations dictate terms to the producers, and if these terms are not complied with the offender is boycotted. It is a well known fact that for some time past the production of both iron and Bessemer steel in England has been at a stand still. As recently as five years ago England had no great competition in this great industry, but now Germany and Belgium are looked on as dangerous rivals. The competition of Germany is felt especially in India, Australia and the colonies. In India though the duties are controlled by the Imperial Government, and she is to all intents and purposes a part of Britain. Germany has more than held her own. This is largely due to the method of production pursued in Germany. There the steel and iron mills are run to their full capacity, and after the home consumption has been supplied the surplus is exported and sold for any price that it will fetch. This is a competition that England cannot meet. Germany's entire production is in the neighborhood of 600,000 tons. From 300,000 to 400,000 tons is consumed at home and the balance exported." There are two ways to remedy the evils and put England on her former footing with her competitors, as Mr. Jeans explained. "One is to lay the matter before the trade associations and endeavor to get labor to co-operate with capital, or to get Parliament to interfere and make laws and regulations." Mr. Jeans will probably visit Pittsburgh and Cleveland in pursuit of his investigation.

A Garden Hose Acrostic.

The following ingenious acrostic comes from the mental workshop of the Cleveland Rubber Works, of the Mechanical Rubber Co., Cleveland, Ohio:

Consider for a moment the subject of
Long life in Garden Hose!
Everybody is disgusted with Rotten Hose, flimsy, worthless stuff, in which
Vitality is sacrificed to gain cheapness; quality and strength entirely disregarded.
Endless dissatisfaction, and innumerable complaints are sure to result.
Lamentable indeed is this state of affairs, but fortunately there exists
A remedy, which the severest tests of time and hard service have proven will
Never fail to fully overcome all the faults and defects common to hose.
Durability is guaranteed and hose rendered absolutely water tight by the
'Seamless tube method of manufacture.

"Second to none" is what we claim for our hose made by this process.
Enormously increased sales for each succeeding year prove its success,
Attained on its own merits—machine made—there is no liability of defects.
Millions of feet turned out every year, bring not a single complaint.
Lapped seams in the tube will work apart and admit water to rot the duck.
Exclusive use of this valuable improvement is covered by letters-patent which we own.
See to it that your hose bears our trade mark stamp. Look out for imitations!!
Secure the agency for our goods in your city and business will pick up.

There is a demand for hose that will last and do service year after year. Ours is
Universally acknowledged to fill perfectly this long-felt want.
Buyers are quick to recognize and appreciate the value of this new feature, and
Eager to escape the annoyance and trouble caused by defective goods.

Have you seen or made a trial of any of
Our Grades: 2-X-L., High Pressure, High Grade, Blue Line Cotton, Etc., Etc.?
Samples, lowest prices and further information gladly submitted on application.
Each sale will bring you others, and the hose will *stay sold;* be paid for; never leak.

It is reported that aluminum horseshoes are to be manufactured by a company of Chicago millionaires. "They propose to establish a plant which will make a supply sufficient for the world."

The New York Hardware Club has now reached a membership of 577—483 resident and 94 non-resident.

The History of One Humber Wheel.

The following letter carries its own explanation:

Washington, D. C., April 5th, 1895.

Messrs. Humber & Co.

Dear Sirs: This Humber of mine, No. 4401, is now in its ninth year of service, ridden all seasons and weathers over 27,000 miles, and good for 50,000 more. It has the *tenth* rear tire on; the original bearings, yet perfect; every original ball; the crank shaft has never been opened; every original nut, bolt, cup and cone; the *original* chain; original front sprocket; the original rear sprocket was used seven years before it got sharp; the original pedals, and what is left of the original enamel and nickel after such hard service and exposure.

This machine has all the original spokes except four, and two of those were kicked out in a collision in 1887. During this collision a wagon loaded with nine coal stoves passed over the machine and rested on it while the driver apologized. In this collision and runover but two spokes and the original step were broken. Repaired O. K. in 90 minutes for 75 cents. Six drills were broken trying to bore that little hole in lamp bracket. My riding weight is 198½ pounds. The price of this Humber was $185. Repairs insignificent and rarely necessary. For economy of maintenance and greatest return for outlay I do not see how I could have done better. The best *is* the cheapest.

Respectfully yours,

George W. Walter.

The New England Hardwaremen.

The regular monthly meeting of the New England Hardware Dealers' Association was held at the United States Hotel, Boston, on Wednesday evening, April 10th. No business of any special note was brought before the meeting, excepting the formation of two new committees, namely, "Pricing" and "Investigating," and D. Fletcher Barber, of Chandler & Barber, Boston, was elected auditor. The members of the committees are as follows: Pricing, chairman, Hiram G. Janvrin, Boston; E. M. Richardson, Waltham, Mass.; A. M. Gardner, of A. M. Gardner Hardware Co., Boston; G. W. Burditt, Cambridgeport, Mass.; C. M. Nichols, Dorchester, Mass. Investigating, M. A. Chandler, of Chandler & Barber, Boston; G. W. Burditt, Cambridgeport, Mass.; W. E. Plumer, Somerville, Mass. The guests of the evening were David M. Ladd and A. M. Hunt, of the United Mercantile Agency of Boston. A very social, pleasant evening was spent.

Designed the Conductor's Punch.

Luther O. Crocker, one of Braintree's best known citizens, died at his home in East Braintree, aged sixty-six years. Mr. Crocker was born in Dedham, January 11, 1829, and was the son of Luther H. Crocker, a noted inventor in his day. Mr. Crocker inherited his father's inventive genius, and in 1865 he designed the conductor's ticket punch. The first of the make was used by Conductor William Osborne lately deceased, who was then in the employ of the Old Colony Railroad. Mr. Osborne took the punch on trial, and it worked so well that Mr. Crocker had it patented in 1867. Mr. Crocker also made the punch that was used on the first through train on the Union Pacific Railroad, and he also made them for Charles Dickens and for Grand Duke Alexis of Russia, the design of the latter being the armorial bearings of the royal family. Medals were awarded to him by the Massachusetts Charitable Mechanic Association in 1869 and a silver medal by the National Exposition of Railroad Appliances at Chicago in 1893.—*Boston Journal.*

Boys and Air Guns.

There is a bill pending in the Legislature to prohibit the selling of fire arms or air guns to boys before they reach their majority. This is a measure that should meet with prompt and favorable action. A great many lives have been lost owing to the reckless handling of dangerous weapons in the hands of boys, and the law cannot come to the rescue any too soon. A boy with an air gun is a terror to the community, and as long as he is permitted to prowl around the neighborhood with the deadly weapon over his shoulder the lives of the people will be in jeopardy. During the past few years several persons have been shot in this city by these so-called harmless air guns. One man had his teeth knocked out while driving along West Fourth Street, and a colored woman was laid low while passing along the railroad near Hepburn Street. Similar stories come from all over the State. Let the pending bill be passed.—*Williamsport (Pa.), Bulletin.*

Death of Douglass Everett.

The death is announced of Douglass Everett, secretary of the Chattanooga Hardware Co., Chattanooga, Tenn. His death was not unexpected as he had been suffering for some time with a complication of stomach and kidney troubles. Mr. Everett was about thirty-five years of age. He went to Chattanooga from Columbia, Tenn., about fifteen years ago, and engaged in the Hardware business as salesman for Vance & Kirby. After remaining with them for quite a while he became connected with J. H. Warner & Co., in the Hardware business. When the firm was succeeded by Carter, McGill & Ewing he was one of the stockholders, and when this firm was merged into the Chattanooga Hardware Co. he was elected secretary of the corporation. Mr. Everett was in the Hardware business nearly all of his life, and had the reputation of being one of the best informed men in the State on this particular line.

Some days since the two five-story buildings, Nos. 1220 and 1222 Main Street, Wheeling, W. Va., occupied by T. T. Hutchisson & Co., wholesale Hardware and saddlery dealers, and W. H. Chapman & Sons, wholesale painters' and builders' supplies, collapsed, burying ten men beneath the ruins. The debris took fire from a natural gas leak, and, a dense cloud of smoke arising, the efforts of the rescuers were greatly impeded. Six persons were killed, among them being three employees of T. T. Hutchisson & Co. Among those injured, but who will recover, was T. T. Hutchisson, the senior member of the house.

C. E. Jennings & Co., No. 97 Chambers Street and No. 78 Reade Street, New York, have been appointed agents for Chandler's Ice Cutting Machines. This is a small, compact, simple and strong machine, which cuts the ice into small diamond shaped pieces with ease and rapidity. It can be attached by screws to any table, shelf or counter, and occupies a space only eight inches square. It is made in four sizes, and prices and further information can be obtained by addressing the agents at the above numbers.

The Hebrand Co., manufacturers of razors and razor strops, have removed their New York office to No. 97 Chambers Street, with stock and a full line of samples. Catalogues will be mailed upon application. Frank A. Ford is representative of the company, and will look after the Eastern trade.

A new factory is being erected on Grand Avenue, New Haven, Conn., by J. F. Molloy, to accommodate his tinners' supply and buckle business. The new factory will give employment to 100 hands, and will cost $10,000.

The Economy Ice Cream Freezer Co., Huntsville, Ala., is the title of a new concern which has been organized to erect a factory. S. S. Pleasant is president.

Customer (in Hardware store)—"Do you sell the Golden Rule?"

Smart Clerk—"We don't even keep it."—*Philadelphia Enquirer.*

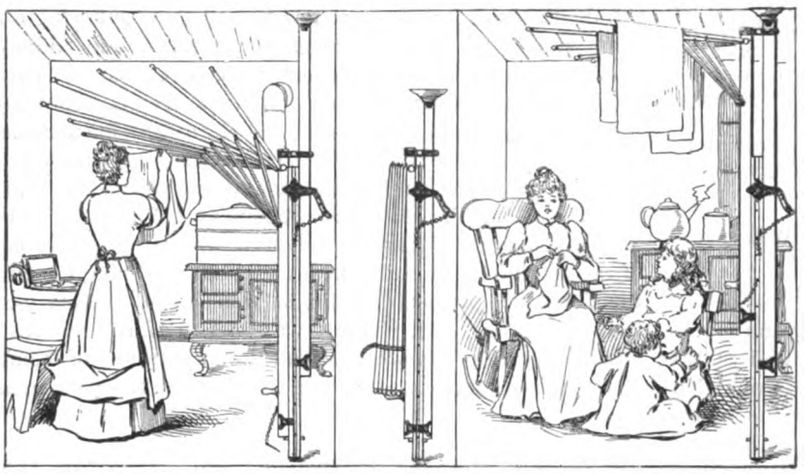
NEW GOODS IN THE MARKET.

If you have anything NEW, let the world know it by illustrating it in these columns.

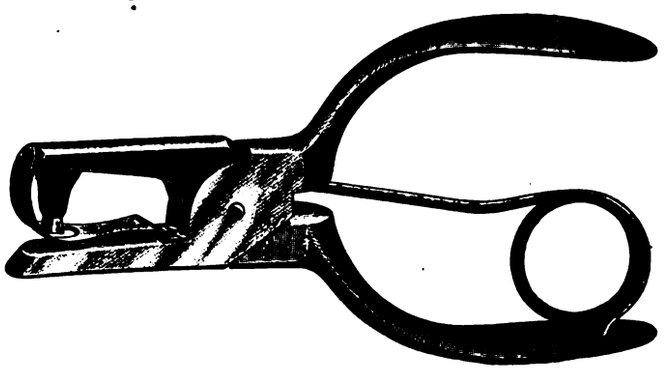


NO CHARGE WHATEVER is made, direct or indirect, as our interest lies in showing the readers of "HARDWARE" where the LIVE manufacturers and wholesalers are, and what they are doing.

When your NOVELTY or SPECIALTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

The Hardwaremen everywhere read this department; it is to your interest to make prompt use of it.

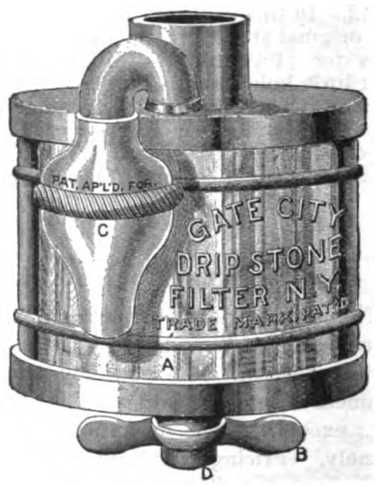
The Eureka Clothes Horse.



H. Young & Co., No. 19 East Sixteenth Street, New York, are introducing the Eureka Clothes Horse, as shown

in the accompanying illustration. The horse is composed of ten dowels or arms, which spread for hanging clothes on. It can be made to fit any room, and extends from the floor to the ceiling. The arms with the clothes can be elevated to any desired height, the clothes thereby drying in a short time. The makers state that the horse proves a great benefit in wet weather, and can also be used to air clothes on after they are ironed; and when folded up, it occupies but little space.

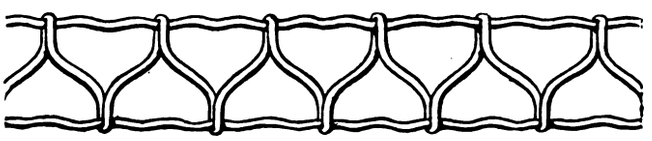
Hill's '96 Ticket Punch.



Warren Hill & Co., Hartford, Conn., are putting on the market the Ticket Punch, illustration of which appears here. The makers describe it as "a punch suitable for the Hardware trade, being well made, simple in construction, and not liable to get out of order. The joint at fulcrum is made strong, thereby keeping the dies in line, to preserve their cutting edges. The operation of its levers is very

quick and easy and in all points is desirable for a medium priced punch used by printers, restaurants and miscellaneous purposes."

Gate City Stone Filter.



The Gate City Stone Filter Co., No. 35 Murray Street, New York, have just placed upon the market the faucet filter shown in the accompanying cut. "The metal portion of the filter is made of brass nickel-plated. Between the metallic bottom and top pieces of the filter is a glass barrel surrounding the Gate City natural stone A, through which the water filters. There is a hole running perpendicularly through the stone, closed at the top but open at the bottom, through which the water is discharged after it is filtered. There is a space of one half inch between the outside of the stone and the inside of the glass barrel. In operation the filter is attached to the bib at the opening in the top, the water filling the space between the stone and glass barrel filtering through the stone, and is delivered at the outlet D. The impurities from the water are deposited on the

surface of the stone, from which they are removed by brushing. A few turns of the thumb-screw B permit the base to which the stone is attached to be taken out for that purpose. The manufacturers state that the capacity of the filter is five gallons or upward per hour, according to the pressure and the amount of deposit in the water. The filter can be attached to any faucet even when there is no thread, by the use of a connection furnished. Among the advantages claimed for this filter are that the glass case enables the process of filtering to be seen; that the impurities never penetrate, but lie on the surface of the stone; that brushing the surface of the stone presents a fresh filtering surface to the water, and that after years of use the stone will be found internally as pure and white as when originally mined. The size of the filter is 3½x4 inches and the size of the filtering stone is 2½x2½ inches. When unfiltered water is desired it is drawn from the faucet C. Turning the milled ring on to the faucet to the left allows the unfiltered water to flow and turning it to the right closes the faucet. The filter is made both with and without the faucet C. New filter blocks, with directions for replacing, can be obtained when necessary."

The Woodard Wire Fencing.

The Woodard Fence Wire Co., Hornellsville, N. Y., are putting on the market the Wire Fencing shown in the illustration here given. The representation shows the wires one-third the actual size. It is made of Nos. 12 and 15 galvanized steel wire, and is put up in rolls of 60 to 90

THIS CUT ONE-THIRD SIZE OF WIRE.

pounds. The makers claim that the crimped side rails will supply all necessary needs for expansion and contraction under heat and cold, and prevents, to a large extent, breaking or sagging. It is furthur described as being visi-

Digitized by Google

ble, strong, and of such attractive design that it is equally adapted for the fencing of the lawn as well as the farm. The strand is 1½ inches wide.

The Handy Window Shade Bracket.

The Window Shade Bracket, herewith illustrated, has recently been put on the market by J. F. Maxwell, No. 73

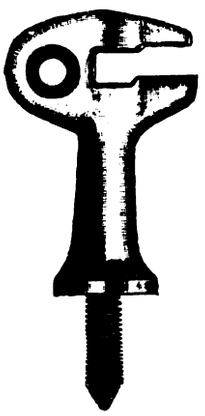


FIG 1.

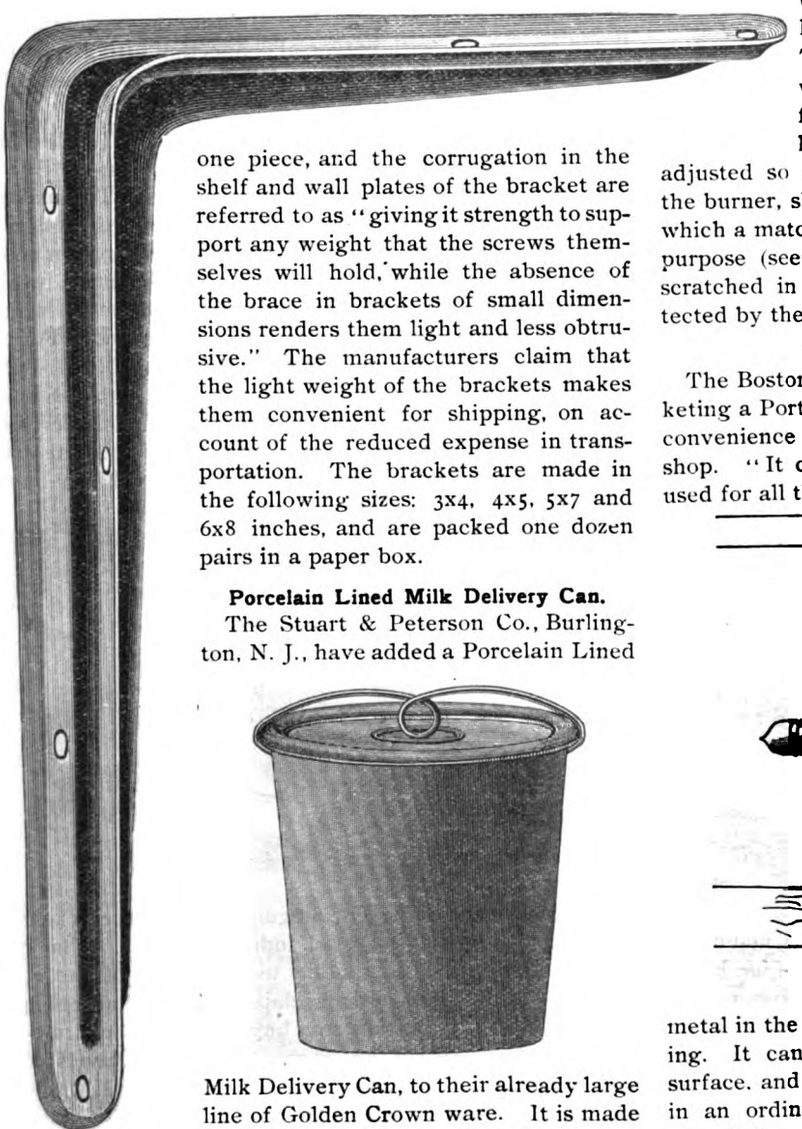

FIG. 2

Hanover Street, Boston, Mass. It is made of cast iron with a wood screw attached, and is designed, so the maker states, "to take the place of old style brackets that require screws to fasten them up. It is neat in appearance and will fit any spring shade manufactured."

The Premier Shelf Bracket.

The National Wrought Steel Mantel & Metal Co., No. 81 New Street, New York, are introducing a wrought cold rolled steel Shelf Bracket, here illustrated. It is made in

one piece, and the corrugation in the shelf and wall plates of the bracket are referred to as "giving it strength to support any weight that the screws themselves will hold, while the absence of the brace in brackets of small dimensions renders them light and less obtrusive." The manufacturers claim that the light weight of the brackets makes them convenient for shipping, on account of the reduced expense in transportation. The brackets are made in the following sizes: 3x4, 4x5, 5x7 and 6x8 inches, and are packed one dozen pairs in a paper box.

Porcelain Lined Milk Delivery Can.

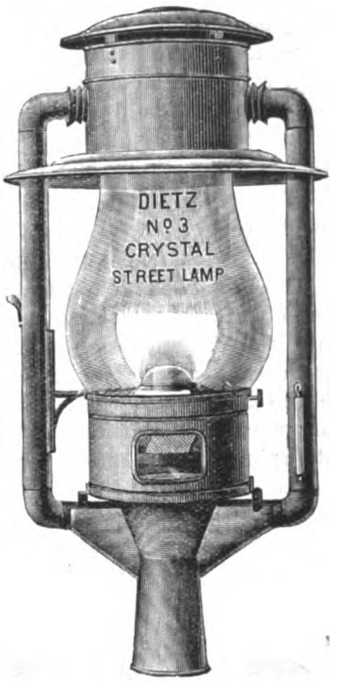
The Stuart & Peterson Co., Burlington, N. J., have added a Porcelain Lined

Milk Delivery Can, to their already large line of Golden Crown ware. It is made of cast iron, and is porcelain lined. The iron covers are supplied with either a glass or porcelain lining. This can is designed to replace tin cans and glass jars, over which it is said to have advantages, namely: that "tins rust and glass jars break, and both have small necks, which condense foul odors in cleaning." It may also be placed on the stove, and the milk sterilized. It is made in one and two quart sizes.

The Crystal Street Lamp.

R. E. Dietz Co., No. 60 Laight Street, New York, have improved their Street Lamps, shown in the accompanying

FIG. 2.



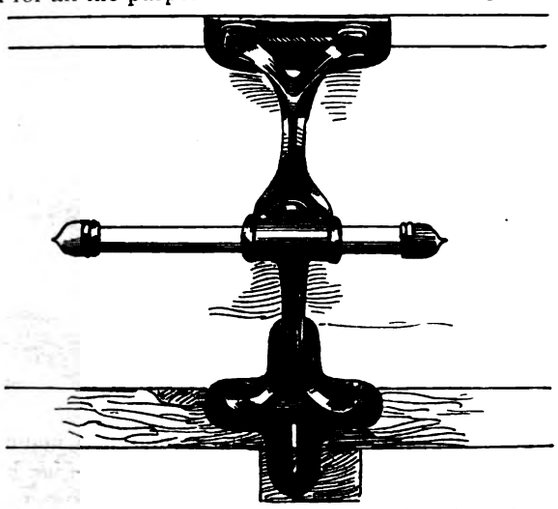


FIG. 1.

illustrations. The principal change is the substitution of a glass fount for the tin founts formerly used. In case of fracture they can be readily replaced. A section is cut out of the metal casing in front, Fig. 2, so that the quantity of oil in the fount can be always seen at a glance. Oil is poured in through an opening in the top fitted with a hinged cap. The receptacle will hold oil sufficient to burn twenty hours and a notched lift is provided by which the wick can be adjusted so as to burn any multiple of four hours. On the burner, shown in Fig. 2, is a rough metallic surface, on which a match fastened in a tin holder provided for this purpose (seen on the right hand tube of Fig. 1) can be scratched in windy weather, the match flame being protected by the large glass globe.

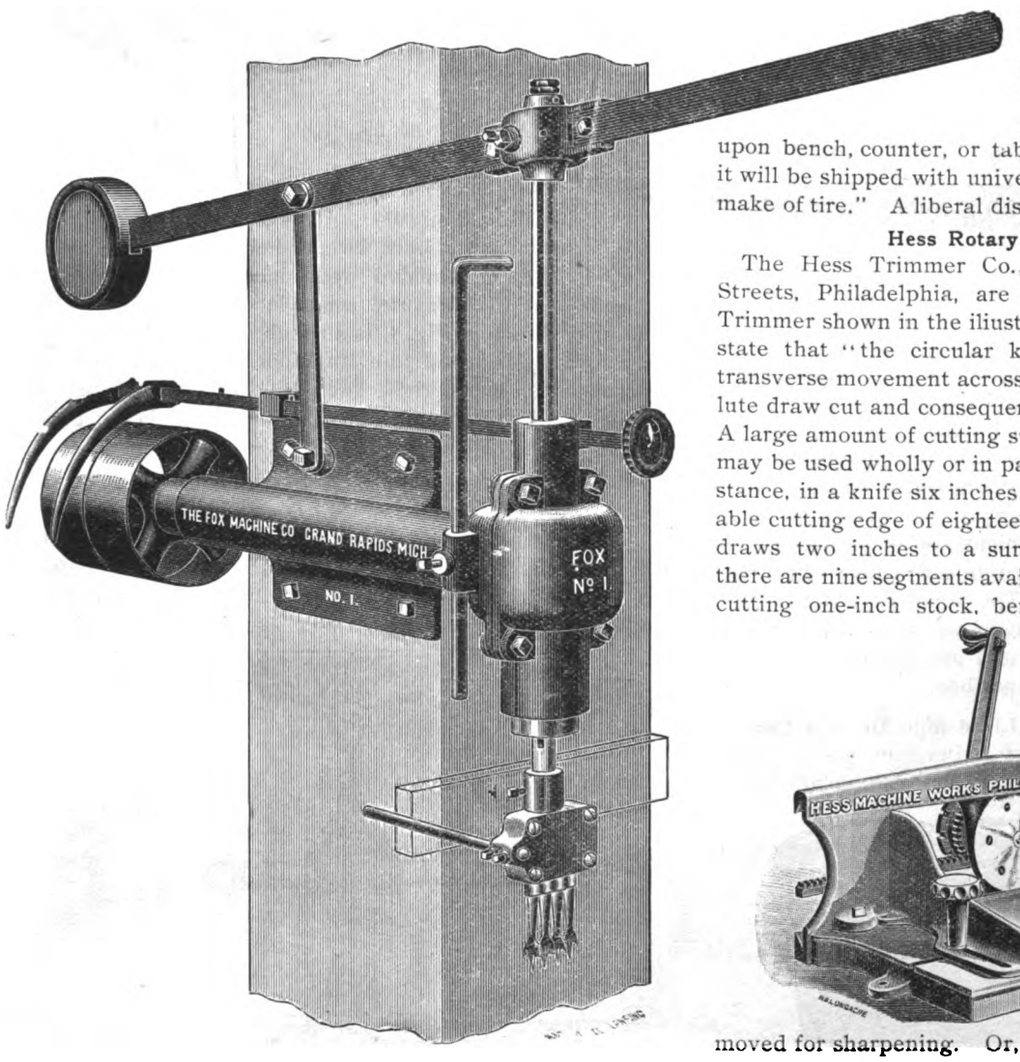
The Boston Portable Bench Vise.

The Boston Portable Vise Co., Boston, Mass., are marketing a Portable Bench Vise which is described as a great convenience for those who have work to do away from the shop. "It can be applied to any table or surface, and used for all the purposes of a bench vise, holding wood or

metal in the most convenient method and position for working. It can be quickly attached to any box, table or surface, and as quickly detached. It can be readily carried in an ordinary tool-box, and weighs, complete only six pounds."

Digitized by Google

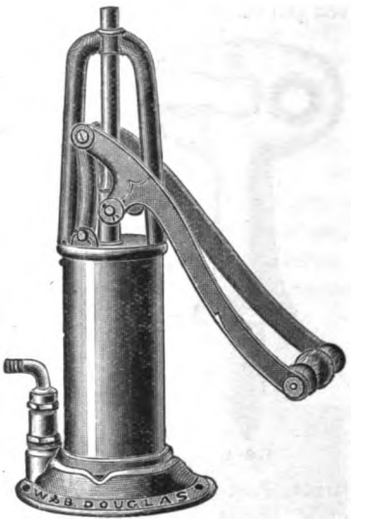
The O. P. P. Sash Weight.



Ewald Over, Indianapolis, Ind., is putting on the market a Sash Weight that is cast perpendicularly instead of in the old horizontal manner. The maker states "that the patterns are drawn out of the sand endwise, thus producing a

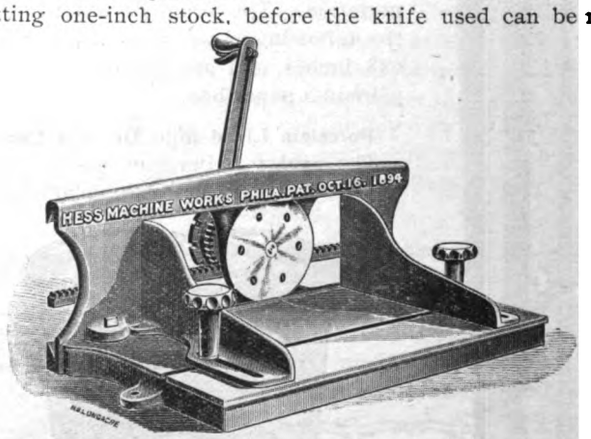
smooth and perfect casting, and, as they are centre hung, they hang true. The weight is marked on the lower end, in place of on the side. It is further stated, that a molder can, with less labor, make fifty per cent. more weights a day than by the old process, and the perpendicular casting requires but one-half the floor room needed in the horizontal method. From one to two per cent. will cover the misrun weights and a variety of sizes can be made in the same flask."

No. 1 Post Boring Machine.



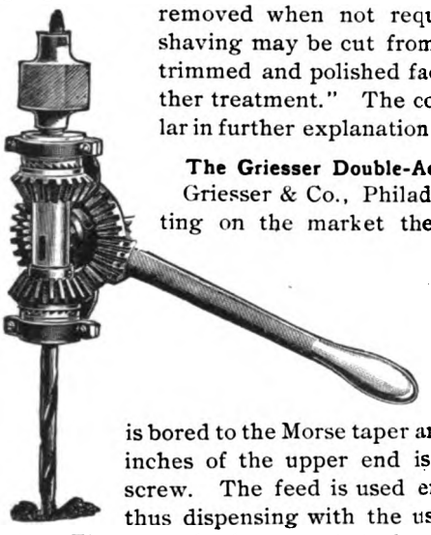
The Fox Machine Co., Grand Rapids, Mich., are offering the Post Boring Machine, shown in the accompanying illustration. The makers state that this machine has been "introduced as a very inexpensive tool for use in inserting sash pulleys. The quadruple bit, which is shown with the boring machine, can be taken out and a single bit inserted in the spindle, which makes it practical for all shop use. It is

an all-around machine, put up in a first-class manner." The point is made that with the quadruple bit four holes can be bored in the same time that it takes to bore one with a single bit. These machines are made in two styles, No. 1, which runs with mitre gear, and No. 2, with quarter turn belt.



The Douglas Utility Sulky Pump.

The W. & B. Douglas Corporation, Middletown, Conn., are putting on the market the Pump, illustration of which is here shown. The makers state that "this pump is capable of standing a pressure of over one hundred pounds to the square inch. It is a most compact article, being about one foot high, and six inches in diameter at the base. The cylinder is of lacquered bronze, and base, brake, etc., are of iron. Forcing about thirty-five cubic inches of air at each stroke, it is recommended as a convenient pump for pneumatic tire work on either sulkies or bicycles. As a sulky pump it has no equal. It is the ideal repair shop pump, and is especially designed to be placed upon bench, counter, or table. Unless otherwise ordered, it will be shipped with universal connection fitting any 1895 make of tire." A liberal discount will be given to the trade.



Hess Rotary Wood Trimmer.

The Hess Trimmer Co., Twenty-fifth and Callowhill Streets, Philadelphia, are introducing the Rotary Wood Trimmer shown in the iliustration here given. The makers state that "the circular knife has a rotary as well as a transverse movement across the bed which insures an absolute draw cut and consequently smooth and perfect work. A large amount of cutting surface, too, is presented which may be used wholly or in part, as may be desired. For instance, in a knife six inches in diameter there is an available cutting edge of eighteen inches; in cutting, the knife draws two inches to a surface cut of one inch, therefore there are nine segments available for use when continuously cutting one-inch stock, before the knife used can be removed for sharpening. Or, on general work the whole of the cutting edge may be used indiscriminately. The cutting edge being thus completely used the life of the edge is prolonged and long periods elapse before sharpening is required, a saving feature in a busy shop. The draw-cut also tends to preserve the edge. The knife travels completely across the bed and allows of stock the full width of the bed being trimmed with ease. This is an unusual feature and extends the machine's usefulness considerably.

Digitized by Google

The machine is adapted to cutting material from a hundredth part of an inch thick to a thickness equal to the diameter of the knife, and of a width equal to the width of the bed. It is also adapted to cutting leather. Another important feature is the fact that while a cut is being made the knife holds the material as in a vise, thus dispensing with the use of the gauges, except on very thick stock. In other machines the gauges are necessary as supports to the push action of the knife. The machine is simple in construction and most easy to operate, the revolution of the handle being governed by the width of the material to be cut. It cuts at any angle from zero to 105 degrees and has the general angles inscribed on its bed. The gauges are easily and quickly set and fastened, and readily removed when not required. The lightest shaving may be cut from material, leaving a trimmed and polished face requiring no further treatment." The company issue a circular in further explanation of the machine.

The Griesser Double-Acting Ratchet Drill.

Griesser & Co., Philadelphia, Pa., are putting on the market the drill shown in the accompanying illustration. "The handle is adjustable from 14 to 20 inches and is of malleable iron. The spindle is bored to the Morse taper and is of steel. Three inches of the upper end is utilized as the feed screw. The feed is used entirely by the hand, thus dispensing with the use of pins, wrenches, etc. The gear wheels are cast steel and the ratchet collars and pawls are of the best quality steel, four pawls engaging with both the upper and lower ratchet collars. The action of the drill is continuous, receiving the motion from both the forward and return stroke of the handle, completing a revolution with the two strokes." The price of this machine is $20, net.

A New Pipe Wrench.

Plumbers, steam-fitters, and others who have occasion to use a Pipe Wrench, will welcome the new tool of this kind put upon the market by Samuel Hall's Son, No. 229 West Tenth Street, New York City, which we illustrate in the accompanying engravings. While these are self-explanatory to a large extent, it may be said in addition that the Hall Pipe Wrench is constructed throughout of crucible steel, drop-forged, and is as durable as it is simple in construction and attractive in appearance. "Unlike other wrenches now on the market, the jaws are smooth, instead of being corrugated; because of this it will not mar a nut or highly polished fitting. The wrench is quickly adjusted to different sizes of pipe, and grips quickly and firmly all kinds—galvanized as well as other pipe, and will not crush it. It releases instantly and cannot lock on the pipe. A good point about the Hall Pipe Wrench, and one that is destined to make it extremely popular, is the facility with which it may be sharpened upon any grindstone or emery wheel without being taken apart. Fig. 2 shows how this is done. We know of no other pipe wrench which may be treated in this way. Again there are no springs to break or get out of order. All parts of the tool are made to standard gauge and are interchangeable. It is made in several sizes from 6 to 48 inches in length, open, taking pipe from ⅛-inch to six inches. The 36 and 48-inch wrenches are made extra long for large nut and bolt, as well as pipe work. Fig. 1 shows the wrench as used. Its application is very simple and accurate. If the gripping point of the wrench be placed to the size of the pipe as marked on the side of the hook, little if any further adjustment is required. As a screw wrench the great strength of this tool is of special advantage. Beside being made of the best of material, both the top and lower jaws are hardened. As seen in Fig. 3 they are on an angle and grip a nut or bolt so that it is impossible for them to slip."

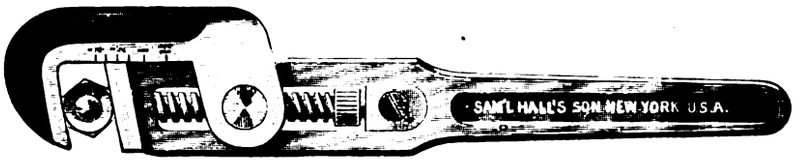


FIG. 3.—AS A SCREW WRENCH.

A finely illustrated bronchure, containing detailed description, price list, etc., of this new tool, is issued by the manufacturer, and may be obtained upon application.

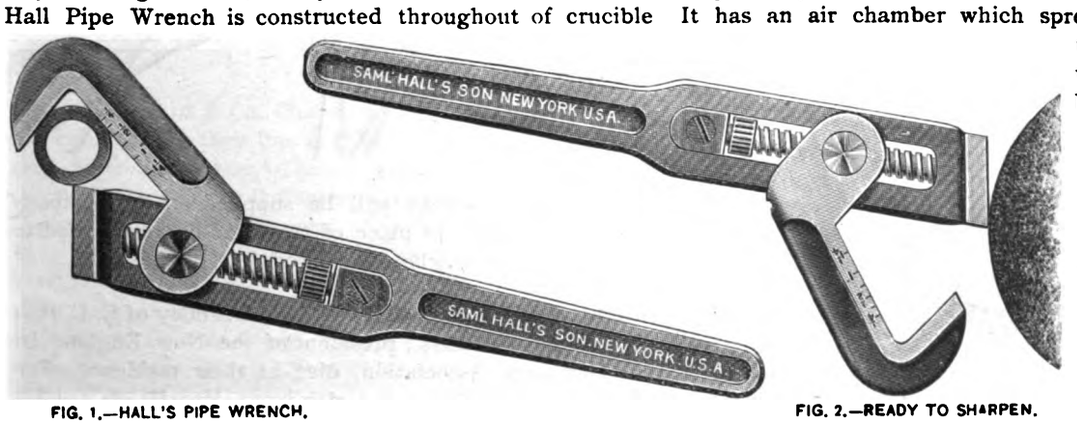

FIG. 1.—HALL'S PIPE WRENCH.

FIG. 2.—READY TO SHARPEN.

The Champion Roaster or Oven.

The Leach Roaster & Baker Co., Paxton, Ill,, are offering the Oven shown in the accompanying illustrations. It is compact in form, and the shape makes it convenient to be used with great advantage on oil, gasoline, gas or coal stoves. It requires but a moderate heat, and is claimed to be perfectly automatic in its functions, requiring no basting. It has an air chamber which spreads the heat equally throughout. This oven will no doubt prove a boon to campers.

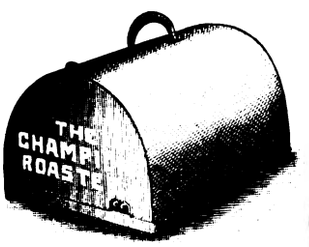

FIG. 1.

FIG. 2.—SHOWS OVEN IN USE.

The Travers Bros. Co., No. 107 Duane Street, New York, announce that they have brought suit against the Gem Hammock & Fly Net Co., of Milwaukee, Wis., for alleged infringement of certain of their patents. This is an outshoot of their recent suit against the American Cordage Co., the result of which gave the Travers Bros. Co. the exclusive right to certain important patents involved.

"Buy what you need and nothing else, and in quantities to suit. Keep what people want when they want it. Prompt payments is the best evidence that a man is good. Short accounts make long friends."

ILLUSTRATED BICYCLE NOVELTIES.

MANUFACTURERS and DEALERS are invited to make FREQUENT USE of these columns.

Anything NEW in BICYCLES or BICYCLE NOVELTIES should be sent us immediately. NO CHARGE, direct or indirect, is made, as our interest lies in SHOWING THE HARDWAREMAN what is going on in THE BICYCLING WORLD.

When your NOVELTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

Wolff-American Cycle Features.

R. H. Wolff & Co., foot of East 118th Street, New York, have entered the bicycle field this season with a line of high grade Wolff-American cycles, embodying among others the features of construction shown in the accompanying illustrations. The hubs, one of which is illustrated in Fig. 1, are made of cold drawn steel tubing, nickeled, and are referred to as being handsome as well as light and strong. The hub is fitted with a hollow shaft containing a wick, which, when charged with good lubricating oil, feeds the oil in moderate though sufficient quantities through the small holes directly on to the balls. The point is made that oil is usually put on the bearings in too large a quantity when supplied direct from an oiler, an error which this device is designed to prevent. The manufacturers state that with the wick saturated with oil the machine can be ridden more than 1500 miles without further oiling. The oiling is accomplished by unscrewing the little block nut on the right hand end of the axle and charging the hollow shaft slowly with good oil, until the wick is thoroughly saturated. An entirely new device for the insertion of spokes is also provided. The cold drawn steel tubing hub is provided with button-hole openings so that two spokes may be inserted through the larger portion of each opening and when fastened to the rim as in the positions shown in Fig. 2. The object of the button-hole shaped openings in the hub is to facilitate the easy and simple replacing of spokes. This can be done, the manufacturers claim, without taking the wheel from the machine and without even deflating the tire. The eccentric adjustment is shown in Fig. 3, by which, it is claimed, perfect alignment is insured. It is explained that the adjustment is simple, and that by means of the eccentrics adjustment is controlled entirely on one side by the turning of a nut, and that it is impossible to throw the wheel out of alignment while adjusting. It is further explained that the rear wheel is held perfectly in the center of the back braces, its only movement being forward or back as is required to take up or loosen the chain. The crank bracket is provided with a hollow shaft and wick so that the oil, by means of the wick, will lubricate both bearings in the same manner as in the hubs, already described. The pedal cranks have irregular openings, which fit on correspondingly shaped ends of the shaft, the cranks being also provided with lock nuts. The foot-brake, Fig. 3, is referred to as simple in construction, easily attached to any fork side, effective in controlling the speed of a wheel, neat in appearance and light in weight. The foot-piece, which extends beyond the side of the wheel, affords the necessary amount of leverage for applying the brake. The foot-brake will be supplied on the company's cycles in place of the hand-brake on roadsters and full roadsters when so desired.

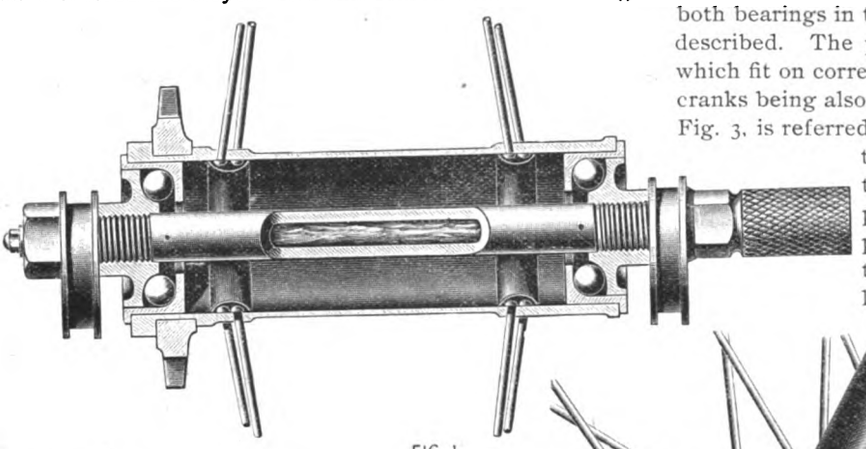

FIG. 1.

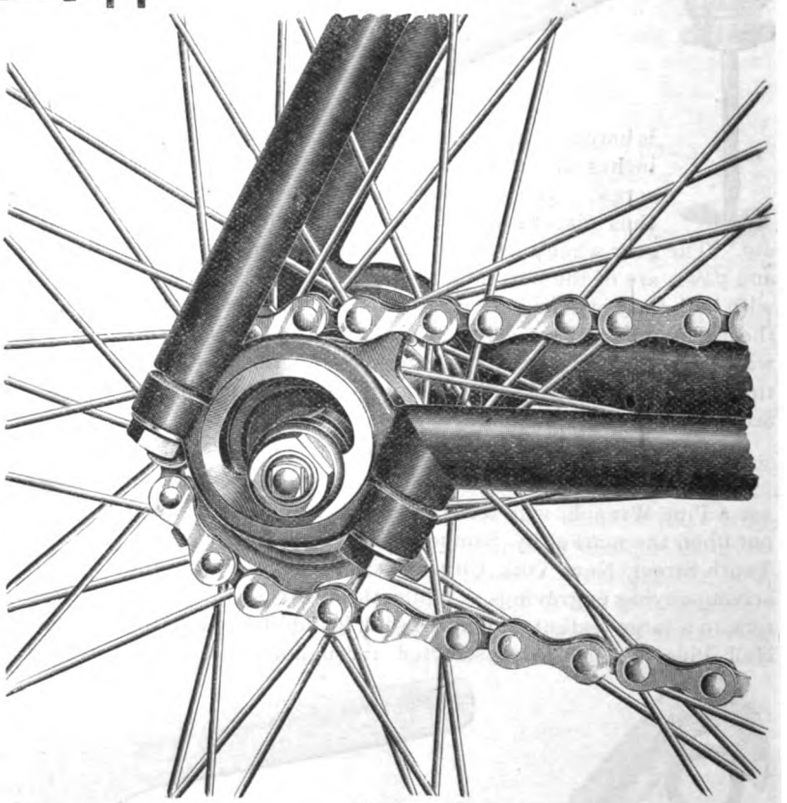

FIG. 2.

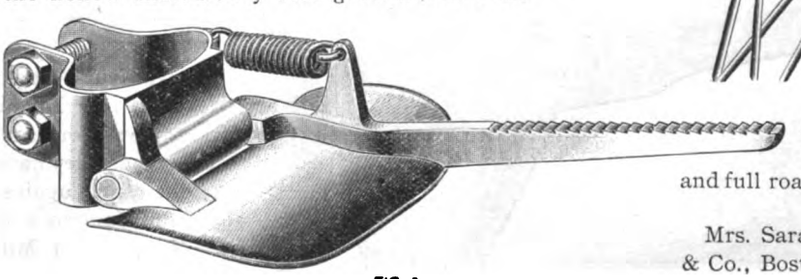

FIG. 3.

Mrs. Sarah Haley, wife of Edwin L. Haley of E. L. Haley & Co., Boston, Mass., president of the New England Iron & Hardware Association, died at their residence, North Wilmington, Mass. on the 16th inst. Mrs. Haley had been confined to the house for the past four or five years. She was always pleasant and congenial and leaves a host of friends, and above all, was a devoted wife and mother. She was forty-five years of age. The sympathy of many friends will go out to Mr. Haley, in this his great loss.

The Parker Gun Co., formerly at No. 97 Chambers Street, have recently removed across the street to No. 96. The new premises are tastefully arranged and there is a cozy office in the rear.

Digitized by Google

RECENT TRADE PUBLICATIONS.

The Hanson & Van Winkle Co., with main offices and factory at Newark, N. J., and branches in New York, Chicago and Birmingham, England, have issued a large and complete catalogue of their Electro-Plating outfits, Chemicals, Polishers' Supplies, Machinery, etc. It contains near 150 pages, and is bound in an attractive cover of black and gold. Views of their works are given, and an immense amount of information upon all the above subjects is added. In a brief reference to their business at present, they say: "We can point with pride to the long number of years in which we have been supplying the trade. We can always refer our correspondents to the leading manufacturers in any line in which they may be interested, as reference for the satisfactory manner in which their orders intrusted to us have been executed. Being the very first to undertake this branch of business in this country, and introduce the first Dynamo-Electric Machines and the popular use of nickel-plating, etc., we feel like taking to ourselves a little of the credit for the vast strides that have been made in this country within the last twenty years in the manufacture of metal goods, in which we now so far excel in quality and price all European manufacturers. In order to maintain our trade, we are constantly looking out for all improvements and processes relating to this business. We particularly call attention in this catalogue to improvements and great reduction in price of Dynamo-Electric Machines, and Nickel-Plating Outfits; to the new Lacquers introduced by us, and used by all the largest manufacturers of metal goods; to the various new Polishing Materials, Tripoli, etc., introduced by us; to recent improvements in the manufacture and reduction in price of Fine Rouges, Cyanide of Potash, XXX Lye, and the various chemicals used by the trade; and to the new Wheels, Prepared Buffs, Black Nickel Solution and Anodes, 14-karat Gold-Plating Outfits, etc., etc. Each department of our organization has been carefully systematized and brought to the highest point of excellence; we have spared neither pains nor expense in the way of increasing such features as would add to the advantage we could offer to our customers, and are constantly looking for all improvements and processes that will benefit them, and we hope that our efforts in this direction will be the means of still further raising the standard of our goods, thus enabling us to make the broad claim, without fear of contradiction, that our goods are of the highest grade obtainable."

Rouse, Hazard & Co., Peoria, Ill., have issued an attractive catalogue of their line of Wheels and Bicycle Accessories. Special attention, of course, is paid to their Sylph and Overland Cycles, the character of which has been referred to already in these pages, and some descriptions of which have been given. The company certainly have made a great success with these leaders, and the catalogue furnishes plenty of reason why the wheels have so well taken with the trade. This catalogue will be sent upon application, and also a sheet which offers extraordinary reductions in prices of their 1893 and 1894 patterns. This special bargain list should be in the hands of every dealer interested in wheels. In a note of introduction the company say: "For this, our sixteenth year, our line has been made complete, and now comprises the only really complete line offered by any one maker in this country. Every machine in the line is the best in its respective grade and weight and is offered by us with full confidence and backed by our warrant, which our tens of thousands of customers have found to be worth one hundred cents on the dollar. In the future, as in the thirty years since our business was established, it will be our constant endeavor to treat our customers with fairness and courtesy, and especially in the matter of our warrant we shall aim to treat every customer not only with justice but with liberality. Our long experience in the business and our acquaintance with the requirements of the trade enable us to offer a line which we are certain better meets the varying conditions of roads, etc., and the requirements of riders in various portions of the country than any other concern. As is well known, America leads the world in cycle construction, and our English cousins who established the industry and formerly set the pace, not only in cycle construction but on track and path, are completely distanced. We are confident that no American bicycles excel and few equal the bicycles described in the following pages. For 1895 we have greatly increased our facilities in every way. We have established our factory here at Peoria, have put in new machinery and shall hereafter be in position to take care of our trade as never before."

Partrick & Carter Co., No. 125 South Second Street, Philadelphia, have issued a handsome catalogue of their House Goods and General Electrical Supplies for 1895. It contains 130 pages, every one of which is filled with illustrations and descriptions of their immense line of goods combined under the headings named. It will be impossible to enumerate the large variety of these goods, but it may be taken for granted that everything possible in the line of electrical supplies applied to building purposes can be found therein. Special attention is paid to their Annunciators, which they say "are now so extensively used and so well known all over the United States, Canada and other countries." The catalogue is in itself a liberal education in this line of labor, and any Hardwareman who wishes to keep up with the times, and know all that is being done in this great line of manufacture, will do well to possess himself of a copy. In a special note the company say: "All parties desiring electrical, scientific, or experimental work done will find it to their advantage to give us a trial. We guarantee in all cases the lowest prices and best workmanship. Material for experimenting in electricity always on hand. Any instrument or apparatus desired can be made from drawings or written description."

The W. Bingham Co., Cleveland, Ohio, have issued a neat little catalogue of their line of Hardware for building purposes, in which separate chapters are devoted to house trimmings, parlor door hangers, bath-room trimmings, cabinet Hardware. sash balances, screen wire cloth, screen door fittings, electric bell outfits, dumb-waiters and elevators, floor and wall registers, etc., etc. It is a neatly and artistically arranged catalogue. In a note of introduction the company say: "This little book is intended merely to give the reader an idea of the extent of our stock, and our ability to satisfy the wants of owners and constructors of buildings. To make even a brief mention of all the articles we carry under the different headings would require a good sized book, over 500 pages of our general catalogue being devoted to goods used by the building trades. Our goods are handled by the reputable Hardware merchants of this city, and any orders given them for our wares will be carefully executed."

The Lewis Mfg. Co., Utica, N. Y., are sending the trade a leaflet which describes and illustrates their Wire Supports for tomato vines, plants, bushes, flowers and shrubs. It is a line of goods that ought to interest every dealer in localities where anything in these lines is grown.

The Putnam Nails.

A BIRD'S EYE VIEW OF WHERE THEY ARE MADE.—A WALK AND A TALK ABOUT THEIR VAST WORKS.

Editor Hardware: For many years the name "Putnam Nail" has been a familiar household word in the homes throughout America. So, after a pleasant hour spent in the works of the Putnam Nail Factory, at Neponset, Boston, Mass., it occurred to me that it would be a benefit to the Hardware trade, who have not been able to avail themselves of the opportunity to study the evolution of a Hot Forged Nail from the rod to the shipping room, to give my impressions of the amount of labor and care necessary to produce a first-class Horse Nail.

As I neared the works, it would have been unnecessary for any one to have informed me of that fact, for the clash of the hammers could be heard for a long distance. Entering the office, I confided myself to the tender mercies of the treasurer, W. W. Whitmarsh, who piloted me through the works.

I found that the extent of the works was such as to require the services of a tinsmith and carpenter the year round. These were domiciled in a neat two-story building, which stood by itself, and contained a considerable amount of machinery pertaining to their trades. Leaving this building, I entered the blacksmith shop. A dozen fires blazed merrily and twenty-five men banged away at the sparkling metal. Now and then, two or three of them stepped up to one of the two large steam hammers, and smote mighty strokes on the heavy steel bars, from which they were forging hammers for the nail machines.

Leaving this busy place, the gas-house where 800,000 cubic feet of gas are manufactured daily, was the point of investigation. This gas is used to heat the rods from which the nails are forged, coal being tabooed on account of sulphur sometimes contained therein.

Then came the acme of interest, the nail mills, of which there are two, each over two hundred feet in length, and containing in all a hundred machines. The clatter of the hammers as one opens the door, is deafening. Through the smoke, the nailers can be dimly discerned, as each stands by his machine and regulates the heat, for by the degree of heat and the strength of the spring alone is the length of the nail determined.

The rod passes through the blazing furnace, and is hurried between the four hammers (which strike in pairs) at a welding heat. Sixty blows rain upon it; it is severed from the rod and drops into the pan a finished nail; drawn to the point from half an inch of iron by hammers only. The best Swedish iron alone is used, and that of the highest quality.

I said to the treasurer, "No shearing needed there," but it might as well been thought, for no voice could penetrate the din.

After contenting myself with a thorough examination, I passed to the scaling room, where I found the nails were polished by friction in large iron barrels filled with water. No acids were used, for fear of impairing the strength of the nails.

As I examined the nails as they came from the barrels, I could see they were the same as I saw at the machine, except that the scales had been removed, and that they needed but the blows upon the point to form the bevel and strengthen the nail, to be ready for driving.

The hammer job room was next visited. Here we were surprised to find an entire department devoted to finishing and renewing the hammers.

The Pointing Room was our next destination. Here was a racket hardly less deafening than in the nail room. Eighty girls were seated at the machines, feeding the nails in one at a time, while the machine steadily hammered away upon each until it dropped into the box below. An examination showed the nail to be finished and ready for driving, and as I could readily vouch, exclusively Hot Forged and Hammer Pointed.

Then to the assorting room. Here another bright set of girls were seated, rapidly passing the nails from the bench into a box, each coming in for a careful scrutiny, and those uneven in size being thrown to one side.

I was struck with the care shown to prevent any uneven nails (of which many must be made by the hot forged process) from being put up as Putnam Nails, the aim being to put out goods in uniformity as well as in all other points superior to all others.

After another careful inspection, the nails are put up in five-pound pasteboard boxes, and five of these in a wooden box, ready for shipment to all parts of the civilized world.

From here, the machine and repair shop was our destination. A large part of the expense of making a genuine Hot Forged and Hammer Pointed Nail is caused by the hammers. We say genuine, for a Hot Forged blank to be afterward cold rolled and sheared could be easily made, but to draw the nail down to a point while under a welding heat, requires a nicety of adjustment that necessitates a frequent renewal of the hammers. A large force of men are employed in renovating the hammers, of which 800 per day are required and which have to be changed twice each day.

A round of the storehouses, where the immense stock of iron is carried, completed the survey, and I returned to the office to pull myself together, my sense of proprieties being shocked at the thought that it took so many people to make a simple Horse Nail.

Some idea of the extent of the plant can be obtained from the fact that a double Corliss engine of 600 horse power, fed by a battery of eight large boilers, furnishes the power, while in addition a McIntosh-Seymour compound engine of 125 horse power drives a dynamo for lighting purposes and a large blower for the blast used in the forges.

To sum up, I found that the grounds were of the area of ten acres, while the buildings covered four acres. They are surrounded on three sides by water, and in the distance Boston and Dorchester Heights, where General Washington planted his batteries to drive the British from the city.

The number of employees exceeds 400 and the capacity of the works is over ten tons per day.

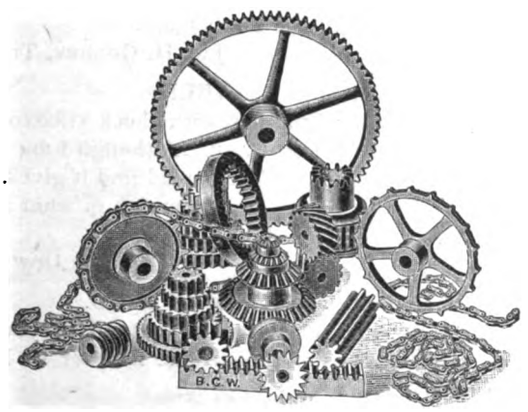
When we consider the immense increased cost over cold rolled and sheared nails occasioned by the amount of gas used to heat the rods, and the large force of men and expensive machinery required to produce nails by the Hot Forging process, is it not to be wondered at that, notwithstanding this, the nominal increased cost in shoeing a horse by this safe and reliable nail, does not exceed one cent per shoeing. We say nominal cost, for in fact it is by all odds the most economical nail for many reasons.

Putnam Nails, by their "elasticity" give slightly to the expansion and contraction of the hoof while the horse is in motion; by their smoothness, do not enlarge the nail holes in the hoof, while their "supreme excellence" in "holding power in the clinch" enables them to hold the shoe in the hardest service until worn out.

By the use of small nails large holes are avoided and money seved to the smith.

To those who may say that I am suffering from excess of enthusiasm, I will say that enthusiasm is infectious and that contact with those who are thoroughly imbued with the idea that the best is none too good and that they will make none other, cannot fail to have its effect. So I say, do not visit Boston without calling on Mr. Whitmarsh, treasurer of the Putnam Nail Co.

D. Walden.



Boston, April, 1895.

In this connection, an examination of the red insert, pages 53 and 54 of this issue, will be of interest.

Some Experimental Gears.

The Boston Gear Works, No. 42 Hartford Street, Boston, Mass., manufacturers of gear wheels, and cutting of every description, are placing upon the market with gratifying success their Experimental Gears shown in this connection. In mention of these in their handsome new catalogue, the makers say: "For the benefit of students, experimenters, designers of machinery, draughtsmen, model makers, manufacturers, Hardware firms, etc., we furnish a lot of gearing of our selection at a much lower price than we otherwise would furnish. They will be a great aid in obtaining information that cannot be obtained from books. By placing these gears in mesh with studs in the centre holes, and fastening them to a board, the exact movement can be much more readily seen than by any other method. They are invaluable to teachers of mechanical drawing. A few evenings with a proper train of gears will teach more of this difficult but important science, so little understood, that can be learned in any other way in much more time. By use of same, foremen or superintendents of machine shops can get considerable knowledge of this branch of mechanics, which is, practically, applied mathematics. Combination No. 1: This will consist of about twenty pieces, one ratchet and pawl, pinion wire, miters, racks, internal, escape wheel, chain wheel, and spur gears of several sizes. Price, $2.50, postpaid. Combination No. 2: Same as No. 1, with studs, shafts, brass plates, and set screws. Price, $4, postpaid.

Combination No. 3: Same as No. 2, with a few more gears, including one set of elliptic gears. Price, $6, not postpaid. Same partly mounted, $4 extra. Combination No. 4: Same as No. 3, but including a still larger assortment, with one set of spiral gears and one gear gauge. Price, $8, not postpaid. Some partly mounted, $7 extra. Combination No. 5: This is a machine with many of the sizes mounted so as to give a very good idea of the movement of most gears. Price, $25. This is the best offer for the money, and we consider it a complete outfit. Combination No. 6: This is our exhibition machine, designed to illustrate every movement that we make, and that is in ordinary use. All parts that are mounted are connected so as to be run either by electric or hand power. This is the best machine that we make, and contains the greatest number of movements. Price, ordinary finish, boxed ready for shipment, $55. Extra finish, $65. Glass case for same, $10 extra. Photographs of No. 6 furnished for 25 cents. Sample Gears: For the benefit of experimenters, manufacturers and Hardware firms, we will send 25 samples of different gears of our selection fastened neatly to cardboard for $2, postpaid." They also furnish, postpaid, for $1, a "Treatise on Gears," by G. B. Grant, which is a text-book for students and for practical use in machine shops; 170 illustrations. This treatise contains a bevel gear chart, odontograph, with methods to draft teeth with an ordinary compass and a great deal of information pertaining to all kinds of gears, such as spur, miter, bevel, rack, worm, spiral, internal, irregular, elliptic, etc., etc.

Wire Signs.

The enterprising business man of to-day is constantly seeking some new advertisement by which he may be distinquished from his brother in the trade, become known and attract the public to his place of business. The wire sign as it is now being made, is acknowledged to be one of the cheapest, most durable and best means of advertising, and particularly appropriate for the Hardware store. The

idea is unique and "the store with the wire sign" as it is spoken of, stands out in prominence from its surroundings. The sign when placed on top of a building, gives it the appearance of having an additional story, and affords a finish to the roof that cannot be obtained in any other way. It can be distinctly read from a long distance as it stands out in bold relief.

These signs may also be made in smaller sizes, to suspend in front of a store, and the letters, being placed on the open wire-work surface, can be distinctly read from both sides. The open net-work is made of galvanized wire, which is not affected by fire, wind or weather, and the metal letters are securely attached to it. To produce the most striking effect, the letters are painted black and not infrequently gilded with gold, but the painted letters are seen at a longer distance. Wire signs from the smallest to 300 feet in length have been made for many of the stores, banks and factories throughout the country by the old established house of E. T. Barnum, Detroit, Mich., who make a specialty of this work, and also manufacture a complete line of wire and iron work for both interior and exterior use. A large, profusely illustrated catalogue will be mailed, free, upon application.

Expansion Awning Hinge.

An article warranted to "overcome the old faulty way of hanging awning frames" has been placed on the market by the Steward & Romaine Mfg. Co., Philadelphia, Pa., owners and manufacturers of single and double expansion bolts, lock nutted. As per the cut shown, it will be seen that all that is necessary to apply, is the cutting of a hole in the brick or stone work, of the depth and diameter of the expansion parts. The Hinge is then inserted and turned

like an ordinary bolt, thus causing the expansion parts to expand in the hold, and making a very solid fastening. This overcomes the old insecure way of plugging holes and fastening the hinge up with wood screws. At the end of the season the hanging awning frame is removed, leaving the expansion hinge remaining in the wall, until required the next season. Catalogue of expansion bolts furnished on application.

The Parker Gun, manufactured by Parker Bros., No. 96 Chambers Street and Meriden, Conn., was, we are informed, "the victor over all competing guns," at the Grand American Handicap, some days since, at Willard's Park, New Jersey. The natural result is that the manufacturers of the "Parker" speak of it as: "Winner of Grand American Handicap of 1895."

CONGRATULATION: ENDORSMENT: GOODWILL.

In our Fifth Anniversary Edition of April 10th appeared a great many letters of endorsement, congratulation and good will, from our friends in various parts of the country. Others which came in a little late were, for lack of space and time, crowded over, and we take pleasure in presenting them in full herewith. With them may be found a number which have been kindly penned since the appearance of that number, and some gratifying newspaper comments, for all of which HARDWARE extends its most grateful thanks.

THE WIRE GOODS COMPANY.

HARDWARE: I cannot lay down your issue of the 10th inst. without remarking that it is a triumph in Trade Journalism. It has given me much the same pleasure that the first signs of returning spring awaken. The number is certainly a remarkable one, and you will get all the credit you deserve.

I would like to specially refer to your article on "The Demoralizing Bargain Counter." The tendency in the trade in the direction of cheap goods is debauching all character, enterprise, and mechanical ability, and it has already progressed to a disastrous extent. The idea of cheapness in goods has already grown to an extent which destroys honesty and self-respect in the manufacturers, prevents the development of mechanics with mechanical ability and artistic taste, and recognizes in the modern merchant only the qualities of low cunning which used to make the successful peddler. In old times the merchant who put sand in his sugar was a cheat; to-day he is a scientific chemist and a great captain of industry. Your article is good enough to keep in print the year around.

However, what I set out to do was to assure you that your issue of April 10th is so exceedingly good that it is a genuine pleasure to everybody who sees a copy of it.

Yours truly,

THE WIRE GOODS COMPANY,

Worcester, Mass., April 12, 1895. A. W. Parmelee, Treas.

KRAEUTER & CO.

EDITOR HARDWARE: We take the pleasure to acknowledge the receipt of a copy of your Fifth Anniversary edition and hope HARDWARE will write for the interest of the trade forever. Respectfully yours,

Newark, N. J., April 12, 1895. KRAEUTER & CO.

F. E. MYERS & BRO.

HARDWARE PUB. CO.: Fifth Anniversary copy of HARDWARE just received, on which we wish to congratulate you. This is certainly one of the finest editions of the kind that has ever reached our office. We are truly very thankful to have illustrations of the Myers Spray Pumps appear in same, which we have noted and for which we thank you most heartily. Yours respectfully,

Ashland, Ohio, April 13, 1895. F. E. MYERS & BRO.

WM. P. WALTER'S SONS.

HARDWARE: Please accept our congratulations for your Fifth Anniversary and the splendid appearance of the last issue. We have only one fault to find with your paper, which is, *it does not come often enough.*

Yours truly,

Philadelphia, April 12, 1895. WM. P. WALTERS' SONS.

THE NUBIAN IRON ENAMEL CO.

EDITOR HARDWARE: As to what we think of HARDWARE, I have but to repeat what I wrote you some two or three years ago, and that is that HARDWARE is one of the few journals that come to my desk that is always read through, and having been rather extensive advertisers, I guess our name is on the list of nearly every publication. Its typographical arrangement is excellent and the subject matter is always of the most interesting.

I certainly wish you all possible success, and can ask nothing better than that the same high standard be maintained. Very truly yours,

Cragin, Ill., April 1, 1895. CHAS. E. BONNELL, Manager.

IOWA FARMING TOOL CO.

HARDWARE: Your edition of April 10th is duly received, and is certainly something to be proud of.

Very truly yours,

THE IOWA FARMING TOOL CO.

Fort Madison, Iowa, April 13, 1895.

M. C. WARREN & CO.

HARDWARE PUBLISHING CO.: Copy of HARDWARE of the 10th received, and we would say that you have outdone yourselves completely (which is saying considerable) in this edition. M. C. WARREN & CO.

Boston, April 15th, 1895.

HARDWARE BOARD OF TRADE.

HARDWARE PUBLISHING CO.: Permit us to thank you for the fine issue received of Fifth Anniversary of your publication. It is fine, clean and "up-to-date," you know.

Yours truly.

New York, April 16, 1895. JAS. H. GOLDEY, Treas.

R. J. McDOWELL.

HARDWARE PUB. CO.: Find herewith check $1.00 to cover a year's subscription to HARDWARE. Although I am handling but a small quantity of Hardware, I find it gives satisfaction to get a live reminder twice a month of what is new under the sun. Truly yours,

Hartford, Ohio, April 13, 1895. R. J. MCDOWELL.

RHODES, DICKELMAN & CO.

EDITOR HARDWARE: Permit us to extend to you our heartiest congratulations on the artistic number of HARDWARE just received.

Wishing it and you many more pleasant anniversaries, we are thanking you for your kindness in remembering us with a copy, Very truly yours,

Forest, Ohio, April 12, 1895. RHODES, DICKELMAN & CO.

THE SAMUEL WINSLOW SKATE MFG. CO.

HARDWARE PUBLISHING CO.: We wish to compliment you on the appearance of your paper issued April 10th, 1895. It is certainly a very handsome publication. Believe us with respect, Very truly yours,

THE SAMUEL WINSLOW SKATE MFG. CO.,

Worcester, Mass., April 12, 1895. Samuel E. Winslow.

SUPPLEE HARDWARE CO.

HARDWARE: We congratulate you upon the taste in which your excellent paper is gotten up. Sincerely trusting that your circulation may increase five fold within the next five years, believe us, Very truly yours,

Philadelphia, April 12, 1895. WILLIAM D. SUPPLEE.

T. L. MERRILL & CO.

HARDWARE: Please accept our congratulations upon your Fifth Anniversary, and please find enclosed one of Uncle Sam's promises to pay $1.00 for one more year to HARDWARE. Yours truly,

Portland, Me., April 13, 1895. T. L. MERRILL & CO.

W. J. HENDERSON.

DEAR SIR: The field of Hardware stood ready for the literary plow to enter and your quinquenuial proves it. I hope the Lord and the politic politicians will spare us all to celebrate your five-and-twentieth anniversary. Every num-

Digitized by Google

ber pays me for itself, as it is examined from preface to finis. Hoping you abundant success (not with La Grippe) with La Grippe on business, I am,

Yours respectfully,

Glen Gardner, N. J., April 12, 1895. W. J. HENDERSON.

JOHN H. GRAHAM & CO.

EDITOR HARDWARE: Replying to your letter of the 21st of March, announcing a special issue in honor of the Fifth Anniversary of your paper, we take great pleasure in congratulating you upon the success achieved in so short a time.

From the very beginning HARDWARE seems to have met with a cordial reception, and at the present time enjoys a position of great respect in the trade, and its usefulness is demonstrated in every issue.

Wishing you a continuation of the brilliant success which has followed your journal through the past five years, we beg to remain, Yours respectfully,

New York, April 1st, 1895. JOHN H. GRAHAM & CO.

THE IRONTON WOOD MANTEL CO.

HARDWARE PUBLISHING CO.: We can say without hesitation that the advertising we have done through your journal has brought us a very satisfactory amount of business.

Very truly yours,

Ironton, Ohio, April 2, 1895. THE IRONTON WOOD MANTEL CO.

CUSHMAN & DENISON.

HARDWARE: We believe that the judicious advertising of a good article is always profitable. The presence of our advertisement in your paper proves that we consider it a good medium. Yours very truly,

New York, March 29, 1895. CUSHMAN & DENISON.

HANSON & VAN WINKLE CO.

EDITOR HARDWARE: We are pleased to say that we have always received benefit from our advertisements in HARDWARE, and, to further show our appreciation, we send a new cut for future use. Very truly yours,

THE HANSON & VAN WINKLE CO.

Newark, N. J., March 30, 1895.

THE STORM MANUFACTURING CO.

EDITOR HARDWARE: Allow us to offer our congratulations on your fifth anniversary, which you are about approaching. We have been advertising in HARDWARE since it first started, and have always believed in the paper. As an advertising medium, we think it a good one, and as a live, up-to-date journal it has no superior. Wishing you continued prosperity, we beg to remain,

Very truly yours,

Newark, N. J., March 29, 1895. THE STORM MFG. CO.

THE ULRICH MFG. CO.

HARDWARE: During the past two years we have kept a record of our advertising, and our card in HARDWARE has given us better results than any other means we have tried to reach the Hardware trade. Yours sincerely,

Rock Falls, Ill., March 30, 1895. THE ULRICH MFG. CO.

A. W. GUMP & CO.

EDITOR HARDWARE: We do not know of a paper reaching a better class of business men who are interested in bicycles, than your publication, HARDWARE. An advertisement of bicycles in your paper must surely prove exceedingly profitable to those who have goods they can dispose of to your readers. Very respectfully,

Dayton, Ohio, March 30, 1895. A. W. GUMP & CO.

DAVENPORT CUTLERY CO.

HARDWARE: Permit us to congratulate you on the fifth anniversary of HARDWARE. Each issue has been received by us with a sense of great pleasure, as it always contains news of great interest, and brings the manufacturers and dealers more in touch with each other. It has brought us very flattering returns, and we can heartily recommend it as the foremost advertising medium in the Hardware trade.

With our best wishes for your success, we are,

Sincerely yours,

THE DAVENPORT CUTLERY CO.

Paul A. Keller, Secretary and Treasurer.

Davenport, Iowa, April 1, 1895.

GILLETTE CLIPPING MACHINE CO.

EDITOR: We appreciate your endeavors in our behalf, and predict handsome returns to all who avail themselves of your columns.

New York, April 2, 1895. GILLETTE CLIPPING MACHINE CO.

COVERT'S SADDLERY WORKS.

HARDWARE PUB. CO: We beg to say that no person manufacturing a line of goods that is entirely a line of specialties, has a better reason to laud the trade journals than ourselves. Not having the means to employ salesmen to canvass the earth, we employ the next best means, the trade journals; the result is the establishing of a business that makes the name Covert a familiar name in trade throughout the World.

We congratulate HARDWARE on its fifth anniversary, and bespeak for it a prominence among trade journals, second to none. Yours very truly,

Farmer, N. Y., March 30, 1895. COVERT'S SADDLERY WORKS.

H. A. LOZIER & CO.

EDITOR HARDWARE: Congratulations are in order, and we extend to you everything that goes with sincere wishes for your continued growth and deserved success. It is a pleasure for us to express our views regarding your excellent publication and attest to its worth as an advertising medium. The excellent results received from our investments in the past commend it to our favorable consideration at all times. Sincerely yours,

Cleveland, Ohio, April 3, 1895. H. A. LOZIER & CO.

AMES SWORD CO.

EDITOR HARDWARE: We desire to offer our best wishes and congratulations on your approaching birthday—that is, of your journal—and our compliments on the energy and painstaking effort which insure its permanent success.

We have found it a valuable advertising medium, and that in these times is about as high praise as can be accorded to anything. Truly yours,

AMES SWORD CO.

Chicopee, Mass., April 3, 1895. G. Bradford, Treasurer.

GEUDER & PAESCHKE MFG. CO.

HARDWARE; On the occasion of your fifth anniversary, we desire to offer you our heartiest congratulations on the success you have attained in your chosen field. We have been patrons of your advertising columns almost since your paper was started, and we cheerfully bear testimony of its value to us in directing attention to the lines of goods manufactured by us and attracting a large line of satisfactory accounts. Wishing you every measure of prosperity and longevity, we are, Yours respectfully,

Milwaukee, Wis., April 2, 1895. GEUDER & PAESCHKE MFG. CO.

GRAND RAPIDS REFRIGERATOR CO.

HARDWARE: We are pleased to state that we consider your paper one of the very best advertising mediums for reaching the Hardware trade.

You pay so much attention to novelties in your reading matter notices that all the trade must have your paper if they would keep posted. Yours truly,

GRAND RAPIDS REFRIGERATOR CO.

Grand Rapids, Mich., April 2, 1895. By C. H. Leonard.

THE A. J. PHILLIPS CO.

EDITOR HARDWARE: We have looked at your paper from an advertising point of view, generally, and are pleased to

Digitized by Google

say that we have been well satisfied with the results of our dealings with you.

As to the paper itself, we think you are justly entitled to be well satisfied with it, and we can scarcely imagine a publication that could be of greater use and interest to the Hardware trade.

With kindest wishes for your future prosperity, we remain, Yours very truly,

The A. J. Phillips Company.
W. B. Phillips, Secretary,
Treasurer and Manager.

Fenton, Mich., March 29, 1895.

BIDDLE HARDWARE CO.

Hardware: It gives us great pleasure to congratulate Hardware on its Fifth Anniversary, and to send our assurances that you have now found a permanent place in the trade.

We always find your paper bright, newsy and interesting and await its arrival with pleasure; what gives us more pleasure is that our experience goes to show that your quotations are made in great spirit of fairness, and observing this rule, you are certainly observing the welfare of the trade.

We trust you will live long and prosper and hope you will continue to grow in size and usefulness and with kindest regards for the future. Respectfully,

Philadelphia, April 23, 1895. Biddle Hardware Co.

NEW YORK TIMES.

Hardware, a semi-weekly publication in this city, which gives a great deal of useful information in attractive form for the benefit of the Hardware trade, has just completed ts fifth year, and has marked the occasion by issuing a special number, much enlarged. Its first number contained but 52 pages; its latest has 150.—*New York Times.*

CLEVELAND PLAIN DEALER.

Hardware, of New York, the leading publication in this country devoted exclusively to the Hardware trade, celebrated its Fifth Anniversary on April 10 by issuing an elaborate special number, consisting of 148 pages, filled with entertaining reading matter and business announcements. Few trade journals can point to a record such as Hardware has made during these five years. Besides the valuable technical information it presents to the trade, it has gained the reputation of publishing more bright things copied by the daily press than any other trade journal in existence. This is probably due to the fact that its editor, Mr. J. H. Kennedy, formerly of Cleveland, was born in Ohio.—*Cleveland Plain Dealer.*

CLEVELAND WORLD.

If ever a publication bore the earmarks of prosperity, the Fifth Anniversary number of Hardware is that publication. It is issued from New York and is one of the few periodicals devoted entirely to the Hardware trade. The first issue contained 52 pages. The anniversary number received to-pay contains 148 pages and is simply bubbling over with matter of interest to the trade.

Inside the handsome cover are to be found page upon page of solid advertising which attest the merits of the publication as a medium for announcing wares.

The president of Hardware is Mr. A. P. Mitchell, a keen New York business man. Mr. J. H. Kennedy, an old resident of Cleveland is the editor, and to his business qualities is due much of the paper's success. Mr. Robert H. Spurgeon is his associate.—*Cleveland World.*

COMMERCIAL BULLETIN.

Hardware, of New York, celebrates its Fifth Anniversary with the issuance of a splendid number of 148 pages, making it the finest Hardware trade paper issue ever seen in this country. Hardware is an up-to-date journal in every sense.—*Commercial Bulletin of the Northwest Trade, Minneapolis.*

The Bissell Carpet Sweeper Decision.

Judge Severens, on March 23rd, filed an opinion in the case of the Bissell Carpet Sweeper Co. vs. the Goshen Sweeper Co. which has been pending in the United States Circuit Court for nearly three years. The Bissell Co. alleged infringement of their patent covering what is known as "broom action," being the spring construction which allows the case and brush to be brought down nearer the floor by pressure on the handle. Several years ago the Bissell Co. brought a similar suit at Detroit, which was heard by Judge Brown, now of the Supreme Court, and he sustained the Bissell Co.'s patent against three different forms of infringing sweepers. Judge Severens now follows these decisions, and upon the final hearing upon the pleadings and proofs, has ordered, adjudged and decreed as follows:

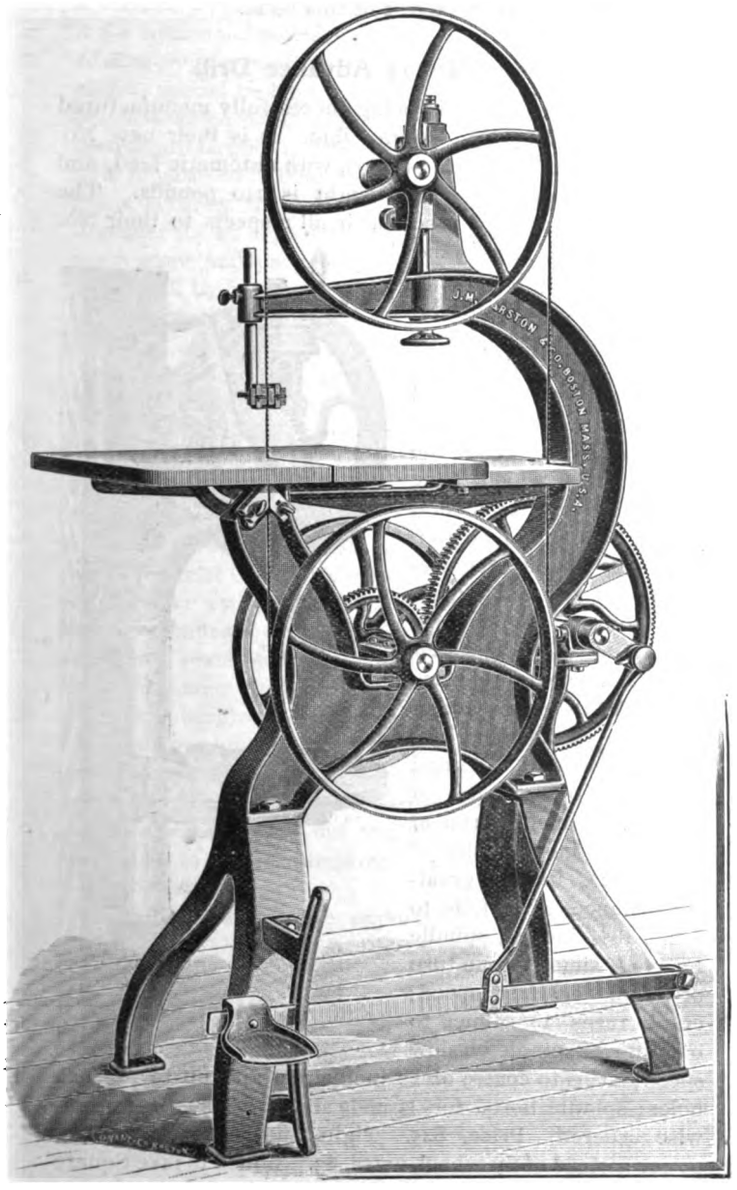
That Adelmer D. Plumb was the first, original and sole inventor of the improvements in carpet sweepers described and claimed in letters patent of the United States, issued to him October 19, 1880, and numbered 233,371; that the complainant is now the sole owner of said letters patent and of all claims for damages caused by the infringement thereof; and of all claims to profits derived by infringement therefrom; that the said letters patent are good and valid in law and secure to the said complainant the exclusive right to manufacture, use and vend the invention described and claimed in the second claim thereof.

That the said defendant has infringed the exclusive rights so secured to the complainant, by the manufacture and sale at the said city of Grand Rapids, and elsewhere, of carpet sweepers called the "Banner," "Star" and "Perfect" sweepers, which sweepers embody the invention secured to the complainant by the second claim of said letters patent.

That the said defendant, its officers, agents, employees, salesmen, servants and workmen, do absolutely desist and refrain from directly or indirectly making or causing to be sold, or using or causing to be used, carpet sweepers in any manner embodying and imitating the said invention so secured and described and claimed in the second claim of said Letters Patent No. 233,371; and particularly that they, and each of them, desist and refrain from so manufacturing, using and selling said sweepers so manufactured by them and known as the "Banner," "Star" and "Perfect" sweepers, as well as any other sweepers of the same form and construction, but which may be known upon the market by different names; and that a writ of injunction do issue accordingly.

That the said cause be referred to John S. Lawrence, Esquire, master in chancery, to take an account of the gains and profits which have accrued to the said defendant, and of the damages which have resulted to the said complainant by reason of such infringement, such accounting to be taken according to the rules and practice of the courts of equity, and the said accounting when completed, together with the evidence taken by him, to be reported by said master of this court with all convenient speed. All the evidence heretofore taken and introduced in the case may be used before the master without being again introduced, so far as the same may be pertinent to the accounting, and both parties shall be at liberty to produce such further evidence as they desire.

Hardware Club Notes.



The following gentlemen have been unanimously elected members of the New York Hardware Club since our last report:

William H. Parsons, Jr., No. 257 Broadway.
M. C. Parsons, No. 257 Broadway.
John Cartledge, Joseph Wild & Co., No. 82 Worth Street.
Edward White, Treasurer New York, Lake Erie & Western R. R. Co., No. 21 Cortlandt Street.
Elmer S. Smith, No. 136 Liberty Street.
Isaac D. Fletcher, No. 253 Broadway.
E. C. Lewis, Waterbury, Conn.
E. H. Paine, U. S. Rubber Co., No. 90 Reade Street.
G. C. Blickenderfer, Stamford, Conn.
C. W. Seamans, President Union Typewriter Co., No Broadway.
E. Graham Bacon, Jr., No. 218 Greenwich Street.
F. P. Prial, No. 21 Park Place.

Marston's Improved Band Saw.

J. M. Marston & Co., No. 251 Ruggles Street, Boston, Mass., are placing upon the market the improved 20-inch Hand and Foot Power Band Saw here shown. In description of the same the makers say that the frame is cast in one piece, to which the legs are firmly bolted, making it sufficiently strong and rigid to withstand all demands that may be made upon it. The legs have a spread of 27 inches, giving it large floor support. The machine weighs 350 pounds, is 5 feet 8 inches to top of saw pulley, and occupies 27x44 inches on the floor. The table is of kiln dried maple, 22x22, is 3 feet 4 inches from floor, and is arranged to tilt for cutting on a bevel. All the bearings are on main frame or casting. The shafts are of steel, lathe turned,

and run in accurately bored babbitted boxes of extra length. The band wheels are 20 inches in diameter, and are covered with pure rubber endless bands strengthened with canvas. The upper band wheel bearing slides on accurately planed gibbed ways and is adjustable up and down to take different lengths of saw, and also has adjustment for lining it with lower band wheel A roller guide is furnished with each machine. The tension is by means of specially made and tempered steel spring, and prevents the breaking of saws. The gears are all automatic machine-cut from solid iron. The machine will cut to centre of 40-inch circle and 6 inches high. The workmanship and material are of the best. The reputation of the builders as makers of standard high grade Hand and Foot Power Machinery is a guarantee of its being a well made and accurate machine. Orders for these Band Saws from London, San Francisco, St. Louis and New York have already been filled. All inquiries for catalogues and quotations will be cheerfully answered by J. M. Marston & Co. at the address above given.

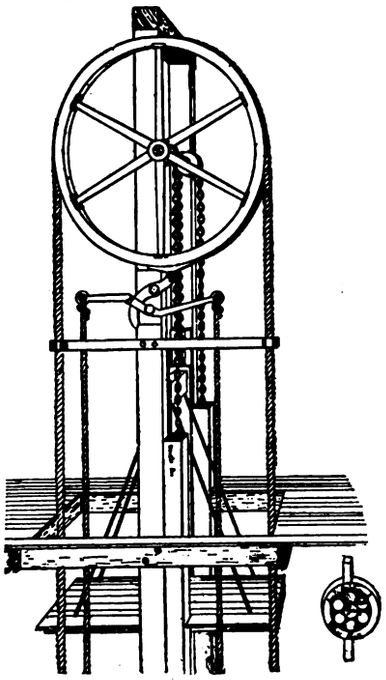
Clapp & Co.'s Great Annual.

Clapp & Co., bankers and commission merchants in the Mills building, New York, have just published their Annual Souvenir, in the shape of a magnificently finished book, nearly a foot square, and containing over 350 pages. It is bound in heavy boards, in blue and gold, has gilded edges, and in its finish and artistic completeness, is worthy of a position in any office, library, or upon any parlor table. It is illustrated with numerous views of the financial centres of New York; contains portraits of O. W. Clapp and Dwight O. Clapp, members of the firm; a view of the different departments of their business, and much other pictorial matter of an interesting character. It also gives views of the interior and exterior of the New York Stock Exchange, the New York Clearing House, and the stock exchanges and boards of trade in all the leading cities of the country. The main body of the book consists of the various weekly letters published by Clapp & Co. each week in the year, with other valuable matter of like character. A large number of tables, containing financial and commercial information of the greatest value, are also found. This makes the book a daily, weekly, monthly and yearly record of the markets of the world, with a standard history of the past year of the world's exchanges. Men of business will find it a most convenient book of reference, and it certainly has great historic value as a compact record of the year 1894. Its value will increase with time. The publishers well say that "Every man should be a student of the laws of the economic and financial world which are taught through these human instruments of interpretation, record, and transmission, known as words and figures." The book is a credit to the publishers, and is a volume that contains a mass of information that it would be almost impossible to obtain elsewhere.

A Very Important Addition.

The Thompson Hardware Co. have increased their large and prosperous business by the addition of a large store in the Fellows' block, No. 143 Middle Street, which is well stocked with paints, oils, artists' supplies and glass. In future this large addition will be devoted entirely to their paint department, and they will be ready to supply all kinds of goods in this line in large or small orders. They are making a specialty of Masury paints, colors or varnishes, for which they are sole agents. This important branch of the business is in charge of F. C. Lawrence, who has had years of experience with C. B. Coburn.—*Lowell (Mass.) Sun.*

Rezin H. Gorsuch, for many years in the Hardware business at the corner of Gay and Front Streets, Baltimore, Md., is dead, aged eighty-one years. He had an active business career of nearly half a century, but several years ago was attacked with Bright's disease, which caused his death. He was born near Cockeysville, in Baltimore county, and began life as a carpenter, spending fifteen years working at his trade in the West. In 1855 he opened a Hardware store in Alexandria, which he transferred to Baltimore at the close of the civil war.



The Arcade File Works at Anderson, Ind., are erecting a large addition to their plant at Anderson, being the third enlargement within twelve months.

The Indiana Hedge & Wire Fence Co. have incorporated, with a capital stock of $300,000.

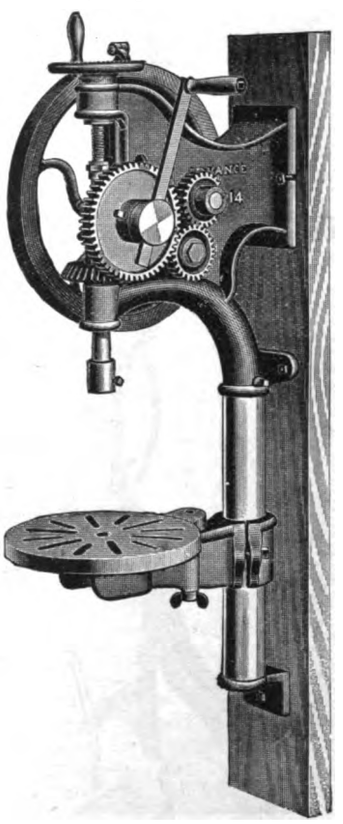
An Improved Elevator.

We here show one of Kimball Bros.', Council Bluffs, Iowa, Hand Elevators for retail stores. It has a capacity for such as are generally used in retail stores or places where the capacity is not required to be very great, but where a ma-

chine is wanted to be quick motioned and easy to operate, for convenience in running from one floor to another.



The cut of the elevator shows the platform, etc., and the brake, which is very handy and can be operated on either side of the platform, it makes no difference whether the operator is at one side at one rope or at the opposite side, as the brake rope is always handy, and by pulling up or down on either side of these ropes the elevator can be locked at any point desired. These elevators are giving the best of satisfaction wherever they have been placed, and there are a great many of them in use all over the United States. They have lately made a great improvement on this machine by placing a steel leaf chain such as shown in Fig. 2. This chain has a very strong capacity

and runs very smoothly over the steel sprocket wheels as shown in cut. Fig. 1 shows the chain in position when in use, and one notices that the links match the sprockets exactly. These are all cut by special machinery made to work exactly one within another. The Fig. 2 shows the chain on top of the sprockets. This is when the platform runs too high in case anyone relieves the brake, the elevator would run up, and should they be green hands and get scared, or neglect to apply the brake, the elevator would run up, and if it was not for this arrangement, would break the elevator. Fig. 3 shows the chain as it lies in the wheels and just coming out of the links that raises it out of the sprocket wheels. This improvement is a great thing for all elevators and it is something that is necessary. They build a great many kinds of elevators, all the way from an electric power elevator of 4500 capacity, down to a dumb-waiter for dwellings, and can furnish anybody anything wanted in the hoisting and elevator line. They would be pleased to send their catalogues to any who are thinking of getting an elevator, and can fill orders promptly and furnish first-class machines at a small expense. Please notice their advertisement on page 2 of this issue.

Silver's No. 14 Advance Drill.

The Drill here shown is being successfully manufactured by the Silver Mfg. Co., Salem, Ohio. It is their new No. 14 Advance Drill, pattern of 1895, with automatic feed, and double back geared. The weight is 240 pounds. The makers explain that it is similar in all respects to their No. 13, but much larger and heavier, making it suitable for all the requirements desired of a hand Drill Press; and when provided with pulleys as listed below, will be found a very efficient power Drill. The 100 pound Drills which have had such a run for several years, have not proven sufficient to the requirements of many and to meet the growing demand for something more substantial at a moderate price they offer their new line of Advance Drills and invite comparison. Sizes and Dimensions: Size of spindle, 1⅛ inches; run of spindle, 3 inches; size of column, 2¾ inches; greatest distance of spindle to table, 18½ inches; spindle turns 1½ times to one turn of crank on fast speed; crank turns 1½ times to one turn of spindle on slow speed; drills to centre of 22 inch circle and up to 1½ inch holes; spindle bored for ½ inch shank drills unless otherwise ordered. Price, $25. Tight and loose pulleys for power instead of fly wheel, extra, $3. Chuck to take Square Shank of Bit Stock Drills, extra, $1.

Dr. T. C. Yancey, of Malta Bend, Mo., is the owner of a knife once owned by Gen. Zachary Taylor. It is a two-bladed, bone-handled clasp knife, with "Rough and Ready" stamped on the large blade. Upon the silver plate of the handle is inscribed "Gen'l Taylor." On the metal pieces at the large end is a good carved likeness of old "Rough and Ready," dressed in the full uniform of a general of the United States Army.

There is a versatile dealer in Farmington, Minn., who combines a Hardware store and an undertaking establishment.

HARDWARE costs only One Dollar a year.

ARE HARDWARE ASSOCIATIONS BENEFICIAL?

NATIONAL ASSOCIATION OF MANUFACTURERS OF THE UNITED STATES.

EDITOR HARDWARE: I have your favor of March 29th. It is a trifle early in the Spring to make an estimate of the harvest. The National Association of Manufacturers is still in formative condition, and the benefits which may accrue to the trade through this Association remain to be developed. The Convention in Cincinnati was in the form of a voluntary conference to consider the propriety of forming a National Association. That Convention did its work admirably in preparing the basis upon which such an Association should be built. I should say, therefore, that the benefits which have accrued to the trade through the Association are largely in the direction of encouragement and new impetus to industry, growing out of the feeling that the manufacturers of the United States have organized to stand together for an organization so broad and comprehensive in its scope and purposes as to afford assurances that its views will be heard wherever and whenever it is found necessary to give them utterance.

I send under separate cover the printed matter of the Association, showing progress thus far, from which you will undoubtedly derive the impression that much depends upon the vigor with which the vice-presidents, chosen at the recent convention to represent the respective States, apply themselves to the work of organizing membership in the Association in the form of local clubs and associations, whose representatives will constitute the delegates to the next National Convention, which will be held in Chicago, on October 15th; which convention, it will be observed, can be composed only of practical, active, leading, representative manufacturers. The constituency of that convention, under the provisions of the constitution, will exceed four hundred.

What four hundred such men, in convention assembled, may do and devise, affords a wide field for speculation; but assuming that they come together, each inspired with a determination to carry out the purposes announced in the preamble to the constitution, it would be very difficult to imagine failure.

Thanking you for the opportunity to say thus much, I am, Yours very truly,

E. P. WILSON,
Secretary.

Cincinnati, Ohio. April 1st, 1895.

MISSISSIPPI & MISSOURI VALLEY HARDWARE ASSOCIATION.

EDITOR HARDWARE: Without the time to look up anything with reference to the matter, I can only say that the Association was organized about thirteen years ago, and I feel sure there is no member in it but feels he has received a large amount of good from his association and connection with it. Many pleasant acquaintances and intimate friendships have been formed, and in all matters where we have come in contact with the manufacturers, we have always found them glad and willing to meet us more than half way on any requests that were made.

Regretting my inability fully to comply with your request, but hoping in this case you will take the will for the deed, I am, Yours truly,

Omaha, Neb., April 8, 1895. B. S. WRIGHT, Secretary.

EX-PRESIDENT THOMPSON'S VIEWS.

EDITOR HARDWARE: I regret I cannot get to you my reply in time for your accommodation, but I give you just a word, and may be it will arrive not too late. The benefits that have accrued are those that naturally follow in the line of exchange of intercourse and social relations. Men are but animals of a higher type, and as they become estranged they are disposed to fight; but when brought together they soon enjoy each other's companionship, and the fighting feeling dies a natural death, having nothing to feed on. There has been greater friendship among our members than ever before, which has worked to actual benefit. Our members are frank to express that they have been helped very much in exchange of ideas and methods.

The trade, especially in Boston, has never been so harmonious in feeling as since the organization of our Association. I speak of Boston as nearly all the dealers in that city are members. There is no question but if all the dealers in themselves New England would band together, that great good would follow. Yours truly,

Lowell, Mass., April 8, 1895. S. H. THOMPSON.

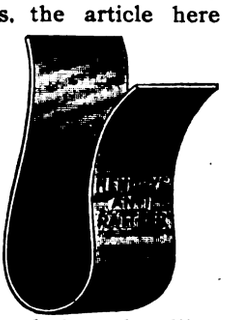
Underhill, Clinch & Co.'s New Connection.

The following circular letter to the trade carries its own explanation:

Norwalk Lock Co., South Norwalk, Conn., manufacturers of Artistic Bronze and Iron Builders' Hardware, Locks, Knobs, Butts, etc.:

To the Trade: We have appointed Messrs. Underhill, Clinch & Co., No. 94 Chambers Street, New York, our sole agents for New York City and vicinity, and solicit through them orders for goods we manufacture. They will carry in stock a large assortment of our products, and will sell at such prices as the market creates.

Yours truly,
NORWALK LOCK CO.,
E. Beard, President.



Having surrendered the agency of the Branford Lock Works, to accept the agency of the Norwalk Lock Co., of South Norwalk, Conn., we would be pleased to receive orders for any of their well and favorably known goods. They being large manufacturers of high and medium grades of goods, we shall be able to supply the wants of our customers promptly, and at such prices as will be satisfactory. Direct telephone communication over private wire with the factory, will enable us to give quick information in regard to special orders.

In the sale of these goods, we shall adhere to our long established principle of selling only to dealers. Inquiries from others will be referred to our customers.

Respectfully,
New York, March 15, 1895. UNDERHILL, CLINCH & CO.

An Anti-Rattler Thill Coupling Spring.

The Sabin Machine Co., Montpelier, Vt., are placing upon the market with great success, the article here shown. It is Hendry's Anti-Rattler Thill Coupling Spring, which is adapted to any coupling: is so formed not to wear it, yet holds the shaft securely, and prevents all rattling. It is an oil-tempered steel spring, and is therefore described as having great lasting qualities. It is made in five sizes: ¼, ⅜, 1, 1⅛, and 1¼ inch. It is an article sure to be handled successfully by Hardwaremen and those handling carriage manufacturing supplies. The Sabin Machine Co. will be pleased to hear from all who are in any way interested.

One reader of our recent Anniversary number writes: "We read your paper through with great interest—*advertisements* and all."

The man who has been retailing shears along Chambers Street was indeed carrying coals to Newcastle.

Review of the Markets.

Money: During the week past there has been a slightly easier feeling in the money market. Business has grown in every speculative department, but this is not a very satisfactory view of the situation. The flurry in oil has been a marked feature of the market, but whether it means a scarcity of oil, mere speculation on the part of heavy dealers, or is the outgrowth of a combination between the Standard Oil Co. and the great Russion oil company, is a matter which time alone can properly answer. General stocks have been a little stronger, and there is a hopeful outlook for the principal crops. Foreign trade shows a heavy balance due abroad, and it is thought that a great deal of gold would go out, were it not for the negotiation of bonds by the syndicate.

Hardware: Trade has fallen off during the last week, and is not now as good as it was about April 1st. Orders that are placed are as a general rule quite small and of a miscellaneous character. Retailers' stocks must be very low and they only order when absolutely forced to, and then in the smallest possible quantity. It stands to reason that when the time comes for a general restocking, trade is bound to brighten up. The boom in building is expected to benefit trade in two ways. It will largely increase the demand for builders' Hardware and give employment to those who buy Hardware. The tone of the market is firm, few manufacturers being willing to go below quotations. The trade in sporting goods and bicycles is active. Most of the houses are busy filling back orders.

Nuts and Bolts: The market in New York is very quiet. Reports from the West indicate that business in that section is decidedly better, though most of the trade is in contract orders.

Wire Nails: The rumored combination of the large wire nail companies forms the principal topic for discussion. It seems to be well-founded, although the principals in the affair evince a disinclination to say much on the subject. There is but little change in the condition of the market, with the possible exception that prices are firmer. Mills are not anxious to take orders for future delivery, as they have as much of that kind of business as they can attend to. 80 cents is the bottom price for large lots for prompt delivery, while small lots are quoted at 90 cents.

Cut Nails: The market is holding its own firmly. A number of orders have been placed and trade is moving well. There are no deviations from the agreed upon prices. Carloads on dock are quoted at 80 cents on a 60-cent average. Lots out of store are bringing 90 cents.

Locks: The trade, as far as volume of business is concerned, is in a better condition than it has been for some time, but prices are lower than ever. Owing to the increase in building there is a good deal of business in sight in the East.

The prices quoted below are for small lots. Round lots, except Tobin Bronze, can be purchased at lower prices:

In sympathy with the other branches of the Hardware business, the domestic cutlery business is in a somewhat depressed condition. The import trade is very quiet. The delivery of German goods is frequently delayed owing to the strike which is still on in that country.

Clapp & Co., bankers and brokers, New York, in their weekly letter, say: "A popular movement in finance is an electric inspiration. Fluctuations of sentiment like vibrations of current increase a power as invisible as it is potent. Everything worth having seems almost within reach of everybody worth anything. The air that was lately leaden seems charged with buoyant sentiment to quicken impulses. Ambitions recently hopeless seem stepping stones to other elevations. A nation or a man that can go to sleep at will, generally retains needed power for waking movements. Straws: About one-fourth of our railway system is in the South, equalling 42,000 miles. Since the trolley electric was introduced about six years ago, 9008 miles of surface railroads have been erected or changed to that system. Only 2243 miles still use horses; 652 miles are run by cables; 614 by steam motors; 62 lines are carrying mail, 55 are hauling freight, 35 have started express service. Evidently electric service will revolutionize transportation interests. Imported goods free of duty for the first six months of the new law equalled 47.9 per cent., against 56.7 per cent. for a corresponding six months the previous year under the old law. Dutiable imports were $131,987,046, against $185,298,927 previous year. Exports decreased $47,277,056 or 9.7 per cent. Imports increased $51,473,439 or 16.9 per cent. Free importation of raw material for manufacturing uses was $50,980,697, against $86,259,779. The imports of nine classes of manufactured goods in February, 1895, were valued at $17,206,056, against $8,395,526 in February, 1894."

THE BALTIMORE TRADE.

Yes; we are comparatively busy. The packing floor for the past fortnight has been covered with orders, the diversity of which occasions some doubt as to whether the country merchant is buying his spring or fall stock. Never, in an experience covering many years, has the writer seen such oddly assorted orders: Freezers and Fire Shovels, Screen Doors and Coal Hods, all delightfully mixed in one shipment.

The visiting trade is still with us. Their confidence in the return of good times is refreshing after the long spell we have had of pessimistic ranting. They all speak hopefully for the prospects of good crops in their locality, and as yet, have not vexed themselves with the tormenting vagaries of the currency question. Trade from the tidewater section of Virginia will begin to arrive next week. Their visit will be a hurried one this year, as the farming season in the truck-raising section is now under a full swing.

Mail orders are frequent and larger in comparison than at any other period of the year. Such business is always flattering. It is a special mark of confidence on the part of the country merchant, an implied compliment that merits careful execution, prompt delivery, low prices. Special tact is required in handling such trade properly. In the first place, it necessitates a thorough knowledge of the wants of that section from which the order comes; a knowledge gained only after long experience. Many of such orders are for irregular goods of such sizes of staple goods not generally carried in stock even by the jobber. It would be easier to place such orders on your "back order book"; but by so doing you greatly inconvenience the customer. By far the best policy is to buy the goods out in town from some other dealer, charging a small percentage above cost; if necessary, put them in at actual cost, sooner than subject him to the delay of waiting for what he needs *at once*. This is the only method of properly treating such business.

Just at the present time Bicycles and Fishing Tackle are coming in for a large share of attention. There is a pleasure in selling both, aside from the profit they bear. The purchaser of a wheel is sure to become a convert to the Good

"Prove all things; hold fast that which is good."

HUMBERS HAVE PROVEN

All things that are reliable and excellent in cycle construction. Their reputation and standing as

THE PATTERNS OF THE WORLD

Have been built up by the practical tests of twenty-six years. : :

HUMBERS HOLD FAST

To all that experience has proven good, and always furnish to buyers Humber Quality at Humber Prices.

Humber & Co., America, Ltd., 318 Broadway, New York.

Road movement and we have never met a true fisherman of a vicious disposition. In both cases nature becomes a great moral teacher.

As yet, we have not taken up the sale of Bed Springs or Baby Carriages. We leave that to those Anacondas of the West. From a purely business point of view, both might prove profitable; but there is an incongruity about them that jars with "the eternal fitness of things." These so-called "New Departures" are the growth of diseased business methods, and ultimately can only have one end. The demand which called into being the department store had some legitimate foundation—it is simply the enlarged edition of the old country cross-road store of twenty years ago, when nainsook and nails were sold over the same counter. The insatiable desire on the part of some of our Western competitors to sell everybody everything irrespective of nature's boundaries, has proven one of the most demoralizing factors in the past two years. As for ourselves we retain enough of the conservative "old fogyism" to find field enough for our energy in the legitimate articles of Hardware manufacture. *The fullest and best ears of corn hang nearest to the ground.*

The location of a site at Clifton for our exposition in 1897, has created a building boom in the northeastern part of the city. This, together with suburban development, has stimulated considerable local demand for builders' Hardware, mostly in the cheaper grade of goods: bronze locks and trimmings finding slow sale.

Prices are firm, and there seems to be a general feeling that the era of advances is close at hand. Heavy Hardware will no doubt be the first to reflect the upward movement, although Bright Wire Goods have taken a turn for the better, the manufacturers last week advancing prices ten per cent. The wire nail mills, overcrowded with orders, are running on double turns. The makers yesterday combined to raise prices five cents per keg. The eastern manufacturers of steel nails advanced prices several weeks ago. The only weakness apparent is the Wire Market, the demand this spring falling considerably short of previous seasons.

Collections are only fair.

THE TABB & JENKINS HARDWARE CO.

THE PHILADELPHIA TRADE.

At last spring is with us, and while we can hardly say with Mark Twain "that the voice of the turtle is heard in the land," still it is gratifying to report that it is having an effect on trade.

Last year spring trade was in March, but as the weather has been so inclement and backward, we look forward to a good spring trade in April and May.

All spring goods are in demand; shovels, rakes, hoes and ice cream freezers are moving freely, and there is a reaction from some of the low prices on poultry netting; stocks are growing lower and in some quarters are almost exhausted.

The boom in bicycles still continues and it is impossible to get them fast enough to supply the demand. All classes are now riding the wheel, and Hardwaremen have awakened to the fact that they are the proper parties to handle the goods. There is no doubt this is to be the heaviest year on bicycles that has ever been known, and the only question is whether the supply will meet the demand.

Factories are running overtime, and in several cases we know that jobbers have had to make personal visits to the factories in order to get stock and many of the small jobbers are cut off from their supplies altogether.

Digitized by Google

We hope to see the same boom in Hardware. Stocks are certainly very low, and the encouraging signs of reviving business, increasing wages and more general employment in the laboring classes should have an effect on general business.

Wire Nails are firmer and many staple goods which have been at extremely low prices are now being held at higher values. Biddle Hardware Co.

THE DAVENPORT TRADE.

May we offer congratulations on your Fifth Anniversary wishing you many happy returns; and we also wish to congratulate you upon the beautiful copy of Hardware issued on that date. If this issue is an indication of the pace set by a five year old, what enormous proportions and elegance of style will be reached by the time it becomes of age and full grown.

The completed portion of the Illinois & Mississippi Canal was formally opened to the public on the 17th instant; the event being appropriately celebrated by hundreds of business men taking a steamboat ride through the canal. It was a proud day for Davenport. The Hennepin Canal, as it was then known, was first projected half a century ago. The project has been discussed both in and out of Congress ever since, hence, when the first section of the canal was actually thrown open to the public for navigation, the people who had so long planned, worked, thought and expended their valuable time and vast amounts of money to accomplish this end, were jubilent indeed. May we soon see this national waterway completed to Lake Michigan, which will give the valleys of the Mississippi and Missouri rivers direct water communication to the Atlantic through the Great Lakes, Erie and Welland Canals, the Hudson and St. Lawrence rivers.

The is a regular "Tempest in a Tea-pot" fight in progress between a jobbing house in Chicago and a Western wire nail manufacturing company, over some wire nail deal, and both parties are getting quite a little cheap advertising out of it; an interior Iowa jobbing firm, who evidently desires notoriety also, issues a printed postal card, with the startling announcement, in big black letters, "*We are in it too*," and proceeds to quote a cut price on wire nails.

A telegram just received states that at the meeting of the sheet iron manufacturers, at Pittsburgh, on the 17th, it was decided to advance the price of both black and galvanized sheets.

Builders' Hardware, Farming Tools, Poultry Netting, Screen Wire, Screen Doors, and Paints are in active demand.

Sales will compare favorably with those of a year ago; collections are fair, with no failures to report; weather favorable for crops. Sickels, Preston & Nutting Co.

THE CHICAGO TRADE.

The increase shown in the business of last month over March of '94, has more than kept up so far during the current month. While business in general cannot be said to be booming, there are some seasonable lines that are in very large demand, and both jobbers and retailers are experiencing trouble in getting their orders promptly taken care of. This is notably true in the bicycle business, particularly in the lines of wheels known as medium grades. It would look as if the ability of the manufacturers to supply these wheels is far below the demand, and quite a number of the more prominent makers of high grade wheels are also unable to keep up with their orders, which are very much heavier than had been anticipated. There seems to be a shortage particularly in the way of ladies' wheels of certain patterns. In many cities it is becoming quite "the thing" for ladies to do, and the recreation has been taken up by a class of ladies who two or three years ago thought it one of the last things they would be guilty of.

In general Hardware lines the demand seems to be improving from day to day, and one encouraging feature about the orders received is that we notice the quantities of goods ordered are growing somewhat. The buying is still of a very conservative nature, still the orders indicate that dealers are buying something in excess of orders which they actually have to fill themselves, which has been about the way they have been buying for two years past.

Prices still rule extremely low, but stocks are so light in the hands of manufacturers, jobbers and retailers that it would seem as if the demand for goods, if it keeps increasing as it has during the last six weeks or two months, will make it possible for manufacturers to get some advances, and we are hopefully looking forward to the near future for a realization of this wish.

Woodrough & Hanchett Co.

THE BOSTON TRADE.

The general business for the past two weeks presents a distinct improvement, and much is due to the effort of Nature, which has given us some seasonable weather, and wonderfully brightened mercantile prospects throughout this section.

The orders received show a general assortment, and it is still evident that buyers are not purchasing for any other than immediate wants. The days for speculative buying seem to be of the past, and the low ruling prices are no temptation to the buyer to anticipate future needs. Under conditions as they exist to-day, it seems to be unwise to advance prices, and all advances made since January 1st are susceptible to some concession.

The demand for Garden Tools has been in excess of last season, and the better grades of both Western and Eastern manufacture have been given the preference. These goods are so reasonable in price that the trade prefer to get a tool that has a reputation, rather than some of the inferior grades that have been offered in seasons past.

Collections are slow and not up to the average.

Frye, Phipps & Co.

THE AUSTRALIAN TRADE.

Superficially, the condition of trade is strongly suggestive of the country generally being in a pretty bad way. The outward condition, however, is misleading. Five or six years ago, when business was booming and everything appeared to indicate phenomenal prosperity, the Colonies were importing far in excess of their exports, and were piling up indebtedness on borrowed money at an alarming rate. All that is now changed. The guiding policy on all sides is economy; and although trade operations are on a small scale, what is bought is paid for or sold on a safe basis of credit, and therefore of a perfectly sound and legitimate nature, while at the same time the output of exportable produce has been greatly increased and unquestionable returns demonstrate conclusively that the balance is now on the side of prosperity. This, too, in the face of difficulties encountered at the hands of the government through import duties on tools and implements, etc. entering into the production of exportable goods; a policy which has been pushed to extreme limits in the labor interests, with a view of encouraging the domestic production of things which could be purchased elsewhere for half the intrinsic value of the labor expended, the unwisdom of which is slowly but surely manifesting itself to the people.

With a climate and every natural condition favorable to the development of such industries as the raising of cattle, sheep, wool, wine, butter, cheese, poultry and such kindred articles, Australia's prosperity consists in such pursuits rather than in the manufacture of goods in which, by reason of advantages of raw material at hand, larger production and lower cost of labor, she is easily out-distanced by other countries. Garden or Lawn Hose.

TO KEEP the grass green, the lawn beautiful, the garden thrifty, to lay the dust and cool the air, your customers will soon call upon you for Lawn and Garden Hose. Have you a stock to supply early buyers? We can furnish you with hose that will not burst, will not leak, will not sweat, that will please your customers, keep them pleased, and increase your business. From the different brands enumerated below, we can meet your views as to price and quality.

"1846 Para."—A half century of good service stands behind this hose. It is recognized as the very best in the market, being made from the finest Para rubber and cotton duck woven specially for us. Hundreds of testimonials from the trade and public place its excellence beyond dispute.

"Double Diamond."—A strong, durable hose, warranted to give entire satisfaction. It is carefully constructed of excellent stock, and there is nothing better offered, 1846 Para excepted.

"Carbon."—This brand will render entirely satisfactory service. It is constructed in a superior manner, and gives greater value for the price than any offered by other makers.

"Double Diamond" Cotton Hose.—The fabric of this hose is circular woven, of a heavy and high grade of yarn, and is so pliable that it can be bent or twisted without injury. It is exceedingly strong, will withstand 500 lbs. pressure, and we can safely warrant it not to burst under the pressure of any system of water works. Every length is tested, and if hung up and allowed to dry after use, it will render good service for years.

"Spider" Cotton Hose.—This is of precisely the same weave as the Double Diamond, and while of lighter fabric, will withstand ordinary water pressure and render reasonable service.

"Spider."—Our cheapest quality; is several grades higher than the best competition hose in the market.

Heavy Hardware Jobbers' Union.

The annual meeting of the Heavy Hardware Jobbers' National Union was held in Louisville, on April 19th and 20th. It was one of the most successful ever held by this Association, and representatives were present from St. Paul, Chicago, Indianapolis, Louisville, St. Louis, Milwaukee, Davenport and Memphis. While in session the Union discussed many matters of importance to the trade. This related principally to the good of the Union itself, the relation of traveling men to the jobbers, and the shipping facilities of the different cities of the country. When the annual election occurred for officers for the following year, a few changes were made, owing to the desire of the previous occupants to be relieved of their burdens; but where there was such an abundance of good material, no mistakes could have been made in the selection of the new ones. The names of those chosen is a guarantee of the future usefulness of the Association. The new staff consists of the following gentlemen:

President: F. K. Maas, of Chicago.

Vice-Presidents: S. D. Kimbark, Chicago; Gaius Paddock, St. Louis, and George Deming, Cleveland.

Secretary and Treasurer: George D. Todd, of the Todd-Donigan Iron Co., Louisville.

Executive Committee: R. E. Brier, St. Louis; J. R. Nichols, St. Paul; Morris B. Belknap, Louisville; H. B. Hunter, Milwaukee, and Clifford Bruce, Memphis.

It is needless to say to those who are acquainted with Louisville, that the abundant hospitality of the Hardwaremen of that city was shown in the usual lavish and generous manner, and the visiting members speak in the highest terms of the reception which they met, and went home sounding the praises of Louisville, in no uncertain way. The dinner at the Pendennis Club, at which the visitors were entertained Friday night, was a most pleasant event. A feature that pleased the visitors highly was the presentation to each of a bottle of the oldest and choicest Kentucky whiskey. Attached to each bottle was a card bearing the name of the recipient and the words, "For Medical Purposes Only."

Situations Wanted.

SITUATION wanted to auctioneer job lots or Hardware specialties through the West, by a man who has had twenty years' experience in that line, and can furnish A1 references. Would be pleased to correspond with job lot dealers Address P. H Starr, Norwalk, Ohio.

HOUSES OF Good Business Standing DESIRED AS AGENTS.

The C. F. Guyon Co., No. 99 Reade Street, New Yor the Eastern branch of the Monarch Cycle Co., are preparing to remove into new quarters, which front on both Reade and Chambers Streets, No. 79 on the former and No. 97 on the latter. The new establishment will give increased shelf room, and there is also a fine sub-cellar, which can be utilized for the storage of wheels. The Chambers Street end of the store will be used for the bicycle business, while the Hardware trade will be conducted in the Reade Street end.

An important branch of the scissor trade is the large shears used by tailors for cutting out. It is somewhat remarkable that the Americans are almost completely commanding this market. Of course, there are several who prefer the Sheffield-made shear, but in nearly all the large tailoring establishments which an observant man visits he will find that the American-made shear is in use.—*Engineer, London, Eng.*

A Sound Business Principle.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Stores, Etc.

Aurora, Ill.—The Aurora Automatic Machine Co., incorporated by Charles Erickson and T. H. Ball, of Aurora, and Simond Flershein, of Chicago, to manufacture bicycle specialties, sewing machines, etc.

Baltimore, Md. — The Excelsior Target Co., incorporated by Hallock A. Penrose, Thomas McGuinness, Henry Kiedel, Walter T. Harvey, John McPhail and others, to manufacture sportsmen's supplies. Capital stock, $100,000.

Bayonne, N. J.—Eagle Bicycle Mfg. Co., branch salesroom opened at No. 726 Avenue B. Mr. Hammond, a traveling salesman of the company, has been made resident manager.

Bardstown, Ky.—W. B. Grigsby & Co., implements, etc., will take up bicycles.

Bozeman, Mont.—Harry McCoy, Hardware, bicycles, etc., has opened a new store.

Brooklyn, N. Y.—Charles C. King & Co., bicycles, have opened new store at Ninth Avenue and Fifteenth Street, handling the 1895 Hartford and Columbia wheels.

Brooklyn, N. Y.—H. & D. Folsom Arms Co., No. 314 Broadway, New York, bicycles, firearms, etc., will open branch salesroom at No. 1201 Bedford Avenue, near Halsey Street. John Biffer will be manager. Bicycle sundries will be carried, together with the Monarch bicycles, the Dictator and the Zeppa.

Brooklyn, N. Y. — The Hamilton Cycle Co. have opened new salesrooms at No. 22 Hamilton Avenue, with L. C. Johnson as resident manager. The company will carry a general stock of bicycles and bicycle sundries, and will make a specialty of storing bicycles, without charge to owners.

Brownsville, Tenn.—T. B. King, Hardware, etc., will add bicycle department, and is securing information regarding prices, etc.

Carlisle, Ky.—R. C. King, Hardware, etc., will add a bicycle department.

Chatham, N. Y. — Wm. W. Grey, new Hardware store opened, and correspondence invited with manufacturers of bicycles and bicycle sundries, looking to accepting agency.

Chicago, Ill.—The Jenkins Cycle Co., incorporated by Shea Smith, George H. Jenkins and Charles E. Jenkins. Capital stock, $75,000. The two first named are of the firm of Shea Smith & Co., wholesale stationers. Mr. Jenkins was formerly manager of E. D. Preston & Co.'s bicycle department. The new company will manufacture two grades of wheels, under the name of "Napoleon," to be sold at $100 and $125. Charles Jenkins will manage the business, and the wheels will be ready for delivery by April 15th.

Chillicothe, Ohio. — N. Purdum & Co., Hardware, will add a bicycle department.

Cordele, Ga.—Cody & King, Hardware, etc., are looking into the advisability of adding a bicycle department.

Dansville, N. Y.—W. H. Dick has commenced the manufacture of bicycles.

Decorah, Iowa.—Bidney & Istad, Hardware, bicycles, etc., have opened a new store.

DeLand, Fla.—Watts Bros., Hardware and furniture, preparing to open a bicycle department.

Elkhart, Ind.—The Lieb Cycle Guard Co., incorporated, with J. J. Newman, president; Eber Darling, treasurer, and Julius D. Woods, secretary, to manufacture a patent cycle chain guard. Capital stock, $10,000.

Hartford, Conn.—Hartford Machine Screw Co., manufacturers of bicycle parts, have recently fitted up an entire plant for turning out 100 complete bicycles daily. They are running twenty-four hours daily, and report increased activity in their lines.

Holly Springs, Miss.—Wall & Jones, Hardware, new store opened. Will add bicycles.

Kingston, N. Y.—C. F. Winkler has opened a bicycle exchange at No. 729 Broadway. He will conduct a bicycle repair department.

Murphy, N. C.—Wood & Gregg, Hardware, etc., are preparing to take up bicycles.

New York, N. Y.—E. J. O'Connor, whose present address is Park Avenue Hotel, is endeavoring to organize a company, or to effect a partnership, for the purpose of manufacturing a bicycle invented by himself, and for which a patent was issued May 1, 1894, the number of the patent being 519,024.

Newton, N. C.—Newton Hardware Co. will add a bicycle department, if a good light weight wheel that would give satisfaction, can be secured.

Lynn, Mass.—Achorn & Deacon, bicycle manufacturers and dealers, open a new store at Nos. 2 and 4 Boscobel block. The firm is composed of Willard S. Achorn and Samuel Deacon. They handle the Stearns wheel, also the Victor, Fowler, Phœnix and other leading makes. During their opening evening three thousand people are said to have visited their store.

Oklahoma City, Okla.—The C. W. McQuown Commission Co., No. 16 Robinson Street, has opened a bicycle department.

Paducah, Ky.—Lawson & Co., bicycles, new store opened on South Fourth Street. The new firm will handle the Stearns, Telegram, Zimmy, Shirk and National.

Suffern, N. Y.—Charles H. Hansen, bicycles, will open new store in the Traphagen building.

Superior, Wis.—Dodge & Pearson, of Duluth, sporting goods, bicycles, etc., opening a new store at No. 1123 Tower Avenue.

Tampa, Fla.—C. C. Woodruff and W. C. Aldridge, new firm, sporting goods, bicycles, opened new store.

Thompsonville, Conn.—S. A. Grant is organizing a company, to manufacture an improved bicycle patented by him.

Washington, D. C.—Cline Bros, No. 909 Pennsylvania Avenue, bicycles, have added a sporting goods department.

Putnam Nails Tell the Truth

Remember the Word
"Putnam."

For the last Thirty Years
They have Stood The Test.

Every one knows that a nail drawn to a point while hot under hammers, is far superior to cold rolled and sheared nails. Even our esteemed competitors are seeking to conjure with the word ***PUTNAM***, and are assisting us by their recent advertisements to more fully impress it upon the public mind.

Does any one suppose that ***Gen. ISRAEL PUTNAM, of Revolutionary fame,*** under any consideration, in old age, would have gone back on his life work and proclaimed that George III. ***was as good a man*** as the immortal Washington?

If he had been in great ***pecuniary*** distress and his mind had become ***enfeebled*** by disease, he might have done so. If he had, would you have believed it?

Remember the word when you are going to have your horse shod—

PUTNAM.

Cold Rolled and Sheared Nails are dangerous. They are liable to split in driving, thus ☞

THE PUTNAM FACTORIES ARE THE LARGEST.
ITS CAPACITY FOR PRODUCTION THE GREATEST.

The value of its Real Estate and Plant alone being three times that of any other concern in similar business.

FOR CIRCULARS ADDRESS

Putnam Nail Company,

NEPONSET, BOSTON, MASS. (OVER.)

REAL MERIT versus CERTIFICATE MERIT.

It is said that the flowers cast at the feet of a new star on the theatrical stage are sometimes paid for by the management.

The audience, however, is not often thus deceived, as true merit finally reaps its reward.

Character should stand behind a certificate in order for it to have a lasting effect.

Mr. S. S. Putnam sold out his entire interest and good will in the Horse Shoe Nail business to the Putnam Nail Co. in 1878.

In the sale of his good will, on record at the Patent Office at Washington, D. C., Liber W. 24, page 107, the following clause appears:—

> "And I, the said Silas S. Putnam, for the consideration aforesaid do also hereby further covenant and agree to and with the said Putnam Nail Company, that I will not at any time (during the period of fifty years from the date of these presents) in any manner directly or indirectly engage in or have any concern with the business of manufacturing horse shoe nails, in competition with the said Putnam Nail Company, or in any way aid or promote any competing or rival manufacture or business, or suffer my name to be in any way used in connection with said business or manufacture except by said Putnam Nail Company; and that I will in all ways in my power aid, countenance and promote the said business of the said Putnam Nail Company." * * * (Signed)
>
> SILAS S. PUTNAM. { SEAL. }

Here follows a sworn acknowledgment by Silas S. Putnam before a Justice of the Peace.

Notwithstanding this, he has almost constantly since been engaged in an effort to produce machines by the Hot Forging process, and so far as we know they have not been a success. And now, after a life time of work on Hot Forging machines, he makes a certificate endorsing a cold rolled and sheared nail.

It is said that "Actions speak louder than words." We are satisfied to leave the question with the public, believing that the general intelligence of the community will be our sure protection against this or any similar attack by others, to prosper on the great reputation of the Putnam Nail.

Scarcely a week passes but that we have people report to us of the injury done to their horses through the use of cold rolled and sheared nails. This very week a man reported that he had extracted a split nail from his horse's foot and that he was obliged to have the foot poulticed for two weeks. He said to us, "You may be sure that I now stand over a blacksmith and see to it that the nail he drives has not the sheared edges near the point."

The Putnam Nail stands for truth and its character is established and no rival is now in sight, nor can there be, till they are produced by the same method. We say the nail speaks the truth because it shows for itself whether it is hammer pointed or sheared at the point.

Some of our competitors conjure with the words of our ad., "Hot Forged and Hammer Pointed," and some with the name "Putnam."

The nail cannot lie, and if it is a Putnam there are no sheared edges, and to be strong, reliable and sure, they must be Hot Forged and Hammer Pointed.

When selecting a bicycle to represent during the coming season, consider ultimate results.

The "DORSETT" is here to stay. It represents every feature of the best wheels on the market with added points of novelty and merit that are bound to make it a "seller."

Interchangeable methods of cycle propulsion presented in the simplest and most efficient mechanical constructions, and perfectly independent of one another.

With the principles exhibited in a practical manner, and construction "special" in every part, the "DORSETT" represents the highest perfection in the art of bicycle making.

Send for catalogue which tells you all about details.

No Disagreeable Odor. No Ashes Light and Heat in Abundance.

No. 327. No. 3 Lift Burner.
Height, 32¼ inches. Spread of Base, 12¼ inches. Nickel Finish.

THE MILLER OIL HEATERS.

Just the Thing for All Time and Every Day Use. For Spring, Summer, Autumn and Winter.

They are an Assured Success, from the fact that the Lamps used are "The Miller Lamps." THE LATEST AND BEST.

IN THESE HEATERS YOU HAVE A HAPPY COMBINATION:

The Best Light. The Best Parlor Heater. The Best Cook Stove.

They are Clean and Odorless. Require no more care than an ordinary lamp. Cylinders of Russia Iron, with Removable Nickel Tops, or with Combination Heating Drum and Grate for Cooking. The No. 3 BURNERS have a FLAME OF 15 SOLID INCHES. "MILLER" HEATERS have outside SCREW ADJUSTMENT for regulating the Wick and PLUNGE MOVEMENT FOR EXTINGUISHING; each one is supplied with an extra Flame Spreader so that Lamp can be used for ILLUMINATING when not wanted as a Heater. All of the Best Material and Workmanship.

They will heat a large room perfectly. A tea kettle of water heated in a few minutes by removing canopy.

Perfectly Safe. They Cannot Explode. Oil Never Gets Hot in the "Miller" Heater. A Good Companion for a Cosy Nook. A Comfort on a Chilly Morning.

READY TO LIGHT, WITHOUT REMOVING CHIMNEY.

A MOST IMPORTANT FEATURE.

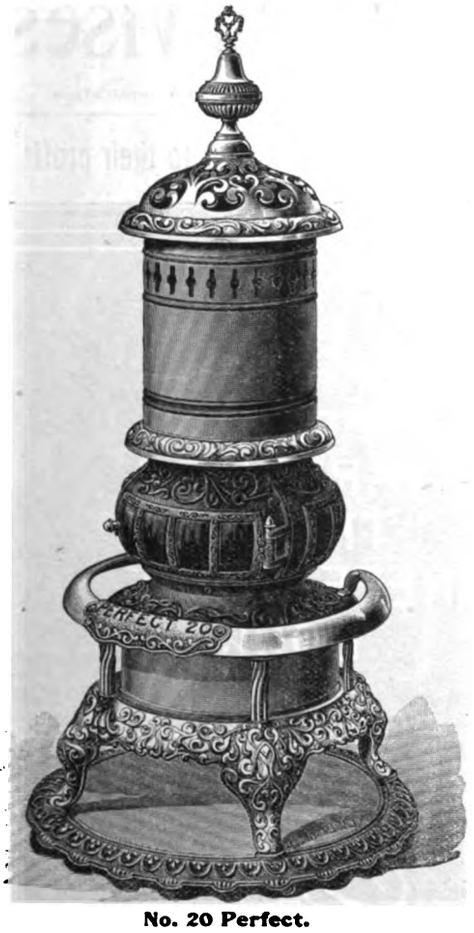
☞ All the weight of the Cylinder rests solidly on the FOUNT and not on the BURNER in these Heaters.

In IMITATIONS of these Heaters the Cylinder is supported on the BURNER, a CHEAP and WEAK CONTRIVANCE, which makes it necessary to REMOVE THE CYLINDER for lighting and which renders it impossible or very dangerous to use the Heater for cooking purposes.

Send for circular showing Heaters with ovens for cooking. We have 12 varieties.

These Lamps hold One Gallon of Oil. Will Burn 12 hours. Easily Lighted by Lifting Top of Burner.

MANUFACTURED BY



EDWARD MILLER & CO., MERIDEN, CONN., United States of America.

NEW YORK STORE: 10 & 12 College Place and 66 Park Place. BOSTON STORE: 63 Pearl Street. CHICAGO STORE: Rooms 808 and 809 Masonic Temple.

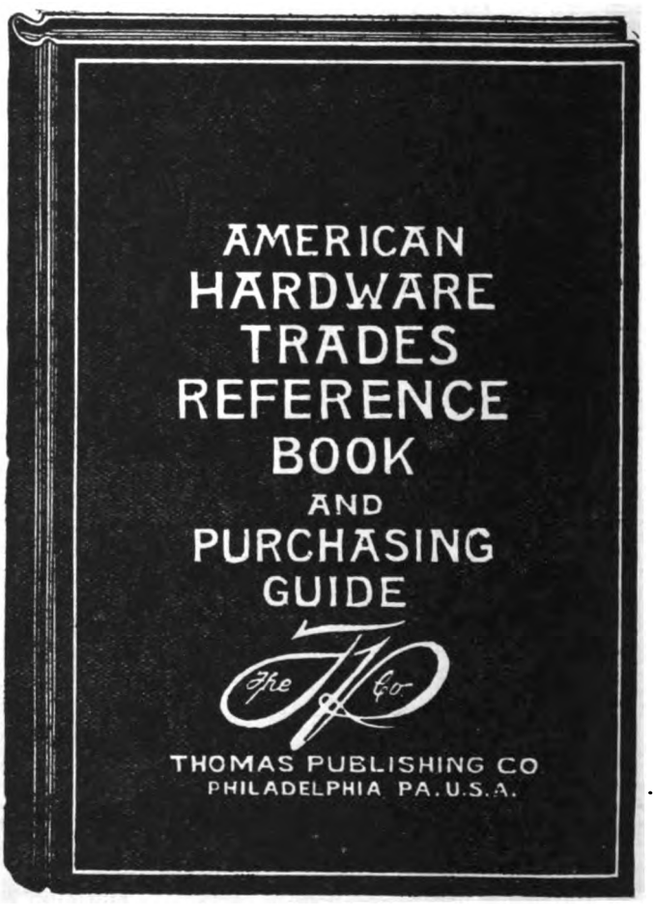
The Conroy patented New Automatic Refrigerator Door Fastener, with lock and key.



THIS FASTENER is the most complete one ever invented. The door will push to more easily with this Fastener than any in the market. The Fastener will tighten the door by the door closing. It is the most substantial; nothing about it to get out of order. By lifting the handle quarter circle the door will open, and if it sticks it will release it. It has a new and improved lock, absolutely secure. Made for flush or raised doors, composed of brass or bronze metal in any finish desired, plain or ornamental.

MANUFACTURED BY

P. J. CONROY,

Manufacturer of **Refrigerator and Ice House Fasteners Hinges and Faucets.**

Over 15,000 Dealers now use it to their profit.

Send for Circular.

A piece of gratuitous information is furnished by a sign on the side of a well known Hardware store. It is so palpably platitudinous as to cause a smile on the face of the beholder. It simply states that "Iron Sinks." Of course the meaning of the sign is obvious, but it is amusing at any rate.—*Lowell (Mass.), Citizen.*

"Excellent Cream!"

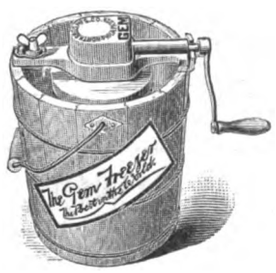
WHITE MOUNTAIN FREEZER

Improved for 1895

With which the finest quality of cream can be produced in Four Minutes.

As features of especial merit we claim:

A STRONG, waterproof tub, bound with heavy, galvanized iron hoops that fully protect the tub, and do not fall off; the gearing completely covered, so that nothing can get between the cogs. Cans full size and made of the very best quality of charcoal tin plate; beaters of malleable iron and tinned; all castings attached to the tub nicely galvanized to prevent rusting. It is the only Freezer in the world having the CELEBRATED DUPLEX DASHER, WITH DOUBLE SELF-ADJUSTING WOOD SCRAPING BAR, by the use of which cream can be frozen in less time, yet finer and smoother than can possibly be produced in any other Freezer now in use.



Get the Best. All Leading Jobbers Sell Them.

THE WHITE MOUNTAIN FREEZER CO., Nashua, N.H.

The BEST FREEZERS Made

HAVE
Electric-Welded Wire Hoop Pails,
MADE OF
Best Virginia White Cedar,
AND
Drawn Steel Bottom Cans.

SOLD BY LEADING JOBBERS.

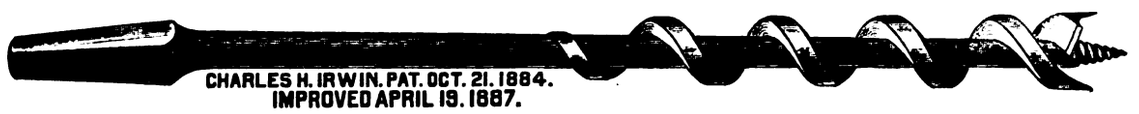
COPY OF LETTER.

SPRINGFIELD, OHIO, February 21, 1895.



IRWIN AUGER BIT COMPANY, Wilmington, Ohio.

Gentlemen:—We send by same mail one of your Machine Bits, which, without dressing or handling in any way, has bored 57,000 holes 4 1-2 inches deep, and is still good. It has such a record that the party felt you would be glad to know it.

Yours, etc.,

THE SPRINGFIELD HARDWARE CO,

Per Wiseman.

CHARLES H. IRWIN. PAT. OCT. 21. 1884.
IMPROVED APRIL 19. 1887.

STANLEY'S PATENT
HAND-Y LEVEL.

The shallow grooves along the two sides of the Level give the owner an excellent grip on the Tool. In climbing ladders, walking on stagings or on the frame of a building, the peculiar form of the Level imparts a feeling of steadiness to the workman who carries it. For ascertaining a Plumb, it can be brought to a perpendicular position with remarkable ease and accuracy.

No. 16. Hand-y Plumb and Level, Cherry, Polished and Tipped.....$1.25

Manufactured by THE STANLEY RULE & LEVEL CO. New Britain, Conn.

NOTICE.

GENTLEMEN:—On and after March 1st, the business heretofore conducted by me will be continued by a Company, to be known as

The Estey Wire Works Company.

Thanking you for favors received in the past, I bespeak a continuance of your patronage under the new organization and trust that the same pleasant relations existing between us may be continued.

Yours truly,

W. S. ESTEY.

As above announced we have succeeded to the business of W. S. ESTEY, and trust that we will merit a continuance of your valued orders as heretofore extended to Mr. W. S. Estey.

Yours truly,

ORANGE SPORTING POWDER, MANUFACTURED BY LAFLIN & RAND POWDER CO.

ORANGE RIFLE EXTRA, ORANGE SPECIAL, ORANGE DUCKING, ORANGE LIGHTNING.

The attention of TRAP AND FIELD SHOOTERS, RIFLEMEN AND DEALERS IN GUNPOWDER, is called to the new ORANGE SPORTING POWDER, patented April 17th, 1888, and branded ORANGE RIFLE EXTRA.

This Powder is quick and strong, and burns with such perfect combustion that the only residum left in the barrel after shooting is a dark oily substance easily removed While this Powder is not exactly SMOKELESS, it gives only a light bluish smoke, which is almost instantly dissipated, and interferes but little with the shooting of the second barrel, taking the place of the so-called smokeless powders in this respect.

This brand of powder sells at the same price as any other brand of Rifle Powder and is superior to any made. No person who shoots can afford not to give it a trial, as after once trying it he will never use any other Powder when he can obtain the ORANGE EXTRA. Weight and quality guaranteed.

MILITARY, MINING AND BLASTING POWDER.

LAFLIN & RAND POWDER CO., 29 Murray Street, New York City.

BRANCH OFFICES:

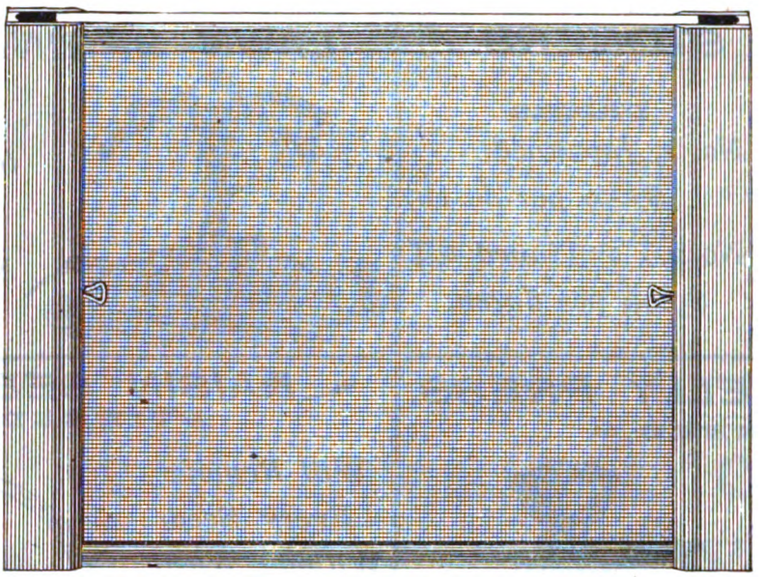
Truss Bottomed FLAX FIBER Pails



Overcome all objections. They **are not** clumsy, partially water-proofed, brittle; their bottoms do not warp out, nor swell and shrink and get loose. They **are** strong, elastic, thoroughly water-proofed, more capacious than other makes, and handsomely finished; while the **truss bottom** holds up its load, but is immovably affixed to the pail. Every man and woman who sees wants them. To introduce them we will ship a trial two dozen to any dealer on receipt of $5.00, or we will send to him **free,** express charges **unpaid,** a sample pail.

Standard Fiber-Ware Co., - Mankato, Minn.

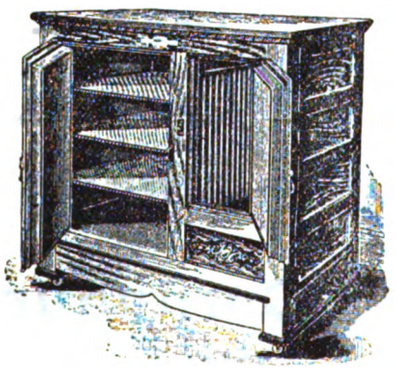
The Best Adjustable Screen is appropriately called

THE "HANDY."

MADE IN EIGHT SIZES.

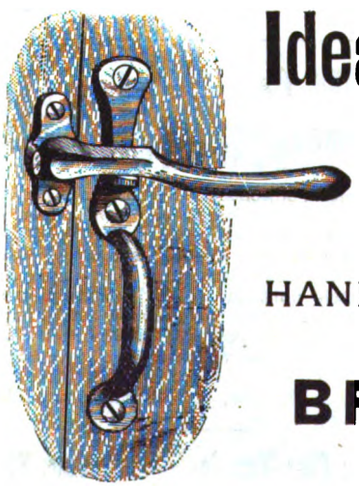
A FEW OF ITS SUPERIOR POINTS ARE:



1st. EASE IN HANDLING.—The hook-shaped pull-bars fastened securely in the centre of the sliding ends afford a ready hold for convenience i placing and removing the screen at the operator's will.
2d. When placed under the sash, it will readily adjust itself to windows in square or out of square.
3d. The Screen is made of hard wood, natural color, finished in oil, and is the neatest, lightest and strongest screen made.
4th Has Box Panels, making both sides alike.

Manufactured by **Pennsylvania Screen Co.**

Sole Agents, **John H. Graham & Co.,**
113 Chambers Street, New York.



The Automatic Refrigerator

has more good points and does better work than any other, and for that reason is a better seller. Our illustrated catalogue for 1895 tells all about the line. Its advantages are:

Perfect circulation.
Large condensing and purifying capacity.
It has no flues to cause it to smell bad.
The trap is inside where it cannot be misplaced or lost.
The drip pipe may be cleaned without disturbing anything in either chamber, and is entirely out of the way.
It has nine walls to protect the ice and to maintain a uniform temperature in the cooling chamber.
It has woven wire provision shelves that are superior.
It has superior hardware.
It is more capacious and convenient.
Flavors of foods will not mix.
Last but not least, it's different, and will bring new customers and new trade.
We want the leading dealers to handle our goods and but one dealer in a place.
The goods are made of ash, and well finished.

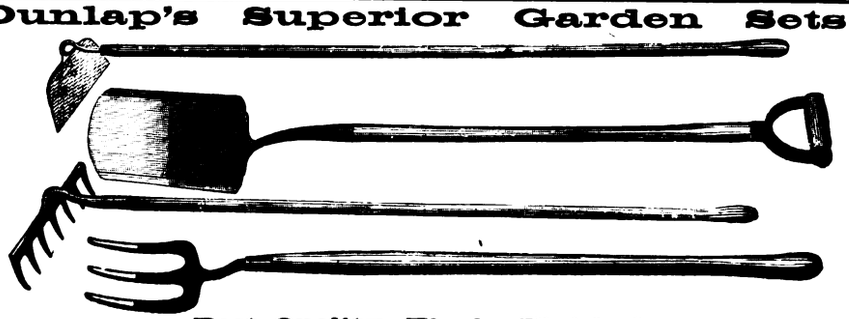
The AMERICAN WICK is made on scientific principles. The gum inherent in the natural cotton is taken out, and no expense is spared to produce a wick that will give THE GREATEST ILLUMINATION.

THE

AMERICAN WICK



Made by the

WICK DEPARTMENT

Of the STANDARD OIL CO. of NEW YORK.

Oil drawn up through the AMERICAN WICK burns with a large, clear, white light and the flame does not drop off in size as it does when a poor wick is used. When the cotton is clogged with its natural dust and gum the full illuminating power of the oil is not obtained and the complaint is heard that the light DROPS.

The "Alligator Wrenches are forged solid in one piece, with tempered steel jaws They have ratchet teeth *cut diagonally* across one jaw, thus enabling them to bite with three teeth at once.
The "Curtis" Wrenches have the diagonally cut teeth of the "Alligator" on both jaws acting in opposite directions. The jaws are connected by swinging bolt and swinging link which gives a quick, sure grip. These Wrenches can be used in contracted space where no other wrench can.

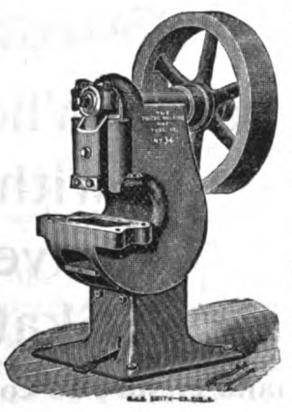
OHIO KNOCK-DOWN STOVE PIPE.

THE Ohio Stove Pipe is the only practicable, durable Smoke Proof Knock-Down Stove Pipe made that needs no directions for putting it together. The Ohio Stove Pipe's peculiar construction enables any person to easily put it together or take it apart. A number of the Ohio Stove Pipe Joints put together will make a continuous line (46 ft. long if desired) of perfectly firm, smoke-tight pipe that will not collapse.

The Ohio Stove Pipe is always shipped in crates of 25 joints of the following sizse:

4 in....per crate. 4½ in.... " 5 in....per crate. 5½ in.... " 6 in....per crate. 6½ in ... " 7 in....per crate



Ask your jobber for this stove pipe; if he does not keep the Ohio, write us.

The Geauga Foundry & Manufacturing Co., Painesville, Ohio.

A Mistaken Notion.

It is a mistaken notion that a fine store in an eligible location, surrounded by attractive signs, is a superior advertisement; for the experience of the most enterprising merchants is that it pays better to spend less in rent and more on advertising.

HARDWARE will keep open house at Section No. 14, in the Sportsmen's Exposition, Madison Square Garden, from May 13th to 18th, inclusive. Our friends are invited to call, and can count upon a hearty welcome.

The two articles contributed to HARDWARE by Sam Haines—a citizen of the Hardware world at large—upon the selling of American goods in foreign countries, are from the pen of one who has in person investigated the question, and knows practically whereof he speaks. The suggestions to manufacturers and exporters found in to-day's issue—especially those relating to credits—are valuable. A great deal of money may possibly be saved by adhering to the simple rules he lays down.

Col. Albert A. Pope is still keeping up his good work in favor of improved public highways. A monograph upon the making of State roads in Massachusetts has just issued from his pen, and is replete with information of value to all who are interested in a like reform in other parts of the country. Arguing from the experience of the Old Bay State, the writer declares that: "Every State should make a beginning on road improvement. In thinly-settled regions of the country, where the people do not feel able to undertake much, they can do no better than to start the reform by constructing sections of single-track roads. No community can afford to neglect the common roadways."

The Coming Sportsmen's Exposition.

The first Sportsmen's Exposition, which will open in Madison Square Garden, New York, on Monday next, is an event of national importance, and marks an era in the history of the great interests there represented. The movement was successfully set on foot in this city some months ago, and all that was hoped for or promised by the projectors, so far as may lie in preparation, has been accomplished. The officers of the newly-formed association have worked with energy, and have shown admirable judgment as to the needs and purposes of an exhibition of this character; the dealers in and manufacturers of sporting goods, and sportsmen generally, have rallied to their support; and when the Garden is thrown open to the public, on Monday next, there will be much that is well worth seeing—that will repay more than one call, whether the visitor be a sportsman or not. Elsewhere in this issue will be found a full description of what may be there seen; and a perusal of the same will show that a great deal more is embraced in an exposition of this character, than guns, ammunition, canoes, etc. The artistic side of the sportsman's life is shown, as well as the material.

It will be a sad commentary upon the sportsmen of America and their friends, if there is not a generous attendance, in recognition of the high purpose held by the originators of this movement, and of the arduous labors by which they have brought this great object lesson of out-door life to the public view. We have, however, no fear upon that score.

Five Hundred Active Members.

On May 7, 1895, there were enough gentlemen elected to the New York Hardware Club, to reach the constitutional limit of five hundred resident members, and a waiting list containing several names has already made its appearance. It is only eleven months since the Club rooms were opened, and the organization had a being otherwise than that of mere patient waiting and faith in a material future. The occasion is certainly one for congratulation, by the individual members whose loyal enthusiasm has made this record possible; by the Club, as an organized force for good in many directions; and by the great trade of which it is a worthy exponent. It was long since an admitted fact that the Club, in the mere nature of things, must be a success; but even the most sanguine hardly looked for such abundant fruits in so brief a time. We have already called attention to the early retirement of nearly one-half of the bonds issued a year ago, and have shown that financially the organization stands upon a rock. It is no venture into prophecy, to say that the Club will remain as a permanent monument to the Hardware trade of New York. The needs that brought it into being, will keep it alive; the good it will do, will widen and increase with age and opportunity.

Mr. Haines on American Hardware in Europe.—II.

EDITOR HARDWARE: It is unnecessary for me to state that while we were, and still are, a large agricultural country, and that agriculture is perhaps the leading industry in these United States, it is a fact that the manufacturing and industrial pursuits have in the last quarter of a century taken such a leap ahead, that we naturally must seek a market throughout the world, even if it does bring us in competition with the industries and manufacturing enterprises that were full grown and controlled the market even before we began, twenty-five years ago.

Our manufacturers in the main considered the foreign field as a mere "dumping ground" for surplus products, and the exporting of goods was, by many manufacturers, considered only as a convenience in this way; that is, hold up the prices at home, and cut the life out of price abroad, this exports goods and gets rid of stock that could not be marketed here at home. This has now, I am glad to say, all changed and the leading manufacturers, totally regardless of tariff, are imbued with the idea that we, of this great "Yankee Nation" can manufacture "stuff" in competition with any other manufacturer, live he where he may.

Take a steamer and cross over in it to some foreign country, it matters little where one goes; he will find American manufacturers and other representatives going abroad seeking a legitimate market for a legitimate product, at the same prices and conditions on which the goods are sold at home. Very many of these trips are experimental trips, or I might say educational trips, seeking to learn what is wanted, and what we have to compete with, both as regard quality and price; and if prices are found to be favorable, it is pretty sure the quality of the goods will prove to be also.

To the novice, or the manufacturer who has no export trade, but seeks to get it, I would say, send out your samples —if you cannot go yourself—judiciously, and send them just exactly as you propose to send the goods, providing orders follow. Do not be too anxious to get full value for these samples, because oftentimes in sending them into a new market, it will be found that they are not just exactly what is wanted, but by making some slight changes our goods can be shipped to the end of the world, so that if the samples are disposed of at half price it will prove a good investment; and if the small loss entailed is charged to advertising account the probabilities are that it will prove as advantageous to the manufacturer, as all his ads in your most estimable paper.

A thing to be avoided in exporting goods of any character is that of shipping indiscriminately to people unknown, who simply have a fine letter-head, and can, and do, promise very large returns in the pay of orders, *providing prices* and *goods prove satisfactory*. Many and many a dollar has been lost, simply by over-anxiety to secure foreign trade.

All reputable merchants who wish to purchase American goods, are perfectly willing to, and expect to, establish bankers' credit on this side of the water for the payment of their bills, and unless the buyer is willing to do this, my advice to the manufacturer would be, never make the first shipment. I could tell you of more than one lot of goods that I have stopped by cable from being delivered, and when the cash was demanded as against bill of lading, the would-be-buyer has proven to be a myth. There are a large number of concerns in many cities throughout the whole world who get a fine living out of American manufacturers by ordering goods in some such way as above. Another point I would like to make is this: A manufacturer who desires an export business should not expect to "jump into it," so to speak, because the reputable buyer does not move rapidly, does not change certainly and entirely, simply because he is asked to do so, but the superiority of American goods, generally speaking, will work their way if the above conditions are complied with, and I look forward before the year 1900 comes, to see this country having a much larger export trade in her manufacturing industries than she has to-day on the imports of the old world industries.

If it were not that I might be accused of trenching into the political domain, I would like to say something about our consuls. I will merely mention the fact, which is greatly to be regretted, that our consuls seem to be generally selected in payment for some political service rendered to the party in power for the time-being. The export of American goods could be much more rapidly increased if our consuls were business men, or men who understood the character of the goods manufactured in the districts to which they are accredited, or if he comprehended the character of the goods that might be brought in from this country, in other words, our consul at Sheffield should be a man who is familiar with the character of the goods made, bought and sold in the Sheffield district, and the same is true of Lyons and Vienna. In fact it is true everywhere. Very often the American manufacturer or his representative may call at the United States Consulate, and being a total stranger, he seeks information, which he is presumptuous enough to suppose he will find in the consul's office, and to his great surprise he finds oft times the consul does not know as much as he does, which is next to nothing. This a very large and important subject.

Yours very truly,

Indianapolis, April 30, 1895. S. A. HAINES.

Elevated Alleviations.

The trade journal HARDWARE urges the development of the elevated roads to their full capacity for usefulness. It says very truly that it will be several years before the underground system can be completed, and argues that "with third-track express service and ferry connections the present elevated system could be of vastly greater usefulness to the public than at present, and by the time the underground road is constructed there would be traffic enough to tax all our transit facilities to their utmost."

There is force in all this, and the construction of a spur from the Sixth Avenue line at Chambers Street to the New Jersey ferries would be in the line of the proposed development. So, too, are the new express trains on both the Sixth and the Ninth Avenue lines. The people of New York will gladly consent to any extensions of the elevated roads that will not interfere with the construction and successful operation of a real rapid transit system such as the voters have approved. They object to anything that will prevent their getting "to Harlem in fifteen minutes," instead of forty or sixty minutes as now. We even think that public sentiment would now approve the building of the additional track asked for in Battery Park some time ago, to avoid the delay in reversing at that terminal. The great increase in travel due to the growth of the west side and of Harlem renders quicker service a public necessity.—*New York World.*

Out of 530 tin plate mills in South Wales about one-half are now idle, about 90 having been closed at the commencement of the present month. The chief cause of the depression is the largely increased production of tin-plates in the United States, where the manufacture has been greatly stimulated by the exceptionally low price of steel billets.—*Hardwareman, England.*

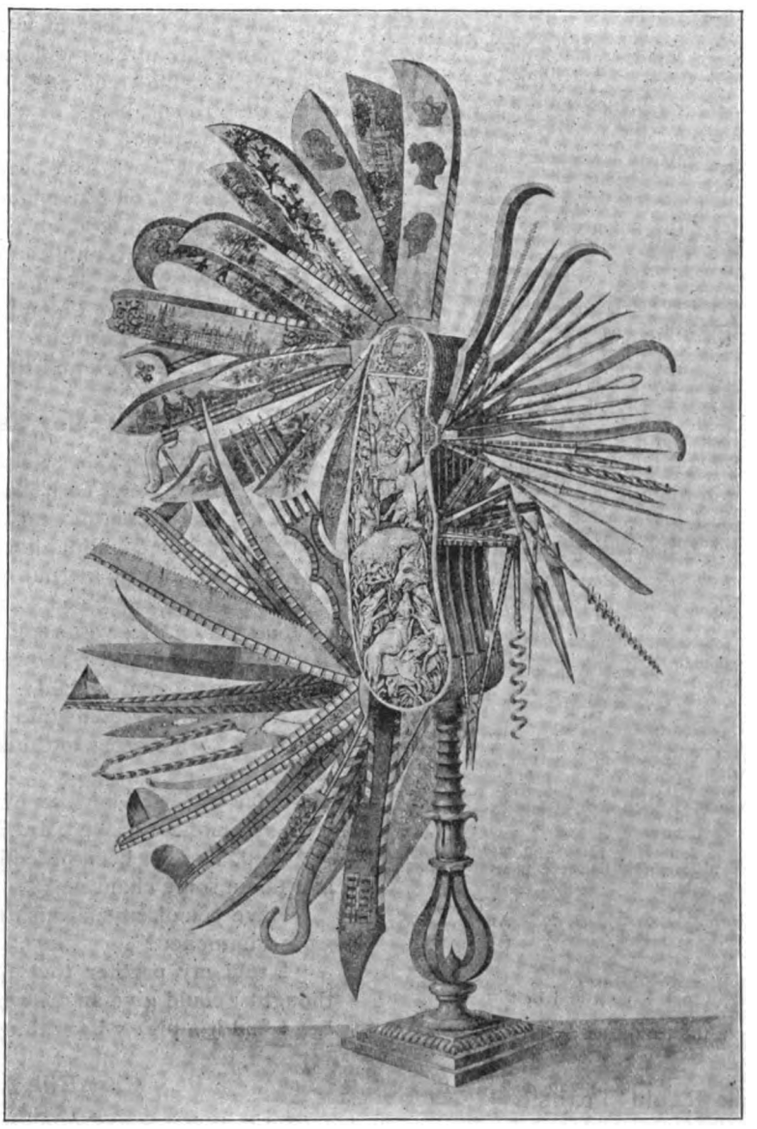
One of the household novelties in England is a natty little pepper mill for table use, shaped as a churn. It is nickel-plated, and prettily finished, and many buy it merely for ornamental purposes.

The West End Hardware Co., of Duluth, have incorporated, with a capital stock of $10,000.

Digitized by Google

The Hardware Buyer.

The Man in the Corner of the W. Bingham Co.'s house, Cleveland, discusses the Hardware Buyer in these words:



With many of the details of the jobber's establishment you are doubtless familiar, but there is one part of the business with which you seldom it ever come in contact—the buying. It is this which determines the standing of the house among its competitors, for upon the ability of the buyers to select the right goods and to buy them at the bottom prices depends the success of the men on the road. There is no one who has the interests of the Hardware trade more at heart, or does more to even up inequalities and harmonize conflicting interests than the jobber's buyer. The manufacturer who sells inferior goods or who asks an exorbitant price has no love for him; the manufacturer's salesmen seek to cover their mistakes and excuse disobedience to orders by calling him a liar; the crank with a useless invention to market thinks him a cumberer of the ground, and his house's salesmen are prone to criticise him, but he pursues the even tenor of his way, and by his shrewdness, far-sightedness and long-headedness puts many an extra dollar in your pocket. With his greater experience and broader outlook he protects you against the flood of poor goods made to sell, and by keeping in close touch with manufacturers and watching the tendency of trade, knows very nearly the commercial value of a thing as soon as presented.

His position in the trade is peculiar and requires peculiar qualifications. The qualities that make a good salesman and those that make a good buyer are as different as chalk is from cheese; he is as analytical, cold-blooded and conservative as the salesman is positive and enthusiastic; investigating and weighing everything, taking a short cut through specious argument and flowery speeches to test goods by his own standards and trying to see things through your eyes. A personal friend with a sample is as a stranger and an alien in the same place. In a general way the buyer knows the process and cost of manufacture of the principal lines and the extent to which variations in the metal market affect the cost, and with this information he is enabled to test the statements of salesmen. In fact, it is no uncommon thing for him to know more about the goods than the poorly posted man who essays to sell him.

The good buyer is always honest. It is a mistaken idea that the "sharp" man with a "For Sale" tag on his veracity and a propensity to violate confidences is the right one to do the buying, for his character is soon known and the measure he metes out is meted to him again. There is every artifice used to draw the buyer from the narrow path of rectitude and pervert his judgment, from the mellowing influence of a good story, insinuating flattery and delicate deference to his judgment to a cash bid for his orders, and it requires a close attention to facts and fignres to always keep in the right track.

A Marvel of the Cutler's Art.

Through the kind offices of Alfred Field & Co., No. 93 Chambers Street, New York, agents for Joseph Rodgers & Son, Sheffield, Eng., we are permitted to here illustrate and describe that wonderful Norfolk Sporting Knife, which is famous the world over, and is well described as "a marvel of the cutlers' art." This is undoubtedly the handsomest specimen in its line the world has ever seen. It was made by Joseph Rodgers & Sons, in the years 1849 and 1850, being finished in the year last named, and was first exhibited at the Great Exhibition at the Crystal Palace, London, in 1851. In it are eighty blades and articles, most of the blades being ornamented with hand etchings by the celebrated artist Fleming, of views of notable buildings and places in Great Britain and the United States of America, among which may be mentioned Windsor Castle, Arundel Castle, the seat of the Duke of Norfolk, Chatsworth House, the Palace of the Peak, the seat of the Duke of Devonshire, York City, and others in England; the Capitol and White House at Washington being representative of the United States.

All the articles and blades are different in character, and close up into the handle. They are made from the highest grade of crucible cast steel, the grinding being done by special workmen. The length of the handle is 15 inches, being of carved pearl, one side representing a boar hunt, and the other a stag hunt. The carving is by a Sheffield man, and is of great beauty and artistic merit. The bolsters are of solid gold, the value of the weight used of this metal being upwards of £7, or nearly $35. When open the knife stands three feet in height, and weighs seventy-six pounds, and it is needless to say that it has been awarded medals wherever exhibited. The estimated value is £1200 or close upon $6000.

The Milwaukee Glue Works in Port Washington, Wis., have been sold at auction to G. Kreisman, of Chicago, for $5000. The original cost of the works was $35,000, exclusive of the land, which was donated. The trouble has arisen from the works' offensive odors.

Discounts subject to change without notice.

SPECIAL NOTICE.

Changes have been made in the following Lists and Tables since the issue of our 1892 catalogue; the revisions now in force bear the dates here specified:

Page.	Item.	Date.
18	Iron Machine Screws	Aug. 1, 1894.
19	Brass Machine Screws	Aug. 1, 1894.
34	Iron Rivets in Bulk	Nov. 1, 1894.
35	Thousand Rivets	Nov. 1, 1894.
36	Block and Carriage Rivets, and Burrs	Nov. 1, 1894.
37	Hame, Coopers' and Truck Rivets, and Belt Rivets and Burrs	Nov. 1, 1894.

Printed Sheets, for insertion in the catalogue, will be furnished upon application.

New York Rapid Transit.

It will be several years at least before the proposed underground road can be completed, even if there are no insuperable obstacles experienced, and in the mean time why should not our present elevated roads be developed to their full usefulness?—HARDWARE.

Because the Rapid Transit Commission conclude that if they should permit New York to have any better rapid transit than it has now, they would to that extent diminish the chances of any one being willing to attempt the building of a tunnel. They are playing a colossal game of speculation for the benefit of the tunnel. They are, so to speak, bearing elevated stock as their last desperate chance of inducing capitalists to think of investing in tunnel stock. The tunnel is the chief end of their official existence, and they are going to see it through at any sacrifice of the public interest.

It is the queerest case of "The public be damned" conceivable.—*New York Sun.*

Hardware Club Waiting List.

The following gentlemen were unanimously elected members of the Hardware Club at a meeting of the board of governors, held on May 7th:

Philip T. Dodge, President Mergenthaler Linotype Co., Tribune Building.

D. T. Mallett, Shoe & Leather Bank Building.

Allen T. Nye, Standard Telephone Co., Postal Telegraph Building.

S. W. Bowne; Scott & Bowne, No. 409 Pearl Street.

Edward H. Wardwell, No. 253 Broadway.

Charles J. Healy, No. 121 Chambers Street.

William H. Cole, No. 95 Chambers Street.

Hermann Bielefeldt, No. 141 West Broadway.

Thurlow Weed Barnes, Postal Telegraph Building.

With the election of the above gentlemen, the five hundred limit for resident members has been reached; and three names are already billetted upon a waiting list in the Club rooms. This record, eleven months after the opening of the Club rooms, is one of which any organization or trade might well be proud.

At the New York Hardware Club some days since a pleasant and impromptu luncheon was given by Commodore George W. English in honor of United States Senator J. C. Pritchard, the first Republican Senator from North Carolina in twenty-two years. Among those present were Congressman Taylor of Ohio, Colonel Fred. D. Grant, President Williams of the Hardware Club, Job E. Hedges, W. F. Wakeman, C. P. Stork and Brace Hayden.

Mr. Henley as a Juryman.

William I. Henley, the well-known Hardwareman, No. 20 Warren Street, New York, has a prospect of serving the public for some time, having been drawn as a juror in the trial of Inspector McLaughlin. Mr. Henley frankly owned that he would like to get out of it if he could, but as he could not give a legal excuse he was compelled to take the eleventh seat. He was asked by Justice Barrett why he had hesitated so long in answering one of the questions put by the defense, and replied:

"Well, frankly, I will state that my business is in such a state that I was trying to think of an answer that would let me out."

"Have you been in court ever since Tuesday, when you were summoned?" asked Mr. Elkus.

"Well, I've not been here all the time. I've stolen away and taken some chances."

"Have you discussed this case with anybody since you were summoned?"

"I told my partner that I was summoned and that I thought I could give an answer that would get me out of it, but I find it a pretty hard thing to do."

Can Fill All Orders.

The National Saw Co., with headquarters in Newark, N. J., in view of the recent fire in their Cincinnati factory, make the following announcement:

To the Trade: The recent fire at our Cincinnati factory will not cause any delay in executing orders for line of saws, trowels, etc., as made at Cincinnati. We will fill all orders promptly if sent to the main office, Newark, N. J.

THE NATIONAL SAW CO.

The Joseph Dixon Crucible Co.'s calendar card for May suggests an American Graphite Pencil in the role of Queen of the May, and presents this pleasant line from Thomson: "They who are pleased themselves, must always please." How about the small boy who is never so happy as when tying a tea-kettle to a dog's tail? Does it please the dog?

The Pittsburgh Mineral Screen Co. have organized in Pittsburgh with a capital stock of $5000.

Digitized by Google

THE HONEST DOLLAR.---I.

[Samuel W. Allerton, of Chicago, who is too well known as a business man to need introduction, has placed upon record his views of the money question, which we are permitted to here present. They will be read with great interest, no matter what the views of the reader upon that great theme may be.]

EDITOR HARDWARE: I see a great nation of seventy million people, the richest nation on the globe, forced to ask a few money-changers to protect the national treasury. I see a private trade made with these money-changers to the effect that if they will try and protect the treasury, we will give them three-quarters of one per cent. on sixty-two millions of bonds. As President Cleveland intimates: "The premium for their confidence in the integrity of this great nation." I see forty-four millions of dollars drawn out of the treasury to hoard in the last sixty days by the money-changers in New York, the result being to embarrass the treasury and force them to issue more bonds. I see a profit of nine millions of dollars for these money-changers, made out of the government in this one transaction, for the industrious people to pay, and, as a citizen of the United States, I feel deeply humiliated, and ask myself: Has not the time come when we should investigate our financial system, discover its defects and remedy them, if possible?

I appreciate thoroughly both the importance of the topic and the fact that master minds in all ages have weighed the question carefully, but as I am fully impressed with the truth and practicability of my idea, I do not hesitate to publish it. I realize further that it will be difficult at first to accept my idea, because in suggesting something else in the place of gold and silver as a basis for our money system, I am running counter to a condition of things which we have been trained to believe is the only one for the purpose.

Gold is but an inanimate object; it is destitute of hope, charity, spirit of universal justice, or that element of higher manhood, true friendship, and always deserts a nation in its days of trouble. When this great nation was in trouble, in 1861, gold deserted us, and we had to appeal to the patriotism of American people who loved this Union more than they loved gold or silver. A wise man said paper money was a delusion; that in the days of the Revolution when men's hearts were filled with patriotism, the continental money we paid to our soldiers was of so little value that they stuffed their mattresses with it. This was a sin of omission of our forefathers in that they did not redeem this, their obligation to the defenders of the American liberty. Had the government issued five-year bonds for the redemption of this currency, this act would have made this currency good and we would always have had a national currency and would not be in debt, as we now are, five hundred billions to foreign nations.

WHAT IS MONEY?

Some commodity or article of universally acknowledged value has always been considered necessary as a basis of exchange among nations and for a monetary system at home, because the people lack confidence in the integrity of their government. History teaches us that from the commencement of civilization all nations have used a great variety of articles for the monetary system; notched wood was at one time used in England as the medium of exchange. So it is evident that nations make and have made many articles the medium of exchange; and such articles are made the medium, not by nature, but by law.

HISTORY OF MONEY.

In our early history we used codfish and pebbles; in after years gold and silver. Not having gold and silver enough to keep up with the growth of our country and its monetary system, we passed through years of great depression. We had all sorts of schemes—State banks, shinplasters, etc., and every so often the honest holder was robbed. Never until our national life was in danger—until men offered their lives by millions and the dead and wounded were brought back from the battle-field, did we have a national currency. The noblest attribute of manhood is true friendship; when the nation was in trouble, gold and silver were too high and mighty to associate with us and we had to appeal to the patriotism and manhood of those who believed that the nation was dearer to them than gold or silver.

When I first came to Chicago the money in circulation was Georgia money. George Smith furnished to a large degree the currency for this great Northwestern country. He bought Georgia bonds at a discount. Georgia had a State law allowing banks to issue three dollars currency for one dollar in bonds. Smith got the Georgia currency, brought it here and loaned it to our people at ten and fifteen per cent. Ever so often a rumor was started that the bank was in trouble. The currency was bought up in the country towns from the honest holder at a discount. Smith made $15,000,000 out of the Northwestern country. Is not this a sad commentary on the statesmen of that day?

Bimetallism is a delusion as a money basis. You never can keep two metals at par with each other. The overproduction of one reduces its value and increases the other. We must have one or the other for a standard. Even if all the nations of the globe should declare for bimetallism it would be a defective basis. England will not so declare, because she will lose her power over the United States. If all the nations of the earth did, you would still have the periodical panic which always depresses the industries. When I first came to Illinois I bought cattle and grazed them on the prairies and fed them on corn in the winter. The first year I did well; the next year I bought my cattle well, but the panic came—down went the price of cattle and I lost all. Not my fault, for my business was honest, but our country was on a false financial basis and the industries all had to suffer. Well do I remember the young men who were cleaned out of all their hard-earned savings in that panic.

THE GOLD BASIS.

With $350,000,000 of gold (as it is evident a large amount of our gold has been used in the arts and made into jewelry), and that is about the amount of gold now held in the United States, the gold basis would mean great depression, hard times, idle labor, and after the people had been ground down for a few years, a new party would come into power for inflation. To now go on a gold basis means a reduction of values one-half, hard times for years, depression in the value of labor and of all commodities. No doubt after the people have had three years of great depression and have been ground down, they would raise up a new party that would demand expansion, and in the end another great financial panic; then the gold men would say: "I told you so."

The New York *Tribune* says our products and property have depreciated $9,000,000,000 in the last two years. As the Chicago *Tribune* says, a fearful price to pay for Democratic misrule. This is not the Democratic party of free-traders, theorists, cranks, anarchists, labor-leaders, and every "ism" in the country. Such a party could not have a fixed policy on any of the great questions affecting our prosperity; but have not the New York *Tribune* and the

Digitized by Google

Chicago *Tribune* done their share to demoralize the industry of our country by demanding that all our property and labor should be measured by one standard, gold—limited at that to $350,000,000? We do not want to forget that when we reduce wages of labor, and labor is idle, that they not only lose in a money way, but morally, socially and intellectually. If there is any place on the face of the earth that has any more sorrow and misery than England, I have never seen it, with all their wealth in gold. When in England I rode on a stage that required a skilled driver. I asked what he got, and he replied, four shillings for fourteen hours' work—equal to one dollar in our money. England is all right for the few aristocrats, but the masses live in sorrow, misery and degradation.

GOLD ACQUIRED BY OTHER NATIONS—HOW?

How did England get her gold? She fitted out fast, stanch sailing-vessels, made stock companies, and it is said that Queen Elizabeth was a stockholder in this piracy to rob the Spaniards of the gold they had found in a new country.

How did France get her gold? Bonaparte robbed weaker nations by war, and when France commenced internal improvements, Germany drilled her young men in a great army and caught France in her weakness, and commenced war on her under a pretext, and made her pay many millions in gold for immunity.

THE SILVER BASIS.

Your will now hear some of our most thoughtful men say that with good men at the head of a party for free silver they will sweep the country in 1896. This would mean great inflation. Bankruptcy would be sure to follow. Again, then, we will return to a gold basis; so with a gold or silver basis we would go on as in the past, contracting and expanding—losing faith in each other. Panics every so often, the country demoralized, labor idle and poverty staring us in the face, while we would have everything here necessary for home comfort. This has been our history and it will continue to be so long as we base our confidence on gold, which is a false friend in time of need. The silver men would inflate, the gold would contract.

Should Congress pass a free-silver law, under our present system of finances it would not benefit us, but would only embarrass the government if it tried to keep silver on a parity with gold; we should have to issue a much larger amount of bonds to sell for gold and add more to our national debt. With an unlimited coinage of silver the people would still be in an uncertain condition, and in the end would be on a silver basis. Our government would have to repudiate or suspend gold payments. Our government must maintain its credit and faithfully perform all its obligations. It is strange silver men cannot see this condition. Of course free silver would make it easier for the man in debt, but he should have no more right to shrink from paying his debts than a single-standard gold man has to depreciate his property one-half and make him pay double. This is the evil of gold and silver; it will always have a changeable value.

SILVER BETTER THAN GOLD.

The silver men have shown a great deal more patriotism and devotion to the prosperity of the American people than the gold bugs who are working for a few money kings in England and New York, and it is my conviction that free silver is a lesser evil than the one-standard gold. But when we look back at the legislation that we have had in this country in the last fifteen years to depreciate the value of silver, it does not seem consistent with common sense that we can have free silver unless we put a dollar's worth of silver in a dollar, and that would be cumbersome and unwieldy in its use.

RESULTS OF PRESENT CONDITION.

We elected President Cleveland on a revenue tariff; we reduced the revenue $80,000,000; we repealed the Sherman act and reduced the currency $48,000,000; every man commenced to hedge; our land was filled with idle labor; the value of labor was reduced 25 per cent. New enterprises stopped and labor was idle, so they had no means to buy.

The hard-earned savings of thrifty men that have been invested for their families in railroad stocks and bonds have been by the repeal of the Sherman act about wiped out; thousands of families are now in distress from this depression through no fault of their own.

DIVERSITY OF OPINION AS TO CAUSES OF PRESENT TROUBLE.

We all acknowledge that we have had many years of the greatest prosperity known to man; the highest prices for labor and the lowest prices for the necessaries of life—because we have had confidence in the currency of our country. Now, why should we, the richest nation on the globe, find ourselves in our present condition? Silver men say because we repealed the Sherman act; Republicans say because we elected Democrats with no financial policy; Democrats say it was time to have a collapse. With good crops, no pestilence, no calamities, must not this depression be our own doing? We now have one class advocating the gold basis, another gold and silver, another state banks and bob-tail money.

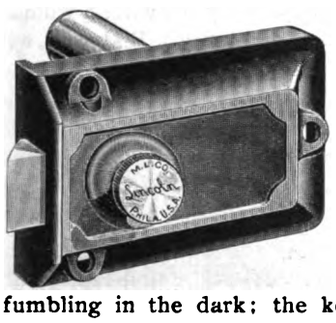
We read the resolutions passed by our wise statesmen at their conventions, all parties declaring for bimetallism, the use of gold and silver for a monetary system. The present administration believed the Sherman act should be repealed; that we should stop buying silver bullion, stop issuing silver certificates, and that confidence would be restored. So by holding out to the Southern wing of the Democratic party the inducement that if the Sherman act was repealed they would have state banks and bob-tail money, with the gold men President Cleveland succeeded in repealing the Sherman act and stopped the issue of silver certificates, but offered nothing to supply their places. New York claimed that with the Sherman act repealed confidence would be restored and foreign nations would buy our securities; in fact, allowing our people to get more in debt to foreign nations. The result has been that New York has lost her gold and her securities have depreciated many millions.

WHY WE HAVE KEPT GOING.

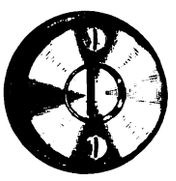
To the thoughtful man it has been a matter of study how our government has, for the last ten years, been able to keep silver on a parity with gold and to redeem all our paper circulation in gold with our present system of finances. The reason we have been able to do it is that the foreigner has been buying breweries, gold mines, railroad stocks and bonds; with a high protective tariff our laborer has been well employed; business has been active and the investment of foreigners has paid, and in this way balance of trade has been in our favor, and gold did not leave us, and no one wanted gold. Railroads made bonds payable in gold without a thought. All this time we have been getting in debt abroad—about $300,000,000, that our people have spent in traveling and buying bric-a-brac—but with the change of our tariff, the granger laws, the inter-state commerce law, labor strikes, agitation of silver, our country kept in an uncertain state, new enterprises stopped, railroads became demoralized, foreign capital stopped coming, and our securities depreciated, so that with the folly of our government trying to furnish gold to the importer, to the traveler abroad, to pay interest on railroads and all other individual enterprises, $100,000,000 of gold in the treasury has been a bagatelle. No doubt, had we maintained a higher tariff, kept our people at work, kept business active, so that railroads and other securities the foreigners had invested in would have paid dividends, they may have continued to invest, and we would have been able to get more in debt to foreign nations; but with the present system

Digitized by Google

of finances it would only put the day of reckoning farther off.



THE ONLY POSSIBLE RELIEF UNDER PRESENT SYSTEM.



The only possible relief we can have under our present finance policy is for foreigners to buy our railroad bonds or securities, which they will not do, but do as they have ever since the repeal of the Sherman act, sell currency bonds, West Shore currency bonds guaranteed by the New York Central Railroad, and other currency bonds, and ship the gold home, knowing the government must, under the present finance policy, continue to issue bonds to sell for gold, and they will buy each new issue cheaper. We produce $40,000,000 of gold per year. To pay the balance against the government caused by the reduction of the tariff, interest on our government bonds and all other securities held abroad, the money the rich spend in traveling abroad, it will take $300,000,000 of gold; so the government must issue $260,000,000 of gold bonds per year. And if foreigners continue to send back our securities the government will have to increase the amount in the sale of the bonds. The government will soon have a debt compared with which the debt of the Rebellion will be insignificant.

[In the next issue, Mr. Allerton will discuss the remedy which in his view should be applied.—Ed. HARDWARE.]

The Lincoln Lock.

The Miller Lock Co., Philadelphia, have lately produced a new four-inch Latch Lock, or "Night Latch," the "Lincoln," of which we have secured a sample shown in the below reduced cuts. It is described as possessing an unusual number of points of excellence and superiority, viz: Reversible bolt, thus suiting all doors that open inward, as well as those that open outward; the bolt is of bronze metal; is adjustable to all doors from ⅞ to to 2 inches thick; another size fits doors from 1⅞ to 3 inches thick; each has three keys; these are of plated steel, strong and handsome; every latch has for its exposure a most beautiful bronze metal escutcheon; the finish throughout ranks the Lock as strictly first-class; the springs are German silver, and will not rust in any climate; the keys are reversible, and require

no fumbling in the dark; the keys will not interchange, even in large sets, unless made alike to order; only a ¼-inch hole is to be cut in the door; the "strike" is new and described as "the best yet devised;" one-eighth turn of the wrist is all that is needed to open the Latch; the price, $1.00 per lock, places it within reach of all. The manufacturers of the above Latch publish an illustrated catalogue, that every dealer should have on file for ready reference.

The directors of the Bellaire, Ohio, Nail Works have held a meeting at which the matter of additional improvements at that plant was discussed and plans made to begin the work on some of them. This company made during the past year nearly $300,000 of improvements, and it is contemplated to make about that much more this year.

The Charles Hardware Co., New York, incorporated. Capital stock, $1000.

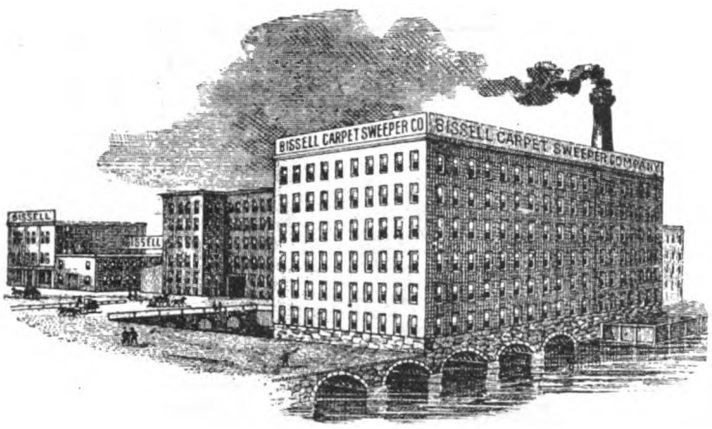
Elliott Burris, of the Humber Co.

Elliott Burris, managing director of Humber & Co., America, Ltd., is a man of the age, one of those to whom the world pays homage because of sterling worth. It is said that a man is as old as he feels. Mr. Burris must evidently be young, for he has a fund of spirits and vim which is inexhaustible, yet, he was a famous athlete twenty-five years ago. From his looks he might be taken for a man of thirty, but he has two charming daughters with years

enough to their credit to make them leaders in their social circle, and a boy old enough to "scorch" with the best of them. Mr. Burris is a traveler in many climes, a student of human nature, and a scholar among books. He possesses a fund of information and anecdote, which makes him a charming conversationalist and a jovial companion, and his knowledge of men and things fits him for his responsible duties most thoroughly. He has a wide acquaintance among the older as well as the more recent dwellers in Gotham, having lived and labored here for many years. He is a member of the New York Athletic Club, the Riders & Drivers' Club, and many kindred organizations, is an accomplished horseman, a finished cyclist, a polished gentleman, a loyal friend and an honest enemy. The Humber Co. are to be congratulated upon his appointment, as manager of the American office and factory.

John W. Davis & Co., contractors and builders and real estate brokers at Roslyn Highlands, Long Island, N. Y., have opened a Hardware store in Mineola, and propose carrying a general assortment of builders' Hardware, agricultural implements, bicycles, etc. This business will be carried on under the firm name, in connection with their regular business, at the place above given. All business communications should be sent them at Mineola.

Those who are concerned to study the subject have probably been struck with the fact that the greater proportion of labor-saving machinery and other machines adapted for special purposes are of American invention. This would seem, in fact, to be a field in which the Englishman finds himself hopelessly "left."—*The Hardware Trade Journal, London, Eng.*



The Buckeye Churn Co., Sidney, Ohio, are having a very profitable season with their Buckeye Churn, which is built upon the concussion principle, which is described as "the only true one for making granular butter." Prices and description will be sent on application.

The Van Wagoner & Williams Hardware Co., Cleveland and New York, are making a very successful specialty of the American Trackless Sliding-door Hanger.

A Big Carpet Sweeper Plant.

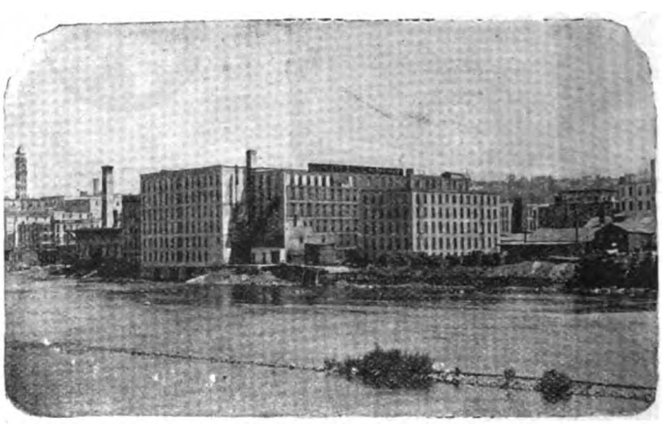
We take pleasure in herewith giving a very good view of the largest carpet sweeper factory in the world, the immense plant of the Bissell Carpet Sweeper Co., located at Grand Rapids, Mich. Almost every year shows new evidences of growth at these factories, and the hard times seem to have made themselves felt but little on the growth of this plant. The year 1893, when so many factories were

compelled to close their doors, the entire Bissell factories were forced to their fullest capacity to execute their orders, and that year saw the completion of factory No. 8, a large six-story brick structure, and the largest of the Bissell group. Last year saw the establishment of a branch factory at Toronto, Canada, to provide for the growing demand for Bissell Sweepers in that country, and this spring finds the foundation plates on the ground and partly in place for the erection of another large factory building in the near future.

The carpet sweeper and this company are forcible illustrations of what can be accomplished by making a specialty of some small article, and giving exclusive attention to developing a demand for it, and extending its sale by correct methods to every quarter of the globe. The carpet sweeper is a little thing to the outsider, but once within the walls of these factories, it is simply astonishing to the visitor, who for the first time sees the special machines and large buildings, and the care that is devoted exclusively to the production of carpet sweepers and carpet sweepers only.

The carpet sweeper as an article of use prior to 1876, was little known, but in that year Melville R. Bissell, then a young business man, saw that there was a future for a carpet sweeper of the right quality, and invented the first Bissell sweeper and centered all his energy in making it the success it has proved to be. The rapid growth of the business soon demanded good men to further the best interests of its various departments, and its financial interests were at an early date, entrusted to Maurice Shanahan, its present treasurer, in whose hands the institution holds a credit enjoyed but by few firms in the country. C. B. Judd, its present manager, became vice-president and secretary of the company when it was organized in 1882, and responding quickly to his hard and systematic work, the business rapidly increased to its present size.

"Look after the little things," seems to be the motto in every department of this establishment. Everything is system, for with branch offices and agencies in almost every foreign civilized country, it requires a perfect system to keep the details well in hand, yet, everything is drawn so completely towards one center, that manager Chas. B. Judd can sit at his desk in his little private office, and on a moment's notice, satisfy himself as to the condition of the sweeper business in any part of the globe.



This company claim to have manufactured and sold over eighty-five per cent. of all the carpet sweepers used in the entire world; a remarkable claim, the truth of which can be easily understood after a visit to the systematic office of this company at Grand Rapids.

As the evolution of the carpet sweeper itself has had much to do with its increased sale, the mechanical department of the business was placed in charge of Walter J. Drew in whose hands the appearance of the sweeper was soon transformed and the perfect sweepers as seen to-day, are the result of his designs and invention. Almost a hundred patents protect the designs and mechanisms used by the company, and they cover the carpet sweeper field so completely that it is a difficult matter to produce a sweeper that does not infringe one or more of these various patents, which fact explains the various law suits in which this company have been engaged. There is, however, a noticeable fact about these suits, and it is that the Bissell Co. are always suing to protect their own interests and are never sued for infringing the rights of others.

During the past ten years, the company's foreign business has had a rapid and solid growth under the able management of T. W. Williams, manager of the company's eastern and export office located at No. 103 Chambers Street, New York. This department has resulted in the establishment at No. 47 Wilson Street, London, England, of a warehouse and branch office, under the management of James L. Pollitt, a native Englishman whose originality and methods have made the Bissell sweeper a household article in England almost equal to the reputation it enjoys in the United States.

In the spring of 1884, the company met a severe loss by fire which consumed the entire plant, but from this it soon recovered. In the spring of 1888, just four years later, the company suffered a severer loss in the death of its president and founder Melville R. Bissell. He was still a young man in years when he died, but in the short time that he devoted to his business, gave it an imprint of his individuality that has remained with it ever since. Quick to perceive and quick to act, and generous almost to a fault, he soon commanded for his business and himself, the respect and admiration of all with whom he came in contact; and this great cluster of factories to-day, with a business that encircles the globe, is a monument of which any man might well be proud and one that few men have been able to erect.

Ever since his death, the office of president of the company has been fittingly occupied by his wife, a woman of excellent and unusual business ability. Endowed with a

charitable disposition, much of Mrs. Bissell's time and means has been devoted to the interests of benevolent institutions and works of charity with which her husband and herself have always been identified.

It is announced by telegraph from the West that the Denver Hardware Mfg. Co., Denver, Col., have made an assignment. The company were incorporated in February, 1892, with a capital stock of $200,000, and on March 27, 1895, claimed assets, $326,000; liabilities, $38,000.

A Davenport Hardware House.

The *Tri-City Commercial Gazette*, of Davenport, Rock Island and Moline, in its first issue contains the following deserved tribute to a well-known Hardware house:

The importance of Davenport as a great purchasing point is forcibly illustrated by the flourishing existence here of such an immense establishment as that of the Sickels, Preston & Nutting Co., of which Mr. J. R. Nutting is the treasurer and general manager. The business is a very old one, having been founded in 1850 by the firm of T. Close & Co. They early achieved an enviable reputation for the superiority of their product, and laid broad and deep the foundation of what has since become such a prominent mercantile factor. They were succeeded in the early '50's by Robert Sickels, of the firm of Close & Co. (Mr. Sickels has been connected with the house since that period—both as senior partner and president—which position he now occupies. Mr. Sickels is also senior member and manager of the New York firm). In 1860 the firm became Sickels & Preston. In 1890 the present company was incorporated under the State laws of Iowa, with the following officers: Robert Sickels, president; A. J. Preston, vice-president; J. R. Nutting, treasurer and general manager; and G. H. Nutting, secretary. They have been actively identified with this branch of trade since their first entry into business life, and have every possible qualification at command, including ample resources and perfected facilities for securing the finest goods manufactured in every section of the globe. Mr. J. R. Nutting, the general manager of the house, and upon whom devolves the sole management of the business, is one of the best posted men in the wholesale Hardware trade. A short sketch of his career would not be out of place in this review—as it demonstrates what energy, ability and perseverance, coupled with honorable business methods, can accomplish. Mr. Nutting came to Davenport with his parents in 1854. A few years later, when still a youngster, he went to live with his uncle at Troy, N. Y. It was in August, 1864, that he entered into the employ of the firm of Sickels & Preston, in the capacity of errand boy. He is what we may truly term a self-made man, having begun at the bottom, and by close application to business, coupled with practical knowledge, energy and perseverance, has gained for him the prominent position he holds to-day—one of the leading wholesale Hardware merchants in the West. The company's warehouse and office are most centrally located at Nos. 119 and 121 West Third Street, also occupying three stores, for warehouse purposes, in the Bazaar Block. Their building is an imposing brick structure, 44x150 feet in dimensions, and five stories, with basement, in height. Here a thorough system of organization is enforced; the stock is arranged conveniently in departments, and covers everything the trade needs or uses. Without attempting to describe this truly representative stock, it may be stated that merchants can nowhere find such a fine stock of general Hardware and cutlery to select from. They are extensive dealers in Hardware and cutlery, rope, cordage and binder twine; tinner's tools and supplies; stamped ware and tin plate; sheet iron, belting and mill supplies, paints, and scores of other articles directly salable to the best class of Hardware, paint and tin manufacturing trade. The firm's commercial relations are by no means confined to the Western States, but with truth may be said to extend all over the country. The well-known firm of Sickels, Sweet & Lyon, of New York City, is closely identified with this house. The company's eastern office is at No. 35 Barclay Street, and No. 45 Park Place, New York City. The company employs in its wholesale department and offices forty clerks, salesmen and accountants, and it has a staff of eight traveling salesmen on the road, covering every section of Iowa, western Illinois, northern Missouri, and southern Minnesota. Davenport's supremacy in commerce is materially aided by the existence of such a great house as this, and the Sickels, Preston & Nutting Co. are to be congratulated upon the large measure of success attending their able and honorably directed efforts.

An Automatic Refrigerator.

The Columbia Refrigerator Co., Northville, Mich., have prepared a catalogue illustrating and describing their Automatic Refrigerator, which they will be pleased to send to all who are interested. In stating the advantages of this article, an illustration of which is here shown, the makers refer to it as having a perfect circulation; a large condensing and purifying capacity; "has no flues to cause it to smell bad; the trap is inside where it cannot be misplaced or lost; the drip pipe may be cleaned without disturbing anything in either chamber, and is entirely out of the way; it has nine walls to protect the ice and to maintain a uniform temperature in the cooling chamber; it has woven wire

provision shelves that are superior; it has superior Hardware; it is more capacious and convenient; flavors of foods will not mix; last but not least, it's different, and will bring new customers and new trade. We want the leading dealers to handle our goods and but one dealer in a place. The goods are made of ash, and well finished."

Send Him Catalogues, E c.

Sayre & Shafer, Montrose, Pa., makers of furnaces and steam generators, and one of the oldest houses in that line, dissolved on March 22nd. Mr. Shafer retires, and has gone into the Hardware business, opening a store on one of the leading business streets of Montrose, where he will carry a large line of shelf Hardware, cutlery, carpenters' tools, tinware, woodenware, and novelties. He has been in New York, laying in a stock, and will open on May 1st. He will be glad to receive catalogues, lists, etc., from manufacturers and jobbers in the above lines. Mr. Shafer is an experienced man of business, having formerly been a resident of Scranton. where he opened the Third National Bank, from which he was compelled to retire because of ill health. He is himself again, and proposes to push his new business with enterprise, and along lines of modern business methods.

Spring may now be declared officially here. The Pike Mfg. Co., Pike's Station, N. H., are again sending their friends sample jars of that famous New Hampshire maple syrup, which is becoming as well known all over the country as are Pike's Whetstones. These annual gifts leave a sweet taste in the mouth of the trade all through the year. HARDWARE acknowledges its share as usual.

The bicycle trade in England for 1895 will probably be the best on record.

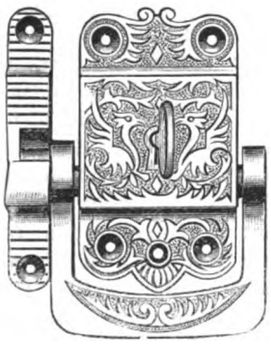
NO CHARGE WHATEVER is made, direct or indirect, as our interest lies in showing the readers of "HARDWARE" where the LIVE manufacturers and wholesalers are, and what they are doing

When your NOVELTY or SPECIALTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

The Hardwaremen everywhere read this department; it is to your interest to make prompt use of it.

"Blue Blood" Packing.



The Ireson Rubber Co., No. 97 High Street, Boston, Mass., are introducing the Blue Blood Packing, which they claim possesses many superior qualities. It is backed

with Para rubber which is believed to make it a most effective spring compound. It is stated that because the compounds used in its manufacture are mineral the packing is not affected by heat. "It contains two ingredients that prevent it from hardening, and retards the vulcanization of the rubber, thus providing against the possibility of the packing being overcured. The packing is pulverized like paper, which gives it strength and assures an airtight joint." The makers further claim that this packing is not affected by ammonia, alkalies, acids, hot or cold liquors or steam. It is made in rolls and sheets, 1-32, 1-16, 3-32, ⅛, 3-16, ¼, ⅜, ½ inch. List per pound, 80 cents. Discount to the trade.

Conroy Refrigerator Door Fastener.

P. J. Conroy & Co., Philadelphia, Pa., are putting on the market an automatic Refrigerator Door Fastener. The fastener is made in brass, nickel-plated and copper finish, in three sizes. While the construction is the same as the plain style introduced by them last season, the one illustrated is designed more for refrigerators and buffets where an ornamental fastening is required.

The Perfect and Adjustable Support.

The Lewis Mfg. Co., Utica, N. Y., are introducing two new Tomato Vine Supports. Fig. 1 shows the Perfect support. Figs. 2 and 3 show the Adjustable, with the hoop in different positions. These Supports are both made of No. 7 galvanized wire, and are provided with shoulders 4 inches from the end, which prevents them sinking in the ground. They are described as being strongly constructed and of excellent finish. The Perfect Support is provided with an extra hoop which gives it a very firm position and successfully supports all parts of the plant. The Adjustable Support is designed so that the hoop can be raised or lowered as best suits the size of the plant. The manufacturers explain that tomato vines will always produce earlier and

FIG. 1.

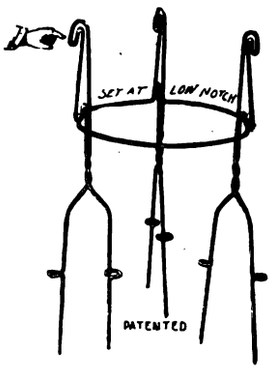


FIG. 2.

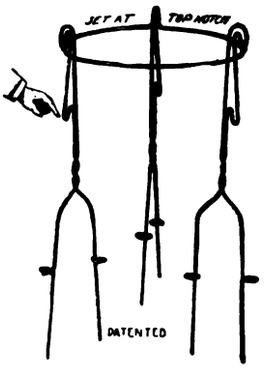

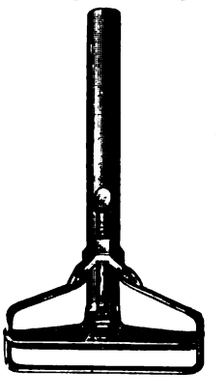

FIG. 3.

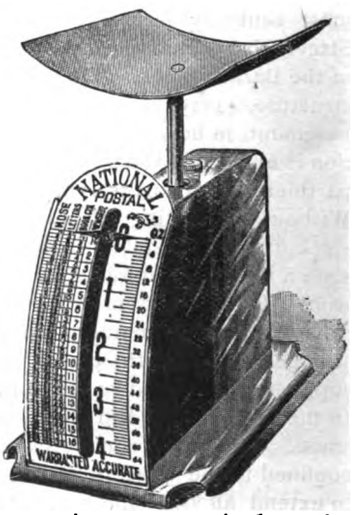
more when they are kept off the ground as the moisture in the earth will cause the fruit to rot. It is further stated that these Supports are superior to the wooden ones in use, as they do not rot or break and are not so bulky. The Support can also be used for roses and peonies.

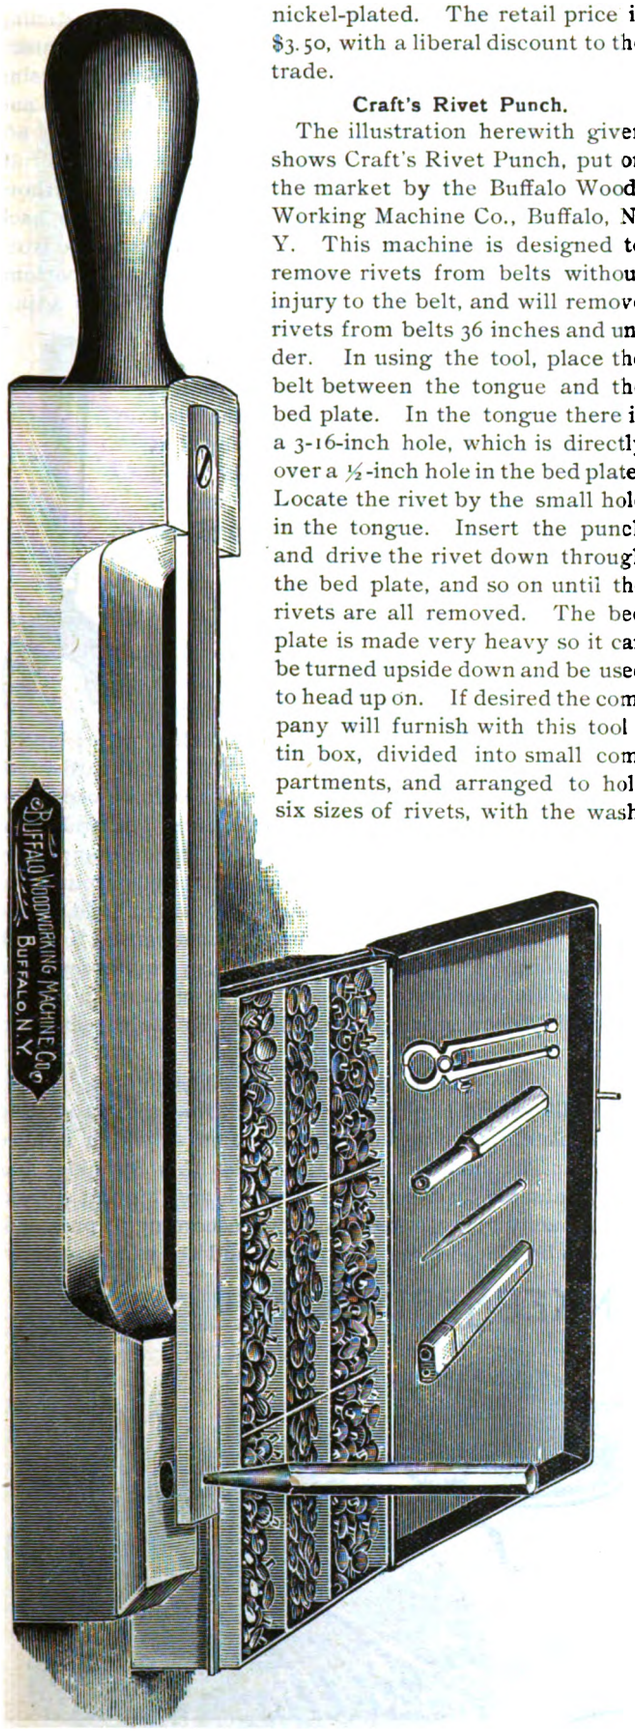


The Arcade Mop Holder.

The Arcade Mfg. Co., Freeport, Ill., are offering the trade the Arcade Mop Holder as shown in the illustration. The Holder is made with a ratchet lever fastened to the handle. By a slight pressure on the end of the lever, the yoke is readily pushed open so the cloth or mop may be easily placed in position. Then by placing the mop on the floor and pressing down on the handle, the mop is fastened in securely, and can be readily released by pressing end of the lever. The Holder is thus durable and easily adjusted. They are fitted up with stained hard wood handles.

National Postal Scale.

The Gilfillan Scale & Hardware Co., No. 725 Old Colony Building, Chicago, are manufacturing the National Postal Scale herewith illustrated. This scale is arranged with a very ingeniously contrived indicator card, which tells everything desired connected with postage on 1 ounce to 4 pounds to any part of the United States or Canada. On the right is found the exact weight of the package in pounds or ounces. On the left is found the cost of postage in cents required on the package weighed, one column being arranged for merchandise, another for letters, a third for books or circulars, and a fourth for newspapers. The indicator plate is in front and is easily read. This plate is removable so that a revised one can be inserted if the postage rates are changed. It is regulated by an adjustable screw on top, so that it can be corrected if necessary, but it is warranted absolutely accurate. The scale is extremely



Digitized by Google

sensitive, reflecting the smallest variation in weight. It is finished in two styles, one in steel, japanned and striped and nickel trimmed, and the other in pressed brass, highly nickel-plated. The retail price is $3.50, with a liberal discount to the trade.

Craft's Rivet Punch.

The illustration herewith given shows Craft's Rivet Punch, put on the market by the Buffalo Wood-Working Machine Co., Buffalo, N. Y. This machine is designed to remove rivets from belts without injury to the belt, and will remove rivets from belts 36 inches and under. In using the tool, place the belt between the tongue and the bed plate. In the tongue there is a 3-16-inch hole, which is directly over a ½-inch hole in the bed plate. Locate the rivet by the small hole in the tongue. Insert the punch and drive the rivet down through the bed plate, and so on until the rivets are all removed. The bed plate is made very heavy so it can be turned upside down and be used to head up on. If desired the company will furnish with this tool a tin box, divided into small compartments, and arranged to hold six sizes of rivets, with the washers separate, and will also furnish belt punch, heading tool, nippers for cutting off the rivets, leather plane and scrapers for making the splices, and cement for joining the splices.

Iron Platform for Wells and Cisterns.

The Bucket Pump Co., Cincinnati, Ohio, are introducing an Iron Platform for Wells and Cisterns in connection with their bucket pump, as here illustrated. The platform, Fig. 1, is made in two parts, the center portion being hinged, permitting it to be opened at right angles, leaving an opening 16x 24 inches in size. The platform is corrugated, having an outward fall; also a small flange at the edge of

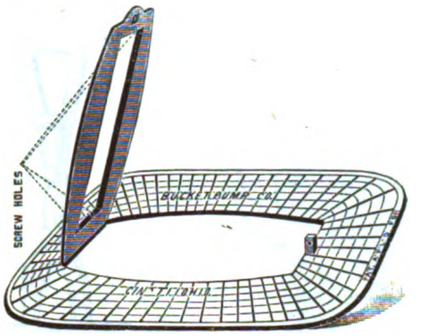


FIG. 1.

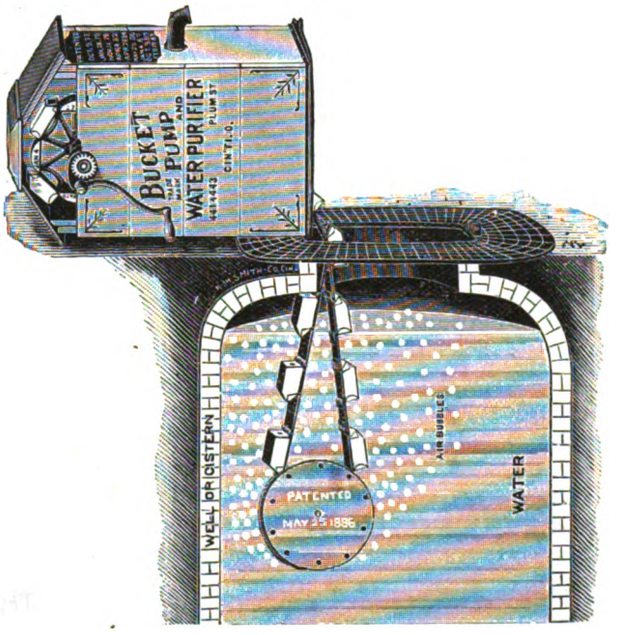
the opening in the movable portion, into which the curb sets, to prevent filth, sediment, debris, etc., coming in contact with the water. The flange is fitted closely to the lower edge of the pump curb, to prevent the water spreading and causing the curb to decay. The curb is permanently attached to the movable portion of the platform, as in Fig. 2, by screws, the position of the screw holes being shown in Fig. 1. This arrangement allows a ready access to the well or cistern, without removing platform, pump, bolts or screws when it is necessary to make repairs in the



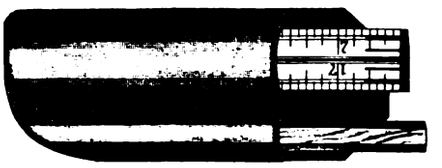


FIG. 2.

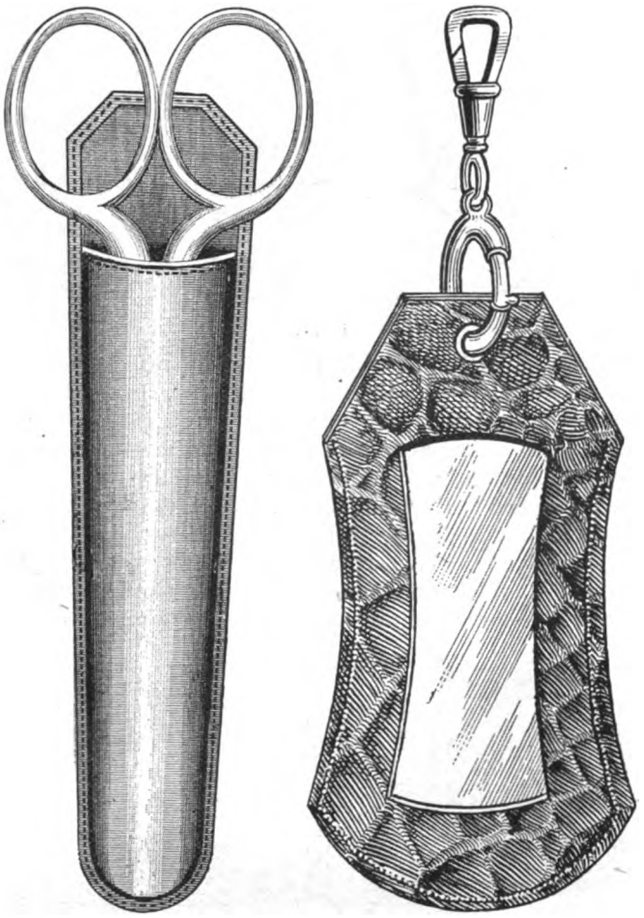
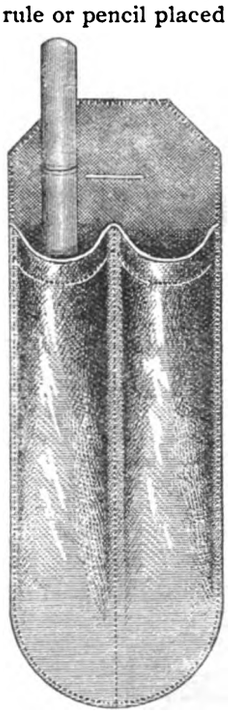
well, cistern or pumping apparatus. The curb in such cases is turned back, when the chains swing back out of the way. When the repairs have been made the curb is turned into position again, and a cotter is passed through the small lug at the front of the curb to hold the whole firmly in place. The makers state that the platform is inexpensive, strong and easily placed in position.

Four Novelties.



E. L. Prickett & Co., Mount Holly, N. J., are introducing several novelties, among which are the Common Sense Rule and Pencil Pocket, the Common Sense Bag Tag, the



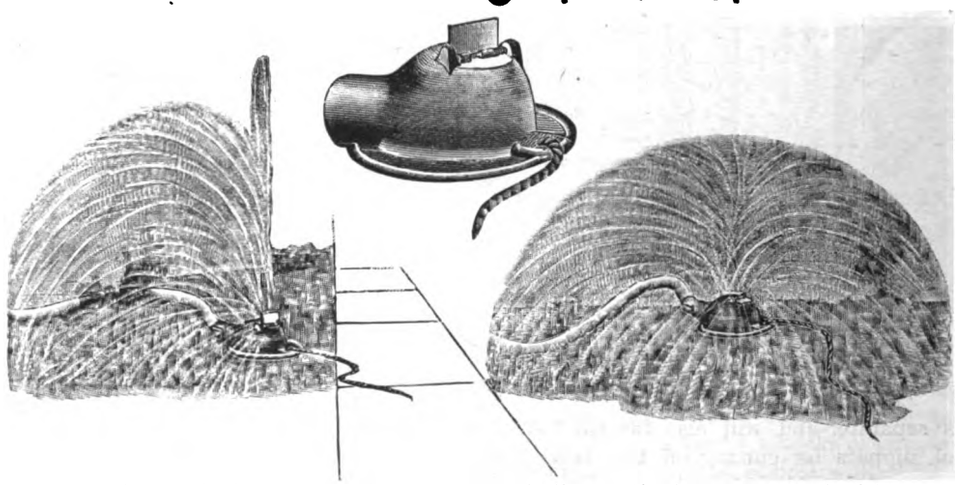
Common Sense Scissors Case and the Common Sense Pen and Pencil Pocket. The Common Sense Rule and Pencil Pocket is a neat, well-made leather case, with a stiff back

Digitized by Google

piece, and a full front piece, the front piece having two openings at the top, and sufficient fullness to allow a rule, on the one side, and a large pencil on the other, to be easily inserted, and the contents are held tight enough to keep them from dropping out when the case is inverted. There

are two pins on the back piece of the case, one at the top and one at the bottom, so that the case can be fastened to any part of the clothes. When the case is put inside the pocket, use the top pin only. The makers claim that a rule or pencil placed in the Common Sense Pocket will stay there until pulled out, but if they are carried loosely in the pocket, and especially if carried in the hip pocket are apt to be dropped in very inconvenient places. The Common Sense

Bag Tag has for the attachment a spring swivel snap and ring which is described as a great advantage over a bungling strap. These tags are made of russet calf skin, patent leather calf, bag leather and imitation alligator. The address card is covered with celluloid which keeps it clean and the attachments are of nickel or gilt. The Common Sense Scissors Case is, the makers state, made of the best quality of leather stock, sewed in silk, with a sole leather tip at the bottom to prevent the scissors cutting through. It has a pin on the back, to be used in fastening the case to the breast or at the waist. It makes a much more convenient way of carrying the scissors than by using the old style card and chain. The common Sense Pen and Pencil Pocket is described as possessing the following advantages: The front piece of the pocket has sufficient fullness to allow a pen or pencil to slip in or out easily without any strain on the Pocket and at the same time the back piece of the pocket remains flat. The fullness in the front piece of Pocket gradually tapers from the top to the bottom, thereby allowing either a large or small article to adjust itself easily, while with the old style flat pocket it is quite difficult to put in a large pen or pencil, and there is always more or less strain on both the pocket and vest. The front piece of the pocket is doubled and stitched at the top to prevent wearing and ripping, and at the same time adds very much to the appearance. The Pockets are made up in first quality of black and light grain leather.



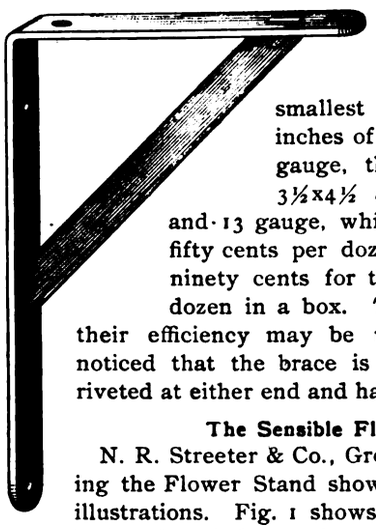
A Family Carpet Stretcher.

The Cincinnati Tool Co., Cincinnati, Ohio, are marketing a new Carpet Stretcher. The blade is dropped out of sheet steel about 3-64 inch thick: extreme width 2¾ inches, the opening in the center being 1⅛ inches wide; length over all is 8¾ inches. The handle is of light hardwood, with brass ferrule. After the carpet has been forced up to the baseboard and the tack started the curved central opening in the blade allows the tack to be driven completely down instead of partially; one difficulty encountered heretofore has been that owing to the slight hold of the tack on the floor, withdrawing the stretcher caused the tack to pull out. The stretchers are put up two dozen in a paper box. The Eastern office of this company, in charge of M. H. Wilson, manager, is at No. 67 Reade Street, New York.

The Yankee Lawn Sprinkler.

The Cleveland Lock Co., Cleveland, Ohio, are introducing the Yankee Lawn Sprinkler, illustration of which is here shown. The manufacturers state that this Sprinkler has many valuable features, some of which are: "great sprinkling capacity (35 to 40 feet diameter) according to pressure; and can be placed close to sidewalk and not wet passersby,

THE YANKEE SPRINKLER.



and can be moved all over the lawn by a cord without shutting off the water or wetting the feet. No revolving parts, or small holes, having as large an opening as the hose coupling has, causing absolutely no back pressure on hose. which preserves the hose. It is all made in one piece, very compact, put up one in a box, complete with cord and rubber

Digitized by Google

washer. The small hinge (see cut) is raised to make half a circle, and laid flat for complete circle."

Brass Brackets.

F. Klages & Co., No. 107 Chambers Street, New York, introduce a neat and inexpensive Wrought Brass Bracket for small shelves of glass or marble, etc. They are in five sizes, of two gauges, the two smallest 2½x3 inches and 3x3½ inches of ⅛-inch brass strips, 14 gauge, the remainder 2½x3½, 3½x4½ and 4x5¼ inches wide and 13 gauge, while the prices run from fifty cents per dozen for the smallest to ninety cents for the largest, packed one dozen in a box. The makers state that their efficiency may be understood when it is noticed that the brace is mortised through and riveted at either end and has a double shoulder.

The Sensible Flower Stand.

N. R. Streeter & Co., Groton, N. Y., are marketing the Flower Stand shown in the accompanying illustrations. Fig. 1 shows the stand designed to be attached to the window casing. The makers state it can

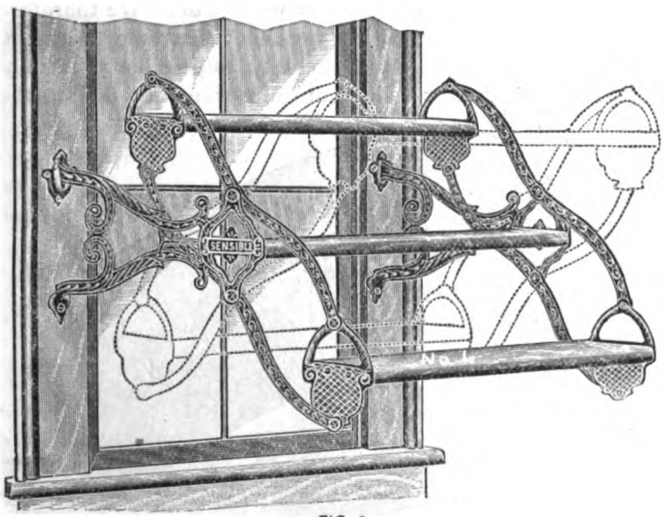


FIG. 1.

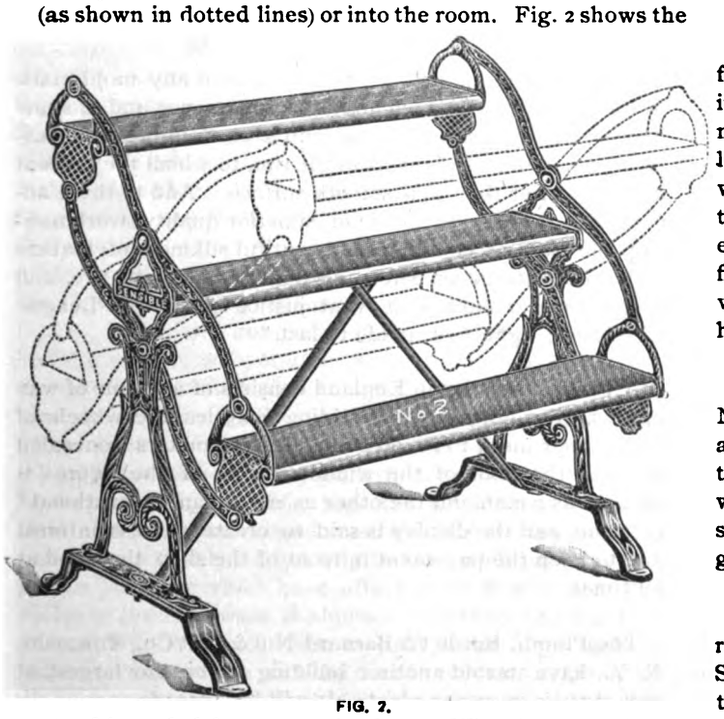
be adjusted in an instant to either face toward the window (as shown in dotted lines) or into the room. Fig. 2 shows the



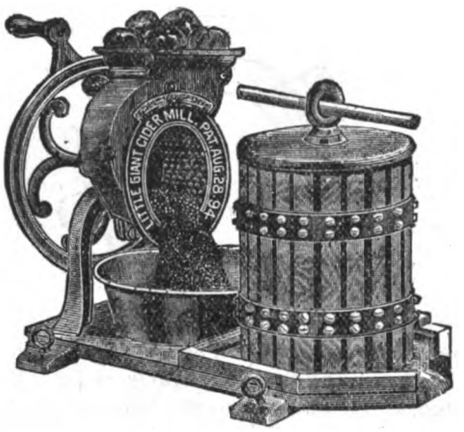


FIG. 2.

stand intended for use on the floor. With these stands the flowers can be turned to face the sun and air, or shifted to face room in evening when the curtain is drawn or blinds closed. Length of shelves, 24, 30, 36 or 48 inches. W. H. Jacobus, New York office, No. 90 Chambers Street.

Little Giant Cider Mill and Press.

The illustration herewith presented is that of a new Cider Mill and Press, invented and patented by Otis Everett Davidson, and being introduced by the Little Giant Cider Mill Co., of Nashville, Tenn. This ingenious and clever Cider Mill is intended only for family use, not being designed for wholesale or other extensive cider making. The cutter is made of tinned steel, and by the peculiar eccentric motion of the hopper, cuts the fruit and separates the white meat of the apple from the peeling, stems and seeds, carrying off the cut apple before it touches any part of the hopper or other metal from which it might be stained.

This is a feature not necessary in the making of cider, but in preparing fruit for cooking purposes it is very convenient. The board and crate are of well seasoned hardwood, the castings are of gray iron, covered with waterproof varnish to prevent rust, while the other metal parts are of wrought iron. In the pressing of the fruit there is also an advantage, as the bottom of the crate, having a nut in it, is brought up toward the top with the screw, the pomace being brought up and away from the cider, between the top and the bottom of the crate, and after pressed is taken out of the top of the crate. The manufacturers state that the mill and press are strong, besides being light and convenient to carry, thereby lessening the danger of its being left in the orchard to rust and rot.

A. W. Wheelock has on exhibition at his store in Rockford, Ill., a lamp that is 150 years old. It first shed its light in the old South Church at Boston, and in a way its history marks the progress of the world during that time. The lamp has had three kinds of burners, the first being for whale oil, which was the great illuminant of that period; the second for lard oil, and when kerosene came into general use the burner was changed to suit the new lighting fluid. The globe of the lamp is very beautiful and the same which adorned it when it was first set up in the historic house of worship.

E. B. Pike, president of the Pike Mfg. Co., Pike Station, N. H., has gone South to take a little needed rest and recreation. His fiftieth birthday overtook him while away, but the arrival of a handsome diamond ring from his employees, with a cordial letter filled with expressions of good will, showed him that although absent, he had not been forgotten.

The edge tool manufacturers of South Staffordshire are receiving better lines from Brazil and other markets of the South American continent than for some time past, and there are indications of an early improvement in the demand for these classes of production from the East Indies. —*The Hardwareman, England.*

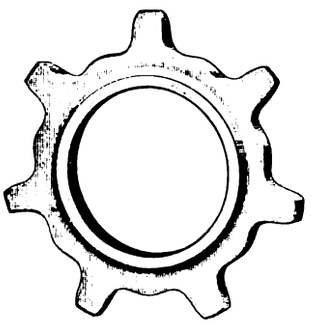
ILLUSTRATED BICYCLE NOVELTIES.



MANUFACTURERS and DEALERS are invited to make FREQUENT USE of these columns.

Anything NEW in BICYCLES or BICYCLE NOVELTIES should be sent us immediately. NO CHARGE, direct or indirect, is made, as our interest lies in SHOWING THE HARDWAREMAN what is going on in THE BICYCLING WORLD.

When your NOVELTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

The Cycloidal Bicycle Sprocket.

The illustration given here represents the Cycloidal Bicycle Sprockets, used on the Tribune Bicycles, manufactured by the Black Mfg. Co., Erie, Pa. The sprocket gets

its name from what is known as a cycloidal curve which is given the teeth; and the successful working of the sprocket, it is stated, is due entirely to the curves given the teeth and to the perfection with which they are cut. The object of the cycloidal sprocket is to remove useless friction and cause the chain to drive as freely as the running of ball bearings. It is explained that the conditions sought in the construction of the sprocket are as follows: "To have the tooth properly curved to enter the chain without contact; that the chain shall pull exactly at a right angle, with its bearing surface against the tooth; that the chain block shall not shift or change its position while passing around the sprocket and that the tooth shall leave the chain without the least resistance; the advantage of the cycloidal tooth is most apparent when the rider is climbing a hill or forcing his wheel rapidly on an up-grade or against the wind; this is where the ordinary tooth grinds and makes the rider work at least 15 per cent. harder than there is any necessity."

Trouser Guard and Bicycle Lock.

Brunner & Co., Hartford, Conn., are putting on the market a Combination Trousers Guard and Bicycle Lock. Two

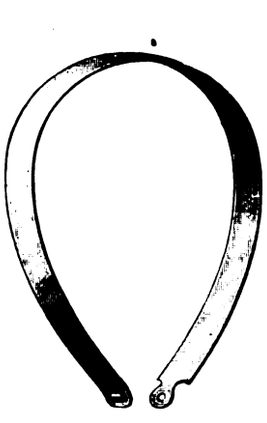


FIG. 1.

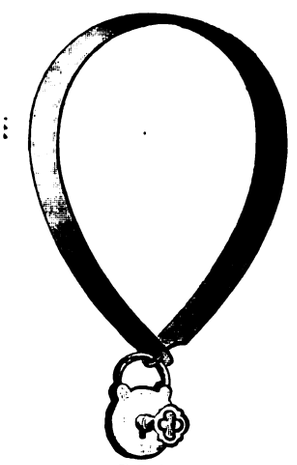

FIG. 2.

trouser guards with holes punched in each and one small padlock comprise a set. The guards are adjusted in the usual manner, the spring in them holding the trousers in position. When dismounted, the rider can detach the guard, and with the padlock fasten it around any part of the wheel, thus disposing of it in an advantageous manner. Price per pair, 25 cents.

The League Tire.

The League Tire is manufactured by the New York Belting & Packing Co., No. 15 Park Row, New York. It was patented April 9, 1895, and in describing it the manufacturers say that "heretofore all the inner tube tires of the cemented variety have been made in iron molds, by a process of vulcanizing, which brought a pressure and strain upon the fabric so great as to stretch and weaken it, driving the rubber into its meshes and depriving it of its natural elasticity, the inevitable result being loss of resiliency in the tire. This problem, that of producing a tire of greatest resiliency, seemed to us worthy of most careful study, and we have sought patiently to secure it. With much satisfaction, and without hesitation, we now record our complete success. In the League we offer the trade and cycling public a tire in which the natural elasticity of the fabric is unimpaired. It is vulcanized by an improved process that prevents injury to the fabric. There is no stretching, straining or weakening during manufacture. We therefore claim for the League Tire, resiliency, extreme lightness, durability and strength—absolutely impossible of attainment in other tires. Further improvements due to the

method of manufacture, are the absence of any mold mark or fin on the tread (which mars the appearance and in some degree increases the friction), and a cloth impression surface on the under-side next to the rim, to which the cement adheres better than to a smooth surface. Add to these advantages, rubber and fabric of superior quality, workmanship the best at command, a beautiful silkiness of texture and a pliability never before seen in a pneumatic tire, and you will understand with what justice we say the League Tire leads: light, fast, made to last."

A window novelty in England consists of a couple of wax figures, in cycling costume, riding Safeties, the wheels of which are caused to revolve by electric motors concealed beneath the floor of the window. One of the figures is dressed as a man and the other as a woman in "rational" costume, and the display is said to create endless interest and to keep the pavement in front of the shop thronged at all times.

The Plumb, Burdict & Barnard Nut & Bolt Co., Towanda, N. Y., have started another building to be the largest of any of their immense plant. It will be 175x420 feet in dimensions. The firm are almost ready to move their machinery from Buffalo. Niagara Falls power will be used.

Digitized by Google

E. N. Higley's Unicycle.

The long-looked for Unicycle has at last made its appearance. It is the production of the fertile brain of E. N. Higley, of Boston. The wheel is built of aluminum, is 7 feet 3 inches high, and weighs but 54 pounds. There have been many unsuccessful attempts to perfect a single wheel, but up to the present these attempts have proved very unsatisfactory. The new wheel was recently tried before an interested crowd of cyclists in the Back Bay district, Boston, and was easily steered, controlled and driven in a 40-foot circle. The trouble heretofore has been the inability to propel a machine of this kind in a circle. The unicycle consists of an outside rim which is provided with a huge pneumatic tire. In the center is a smaller wheel, sufficiently large for a man to crawl through: strong steel spokes connect these two parallel wheels. In the centre of the inside wheel are the handle bars and saddle. A double gearing operates the machine, both rims of which revolve about the rider. The power is applied by friction. The saddle and all bearings are ball bearings, and the whole machine is moved easily. The wheel is steered by changing the centre of gravity of the rider's body. When he wishes to turn a corner he inclines his body toward the corner and the wheels turns readily, being very sensitive.

An English Opinion of American Associations.

Plain figures will sometimes clinch an argument far more effectively than the most forcible exposition of principles, and we suggest to those of our readers who have read our many exhortations on the formation of Hardware associations, that the following figures will provide food for profitable reflection. The facts are quoted from a characteristic speech made by Mr. Edward Buford at the recent dinner of the New England Iron & Hardware Association, at Boston, U.S.A., the whole discourse being full of indications of a healthy spirit of co-operation, which seems unpalatable to the majority of our trades at home. Our readers will perhaps more easily grasp the position of Mr. Buford if we quote the following passage from his introductory remarks: "I am an enthusiast in my faith in the good which can be accomplished by working together in Hardware associations. In my opinion, trade associations furnish the only remedies on which we can rely for the eradication of pernicious practices which have attached themselves like barnacles to the Hardware business. Unless we can make up our minds to work together, we can never hope again to realize commensurate with the detail and labor profits which devolve on those who are engaged in selling Hardware."

After having thus hoisted his colors in favor of the policy of combination, Mr. Buford proceeded to justify his position in a very practical manner. He referred back to his own experiences of the working of Hardware associations, and put forward some figures which he described as "literally true, and should convince even the most skeptical that our way out of the difficulties which beset us lies through Hardware associations." The experience he had in mind related to six houses in Nashville. He carefully went through the books of these firms and tabulated the quantity of wire nails, Burden's shoes and plain and barbed wire, which had been sold, and the average price during the previous twelve months. The result of the investigation showed that a total profit of about £7000 had been realized by the six firms on these four staple articles. It was the opinion of the firms interested, that had they been cutting against one another, instead of operating mutually, the total combined profit would not have exceeded £1000, and even this estimate was regarded as rather too high. By adopting the same principle in regard to some thirty or forty other staple lines, the members of the Association found their books showing a comfortable balance at the end of the year, which assuredly would not have existed had they worked on lines of antagonism instead of combination.

The facts in the foregoing paragraph will probably bear the appearance of a dream to some members of the trade at home who spend a large portion of their brain power in devising schemes to cut out their neighboring fellow-tradesmen, but the figures are given on good authority, and cannot be easily disregarded. We hope they may induce a greater degree of faith in the advantages of association than we have so far found to exist in this country. The reason for the present apathy to the formation of local combinations is not far to seek, and we think Mr. Buford hit the right nail on the head more than once in the course of his remarks. We quote just one other portion of his speech which throws a little light on this part of the subject: "I am frequently impressed that jealousy and personal spite are very potent factors in selling goods in these days. The desire to prevent a competitor from making a living profit on his goods seems to be as strong as it used to be to make a handsome profit for one's self. This is a 'dog in the manger' feeling, against which every man who does a legitimate business should set his face. Personal spite is the result of unscrupulous competition and unscrupulous competitors, and comes from a selfish indifference to the rights of others."—*The Hardwareman, London, Eng.*

An English Hardware authority states that "probably no branch of manufacture in South Staffordshire has suffered so severely from the effects of German competition as the Cut Nail trade."

J. Wiss & Son's Addition.

J. Wiss & Son, Newark, N. J., manufacturers of Shears and Scissors, are making an extensive addition to their already large works. This new part, like the rest, will be constructed of North River brick, set in red mortar, with bluestone trimmings. The basement will have brick floors and the floors of the upper stories will be mill construction. The entire plant will have cost the firm upward of $50,000, and it will be one of the best appointed factories in that great city of workshops. The extension will be 38x60 feet and will be added to the main building, which is 38x150. This will give a frontage of 210 feet. Besides, there are in the rear a grinding shop 35x80 feet, a blacksmith shop 35x60 feet and a boiler shop 30x36 feet. There is a fine stack 8 feet in diameter and 90 feet high.

Seed's New Water Filters.

Joseph H. Seed, Nos. 21 and 23 Centre Street, New York, who has made his name known in all parts of the country where Water Filters come up for consideration, has taken

a marked advance step this season by offering a finer line than he has before attempted. He describes them as "the finest line ever introduced in America." What they are, may be judged somewhat from the illustrations here shown. All these sketches are full size. They are made of brass, nickel plated, and will fit almost any sized plain or screw faucets. They are packed one dozen in a box, with assorted rubber attachments. Extra rubbers will be supplied at twenty-four cents per dozen; and filtering materials in one-half pound boxes, at sixty cents per dozen. All these Filters are reversible, except No. 4. A sample of each will be mailed by Mr. Seed, on receipt of retail price for the same. The prices given are as follows:

No. A 1.		No 3.	
Retail Each	$ .75	Retail Each	$ .25
Per Dozen	4.50	Per Dozen	1.75
Per Gross	48.00	Per Gross	18.00
No. 2.		**No. 4**	
Retail Each	$ .50	Retail Each	$ .25
Per Dozen	3.00	Per Dozen	1.00
Per Gross	30.00	Per Gross	11.00

Wood Lemon Squeezers.

John Sommer's Son, Nos. 355–365 Central Avenue, Newark, N. J., has now ready to offer the trade a new line of Wood Lemon Squeezers. made with rosewood, lignum-vitæ, imitation mahogany, and porcelain bowls. They are three inches in diameter, and one-half inch thick, and are described by the maker as "far stronger and superior to anything heretofore on the market." They are trimmed with brass hinges finely plated; brass hinges, not plated; and steel hinges, at a reasonable price. Mr. Sommers has the reputation for making first-class goods, and the trade may be sure that they are as represented. Prices and further description will be sent on application.

The United States Marshal will on June 1 sell the property of the Racine Hardware Co., consisting of real and personal estate located in the city of Racine, Wis., under a decree obtained by the American Trust & Savings Bank of Chicago against the Racine Hardware Co., A. C. Frank, assignee, Stephen H. Seamans as receiver of the Wisconsin Mutual Fire Insurance Co., and others. The amount of the decree is $131,154.12. The sale will take place at the Racine County Court House at 2 o'clock on the afternoon of June 1.

Julius C. Brown, president of the Brown Nut & Lock Co., of Chicago, was found dead on a vacant lot at Twentieth and Jackson Avenues, Kansas City, on April 10th. He had only fifty-seven cents in his pockets and was very peculiarly dressed. Under a white linen shirt he wore two negligé summer shirts of different colors and under a black tailor-made suit he wore a white vest and very light summer trousers, carefully creased. It is thought possible that he might have left the hospital in which he was being treated in Chicago in a demented condition. He was the patentee of the Brown nut and lock adopted by the Illinois Central Railway last summer and of other devices used by the same railway. He had a wife and two children living in Chicago and a mother at Santa Barbara, Cal.

George R. Tingle, Jr., of Washington, and intimately associated with the American sealing industry in Alaska and the Pribilof Islands, in speaking to a HARDWARE reporter of the Hardware industry of that region, said: "The demand for Hardware is supplied by two big companies, the North American Commercial Co. and the Alaska Commercial Co. These companies maintain general supply depots all along the Alaskan coast and on the Pribilof Islands. The demand is largely for harpoon-heads, skinning kuives, materials for repairing vessels, etc. The whole supply is purchased in San Francisco, and carried in ships to Alaska during the spring season. There are a few small stores in Sitka, but no exclusively Hardware shops in all Alaska."

B. J. Jenkins, a prominent Hardware merchant of Montfort, Wis., has died suddenly in the thirty-sixth year of his age.

WORKS OF F. E. MYERS & BRO.

By far the leading, most useful and heaviest industrial enterprise here is that of F. E. Myers & Bro., manufacturers of pumps and hay tools. This is the largest works in the new world manufacturing pumps and hay tools exclusively. From acorn to giant oak is the history of this industry. Some twelve years ago the foundation of this vast enterprise was laid. Space accorded me for this report will allow only a generalization of facts concerning the history of this firm. These gentlemen were born and raised right in the shadow of this city, six miles east near the small hamlet of Rowsburg. Here it was that the original factory of the famous firm of Studebaker Bros. was first started, and their father was at the head of the wood working department, way back in the fifties. In early manhood, F. E. Myers, senior head of this concern, secured a position as traveling salesman for agricultural implements. With his brother, P. A. Myers, the inventor, he afterwards branched out in operating a mammoth retail implement house. The transition from this, to manufacturing, followed with financial success achieved. And thus have I briefly and quickly led up to the starting of the colossal enterprise now carried on. The extensive plant now utilized comprises four large main structures. Three of these are three stories high, built of brick and in lineal length would occupy 565 feet with an average width of 40 feet and foundry 50x160 feet. Then the storage warehouse is 50x160 feet; besides this are minor buildings and large yards. These structures are all spacious, well lighted and well built; it might be said are erected for all time to come. Probably $200,000 has been used in their construction and equipment. The machinery, devices and appliances are of the heaviest and most modern structure. Much of the machinery has been specially planned and constructed and nowhere else is there a duplication. During the past quarter of a century the writer has visited all the principal manufacturing institutions in the United States, in the many and various branches of manufacture, but in all that time has never inspected any single industry where there was so much diversity of operation. And yet everything here proceeds as regularly as if given over to any only single line. To attempt any detailed elaboration would require pages instead of columns of this paper. Wood, leather, iron, steel, brass and other materials all enter into the composition of the specialties manufactured by them. And skilled mechanics in each line are employed. The machinery is of the best description and the factory is manned by a force of over 200 men. The specialties of construction are well pumps, tank pumps, spray pumps, windmill pumps, hay carriers, forks, pulleys, etc. These find a ready and appreciative market throughout this country, the old world, Canada, South America, West India Islands, and in point of fact, the whole universe. F. E. Myers & Bro. issue periodically a splendid catalogue of about 200 pages, richly accentuated with cuts of their factory buildings, departments, productions and full and minute information regarding their construction and special points of their superiority. Thousands of dollars annually are spent for printers' ink, a large sum for postage and a corps of a full score of traveling men represent them on the road, besides which they have export headquarters in New York. It is a grand sight to inspect their factories and see their skilled workmen employed. In thirteen months' time there has been but a breathing spell of one week necessitated for the overhauling of machinery and repairs. Such is the continued expansion of their business that they are about to commence the erection of additional buildings. One important fact deserves particular mention. Every article turned out by this firm is perfect. The greatest care is exercised to have everything right up to standard perfection. Strength is given to every part of each article where the strain comes. It would be impossible to accurately figure up the extent of their annual business, but it can safely be said to be not less than three quarters of a million dollars yearly. And they are heavily interested in The Bucher & Gibbs Plow Co., of Canton, Ohio. Mr. F. E. Myers is president of this named corporation, and his brother, P. A. Myers, is one of the directorate. Formerly F. E. Myers, the gentleman now the president of this concern, was their traveling representative. He is also the superintendent of their agencies. This is the oldest and largest plow factory in the Buckeye Kingdom. Thus, in a brief manner, for local publication, have I concentrated a chapter concerning a concern whose existence has had so much to do in aiding the growth and development of this city. In a plain, simple manner, have I outlined this successful concern. To this I will add, that Messrs. F. E. Myers & Bro. belong to that strata of men who are more solicited than soliciting. Their liberal public spirit and generosity are shown on all occasions; they are moving and guiding spirits in all commendable and local affairs and are of the forceful, typical class of men whose genius underlies and substantially vindicates Western American character which seems to intensify when one leaves the narrow confines of the East. Both members of this firm are in the prime of life, unostentatious and unassuming, and manage the vast daily details of this industrial enterprise as easily as if but a single personal occupation was on hand. They have given this city a permanent industry whose value can hardly be estimated. And in so doing have displayed a grand measure of pride for the place of their nativity. It can only be said that for Ashland they have done an immeasurable amount of good. Their example is well worthy of emulation and shows what can be accomplished by indomitable energy and rugged perseverance.—*Ashland (O.) Press.*

The Security Sash Balance.

In this issue, on page 55 there appears an advertisement of the above named Balance, which requires no pockets or pulleys in the pulley stiles, and which "will exactly balance a sash at any point, working without a friction screw. It requires no space between the window frame and studding, allowing the plaster to be joined closely to the frame, while the frame may be nailed firmly to the studding, so that the frames cost less where this Balance is used. It is placed on the centre of the window head, out of sight, and free from dust. It can be made strong or weak by the use of a key, and there is but one cord to each sash." Size A will balance a sash weighing from 5 to 25 pounds; Size B from 20 to 40 pounds, etc. Descriptive circulars and discounts to dealers mailed on application to the Richmond Safety Gate Co., Richmond, Ind.

Good Words for "Hardware."

Hall Mfg. Co., Wallingford, Conn: "We admire HARDWARE very much. Your paper is by far the neatest, most attractive and entertaining trade paper we know of."

HARDWARE, published in New York city, appeared last week with a neat and attractive cover and numerous special articles of interest to the trade. This issue commemorated its fifth anniversary and HARDWARE has certainly established itself on a solid foundation in this brief period.—*Detroit Evening News.*

HARDWARE costs only One Dollar a year.

RECENT TRADE PUBLICATIONS.

W. & B. Douglas, manufacturers of Pneumatic Pumps for Bicycle and Sulky use at Middletown, Conn., with branch houses in New York and Chicago, have issued a handsome little leaflet covering the above line of goods. In this are illustrated and described in full their Douglas Utility Sulky Pump, which is referred to as "the best repair shop pump made;" the Douglas Pneumatic Compressor, which is a recent addition to their extensive line of power air pumps; the Douglas Pneumatic, which is a brass air pump, with flanged iron base, standing about 21 inches high, and fitted with the best quality of rubber; the Douglas Hurricane Pump, which is 1½ inches in diameter, over a foot high, highly nickeled, and fitted with a serviceable cupped leather piston; the Douglas Double-acting Saddle Pump, which it is said will fill a tire almost immediately; the Douglas Nickelette, which is a recent addition to their pneumatic pumps, is nickel-plated and stands 21 inches high; and the Douglas Saddle Pump, which is nickel-plated, and so compact as to be readily carried on the saddle on the road. In a note of introduction the company say: "Appreciating the constantly increasing demand of the bicyclist and racing fraternity for an improved design of Pneumatic Sulky and Bicycle Pump, we have put an experience of over sixty years in the exclusive manufacture of pumps and pumping machinery into the production of a line of tire fillers unequalled on the globe. If you fail to find what you want in this small leaflet, and are in need of pumps of any kind and for any purpose, we shall be pleased to supply your needs at fair prices for the best goods."

The Ferracute Machine Co., Bridgeton, N. J., have published their new catalogue No. 11, describing their full line of Sheet Metal Machinery, comprising presses, dies, etc. The catalogue is bound in attractive red cover, with double sheets folded in, which are also printed in colors, with a handsome border. The catalogue describes over 300 sizes and kinds of presses, although of course only a portion of them can be illustrated. It gives full information on various subjects in the various tables, and the company say that photographs of the presses not illustrated, also sheet metal samples, will be sent on application, and estimates given for all kinds of dies on receipt of specifications. The company in further description say: "The articles produced in our works (all of which are of original design and are carefully planned for strength, convenience and symmetry, according to correct principles of mechanical engineering), consist chiefly of presses and dies for the shearing, cutting, punching, bending, forming, embossing, coining, drawing, deepening, broaching, etc., of bar and sheet metals, together with paper, leather, cloth and other materials. A few auxiliary tools, such as spinning lathes, beading machines, soldering apparatus, etc., are also made, but our business in the regular lines has so increased that we have abandoned the building of miscellaneous machinery."

The Wm. Rogers Mfg. Co., Hartford, Conn., are sending out a new edition of their catalogue which is numbered 40, and is certainly one of the most handsome and artistic trade publications of the year. It contains over one hundred pages, is bound in a handsome cover, with embossed lettering in silver and brown. Their very handsome line of Silver-Plated Flat-ware, Table-ware, etc., is shown in illustrations which bring out the artistic quality of the work in a very fine manner. It will, of course, be impossible to even attempt an enumeration of their various lines, which require two pages of the catalogue to mention. Everything in the line of manufacture described in the title can be found herein. The company say that they have endeavored to make this the most complete list ever issued; have illustrated many new designs, which have been added since their last issue, and add that "the high standard our goods have reached will be maintained in the future, and we hope by supplying the trade with reliable ware, and giving them honorable treatment, to deserve the patronage of all dealers in our line." This catalogue will be furnished to any dealer in the country for the asking.

E. T. Barnum, No. 179 Jefferson Avenue, Detroit, Mich., has kept the printers busy this spring, in the preparation of a number of catalogues, which are just being sent to the trade. These include his general catalogue of 120 pages; one devoted to jail cells and jail work of every description; another to bank and office railings, brass wickets, bank screens, etc.; another to builders' wire and iron work, roof cresting, fire escapes, window guards; one to wire and iron fences, etc., etc. There are also several minor ones, covering special lines of his manufacture. These have been sent not only to the trade in the United States, but to a number of foreign countries as well, and Mr. Barnum will be glad to mail a copy free to anyone upon application, provided specification is made as to the kind of goods wanted, so that he will know which catalogue to send. It is needless to say that Mr. Barnum has made a great success in his special line, and that everything known under the sun in the lines described by the titles above, can be found illustrated in full in these catalogues.

"Seamless Tube Hose" is the title of a monograph sent forth by the Cleveland Rubber Works of the Mechanical Rubber Co., Cleveland, Ohio. The fact that the lessons taught within it are set in musical verse speaks well for the inspiration of the theme—for no man can poetize about rubber hose unless he pretty thoroughly believes in it. The key-note is pitched in this way:

There once was a dealer in *hothes*,
Who sprinkled his lawn when he '*rothes*;
But he frequently found
That instead of the ground,
He was soaking his feet and his *clothes*.

Several pages follow in the same strain, and the moral comes in these words:

To sell Cleveland Hose all should *comments*;
It appeals to men's good common *sents*,
Because it is stronger,
It lasts so much longer,
Means the saving of dollars and *cents*.

We have had occasion heretofore to refer to the Ideal Hand Book No. 6, published by the Ideal Mfg. Co., New Haven. This is filled with useful information to shooters, covering every point of information in regard to the well known Ideal Tools. The book is written in a spicy and entertaining manner, and any dealer or shooter who wishes information pleasantly presented will do well to send for a copy, which the publishers will gladly furnish upon application. We have from time to time illustrated the leading lines manufactured by this company, and hope to present others which are new upon the market at an early date.

The Illinois Pure Aluminum Co., Lemont, Ill., have issued an attractive catalogue of their line of Pure Aluminum cooking utensils, steam jacketed kettles, and other vessels. These articles are illustrated in full, with descriptions and prices, and comprise almost everything under the name above given. A great deal of information is furnished in regard to the advantages derived from the use of goods made of this material. The catalogue will be furnished upon application.

Coburn Overhead Tramway.

The Coburn Trolley Track Mfg. Co., Holyoke, Mass., are manufacturing a patent Carrying Track or Overhead Tramway, that seems a safe, practical and labor-saving system for moving all kinds of merchandise to any part of a mill or factory. In Fig. 2 may be seen the track when put up ready for use; in Fig. 1 a detailed section of the

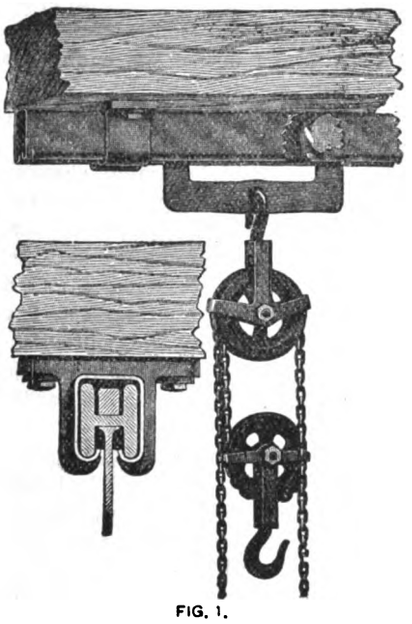

FIG. 1.

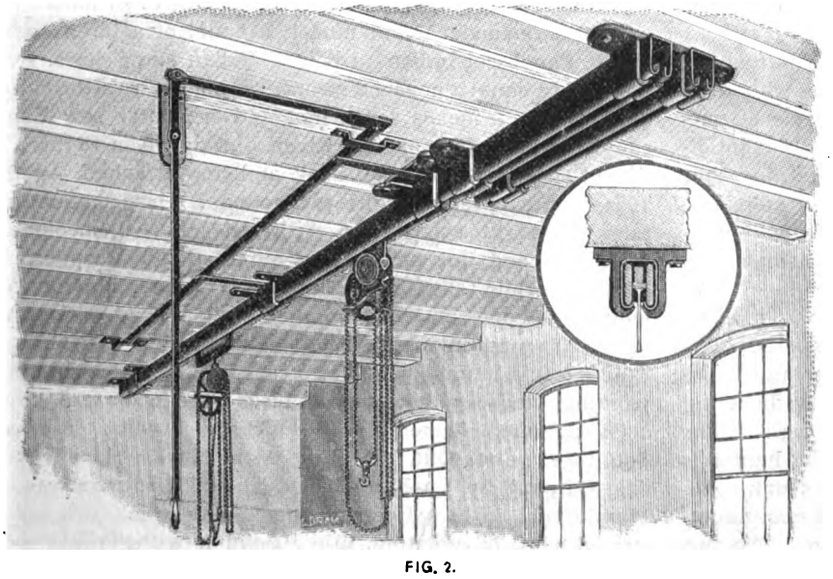
same. It is said that there is with this system no possible chance for wheels to get out of or off the track. With single and double switches, and curves, the loads can be easily propelled in any direction desired, and, having a central hanging, an even motion is obtained. This is usually a very easy and cheap device to apply, that depending somewhat on the location and position of the timbers to which the track bed, usually a 3-inch x 10-inch plank is secured. At present they use only two sizes of track on the carrying system, "Regular" and "Large." The "Regular" track is made of 16-gauge steel and used only for light loads, for, while sufficiently strong to carry loads of considerable weight, the diameter of the trolleys is too small to obtain the best results. The "Large" track is made of



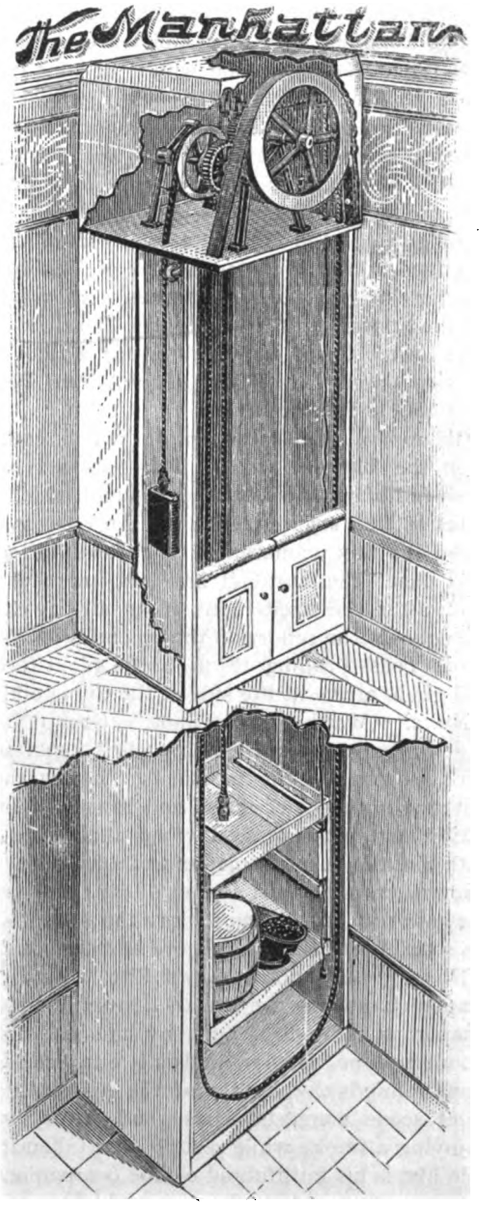


FIG. 2.

No. 13 gauge steel, which, with the addition of brackets can be made to sustain a great weight, but they do not recommend it for use where the load will continually exceed 3000 pounds.

The radius of the curve for the "Regular" track is 18 inches and over. For the "Large" track they use curves three feet and six feet radius. Switches are either single or double. Carriers are made of malleable iron and are both single and double. Single carriers are suitable for loads of 1200 pounds weight. Double carriers for all over that weight. The frequency with which the brackets are applied depends upon the weight of loads to be propelled. With the "Regular" track they recommend using five or six-foot lengths of track with a bracket at end and center, or every two and one-half or three feet. With the "Large" track for loads weighing less than 1200 pounds they would use four or five-foot lengths with bracket at ends only, but for loads weighing over and less than 3000 pounds would use five foot-lengths of track with a bracket every two and one-half feet.

Dumb-Waiters and Elevators.

Among the products of the many factories of the busy manufacturing city of Newark, N. J., probably none are better or more favorably known than the goods manufactured by the Storm Mfg. Co., of that city. The firm have been making Dumb-Waiters and Elevators of various kinds for a number of years. Their line is complete in all respects, and contains almost everything in the line of hoisting appliances from the smallest Dumb-Waiter to the large and powerful elevator. All of their machines are equipped with the best and newest devices for speed, safety and durability, and are thoroughly first-class in all respects, and at the same time moderate in price. They will be pleased to furnish catalogue for prices on application.

THE FIRST SPORTSMENS' EXPOSITION.

Ere the next number of HARDWARE is laid before our readers, the great Sportsmen's Exposition will be a thing of the past, and live in our minds as a pleasant memory only. Some doubt exists in the minds of some who ought to know, as to the advisability of holding the Exposition in New York, instead of in the West, where the greater number of sportsmen live and where most of the hunting is done. This way of thinking will, however, be corrected by the generous patronage that is bound to be bestowed upon such a praiseworthy undertaking. The Exposition is an assured success from an artistic point of view, and it rests entirely with the generous American sportsmen, as to whether the business end will come out all right.

The numerous exhibitors are fairly out-doing themselves to make attractive exhibits. The scope and variety of the exhibits to be shown is simply marvelous.

The Loan and Trophy exhibits are increasing every day, and the collections alone would be worthy of one or two visits to the Garden, without the general exhibits of the manufacturer. The five elaborate and artistic cycloramic hunting scenes exhibited in the east end of the amphitheatre, were designed and prepared by Frederic S. Webster, the well-known professional taxidermist and naturalist. The figures and groups were constructed and executed and arranged by the Webster Studio of Taxidermy. The designs are original and the scenes were prepared especially for the Sportsmen's Exposition. The titles are: Group 1, "At Last;" Group 2, "Waiting for a Shot;" Group 3, "A Solitary Camp Fire;" Group 4, "A Two Pounder;" Group 5, "A Lost Opportunity."

Group No. 1 is a conception which embodies a scene from the Western wilds. The season is winter, and the fresh fall of snow covers the ground, which heightens the effect of this striking picture. An Eastern sportsman has killed his first monarch of the forest after a long hunt. "At Last" the fatal ball has laid low the majestic ruminant, after the excitement of an all-day chase, and while the echo of the report of the unerring "Winchester" has hardly ceased rolling through the silent forest, the hunter and guide arrive at the side of the dying elk.

No. 2, "Waiting for a Shot." Group No. 2 is a scene which forms a picture which leads the sportsman who loves duck shooting to the marshes. Though the style of pursuit may not spice of action and danger, it is full of anticipation and pleasure, and when this is attained, together with a reasonable complement of a half dozen or more fat, juicy racers of the air, who shall say that marsh duck shooting hath not the charm to lure the ardent sportsman with his spaniel retriever from more stirring scenes?

No. 3, "A Solitary Camp Fire." Group No. 3 represents a chapter in the life of a lover of field sports. The temporary camp fire, built by the old fox hunter on a wooded slope, is slowly dying out. The low flickering flame reminds the hunter of the approach of night. The quiet scene suggests repose, and naturally the hunter is enjoying a smoke while resting on a fallen tree trunk. Beside him is his faithful old canine companion of many hunting days (a fox hound), a scarred old veteran. The two dead Reynards tell the story of the day's work, and the score to the credit of the old brush hunter and his dog goes up higher.

No. 4, "A Two Pounder." We are not all of us trout fishermen, but many of us have felt the thrill of delight when one of these gems of the sparkling waters has struck our whisping flies. Group No. 4 is intended to picture this experience of the fisherman. The cool shattering stream from which a speckled beauty weighing two pounds has been hooked by the fisherman, is a deception produced with charming effect. Its source is indicated by the woodland background. "A Two Pounder" is enough to make any fisherman's face wrinkle here and there, when he has victoriously landed Mr. Salmo Fontanalis, and the fight is over.

"A Lost Opportunity." A common experience of the sportsman is portrayed by Group No. 5. The hunter has been shooting grouse, when the signs of deer are discerned. A report from the gun has sprung the buck at an inauspicious time, while the shells are being adjusted in the unlocked gun by the impatient hunter. The fast retreating buck leaves the shooter rattled, and with disgust pictured in every feature, and he consoles himself by picking up his dead grouse. "A dead grouse in hand is far better than a live buck in the bush."

Loaned by Hon. Theodore Roosevelt, Washington, D. C.: 2 mounted elk heads, 1 mounted buffalo head, 1 mounted mountain sheep head, 1 mounted mountain goat head, 1 mounted peccary head, 1 mounted antelope head and 1 mounted white-tailed deer.

Ninety instantaneous photographs of wild animals, loaned by A. G. Wallihan.

Loaned by Austin Corbin: 1 buffalo head, 1 European stag, 1 buffalo head (Grover Cleveland.) The bull from which this head was taken was killed in a fight with another buffalo in a dispute to settle the rivalry for the supremacy of the herd, after a long battle of two hours. It was mounted by the Webster Studio. 1 wild boar head, 1 wild boar, entire specimen; 1 Himalayan tiger skin, 1 Polar bear skin.

Loaned by A. H. Verrill, New Haven, Conn.: Mounted specimens—1 golden eye duck, 1 velvet scoter duck, 1 group of blue bill ducks (2 birds), 1 wall panel "Dead Game," California quail (2 birds.) A collection of Indian bows, arrows, stone heads, spears, poisoned arrows and other implements of various Indian tribes.

Loaned by William Ziegler, New York City: 1 model of a birch bark canoe, Maine model; 1 model of a birch bark canoe, Penobscot Indians; 1 pair of Indian snow shoes. Penobscot Indians; 2 polished sword fish blades, 1 rattlesnake skin, 6 feet 6 inches long; mounted heads of saw fish, caught in the Caloosihatcher River, Florida, on an 18 thread (linen) bass line and pole, hook and line attached, April, 1893, length 14 feet, weight 575 pounds; 1 large mounted tarpoon, weight 131 pounds, with rod and reel, specimen with hook and line attached; 1 mounted baby tarpoon, 1 mounted white-tailed deer, antlers in velvet; 1 mounted white-tailed deer, fawn; 1 mounted caribou head, antlers in velvet; 1 mounted moose head (adult), 1 mounted moose head (calf), 1 buffalo head (23 years old), 1 water colored painting, landscape with moose, birch bark frame and mat.

Oil paintings loaned by the Webster Studio: Pointer dog, title "Look Out," by Mrs. A. E. Hoyle; black bass, title "Lost," by Le Baron Goodwin; oil paintings by A. Weyderveld, title "Coast Scene," with weak fish and striped bass; oil painting, title "Salmon with Trout;" oil painting, title "Black Bass;" oil painting, title "Striped Bass;" oil painting, title "Brook Trout;" oil painting, title "Brook Trout."

We print herewith a plan of the Madison Square Garden with exhibition spaces. Also a summary of the displays to be made by the different exhibitors, and portraits of the efficient secretary and treasurer, who have done so much towards making the Exposition what it is.

HUNTER ARMS CO.

The Hunter Arms Co., Fulton, N. Y., will be found in section 72. They say that, first of all, it is their aim to make their exhibit as educational as possible. "The Gun business is almost infinite in its details, and we find that a large proportion of the sportsmen throughout the country know very little about the actual processes and the immense amount of work it requires to make a complete and perfect Gun. We will show Gun barrels from the tube in all of their different stages of manufacture until they are turned out complete; will also show the working mechanism of our Guns. The Smith Gun has the strongest and simplest lock in the world. We expect to have this demonstrated quite forcibly by all of the pieces which will be put into a small frame that can be handed around among the interested; will also have one of our Ejector Guns cut away in such a manner as to show the work of the locks and also the Ejector mechanism. This particular class of Gun has become very popular among the shooters. We now make them in ten different grades ranging in price from $75 to $500. We will also, of course, have a full line of samples.

grade No. 1 Famous St. Lawrence River Skiff, fitted with rowing and sailing outfit complete; another will be a Special St. Lawrence River Skiff somewhat different from their regular model, and made more for anglers' use for New York water; another boat will be one of their Lake St. Francis Hunting Skiffs, as described on page seven of their 1895 catalogue. They will also show a yacht's dinghey or tender, similar to their No. 31 as shown in the catalogue; also a No. 45 or 46 Canadian paddling canoe, and perhaps an Adirondack Hunting Skiff; also one of their No. 4 Famous St. Lawrence River Skiffs. Besides the above boats they will show a number of paddles and oars of different kinds. It is not their intention to make a very elaborate display of boats made especially for the exhibition. "We are merely going to show," they say, "our regular stock boats so that the sporting public can see exactly what they will get should they order boats from catalogue description only."

IVER JOHNSON'S ARMS & CYCLE WORKS.

This establishment, of Fitchburg, Mass., will exhibit the following: Two bicycles, twelve Champion Single Shot

It is going to be our aim to show the American shooters as far as we possibly can that American manufacturers can make fine Guns. We will have on exhibition several of our A-2 $275 grades. In all probability we will have some very fine engraving to show the boys in the way of inlaid gold dogs in lock plates, etc. Through the kindness of one of our patrons we expect to be able to exhibit one of our A-3 $500 Automatic Ejectors. We will be proud to set this Gun beside any gun in the world, no matter by whom made, as we are confident it will prove a winner in every sense of the word. It may interest your readers to know that the Smith Ejector Gun by actual count of parts is the simplest Gun in the world. Our plant is composed of a main building 220 feet long, 50 feet wide and four stories high. We have never closed our factory during the panic season owing to the large trade we have on high grade Guns. Our case hardening department, engine and boiler room, brazing and drop forging rooms are all in separate buildings. Our Gun plant is pronounced by many, who have been over it, as one of the most complete in the whole country."

ST. LAWRENCE RIVER SKIFF, CANOE & STEAM LAUNCH CO.

This company, with headquarters at Clayton, N. Y., will show at least six different craft, one of which will be their

guns, about sixty-four I. J. Safety Hammer and Hammerless Revolvers, about twenty-four American Bull-Dog double action, and about twenty-four Defender Single Action revolvers. They will have an attractive catalogue to give away, will occupy Space No. 62 and have special showcases made for this Exposition.

HAZARD POWDER CO.

The Hazard Powder Co., New York, will show their various grades and qualities of powders. The big powder kegs which will be seen in the foreground of the exhibit are simply exaggerated samples of the packages in which the Hazard powder is shipped. The showcases to be placed in the center will contain the following articles:

Bottle No. 1 will be filled with crude saltpetre. This is imported by the exhibitors from Calcutta, India and is used exclusively in the manufacture of black sporting powders.

Bottle No. 2 contains saltpetre after being refined, and as shown in the sample is ready for mixing with the other ingredients used in making powder.

Bottle No. 3 contains lump brimstone (sulphur) as received.

Bottle No. 4 contains brimstone ground at the mills, ready for mixing with the other ingredients.

Digitized by Google

Bottle No. 5 contains lump charcoal, burned especially for the exhibitors.

Bottle No. 6 contains powdered charcoal, showing the condition after preparation for powder.

Bottle No. 7 contains composition, the mixture shown being refined saltpetre, brimstone and charcoal, for the "Kentucky Rifle" quality.

Bottle No. 8 contains a piece of press cake. These are two feet square when manufactured, and result from composition after a pressure of several hundred tons.

Bottle No. 9 contains unglazed grain powder, which is produced by graining from the press cake. After drying, glazing, assorting and packing the finished powder is as per sample shown of "Kentucky Rifle."

Bottles Nos. 10, 11, 12, 13, 14, 15 contain the several size grains of "Electric" powder, illustrating the highest grade of black sporting powder manufactured. Used for long range and fancy shooting, burning extremely quick and leaving no sediment.

Bottles Nos. 16, 17, 18, 19, 20, 21 contain "Duck Shooting" powder, in six sizes of grains. Its name implies its

J. A. H. DRESSEL, TREASURER.

purpose; it is a much stronger powder than the "Kentucky Rifle" and is adapted for shotgun use entirely.

Bottles Nos. 22, 23, 24 contain the three size grains of Hazard "Trap" powder, made especially to supply a demand for a strong, clean and moist burning powder for trap and wing shooting.

Bottles Nos. 25, 26, 27, 28, 29 contain the popular size grains of Kentucky Rifle powder for general use in rifles and shotguns.

Bottle No. 30 contains the "Hazard Smokeless Powder." "Blue Ribbon" band for use in shotguns only. Made in but one size grain as shown, about half the weight of black powder. It makes no smoke, contains nothing that will injure the gun barrels, or impair the eyesight, and is safe, reliable and pleasant to use.

WINCHESTER REPEATING ARS CO.

The Winchester Repeating Arms Co., New Haven, Conn., and New York, will exhibit the well known Winchester Repeating Rifle in its different styles, their exhibit being practically the same as made by the company at Paris, Melbourne, Chicago and other points. They will also show their repeating shotgun, rifle sights and prepared ammunition. This will embrace metallic ammunition for rapid firing cannon, armor piercing projectiles, etc., as well as samples of steel plate pierced by their projectiles.

UNION METALLIC CARTRIDGE CO.

The Union Metallic Cartridge Co., Bridgeport, Conn., and New York, will display a full and complete line of its products, including everything in the way of cartridges, from the 22 calibre revolver cartridge to the great brass shells for use in high power rapid firing guns. Also caps, primers, gun wads, paper shot shells, primed shells, bullets and samples of other products turned out by the company.

WEBSTER STUDIO.

The Webster Studio, No. 106 East Twenty-third Street, New York, will exhibit trophies of the chase, embracing mounted heads and full mounted specimens. The specimens to be exhibited are as follows: Mounted heads: seven moose heads, one mountain sheep, one gombok (antelope), one wild boar, two buffaloes (adults), one buffalo (three years old) and one barren ground caribou.

Full mounted specimens: one Hudson Bay wolf, one African leopard, one black bear (Albino), one kangaroo, two wild boars, one golden eagle (loaned by Geo. K. Vanderbilt), one pregrime falcon (bird used for ancient falconry), and three flamingoes (American).

SPRATT'S PATENT.

Spratt's Patent, New York, will exhibit a full line of their patent dog food and game meal, embracing: dog cakes for all sporting dogs; pet dog cakes for dogs getting little exercise; puppy cakes for use during teething; cod liver oil cakes for delicate dogs and for use during convalescence; greyhound cakes, extra percentage of meat; game meal, for pheasants, quail, etc.; dog medicines for all diseases; dog soap, for the destruction of fleas and prevention of skin diseases; also collars, chains, leads, couples, muzzles, brushes, combs, gloves, blankets, shipping hampers and all kennel appliances.

CLEVELAND TARGET CO.

The Cleveland Target Co., Cleveland, Ohio, will exhibit samples of their famous Targets, their different styles of Traps, and of Electric Pulls. They will occupy space No. 56, and members of gun clubs will find their booth a very interesting one to visit. It will be in charge of Paul North, who will make each visitor welcome.

CUSHMAN & DENISON.

Cushman & Denison, No. 172 Ninth Avenue, New York, will show their "Perfect" Pocket Oilers, described as "the highest grade of Oiler made;" manufactured in the best quality only, and sold at twenty-five cents each. The "Star" Oiler, a first-class article of the medium grade, and a very good article for the price charged—ten cents. The exhibit will consist of the case which won the Medal at the World's Fair of 1893, and of a stand handsomely covered with maroon plush.

GAS ENGINE & POWER CO.

The Gas Engine & Power Co., Morris Heights, New York City, will occupy spaces Nos. 53 and 54, where they will have two Naptha Launches on exhibition.

MARLIN FIRE ARMS CO.

Marlin Fire Arms Co., New Haven, Conn., can be found in space No. 59, in the center, and a case of oak base and all plate glass above, being plate glass upon all sides and top. In this they will arrange one hundred or more Marlin Rifles of all the models, showing Muskets, Rifles with straight and pistol grip of all styles of butt and finish. The wood will be American and English walnut, bird's-eye maple, sycamore and other special woods. They will exhibit Guns of nickel, silver, oxidized silver and gold plating, blued and case hardened finish; will have some Guns fully gold-plated, being duplicates in some respects of the gun at the World's Fair which was the only full gold gun there; will exhibit their Take-Down with interchangeable barrels

Digitized by Google

and styles of magazines; also Revolvers with blued finish, nickel, silver and gold-plating, rubber, pearl and ivory stocks. Also Marlin Sights and specialties such as Rust-Repeller.

LE ROY SHOT & LEAD WORKS.

The Le Roy Shot & Lead Works, No. 261 Water Street, New York. The exhibit made by this company will embrace 55 samples of shot, covering everything in the shot line, from ounce balls to dust shot, which contains 2600 pellets to the ounce: also soft, chilled, buck shot and balls. Special attention will be paid to the half-sizes, known to the sporting fraternity as trap-shot. The company will also exhibit taxidermists' specimens of birds and animals.

VON LENGERKE & DETMOLD.

Von Lengerke & Detmold, No. 8 Murray Street, New York, will exhibit Francotte guns, Schultze Smokeless powder, Walsrode smokeless powder, fine English leather sportsmen's goods, fine fishing tackle, new novel live pigeon traps worked by electricity and automatic mechanical pulley arrangements, lu-mi-num bicycles and fine ballistic testing instruments.

HERMANN BOKER & CO.

Hermann Boker & Co., No. 101 Duane Street, New York, will exhibit the Spencer repeating shotgun in the following varieties: Grade D, plain twist barrels; grade C, Damascus barrels; grade B, Damascus barrels engraved; grade A, Damascus barrels full plated; and a special Spencer "Trap" gun exhibited for the first time. Also the Hollenbeck gun, manufactured by the Syracuse Arms Co., in the following grades: No. 0, twist, plain, hammerless; No. 1, twist, engraved, hammerless; and a new ejector gun with Damascus barrels on exhibition for the first time.

LEFEVER ARMS CO.

The Lefever Arms Co., Syracuse, N. Y., in reference to their exhibit, say: "It is gratifying to us to be able to present to the visitors of the Sportsmen's Exposition a system of Automatic Breech Loading Hammerless Shotguns that are neither undeveloped or untried. We are proud to refer to the record made by the Lefever Gun, extending over a period of twenty or more years. There are tens and tens of thousands of our guns doing good service in the hands of sportsmen throughout the United States and Territories. We build the only Hammerless Gun that is fitted with compenested action to take up the wear in every direction. The Guns we shall furnish are all bored and built for the use of nitro powders, though they handle black powders with equally good results. We shall make an exhibit of the different grades of Automatic Breech Loading Hammerless Shot Guns that we manufacture. These will be of the various grades and gauges. We expect that sportsmen will be particularly interested in our Guns, which are fitted with our new Automatic Shell Ejector. There has always been a prejudice against Automatic Ejector Guns of all manufacture, because they were complicated in their mechanism. We have overcome this objection, for our Ejector Gun is simplicity itself in its construction, consisting of only two pieces, one in the frame and one in the hammer. Simple as it is, it does the work to perfection, ejecting only the discharged shell and throwing it with force a considerable distance. The space we will occupy will be known as No. 93 and the party in attendance will be pleased to give any information or answer any questions about our Gun."

WILLIAM LYMAN.

William Lyman, Middlefield, Conn., will have an attractive exhibit, consisting principally of his rifle and shotgun sights, and also revolver sights of various kinds. These will be shown in a glass case in Space No. 93.

EXHIBIT OF E. I. DU PONT DE NEMOURS & CO.

The space occupied by E. I. Du Pont de Nemours & Co. has been arranged with the view of exhibiting the raw materials that enter into the manufacture of gunpowder, the manufactured article itself in its various forms, and also the packages in which the powder is sold. The arrangement of these empty packages is unique and original. A cabinet occupies two sides of the space, of which cabinet the upper part is open, the back and sides being lined with plate-glass mirrors. In this cabinet is grouped a collection of kegs and canisters, in such a manner as to show each individual keg, and yet have a neat and tasteful form. The kegs and canisters, reflected in the mirror, their gay colors contrasting finely with the cream white and gold of the cabinet, make a striking picture which must be seen to be fully appreciated. At the sides of the groups of kegs are arranged eight large clear glass bottles, containing the raw material from which gun powder is made. The materials thus exhibited are as follows:

Saltpetre: The crude salt as it comes from India.
Saltpetre: Crystalized.
Saltpetre: Refined, 1 in 10,000 of impurity.
Sulphur: Common.
Sulphur: Refined.

FREDERIC L. WEBSTER, SECRETARY.

Willow Wood: From which the charcoal for the fine sporting powder is made.
Willow Charcoal.
Charcoal: Common, for the lower grades of powder.

A show case stands in the front of the space, in which are exhibited a number of samples of gun-powder and explosives. They are placed in crystal glasses resting on a bed of rich velvet. The regular grades of rifle and shotgun powders are designated by the letters, OTP, Fg, FFg, FFFg.

V. G. P.: Is a superior Trap shooting powder.
Choke Bore: A selected powder well suited to choke bore guns.
Gun Cotton: Service Gun Cotton of the U. S. Government.
Gun Cotton: For use in the manufacture of Blasting Gelatine.
Gun Cotton: For use in the manufacture of Smokeless Powder.
Smokeless Powder: For Shot Guns.
Smokeless Powder: For 22 cal. Gallery Rifles.
Smokeless Powder: For 45-90-300, 38-55, 32-40, 32-20 and 25-20 rifle.

Digitized by Google

Smokeless Powder: For U. S. Government 30 cal. Rifles.
Smokeless Powder: For Field Guns.
Smokeless Powder: For 6-inch and 8-inch rifled guns.
Curical Powder.
Hexagonal Powder.
Sphero-Hexagonal Powder.
Prismatic Powder: For 5, 6, 8, 10, 12 and 13-inch Rifles.
Saluting Powder: U. S. Army.

An assortment of loaded shells for shotguns is a special feature. A piece of mica has been introduced into the side of these shells, so that the position of the powder, wads and shot can be plainly seen. These shells have been loaded in the best manner, and the wadding as shown, is the best in use with the justly celebrated "Du Pont Smokeless."

Another feature of this exhibit is a Winchester rifle, from which have been fired one hundred shots of the Du Pont Smokeless Rifle Powder, the barrel being in the condition the last shot left it, not having been cleaned. The rifleman has but to look at the interior of this barrel to be convinced that the powder fired from that rifle is the cleanest, and least injurious to the barrel yet discovered.

Blasting Powders shown by Messrs. E. I. Du Pont de Nemours & Co. are as follows:

A, Blasting: Used for quarrying and rock blasting, and for all kinds of work which is too hard for the cheaper B, blasting.

C, F, FF, FFF, FFFF and FFFFF, are the sizes of grain exhibited.

B Blasting, is shown in the following sizes, and is used for coal mining and for earth blasting.

CCC, CC, C, F, FF, FFF and FFFF.

PARKER BROS.

Parker Bros., Meriden, Conn., and New York, will have an exhibition, comprising a case holding fifty of the Old Reliable Parker Guns of the different styles they make, both hammer and hammerless: a full assortment including 8 to 10 bores; weights running from 5¾ to 14 pounds.

BRIDGEPORT GUN IMPLEMENT CO.

The Bridgeport Gun Implement Co., Bridgeport, Conn., and New York, will exhibit a full line of loading and cleaning implements of every variety and price, as manufactured by them, showing the most modern methods of loading shotgun shells by hand, as well as by machine, and the latest methods of measuring nitro powders. In this connection they will also exhibit a number of very old style loading outfits, which form an interesting comparison with the modern tools.

In addition to their gun accessories the Bridgeport Gun Implement Co. will show a full line of bicycle sundries, including the celebrated Bridgeport Cyclometer in all styles, bicycle stands, lantern brackets, whistles, oilers, lanterns, toe clips, bells, etc.

SCHOVERLING, DALY & GALES.

Schoverling, Daly & Gales, Nos. 302 Broadway and 84 Duane Street, New York. This exhibit will consist of Charles Daly guns, a number of which have been gotten up specially for this Exhibition. Some of them are works of art, the like of which has never been seen in this country. They also have made up some samples of guns with the Krupp steel barrels. These barrels, it is said, "according to actual test, are much stronger than any shotgun barrel used." They also have a fine exhibit of the Charles Daly three-barrel guns, showing the gun in various grades; also with the fluid steel barrel. They have a fine selection of Sauer & Sons', Suhl, Germany, guns which are made by machinery, and is a very special medium priced article. They represent the Marlin Fire Arms Co., New Haven, and have a fine selection of rifles and revolvers of their manufacture. These include the new Take Down Rifles which were put on the market last year, and a number of finely finished guns made specially for this occasion. They also represent the new rifle made by the Savage Arms Co., which will use a 30 calibre smokeless cartridge similar to those used by the U. S. Government and the foreign countries who have adapted the new small calibre smokeless powders. They also represent the Ideal Mfg. Co., who make a very interesting exhibit of their leading tools, and the numerous unique implements for cleaning, etc. manufactured by this enterprising firm.

In the sporting department they represent the well known lawn tennis manufacturers, Wright & Ditson of Boston, who are the leading tennis makers of the world. Their championship tennis ball is not only sold and adopted in this country, but in a great many foreign countries, and is kept by dealers in almost every country in the world. A. J. Reach Co., base ball, boxing glove and striking bag manufacturers, have an interesting exhibit. They are of the leading manufacturers of their line in this country. They also exhibit golf goods made by Wm. Park. Jr., of London, and Wm. Ferney of Troon, Scotland, as well as a line of their own make which are made in this country. A complete line of fishing tackle is also represented, showing the various grades from the cheapest to the best. They also show an interesting exhibit of picnic hampers which are used extensively abroad, and will probably become popular in this country. A complete line of fencing goods is also shown. These include foils of all descriptions made in Paris and Solingen. A large assortment of canvas and leather hunting clothing, shoes, leggings, etc., will be displayed, also gun cases both imported and domestic. They also exhibit a complete assortment of athletic clothing which includes sweaters, tights, jerseys, shoes, belts, etc.

HULBERT BROS. & CO.

Hulbert Bros. & Co., No. 26 W. 23d Street, New York, will exhibit a full line of athletic and gymnasium goods; field games including golf, lawn tennis, baseball, etc. They will also show a large variety of suitings for ladies' and men's bicycle suits; Majestic wheels, ladies' and men's; fly rods, lines, reels, flies, a complete line of cameras, and photographic outfits for both amateurs and professionals, and an assortment of boats and canoes. Two of the novel features of this exhibit will be the Kenwood sleeping and camping bags, which are woven from one piece of felting. These bags are warm, soft and waterproof; also show a lean-to camp similar to those used in the Maine woods. The camp will be fitted up with everything needed for the hunter's convenience.

IDEAL MFG. CO.

The space accupied by the Ideal Mfg. Co., New Haven, Conn., will be No. 59, directly in the centre, next to the Marlin Fire Arms Co. They will have a fine quadrangular case of quartered oak and French plate glass, enclosing a pyramid covered with black velvet, on which the various cartridge reloading implements manufactured by them are arranged in an artistic manner best adapted to show them up to good advantage. This case is the same one that was at the World's Fair at Chicago, and in it may be seen the original card that was issued at the Fair, announcing the medal of award to them. In addition to the medal, they were awarded four honors, which was the highest number given to anyone in this line. A full detailed description and illustration of each machine and implement manufactured by them is given in our unique catalogue, which is known to the trade and shooters as the Ideal Hand-Book. Hardware dealers who handle sporting goods will find one of these books of value to them, as it contains much matter pertinent to the trade as well as the consumer.

A. G. SPALDING & BROS.

A. G. Spalding & Bros., Nos. 126 to 130 Nassau Street, New York. They will have on exhibition a complete line of athletic and sporting goods, showing same in an entirely novel way; all styles of implements used in baseball, arch-

Digitized by Google

ery, cricket, golf, lacrosse, tennis, skating, hunting, fishing, foot ball, gymnasium, etc., etc., and an attractive line of athletic clothing used in all kinds of outdoor and field sports. In connection with sporting goods, they will have a line of boats made by the St. Lawrence River Skiff, Canoe & Steam Launch Co., of Clayton, N. Y., and this exhibit will contain some of the work shown by this company at the World's Fair in Chicago. There will also be a very attractive display of the celebrated Peck & Snyder "American Club" ice skates, for which A. G. Spalding & Bros. are the sole selling agents.

"HARDWARE" PUBLISHING CO.

In Space 14, HARDWARE will be pleased to entertain its friends, and all are invited to call at the stand over which will be found a handsome gilt sign bearing the following inscription:

ALL THE NEWS. **HARDWARE** HARDWARE EXCLUSIVELY.

A Review of the American Hardware Market. One Dollar per Year.

Published by the HARDWARE PUBLISHING COMPANY, No. 165 Chambers Street, New York

This space will be fitted up in office shape, and visitors who may be present from any part of the country are invited to call in and rest themselves, write to their friends, or make use of our facilities in any possible way. Representatives of HARDWARE will always be in attendance, to give callers a hearty welcome.

This will be headquarters for the Hardware trade in attendance at the Exposition.

SMITH & WESSON.

Smith & Wesson, Springfield, Mass., will have an exhibit consisting of a large upright showcase of quartered oak, eight feet long, four feet wide and eight feet high, having plate-glass on all four sides and on top. This case was one used at the World's Fair and is very ornamental and attractive in itself. It will contain samples of their full line of models of revolvers, single action, double action, safety, hammerless and target and of single shot pistols and other articles manufactured by them and pertaining to their particular style of arms. Included in the exhibit will be a quantity of beautifully finished and decorated specimens of their work, elaborately enrgaved and inlaid with gold and having pearl, ivory and repousse silver stocks, the latter the work of such well known houses as Tiffany & Co. and the Gorham Mfg. Co. One particular revolver is a very fine specimen of the engraver's work, consisting of engraving in relief, with back-ground of inlaid gold. This single sample represents nearly a year's work of the engraver, and is probably the most elaborately finished revolver in existence. Other revolvers will also be shown.

C. G. GUNTHER'S SONS.

C. G. Gunther's Sons, No. 184 Fifth Avenue, New York, will exhibit mounted heads, full mounted specimens, and furs of every kind.

In center of space will be a large rock 9 feet high, 12 feet long, covered with moss and ivy; on top of the rock one of the largest mounted buffaloes in the world. Mounted animals and heads will be set in and around the rock, making a grand center piece.

There will be four large white columns 18 feet high, one at each corner of the space. On top of the columns will be mounted eagles of the various kinds. About twenty-four heads will be hung around each column, such as moose, elk, caribou, all kinds of deer, buffalo, musk ox, antelope, Rocky mountain sheep, mountain goat, roan antelope, gaur ox, sable antelope, walrus, wart hogs, wild boar, eland, water buck, roebuck, reindeer, ibex, nylghau, bosch bok, koodoo, hartebeest, gnu, oryx, gems-bok, riet bok, pallah, spring bok, gazelle, cape buffalo and many others too numerous to mention.

Two large glass showcases will contain some of the finest and largest skins and ready for use ever shown, such as Royal Bengal and Mongolian tigers, lions, leopards, cheetah, nebulous ounce, jaguar, black jagaur, white polar bear, black brown, Isabella and grizzly bears, panthers, ocelots, lynx, wild cat, all the different foxes, in fact all the skins of fur-bearing animals in use today. In the way of showing what useful articles can be made from skins they will have a line on hand for sale. The sportsman will find at this exhibit almost any article that can be made from skins. We name a few: elephant's feet made in game, wine and cigar cases, etc. Vests for hunting, golf, yachting, iceboating, trap shooting, skating, toboganning, driving, sleighing, etc. Coats for hunting, sleighing and for evening wear. Robes for traps, sleighs, etc., steamer rugs, floor rugs and mats, with full heads, natural teeth and claws, sleeping bags for hunting, steamer bags, leggings, slippers, field pouches, tobacco bags, and many others.

If space will permit the following mounted animals will be exhibited: moose, elk, caribou, deer of all kinds, antelope, Rocky mountain sheep, mountain goat, angora goat, Russian Wolf, prairie wolf, black wolf, white wolf, timber wolf, panther, jaguar, ounce, leopard, brown, black grizzly and white Polar bears, ocelot, wild cat, lynx, the various foxes, groups of mink, otter, beaver, martens, skunks, raccoon, fitch, fisher, ermine, Russian sable, badger, Persian lamb, opossum, chamois, prairie dog, village, Siberian squirrel and many African animals. Four large bears, brown, white, grizzly and black, holding salvers will be placed near aisle; the salvers will hold books on fur-bearing animals, to which visitors will be welcome.

OVERMAN WHEEL CO.

The Overman Wheel Co., Chicopee Falls, Mass., will show an attractive line of goods of their own manufacture. They have endeavored to make the exhibit as educational in its character as possible, and with that purpose in view will show quantities of raw material, and goods in the various processes of manufacture. Among the goods shown will be baseballs, mitts and gloves, bats, uniforms, baseball sundries, masks, golf implements, boxing gloves, striking bags, pulley weights, lawn tennis balls, rackets, footballs, etc.

REMINGTON ARMS CO.

The Remington Arms Co., Ilion, N. Y., and New York. The exhibit made by this company will consist of a full line of their hammerless, semi-hammerless and hammer guns, in all grades, from the ten dollar semi-hammerless gun to the two hundred and fifty dollar double barrel hammerless gun; a full line of Flobert and sporting rifles, as well as military rifles, including the modern Lee rifle in small calibre, as used in the United States Navy. In this exhibit are included a line of military rifles, showing every model made since the organization of the company in 1816, since which over 1,000,000 rifles have been furnished to the various governments of the world.

In this exhibit will also be included displays of the modern hammerless gun in all its stages of manufacture, from the raw material to the finished gun. Also a case containing fifteen antique arms, selected from the large collection which the company have at their armory at Ilion, N. Y. The exhibit is contained in solid quartered oak showcase with bevelled glass front.

WIEBUSCH & HILGER.

Wiebusch & Hilger, No. 84 Chambers Street, New York. This exhibit consists of a full line of medium and high grade hammer and hammerless guns manufactured by F. Dumoulin of Belgium, and an assortment of Flobert rifles, standard and fancy patterns. Also the well known Stevens pistols, rifles, shotguns, and a new rifle known as the Ideal. Also the well known S. S. Smokeless Powder; working models for hammerless guns; carved stocks and samples of Damascus barrels in the different stages of manufacture.

Digitized by Google

The exhibit will be surmounted by letters in electric light "Smokeless S. S. Powder" for which the exhibitors are the general sales agents.

TATHAM & BROS.

Tatham & Bros., No. 82 Beekman Street, New York, will show a miniature shot tower from 20 to 25 feet high, with working machinery, showing the method of dropping shot, hoisting it out of the tank, polishing and sorting the various sizes of shot and separating the good from the bad. This will show practically the whole process employed in the manufacture of shot, except the dropping of the lead and the bagging which cannot be conveniently done at the Garden. The finished shot will be dropped from the tower instead of the molten lead. A full line of the products will also be shown.

Saw Works at Full Capacity.

The E. C. Atkins Saw Works have this month been running to their full capacity, giving employment to four hundred men. These works about a year ago began manufacturing band saws in addition to circular and cross-cut saws, and have made a great success of this class of work and are now considerably behind their orders. This week some of the departments shut down to enable the company to remove the large boiler from the old to the new boiler house, and the company is to put in an additional engine of five hundred horse-power. The company has recently purchased some new machinery of a superior type, and has plans prepared for a new office building which will be a credit to the establishment, erecting it on the corner of Illinois and South Streets.—*Indianapolis Journal.*

Philadelphia Hardware Association.

Meade Post Hall, Philadelphia, on Thursday evening, May 2nd, was the scene of a meeting of the Philadelphia Hardware Association. Several candidates' names were presented for membership and seven were elected. Prospects indicate that before the end of the year the membership will be enlarged at least fifty per cent. After the transaction of the usual business, H. L. Stortz offered a resolution that a committee be selected to make the necessary arrangements for reading papers and holding debates on subjects of interest to the Hardware trade. The resolution was adopted without opposition. The members then partook of a substantial supper at Boothby's restaurant.

E. Bissell, Son & Co., No. 12 Murray Street and No. 15 Park Place, New York, announce their last cutlery auction sale of the season, to be held on Wednesday and Thursday, May 15th and 16th, at 10 A. M. They will also, on May 16th, have an unreserved "cleaning out" sale. Dealers who appreciate a good chance, should study the details in their card upon another page of this issue.

Patterson, Gottfried & Hunter, Nos. 146 and 150 Centre Street, New York, are sending their friends a handsomely colored pocket map of New York, which not only shows the State and its surroundings in fine shape, but also introduces the receiver to the Coldwell Lawn Mowers, as leaders in their line.

The Samuel I. Goodall Co., Philadelphia, manufacturers of Bailey pattern iron and wood planes, are now tempering the cutters of the same under an entirely new process that gives them a keen cutting edge. They will be pleased to give further information on application.

Attention is specially called to page 54 of this issue, where Hulbert Bros. & Co., No. 26 East Twenty-third Street, New York, announce a Fire Sale of revolvers, sporting goods, etc. This is a rare chance to obtain bargains in this line.

Review of the Markets.

The past week marks an improved condition in the money market and shows a return of confidence. A statement made by the Comptroller of the Currency, indicates that the deposits of the savings banks of New York have been largely increased, and the reserve is far ahead of the requirement. Time money is easy, ranging from 2@3½ per cent., as to collateral and date of loan. Call money is quoted at 1½@2 per cent. The prospects for business thus far in May are brighter than since the slump in May, 1893. The agricultural prospects are also favorable, contrary to the reports in the early spring. The average of wheat and cotton will fully equal that of last year. The only depressing feature is the unsatisfactory condition of the U. S. Treasury. The monthly statement of the Treasury Department shows a deficiency of over $45,000,000 for the fiscal year up to April. The exports of gold and silver from the port of New York last week aggregated $388,797 gold and $565,066 of silver.

Hardware: Business has shown a slight though steady advance for the last three months, the volume of trade being considerably larger than for the corresponding three months of last year. Prospects indicate a still further improvement, and the trade are beginning to see things in a brighter and more hopeful way. The effect of the unusual activity in building circles will be felt soon. Up to the present time, the dealers in structural iron work are about the only ones that have been greatly benefited. When the buildings are nearing completion, a large call for builders' Hardware is expected. The orders for general Hardware are still small, and carefully selected, very few stocking-up orders having been booked. The majority of orders are by mail, houses preferring this medium, instead of ordering through traveling salesmen. The demand for bicycles is very large, manufacturers having hard work to fill orders.

Cutlery: A fair trade is reported in domestic grades, but there is no improvement in the import trade. The German strikes still continue, making it impossible to procure goods from the German makers.

Nuts and Bolts: There have been no changes in prices lately, although the information comes from Cleveland of the advance in the price of iron, $2.00 per ton, which should cause a rise in the prices of nuts and bolts. Business in the East is not in a satisfactory state, the volume of trade not being what it should. A better feeling exists in the West.

Wire Nails: The trade is in a flourishing condition, and a large amount of new business is being transacted: in fact, the mills have more orders than they can take care of. Prices are up, 90 cents being the bottom figures for carload lots at Pittsburg, while small lots bring 75 cents. The New York quotations are $1.10 for carload lots, and $1.15 to $1.20 for small lots out of store.

Cut Nails: The market is in a healthy condition, there being quite a large demand for cut nails. Prices are maintained, and the manufacturers report many new orders. The quotations are for carload lots on dock 80 cents at a 60 cent average. Small lots out of store 95 cents.

Tacks: The new list evidently meets with the approval of the trade, as there have been no complaints made about it. Prices are more uniform. Orders are more numerous, but the improvement is no doubt due more to the naturally better condition of business than to the effect of the new list.

Red Lead: Lots in kegs less than 500 pounds, 6 cents; in lots of 500 pounds and over, 5½ cents. German, 4¾ to 5 cents; English, 4¾ to 6 cents.

White Lead: The quotations governing white lead are as follows: Pure white lead, dry and in oil, lots of less than 500 pounds, 6 cents; 500 pounds or more, 5½ cents.

Zinc: There are no changes in quotations, prices being 3¾@4¼ cents for jobbing lots.

My dear, dear Lord,
The purest treasure mortal times afford
Is spotless reputation---That away
And wheels may be painted iron or gilded clay;
An honest cycle that has stood the test,
Is the famous one with the Humber crest;
In quality is its fame; both grow in one;
Take quality from it and its fame is gone.

HUMBERS have been the favorite Bicycles of two generations of riders. They are still the - - STANDARD.

Clapp & Co., bankers and brokers, New York, in their weekly letter, say: "Higher prices, wages and money give cumulative evidence of growing activity and profit in manufactures, trade and commerce. Confidence, as a product of right attitudes and methods in law and finance, is rarely appreciated at its true value, and never was in as excessive production as silver and gold. Financiers without fear are now steadily pushing reconstructive work. Foreign capital is inclined to check its importunity and embrace its opportunity. Where enterprise leads, labor and capital will follow in the general revival of business. Straws.—35,524,890 pieces of mail were handled by the United States post-office in March, against 32,635,370 pieces a year previous. April will likely show larger gains. The production of gold is reported increasing steadily. Latest reports indicate that 1894 produced more gold than any previous year, and that 1895 may exceed it. Clearings Southern States show increase of double that shown by all cities outside of New York. The first six months under the McKinley tariff of 1890, United States custom receipts were $114,531,953, against receipts from the first six months under free trade of 1894 $79,687,458."

THE BALTIMORE TRADE.

Considering the long spell of rain which has existed during the past fortnight, business in this section has been remarkably good. The principal difficulty at the present time is occasioned by the delay of manufacturers in shipment of seasonable goods. In the Bicycle line this is most noticeable. Prices are on the jump! Each mail brings advices of advances, which have been long promised and are truly welcome. It has been our experience that a declining market always carries with it a corresponding reduction of purchases; and in the event prices retain this upward tendency until the fall, we can safely rely upon a very good business at that time.

In the agricultural and fruit growing sections, merchants are busily engaged in supplying local wants and voluntary orders of the "hurry type" are of daily occurrence.

Collections might be better; but there is every indication of an early improvement even in this department.

THE TABB & JENKINS HARDWARE CO.

THE PHILADELPHIA TRADE.

There is no doubt that trade has brightened and goods are in better demand, with evidence that dealers are stocking up more liberally and not pursuing to the same extent the hand-to-mouth policy which has been the only line of action for the last two or three years.

Manufacturers are generally reporting an increased demand, and some of them state they are rushed with orders, and there is already difficulty in getting some goods.

Prices are generally much firmer in tone and the market

Digitized by Google

is advancing; all conditions seem to point to a betterment in prices.

The advance is legitimate. Commencing with increased cost in iron ore, and higher wages paid to the laborers, the same conditions seem to govern metal throughout its entire production.

Labor all over the country appears dissatisfied with the present low schedule of wages, and the papers are daily reporting strikes for higher wages; all this means higher prices, and while it is not anticipated that there will be any sudden or unhealthy rise, it seems to be the general opinion that there is to be a conservative and permanent improvement in prices.

The demand for spring goods continues unabated. Bicycles are simply at a premium. We heard of one jobbing house who recently offered a brother jobber $7.00 extra on every machine if they would turn over their stock to them. The offer of course was declined.

Factories are running their utmost capacity, and orders are being filled as far as possible, but the condition is far from satisfactory.

Wire Nails are firmer, and the market is in a most unsettled condition with prices tending upward, and it is likely that Cut Nails will share in the advance.

BIDDLE HARDWARE CO.

THE DAVENPORT TRADE.

Copious rains have fallen quite generally throughout the western and southern portions of Iowa, covering perhaps three-fourths of the area of the State. Davenport does not happen to be in the moistened portion, but we know full well that it will rain on the just, etc.

Lawn Mower business is rattling from early morn until into the night, when good men sleep, or, at least, when they should sleep.

Screen Wire is selling rapidly, but at a price that obscures any possible view of a profit to the jobber.

While there is an apparent coldness between the dealers in refrigerators, it is a chilly day when orders are not freely executed.

Ice cream has taken the place of hot oysters, and freezers are in demand.

From the amount of galvanized netting going out, we infer that the festive spring chickens' territorial rights are becoming rapidly circumscribed.

The wire nail fight alluded to in our last letter, is still on, and it is to be hoped that it will be fought to a finish and that a complete "knock out" will occur in the very near future. By the way, some of the wire nail manufacturers have advanced their prices.

Trade in general Hardware is good, especially so in builders' Hardware. There is more building being done at this moment than ever before at one time in the history of this city.

The new railroad bridge across the Mississippi is assured.

Work is about to commence upon the Davenport, Clinton & Eastern Railway, connecting us with Clinton by a direct line following the Iowa shore closely, giving the first railroad to the towns of LeClaire and Princeton.

Crops are looking well, and if blossoms count for anything, we will have fruit in abundance. Collections satisfactory.

SICKELS, PRESTON & NUTTING CO.

THE CLEVELAND TRADE.

The turn for which we have been waiting patiently for two years past seems to have arrived. We are able to report a very much better feeling and more active business than it has been possible to chronicle for some time. What the exact reason for it is we do not pretend to say, but are quite satisfied to have the conditions exist, without puzzling our brains to account for it. In our immediate section we are suffering for lack of rains, but the condition has temporary compensation in stimulating the demand for garden hose, lawn sprinklers and such articles.

Wire Nails: The manufacturers have finally tired of the extremely low prices that have been ruling, and an advance has been made which will probably be sustained, and if general conditions continue to improve as they promise, will undoubtedly be followed by further advances.

Barbed and Smooth Wire: The market for these articles continues unsettled. Consumption has not been as great as usual up to date, but we believe that it is only postponed, as the early spring months were not so favorable for its use as customary. Prices are extremely low, and no dealer can make a great mistake in providing for his wants.

Poultry Netting: Is moving in large quantities. The random quotations made by some houses early in the season were totally without good reason, and those houses which refused to sell below a legitimate price, find that their sales are fully equal to former seasons.

Refrigerators and Ice Cream Freezers: These goods are commencing to move in large quantities. The low price of ice will undoubtedly stimulate the demand. In this community ice is supplied at about one-half the price ruling in 1894.

Bicycles: It is impossible to supply bicycles as rapidly as orders are received. Dealers must make up their minds to be lenient with their jobbers, and jobbers must be equally lenient with manufacturers. Every indication points to an unprecedented sale for 1895, and the Hardware dealer who does not yet handle them as a part of his line is certainly not "keeping up with the procession."

All conditions seem to point to a new era of prosperity and normal business conditions. We hope that the improvement will continue in its present slow and sure manner, and that the fall of 1895 and spring of 1896 may be seasons that all Hardware dealers can look back upon with emotions of profound pleasure.

MCINTOSH-HUNTINGTON CO.

THE GRAPHITE TRADE.

We have no hesitation in awarding to the month of April all deserved honors, and have no complaints to make regarding the state of business. We have worked hard, and have been promptly rewarded as a consequence. The largest percentage in gain for the month was in Lubricating Graphite; next in order Crucibles, Lead Pencils, and so through the general line of Graphite productions.

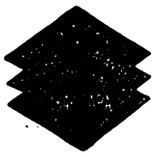
The enormous demands for bicycles have created a lively interest in the Chain Lubricant, of which we are the leading manufacturers, which will in some measure account for the gain in that department, but the general business is strong and steady, or what Cowper calls

"A business with an income at its heels."

JOSEPH DIXON CRUCIBLE CO.

Humber & Co. have established a free reading-room for the use of their employees at Westboro, Mass. A fine, well-lighted room has been secured, and handsomely fitted up with tables, lounges, electric lights, lavatory, etc., and all the periodicals, together with the daily and cycling papers, will be kept on file. The policy of Humber & Co. toward their people is exceedingly liberal. Those who work in the great factory at Westboro are well paid, well housed, and well treated, and now that the reading room is established they will have a pleasant evening resort.

F. E. Kohler & Co., Canton, Ohio, announce under date of May 1st, that they have "purchased patent No. 507,484, dated October 24th, 1893, which is the first patent on lawn rakes showing a sheet metal U shaped head, and we hereby warn all parties against making, selling or using infringements."



Sargent & Co., New York and New Haven, have, under date of May 1st, issued a revised list on Steel Squares, Steel Rules, etc.

Garden or Lawn Hose.

TO KEEP the grass green, the lawn beautiful, the garden thrifty, to lay the dust and cool the air, your customers will soon call upon you for Lawn and Garden Hose. Have you a stock to supply early buyers? We can furnish you with hose that will not burst, will not leak, will not sweat, that will please your customers, keep them pleased, and increase your business. From the different brands enumerated below, we can meet your views as to price and quality.

"1846 Para."—A half century of good service stands behind this hose. It is recognized as the very best in the market, being made from the finest Para rubber and cotton duck woven specially for us. Hundreds of testimonials from the trade and public place its excellence beyond dispute.

"Double Diamond."—A strong, durable hose, warranted to give entire satisfaction. It is carefully constructed of excellent stock, and there is nothing better offered, 1846 Para excepted.

"Carbon."—This brand will render entirely satisfactory service. It is constructed in a superior manner, and gives greater value for the price than any offered by other makers.

"Double Diamond" Cotton Hose.—The fabric of this hose is circular woven, of a heavy and high grade of yarn, and is so pliable that it can be bent or twisted without injury. It is exceedingly strong, will withstand 500 lbs. pressure, and we can safely warrant it not to burst under the pressure of any system of water works. Every length is tested, and if hung up and allowed to dry after use, it will render good service for years.

"Spider" Cotton Hose.—This is of precisely the same weave as the Double Diamond, and while of lighter fabric, will withstand ordinary water pressure and render reasonable service.

"Spider."—Our cheapest quality; is several grades higher than the best competition hose in the market.

THE WARNER LOCK CO.,
412 Manhattan Bldg.,
Chicago, Ill.

N. & G. Taylor Co., tin-plate manufacturers, Philadelphia, announce that they have given up their old quarters in Water Street, New York city, and have moved to the Cable Building, No. 621 Broadway, where they have opened new and commodious offices with a corps of assistants, in charge of George Livingston, a gentleman who has long been identified with the building and kindred trades of New York and Brooklyn. The firm also announce that they have secured larger and better warehouse facilities for the quick filling of orders.

HARDWARE, of New York, has been enjoying the luxury of a birthday. The issue of April 10th is a large special number with a handsome double cover in honor of the Fifth Anniversary of its appearance. It contains 148 pages of which 100 pages are filled with advertisements. It contains an immense amount of information of value to the Hardware trade and incidentally to the users of builders' Hardware as well. This publication is not the oldest in the line it represents, but it is rapidly forging to the front and it bids fair to become the leader in that line.—*Western Builder*, St. Louis, Mo.

The Niles Tool Works, Hamilton, Ohio, have decided upon a very material and prosperous move. With the indications of a general resumption of business, based on their receipt of orders, they have found that their shop capacity is too small and they have therefore plans and specifications under way for the near coming erection of an addition to their great plant, 60x400 feet in dimensions, two stories in height and the entire structure is to be substantially of iron and steel.

Patterson, Gottfried & Hunter, Nos. 146 and 150 Centre Street, New York, are sending their friends some quaint designs in colors, and shaped in the forms of spades, hearts, diamonds, clubs, crescents, etc. Their various lines of goods are described upon the same.

Important Auction Notice

LAST CUTLERY SALE THIS SEASON.

E. BISSELL SON & CO.,

AUCTIONEERS.

Wednesday and Thursday, May 15th and 16th, at 10 A. M.

Gainesville, Fla.—E. Baird & Co., wholesale and retail Hardware, preparing to add bicycling department. Correspondence with manufacturers of bicycles and bicycle sundries solicited.

Gibtown, Tex.—D. M. Wilson, of Vineyard, Tex., new Hardware store opened. Will take up bicycles. Correspondence invited with manufacturers of wheels and sundries.

Lincolnton, N. C.— Ramsaur & Burton, Hardware and leather goods, will take up bicycles if satisfactory inducements are offered.

Longport, N. J.—Coty Hardware Co., incorporated to continue the business of Julius Coty and Richard R. Albertson. Correspondence with bicycle manufacturers invited.

Mount Airy, N. Y. — Davis & Newton, general merchandise, will take up bicycles. Correspondence with manufacturers for wheels and sundries solicited.

Rockingham, N. C.—John W. Covington, general merchandise, contemplates adding bicycles to his business, and to that end invites correspondence with manufacturers of wheels and sundries.

Recent Fires.

Rochester, N. Y.—Rochester Cycle Co., at Nos. 73-75 South Saint Paul Street, fire loss to factory of $7000; $4000 being upon the building, covered by insurance, and $3000 upon the stock. Manufacturing will be resumed as soon as losses can be adjusted. The company state that there will be no delay in deliveries.

Miscellaneous.

Cleveland, Ohio.—The Hoffmann Bicycle Co. report adoption of triangular tubing for reinforcing the frames of the Hoffman bicycle. An application has been made for a patent on the device.

Freeport, Ill.—The Stover Bicycle Mfg. Co. report satisfactory business, now selling double the number of wheels sold at the same time last year. Their factory is running night and day, turning out forty wheels daily.

Paterson, N. J.—The Bredder Allen Cycle Mfg. Co. contemplate extending business, and are making efforts to secure additional capital for that purpose. The company report more orders than it can handle.

Philadelphia, Pa. — Garden & Brewster, bicycles, report business good, having sold more wheels within a ten days' period recently than ever sold before in that length of time.

FIRE SALE.

Hulbert Bros. & Co. will place on sale at their new storage warehouse, No. 532 to 540 West 22d Street, on the morning of May 20th, the goods damaged in the burning of their warehouse in West 21st Street, goods consisting as follows:

30,000 REVOLVERS,

3,000 RIFLES,

5,000 SHOT GUNS,

These are damaged by water, only.

A large number of Chest Weights, Rowing Machines and Athletic goods, damaged by fire and water.

The damage, to a very large proportion of the goods, is very slight, and the sale will afford bargains in fire arms never before given to the trade.

Schedules of these goods, with prices attached, for the trade only, can be had on application, and all orders will be filled consecutively.

I Challenge the World

To Produce a More Perfect

Adze Eye Nail Hammer

Than I am now sending out to the Trade.

Hurry up, Boys, I have a splinter in my hand too!

I have recently introduced in my Forge Department, improved facilities for turning out Adze Eye Nail Hammers; every Hammer must come perfect in shape and as near uniform as Forging can make them.

Considering the increased use of Wire Nails and Brads, I have so tapered the slot in the claw that it will draw the smallest as well as the larger nails.

The Eye must come "True" making the "Hang" of the Hammer feel right in the hand.

I should like every dealer in the Country to have one of my new Adze Eye Nail Hammers for his showcase, that the Mechanics may see it and pass upon it.

EVERY HAMMER WARRANTED.

I have made some special Boxes to hold one Hammer and will send, prepaid, to a Dealer in any part of the United States, a sample of the New and improved, ANCHOR BRAND, No. 1½ Adze Eye Nail Hammer on receipt of **50 CENTS.**

THE MILLER OIL HEATERS.

Just the Thing for All Time and Every Day Use. For Spring, Summer, Autumn and Winter.

No Disagreeable Odor. No Ashes Light and Heat in Abundance.

No. 327. No. 3 Lift Burner. Height, 32½ inches. Spread of Base, 12½ inches. Nickel Finish.

They are an Assured Success, from the fact that the Lamps used are "The Miller Lamps" THE LATEST AND BEST.

IN THESE HEATERS YOU HAVE A HAPPY COMBINATION: The Best Light. The Best Parlor Heater. The Best Cook Stove.

They are Clean and Odorless. Require no more care than an ordinary lamp. Cylinders of Russia Iron, with Removable Nickel Tops, or with Combination Heating Drum and Grate for Cooking. The No. 3 BURNERS have a FLAME OF 15 SOLID INCHES. "MILLER" HEATERS have outside SCREW ADJUSTMENT for regulating the Wick and PLUNGE MOVEMENT FOR EXTINGUISHING; each one is supplied with an extra Flame Spreader so that Lamp can be used for ILLUMINATING when not wanted as a Heater. All of the Best Material and Workmanship.

READY TO LIGHT, WITHOUT REMOVING CHIMNEY.

They will heat a large room perfectly. A tea kettle of water heated in a few minutes by removing canopy.

Perfectly Safe. They Cannot Explode. Oil Never Gets Hot in the "Miller" Heater. A Good Companion for a Cosy Nook. A Comfort on a Chilly Morning.

A MOST IMPORTANT FEATURE.

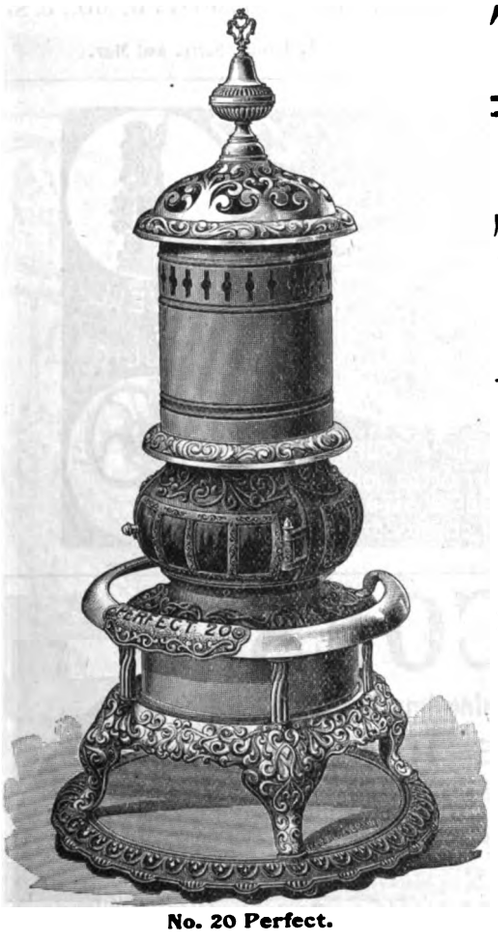
☞All the weight of the Cylinder rests solidly on the FOUNT and not on the BURNER in these Heaters.

In IMITATIONS of these Heaters the Cylinder is supported on the BURNER, a CHEAP and WEAK CONTRIVANCE, which makes it necessary to REMOVE THE CYLINDER for lighting and which renders it impossible or very dangerous to use the Heater for cooking purposes.

Send for circular showing Heaters with ovens for cooking. We have 12 varieties.

These Lamps hold One Gallon of Oil. Will Burn 12 hours. Easily Lighted by Lifting Top of Burner.

——MANUFACTURED BY——



EDWARD MILLER & CO., MERIDEN, CONN., United States of America.

NEW YORK STORE: 10 & 12 College Place and 66 Park Place. BOSTON STORE: 63 Pearl Street. CHICAGO STORE: Rooms 808 and 809 Masonic Temple.

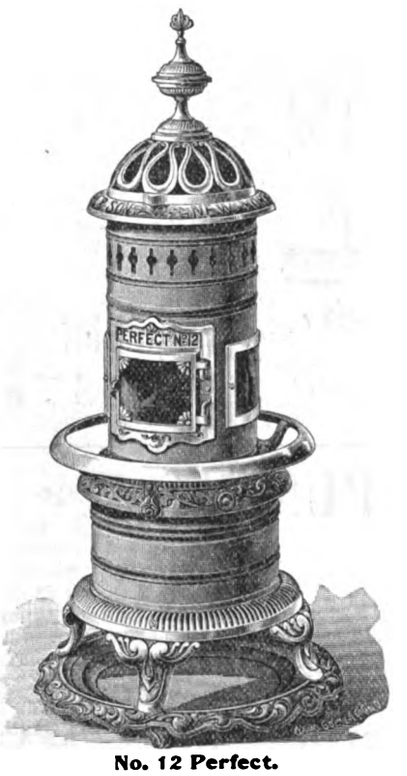
No. 328. No. 3 Lift Burner. Height, 32 inches. Spread of Feet, 11¼ inches. Russia Iron with Nickel Lamp and Trimmings.

The Perfect Oil Heaters

No. 20 Perfect.

No. 20 and No. 12.

The Two Leaders For This Season.

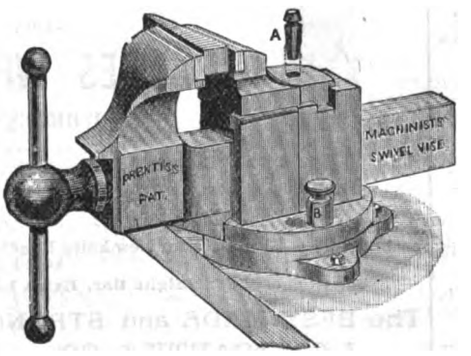


All brass tanks and all other features worthy of incorporating in oil stove construction.

If you wish to knock out competition handle these stoves.

MANUFACTURED BY

J. H. CORT & SON,



41-51 Adams St, 138-154 Water St., **Brooklyn, N. Y.**

PERSISTENT

Enterprising people are beginning to learn the value of advertising the year round. The persistency of those who are not intimidated by the cry of "dull times," but keep their names ever before the public, will surely place them on the right side in the end. Think over the persistent advertisers you know.

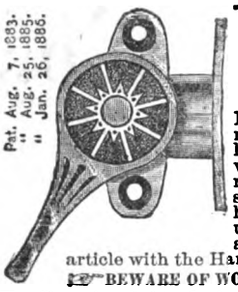
BEST AND CHEAPEST
STONE WATER FILTER
ON THE MARKET.
Tripoli Stone Block System.



Set up ready for use. There are two crocks, each of four gallons capacity—an upper one holding the Filter Block, and the lower one, which can be used as a water cooler if desired. This Block is four inches in diameter by the same in height, and is hollowed out on inside. This fits on a metal tube, which fastens by means of a nut to bottom of Filter Jar. Block can be lifted off tube, cleaned and replaced in two minutes, and with no trouble at all. Water passes from outside of block, through the walls, into the hollow chamber, and from thence, by the means of the Drip Tube, into the lower receptacle.

"Excellent Cream!"

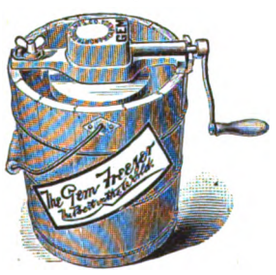
WHITE MOUNTAIN FREEZER

Improved for 1895

With which the finest quality of cream can be produced in Four Minutes.

As features of especial merit we claim:

A STRONG, waterproof tub, bound with heavy, galvanized iron hoops that fully protect the tub, and do not fall off; the gearing completely covered, so that nothing can get between the cogs. Cans full size and made of the very best quality of charcoal tin plate; beaters of malleable iron and tinned; all castings attached to the tub nicely galvanized to prevent rusting. It is the only Freezer in the world having the CELEBRATED DUPLEX DASHER, WITH DOUBLE SELF-ADJUSTING WOOD SCRAPING BAR, by the use of which cream can be frozen in less time, yet finer and smoother than can possibly be produced in any other Freezer now in use.



Get the Best. All Leading Jobbers Sell Them.

THE WHITE MOUNTAIN FREEZER CO., Nashua, N. H.

The BEST FREEZERS Made

HAVE
Electric-Welded Wire Hoop Pails,
MADE OF
Best Virginia White Cedar,
AND
Drawn Steel Bottom Cans.

SOLD BY LEADING JOBBERS.

HAVE YOU SEEN THE DRAWN-STEEL BOTTOM CAN ?

STRONGER. LAST LONGER. HANDSOMER.
EQUALLED BY NONE
IN PERFECTION OF DESIGN AND CONSTRUCTION AND PRACTICAL RESULTS IN USE.

Manufactured Exclusively by

North Bros. Mfg. Co., Philadelphia, Pa.

SAVE YOUR CHAIN.

USE EAST INDIA STICK GRAPHOLINE.

The genuine bears our trade mark. Beware of imitation.

Nothing is too good for your chain.

East India GRAPHOLINE costs a little more but it is High Grade, put up in a handsome metal box with adjustable bottom. Can be used without soiling the hands. Carried in any tool bag. Sold by all large bicycle dealers in both America and Europe.

PRINCE WELLS,
Sole Imptr. 632 Fourth Ave.,
LOUISVILLE, KY.

Sample stick by mail, 25 cents.

Electrotype furnished for Catalogue.

OHIO ICE CREAM

A high-grade Freezer.
Mechanically Correct.
Fittings Accurate.
Easily Cleaned.

"THE RESULT OF 25 YEARS' EXPERIENCE."

Thoroughly mixes the Cream from bottom to top. Neither Salt nor Oil can reach the Cream. It has all the good points of other makes, and many more of its own.

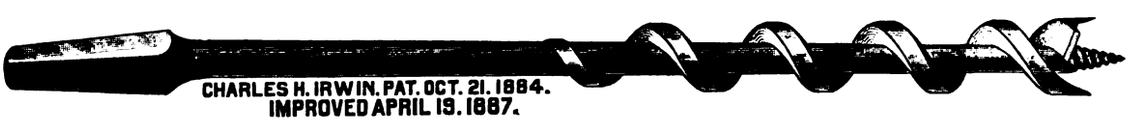
COPY OF LETTER.

SPRINGFIELD, OHIO, February 21, 1895.



IRWIN AUGER BIT COMPANY, Wilmington, Ohio.

Gentlemen:—We send by same mail one of your Machine Bits, which, without dressing or handling in any way, has bored 57,000 holes 4 1-2 inches deep, and is still good. It has such a record that the party felt you would be glad to know it.

Yours, etc.,

THE SPRINGFIELD HARDWARE CO,

Per Wiseman.

ORANGE SPORTING POWDER, MANUFACTURED BY LAFLIN & RAND POWDER CO.

ORANGE RIFLE EXTRA, ORANGE SPECIAL, ORANGE DUCKING, ORANGE LIGHTNING.

The attention of TRAP AND FIELD SHOOTERS, RIFLEMEN AND DEALERS IN GUNPOWDER, is called to the new ORANGE SPORTING POWDER, patented April 17th, 1888, and branded ORANGE RIFLE EXTRA.

This Powder is quick and strong, and burns with such perfect combustion that the only residum left in the barrel after shooting is a dark oily substance easily removed While this Powder is not exactly SMOKELESS, it gives only a light bluish smoke, which is almost instantly dissipated, and interferes but little with the shooting of the second barrel, taking the place of the so called smokeless powders in this respect.

This brand of powder sells at the same price as any other brand of Rifle Powder and is superior to any made. No person who shoots can afford not to give it a trial, as after once trying it he will never use any other Powder when he can obtain the ORANGE EXTRA. Weight and quality guaranteed.

MILITARY, MINING AND BLASTING POWDER.

PLACE THE MATTER CLEARLY.

To make a man realize an idea as you realize it, is what is necessary to make him understand his needs. Advertisements should aim to place a matter so clearly before the public that they see it as clearly as the advertiser does.

Digitized by Google

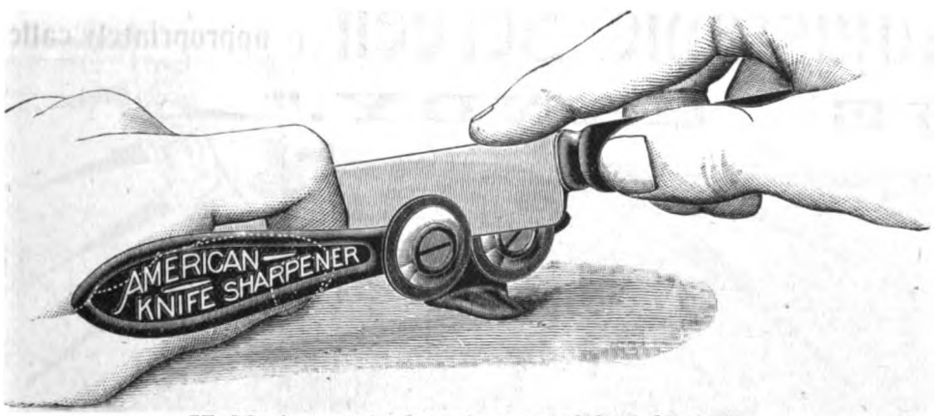
IT TAKES A PULL,

to separate the plies of our rubber belting. A yoke of oxen can do it, but hard service won't, so strong is the friction. Our belting is uniform in width and thickness, consequently more of its surface comes in contact with a pulley. That means



NO WASTE OF POWER.

Rubber belting is never injured by water, hence it is best for out-door use, for wet localities, and for mills where the atmosphere is surcharged with moisture or steam, as in paper mills, tanneries, etc. Buy the durable kind, branded 1846-Para, Double Diamond or Carbon, made for 50 years by the

NEW YORK BELTING & PACKING CO. LTD

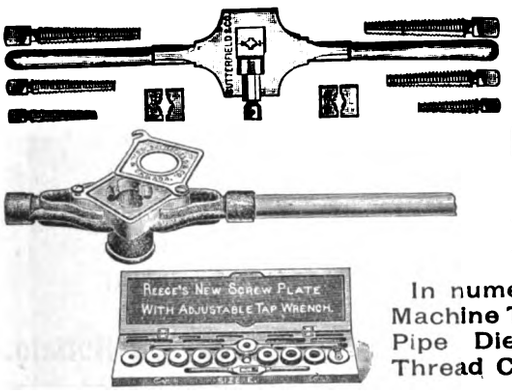
The Best Adjustable Screen is appropriately called

THE "HANDY."

MADE IN EIGHT SIZES.



A FEW OF ITS SUPERIOR POINTS ARE:

1st. EASE IN HANDLING.—The hook-shaped pull-bars fastened securely in the centre of the sliding ends afford a ready hold for convenience i placing and removing the screen at the operator's will.
2d. When placed under the sash, it will readily adjust itself to windows in square or out of square.
3d. The Screen is made of hard wood, natural color, finished in oil, and is the neatest, lightest and strongest screen made.
4th Has Box Panels, making both sides alike.

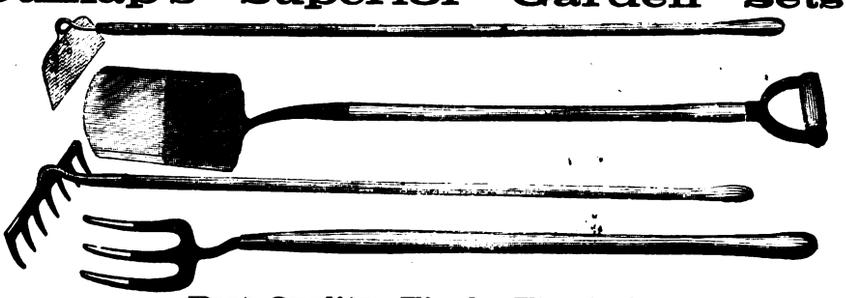
The AMERICAN WICK is made on scientific principles. The gum inherent in the natural cotton is taken out, and no expense is spared to produce a wick that will give THE GREATEST ILLUMINATION.

THE

AMERICAN WICK



Made by the

WICK DEPARTMENT

Of the STANDARD OIL CO. of NEW YORK.

Oil drawn up through the AMERICAN WICK burns with a large, clear, white light and the flame does not drop off in size as it does when a poor wick is used. When the cotton is clogged with its natural dust and gum the full illuminating power of the oil is not obtained and the complaint is heard that the light DROPS.

OHIO "WATER TIGHT"

STEEL MORTAR and BRICK HODS

OHIO "Water Tight" Steel Hods are from 25 to 50 per cent. lighter when in use than the common wooden Hod.

Ohio "Water Tight" Steel Hod bodies are positively Water Tight. These bodies are the only ones made, folded from a single piece of sheet steel without cutting the metal, are reinforced on the edges and at the dumping point By our special devised machinery we are enabled to furnish the strongest, lightest, most durable and only double end mortar and brick hods offered to the trade.

Our improved Malleable Iron Fork and Wooden Shoulder Saddle make it easier for the user to carry, or to attach a piece of cloth, should he so desire, to the under side of the saddle than the old style.

With our improved one piece Malleable Iron Fork and socket for holding the hardwood handle and taking up the shrinkage, a broken handle can be readily replaced, and hods shipped knocked down.

The Bicycle Drouth.

It is doubtful if such a condition of affairs as exists at present in the Bicycle business has ever before been witnessed by our naturally wide-awake dealers.

Scarcely a leading manufacturer of wheels, but has found his sales—through agents greater in number than he ever supposed it was within his ability to gather—,so far surpass his most sanguine expectations, that he is to-day unable to supply to any appreciable extent the constant, steady, and increasing demand for high-grade wheels apparent on every hand.

Of course the desire of the people to own and enjoy the incomparable pleasure derived from the now indispensable addition to our domestic economy, has been greatly fostered and encouraged by a liberal display of money expended in bicycle shows throughout the country, which were of vast importance in exhibiting the many hundreds of valuable devices which our cycle makers were adopting, and thereby improving their increasing product, and also by a judicious system of advertising, well calculated to arouse the engrossing interest of the would-be purchaser and enabling him to make a decision where previously all was vacillation.

The buyer in prospective has been made familiar with the constructive excellence of all the leading wheels on the market; and in no branch of industry has it ever been found necessary to make so complete a campaign of education, but the results have, more than ever, justified this manner and method of conducting sales. As it takes months of preparation for a season's output of wheels, it is fair to presume in the case of all the leading makers, every bicycle they can produce with safety for the entire season, is already sold under contract, with orders being turned down every day for wheels which are unreachable, and this state of affairs is unprecedented.

A similar stimulus is being given to other lines of business, in sympathy with a growing demand for goods. Orders for leading lines are coming in, in a largely increasing volume. Contracts for Fall are being given in May for the first time in two years, by sagacious buyers; wages are being gradually restored to the patient workers by the conscientious manufacturer.

Prices of leading products are advancing perceptibly though on a conservative margin; and where the conditions show that a complete supply to meet the full demand is simply impossible. The cost of raw material increases as the mills and factories become confident buyers, and the iron of life is again injected in the nation, and the color again makes its appearance in the cheeks of trade; the feverish eye of speculation notes a surplus such as the thirty to forty millions in the banks of our city give evidence of, as well as even one day's record-beating sales in Wall Street of over 700,000 shares show proof, which surely indicate that it is again possible for one merchant to grasp the hand of another and smile with happy anticipation of the future, rather than frown with an air of nervous apprehension, as has heretofore been the prevailing custom.

Business and Municipal Affairs.

Business administration of municipal affairs is on trial in New York City, and every merchant owes it to himself as well as the community, to hold up the hands of Mayor Strong in his efforts to give this city good municipal government. He resigned his position as president of one of the largest banks in this city, and neglected his other commercial interests, not because he wanted to, but because urged by his fellow merchants and citizens to do so for the public good. He is doing his level best to give New York a good business administration, and the business men of New York, without regard to party, should back him up with voice and pen whenever they have an opportunity to do so.

The Permanent Sportsmen's Exposition.

The Annual Sportsmen's Exposition is an assured, permanent fact. The recent gathering at Madison Square Garden demonstrated that fact, beyond all question. The interested multitudes who for a week poured through the corridors, and gave delighted attention to the exhibits, set the seal of public approval upon the venture, and made it impossible to come to any conclusion other than the above. It was an Exposition that won squarely upon its merits. Nothing more attractive or artistic in its way was ever known in that place of many shows. The scenes that greeted the vision upon entering the Garden, disarmed adverse

Digitized by Google

criticism, and a detailed examination of the exhibits fortified the good opinion first formed. As an exhibit for the eye alone, it was well worth the visit; as a means of education in all that relates to healthful and innocent sport, it was beyond valuation.

No meed of praise is too great for those who have patiently labored for so many months to make this Exposition worthy of the great interests which it represented. Their reward was in the event itself. To Charles Tatham, the president; J. A. H. Dressel, the treasurer; Frederic S. Webster, the secretary, and P. G. Sanford, Charles Daly, J. Von Lengerke and Jacob Studer, of the board of trustees, more especially belongs the honor of having made the Exposition what it was.

The success of next year's exhibit is a foregone conclusion.

The Michigan Hardwaremen are moving in favor of a State organization of a fraternal nature. The call published elsewhere in this issue gives the details thereof. The good work is moving forward in all directions.

Hartford Hardwaremen Dine.

At the sixth semi-annual dinner of the Hartford Hardware Association, held at the Elm Tree Inn, Farmington, Conn., on the evening of May 16th, the Association had as guests the Hardware Social Club of Western Massachusetts. The local organization were thus able to reciprocate courtesies received at the hands of the Massachusetts club. The visitors present were: E. D. Wells, G. E. Russell, W. A. Pearson and H. R. Russell, of Holyoke; H. G. Noble, James H. Bryant and A. B. Parks, of Westfield; E. R. Taylor, of Chicopee Falls; Charles A. Bryant, of Chicopee; F. E. Clark, J. Douglass Law and C. J. Blackstone, of Springfield. Those of the Hartford organization who attended the dinner were: James R. Crofut, S. L. Way, John B. Clapp, W. F. Girard, E. B. Thrall, John C. Tracy, George I. Clapp, L. L. Ensworth, W. F. Jones, H. N. Robinson, R. F. Way, E. M. Francis, George Breed, William Francis and Irving C. Treat.

Following the dinner informal speeches were made by several of those present, and the historian, Gen. John B. Clapp, read a historical sketch of each of the eleven firms comprising the Hartford Hardware Association. There are eighteen individual members of the Association, ten of whom have been in the business over twenty-five years. They are: William Francis, 54 years; S. L. Way, 46; E. B. Thrall, 37; L. L. Ensworth, 36; W. E.. Cone, 34; John Tracy, 33; H. N. Robinson, 32; S. F. Cadwell, 32; John B. Clapp, 29; W. Frank Jones, 25 years.

Failure of Buehler, Bonbright & Co.

James S. Bonbright, trading under the name of Buehler, Bonbright & Co., Hardware, Philadelphia, Pa., has made a general assignment to Herbert Eells for the benefit of all creditors. "The assets and liabilities could not be learned, and it was stated by Mr. Eells that, owing to the great variety of goods in stock, it would be impossible to render a statement for several weeks. The cause of the trouble, Mr. Eells stated, was due purely to the prolonged business depression, and the depreciation in value of the staple articles of their trade, in many instances ranging from 25 per cent. to 40 per cent. On March 26th last it was decided to dispose of the stock, and it was subsequently sold to a competitor. Forty thonsand dollars of the firm's money was from the estate of the senior Bonbright, who died in 1892, and was left by him as a loan in trust, for his widow and children. Finding the business failing and the demands of other creditors pressing, it is said that Mrs. Bonbright pressed her claims to priority. The business was a very old one and had a large and prosperous local trade, and the firm was well-known through the adjacent States. It was founded in 1827 by Martin Buehler and became successively Buehler & Brothers, Buehler, Howard & Co., and subsequently Buehler, Bonbright & Co., then consisting of Martin Buehler, George Bonbright, Charles P. Suesserott, Edward D. Eyre and Thomas A. Fleck. Through death and retiring members the firm was depleted, and a new firm was organized January, 1888, consisting of Edward D. Eyre, Thomas A. Fleck, James S. Bonbright and Gilbert W. Molloy. Of these, Mr. Fleck and Mr. Molloy retired in 1891 and 1892 respectively, and Mr. Eyre died in January, 1893, leaving Mr. Bonbright as sole partner. Mr. Bonbright continued the business under the old firm name until the present crisis."

Michigan Hardware Dealers Organizing.

The movement which has become so general toward the formation of Hardware associations during the several years past, has reached Michigan, and there is good evidence to indicate that within a month or so the Hardware dealers of that great commonwealth will be joined in fraternal bonds. A call has been issued for a meeting to be held on July 9th, and in all likelihood Detroit will be the place of gathering. The purpose has been to reach every dealer in the State, and if any have been overlooked, it has been by error, and such are asked to forward their names and views to F. S. Carlton, care of the Carlton Hardware Co., Calumet, Mich. The call, in full, is as follows:

Calumet, Mich., May 13, 1895.

Whereas, The forming of Hardware Associations in various States has proved of social and commercial benefit to their members; and

Whereas, The Hardware dealers whose names are given herewith, doing business in the State of Michigan, believe that a similar association would be of benefit to them, it is hereby

Resolved, That a meeting be held in one of the following places: Bay City, Saginaw, Cheboygan, Petoskey, Detroit or Grand Rapids, Mich., on the 9th day of July, 1895, for the purpose of adopting a constitution and by-laws, and the election of officers and any other business that may be brought before it, and it is further

Resolved, That all legitimate Hardware dealers located in the State of Michigan are invited and urged to join the association. The purposes of which are to protect their mutual business interests and promote social intercourse.

Due notice will be given in Detroit daily papers of place of meeting.

Carlton Hardware Co., Calumet.
Mosher, Bissell & Mather, West Bay City.
Ferguson Hardware Co., Sault Ste. Marie.
Warren Hardware Co., Jackson.
H. C. Weber & Co., Detroit.

Please fill out the following, detach and mail at once to F. S. Carlton, Calumet, Mich.:

Are you in favor of such an organization as proposed in Michigan Hardware Dealers' Association? _____. Would you become a member? _____. Would you have a representative at the first meeting to be held July 9, 1895? _____. Which of towns named would you favor for first meeting? _____.

_____

_____, Mich., _____, 1895.

The responses so far have been favorable. If the Michigan Hardwaremen could fully understand the benefits arising from associations of this character, the responses would be unanimously in favor of the movement.

The increase of wages among the Ohio wire and nail workers affects 6000 men. Perhaps it is not the worst possible blow to the Ohio calamity candidates, but it is certain that none of them can stand many like it.—*New York World.*

PRACTICAL TALKS TO HARDWAREMEN.

THE IRONMONGER AND HIS ASSISTANT.

In England, the ironmonger thinks so highly of his business that an applicant who desires to master its secrets must pay a premium for the privilege. An agreement, drawn up with much form and executed in parchment, is signed and sealed, by which the apprentice is bound for at least two years, and usually makes his home with his master.

When the time specified has expired the apprentice blossoms into an assistant, and is required to wear an apron usually of some dark-colored material. He must be very profuse in expressing thanks to customers. The prescribed form in serving, after a want has been supplied, is to inquire "Is there anything more I may have the pleasure of doing for you?" or, "Madam" or "Sir, where may I have the pleasure of sending this?" as, no matter the size of the parcel, "Madam" or "Sir" would not think of carrying it—even two or three pennyworth of this or that must be delivered.

The work hours of the assistant are usually from 8 A. M. to 7 P.M., with one hour allowance for dinner and thirty minutes for tea. On Saturdays some assistants are required to work later than this; however, there is but little variation the year round.

The shop is swept every night to allow the dust to settle on the counters, which must be carefully wiped the first thing in the morning, that all may be clean and bright upon the arrival of the proprietor.

The wages of the assistant vary, according to ability, although the average per week is from two to three pounds.

One difficulty the assistant has to contend with, is in keeping the shelf goods neat with the prevailing system of tying of packages, as all articles come from the makers tied up in two or three layers of brown paper. After a busy day the shelves are piled a foot high and the articles are lost in a maze of twine and paper.

The ironmonger is nothing if not conservative. After an absence of eight years I visited a very good representative of the trade, and failed to find a particle of difference in him, his business or his shop arrangement. As regular as the sun, he came and went, day in, day out, week, month and year. He was very exact in the details and minor affairs; all small pieces of paper, if but four inches square, would be saved; short lengths of twine four or five inches long would be tied together and hung upon special hooks behind the counter. Before going to the twine box these pieces must be used. When the packages were tied the twine was cut with scissors, two pairs of which were kept on the counter for that purpose.

"You evidently do not think," I suggested, "that the American plan of saving time in opening packages by using the knife and throwing away the string, is the better economy?" "The best economy," he replied, "is shown in the result. I have spent on an average, not over five shillings per year for paper and not much more for twine, utilizing all scraps and bits of either that find their way into the shop. In the schools, abstruse problems in arithmetic are taught, not for the immediate benefit to be gained by a solution of the problem, but for the mental discipline acquired. But in training my apprentice I go a step farther, getting from them, in my lessons of economy, a direct return for myself; at the same time grounding them in principles of economy, while their time is of small value, leaving the use of the knife until that happy period when their time is of such value that the use of the knife would indicate the better economy."

He was the essence of politeness, especially to the good customers and those of long standing. I have seen him clear the counter and get to the door to open it for a lady, in two bounds, covering a distance of six or eight yards. He was very sharp after the cash. Did not believe in cutting prices, as every article must be sold for a profit.

Like most ironmongers in towns, he did a large trade in petroleum oil, the ordinary quality of 175 degree test, retailing at sixteen cents in American money. Ninety per cent. of the oil comes from the United States, the balance from Russia. The barrels are set up in the back yard and the oil is carried by pumping facilities to the shop, where by special measuring gear it is drawn for the purchaser.

One workman was kept regularly in a well-fitted shop in the rear of the premises, to do any kind of odd jobs, the proprietor, with the aid of an assistant and two boys, doing all the rest of the work. One of the boys was kept inside and the other did all of the delivering with a two-wheeled truck or push cart.

After being in business twenty-five years, he had amassed a comfortable fortune of from ten to fifteen thousand pounds, "all out of my shop," said he, "and due mainly to the exercise of proper economy."

TRAINING THE HANDS.

The lack of manual training has been felt by many, who in the ordinary interpretation of the word, are considered educated.

This failing is noticed most frequently in the trivial repairs the Hardwareman is called upon to make. A left-hand rim lock has been carried three miles to have the latch bolt reversed. A customer repudiated his bill, cursed the outfit and the outfitters, because the water had evaporated from his electric battery. Another customer was charged five dollars by a hard-hearted dealer merely for putting a simple leather valve in his pump.

The impression appears to be firmly installed that, if a plumber is paid for doing certain work, that work can be done by none but a plumber, whereas if men retained even a little of the inquisitiveness of their youth, they might yet "see the wheels go round."

In dealing with mechanics, the ability to illustrate some technical feature by free-hand drawing, is of great advantage to the merchant. A salesman for electric chandeliers said that his talent for drawing had enabled him to close many a contract by clearing up all doubts and showing just how such and such a combination would look.

In trimming his window, many a Hardware clerk has marred an otherwise good display by the appearance of his price-tickets, and has longed for something that would enable him to become a creditable sign-writer, or at least for a substitute for the labored and crude effects of his drop-block and brush!

SHOP TALK.

On Saturday night, as we were giving to the proprietor our customary review of the week, he said: "Boys, now that we are pretty busy with the spring trade, are you sure you enter all the items to be charged?" Of course we all replied that we did not miss a thing. "Well," he continued, addressing the Cutlery Man, "what is your plan?"

"Oh, I have a good memory," he replied, "and when we're busy I wait on the customers in turn and make the charges afterwards."

The Tool Man said he made a memorandum on a slip of paper, then during a lull, taking these slips from his pocket and charging the items.

The Stove Man, nicknamed "Double Sure," said he entered every charge in the proper book at the time the sale was made, that as far as *making* the sale, it was effected when the goods were transferred to the customer, but to be

Digitized by Google

collectable, the account needed the written evidence of the transaction, that he had been trained to make the entry at once, taking *one* risk—that of an impatient customer leaving; while if the entry was deferred, *two* risks were assumed—that of losing the first sale by forgetting to make the entry, and that of not making the sale at all.

Drifting into a lighter vein, the following "order" was handed around to be translated:

"Please and sent me 2 Pear Engse for hinths a perpetrated pie pan a pd rozena and also please and sent a hand spade," with verbal instructions to send to "Eli Avenue, C. O. D."

The correct filling of the order was: 2 pair of four-inch hinges (Acorn Butts), 1 perforated pie-pan, 1 pound of raw sienna, 1 garden trowel. Delivery was made to Lehigh Avenue. Shop Man.

Plume & Atwood Chicago Offices.

The Plume & Atwood Mfg. Co., Albert E. Snow, agent, can now be found at their new store, No. 199 Lake Street, Chicago. They were formerly located on Lake Street for twelve years, and for the past four years have been located at No. 90 Market Street, but have now taken a four-story building and basement, 20x180 feet, have had it thoroughly remodeled, and will occupy the entire building, carrying a full and complete stock of their general lines of Brass, Wire, Brazed and Seamless Tubing, Butts, Escutcheon Pins, Jack and Safety Chain, Lamp Trimmings, Lamp Burners, Table and Banquet Lamps, and various other goods of their manufacture. The front half of the ground floor has been fitted up with very handsome offices, and the rear will be used as a metal room. The front half of the second floor has been fitted up as a general sample room of their different lines of goods, and the rear will be occupied by open stock, and the third and fourth floors and basement with package stock.

With their increased facilities and accommodations, it will, no doubt, be a great convenience to the trade, and any of their customers who may be visiting Chicago will find every convenience.

They are also selling agents for American Ring Co., Waterbury, Conn., and for Fletcher Mfg. Co., Providence, R. I., for their Lamp and Stove Wicks.

A Demand for Apple Parers.

The Reading Hardware Co., Reading, Pa., and No. 96 Reade Street, New York, announce that they are receiving a great many orders for Apple Parers, which they take as indicating that there will be a large crop of apples throughout the country the coming season. Because of this increased demand, and that they may not get behind in their orders, they have issued a circular asking an anticipation of wants in this line, so that the goods may be shipped early and be on hand when needed.

Among the Parers that have won so fine a reputation as of the manufacture of this company, may be mentioned the Reading Apple Parer, made only by this company, with improved curved knife; the Baldwin Parer, with automatic push-off, and all the latest improvements—will pare apples of any size and shape, and remove them from the fork automatically; the '72 Apple Parer, without the push-off, that has been upon the market for many years, and for a low-riced machine has given entire satisfaction: and the Advance parer, corer and slicer, with improved push-off. In speaking of it, the makers say: "The Advance is a strictly first-class machine at a low price, and is not intended to replace the inferior devices in the market. It is the only machine ever invented that will entirely pare, core and slice an apple. With one hand you can pare, core and slice an apple, and withdraw the fork from the core."

Death of Henry S. Vroom.

Henry S. Vroom, a member of the firm of Terrell & Vroom, general Hardware dealers, No. 368 Eighth Avenue, New York, died at Port Richmond, S. I., on May 12th, of pneumonia and heart affection. He had passed a useful life in the trade of which he was an honored member. For nearly twenty years he was connected with the old firm of John C. Johnson & Co., No. 36 Howard Street, and later with the successor of that house, Jos. T. Farrington. In 1884, in partnership with Isaac H. Terrell, he formed the firm above named. Mr. Vroom was a former member of Livingston Lodge, F. & A. M.; Adelphic Chapter, and Morton Commandery, the Riverside Club, and the Kill von Kull Yacht Club, being at the time of his death treasurer of the latter. He was a resident of Staten Island for thirty odd years, and leaves a widow and one daughter.

Death of E. A. Chapman.

The death of E. A. Chapman, president of the Chapman Mfg. Co., Meriden, Conn., removes a useful and honored member of the community with which he had cast his lot. He went from Middletown to Meriden in 1888, and in association with other gentlemen, formed the company above named. For a number of years he was its treasurer and manager, and upon the death of its president, I. C. Lewis, in 1893, he was elected to that position, which he held until his death. In 1894, by the advice of his physician, Mr. Chapman made a trip to Genoa, Italy, which did not result in the benefit that was hoped for. In August he visited the Adirondacks, and from thence went to Colorado Springs, to Redlands, and to Los Angeles, where he died on April 9, 1895. The remains were brought home to Middletown, where the burial occurred on May 15th.

The annual meeting of E. & T. Fairbanks & Co. was held at St. Johnsbury, Vt., some days since. The following directors were elected for the ensuing year: Henry Fairbanks, St. Johnsbury; S. N. Brown, Boston; William S. Wells and James G. Gardiner, New York; Charles H. Morse, Chicago; H. N. Turner and John C. Clark, St. Johnsbury. Mr. Clark was elected to fill the vacancy caused by the death of Colonel Fairbanks, and with this exception the board is the same as last year. The stockholders re-elected William S. Boynton and Edward T. Fairbanks auditors. After the stockholders' meeting the directors organized by electing the following officers: President, S. N. Brown; vice-president, Henry Fairbanks; secretary and treasurer, John C. Clark; general manager, H. N. Turner.

The American Wringer Co., No. 99 Chambers Street, New York, have sold the patents and good-will of their lines of Cork Pullers, Milk Shakes, Lemon Squeezers and Ice Shaves to the Erie Specialty Co., Erie, Pa., who will hereafter make the same, including the Samson Cork Puller, Imperial Milk Shake, Imperial Ice Shave and Acme and Fifth Avenue Lemon Squeezers. The Erie Specialty Co. announce that they "will maintain the high standard of excellence which these goods have attained," and add that they are in a position to give orders prompt and careful attention.

The Standard Range & Stove Co., Terre Haute, Ind., are getting ready to run about forty men after a general remodeling of the old building. The company are making three lines of stoves, high, medium and low grade.

George W. Buck, of the Hardware firm of G. W. Buck & Co., Baltimore, died suddenly at his home, No. 2023 North Calvert Street. He was in the forty-fifth year of his age. His death was from heart trouble.

THE HONEST DOLLAR.--II.

[Samuel W. Allerton, of Chicago, who is too well known as a business man to need introduction, has placed upon record his views of the money question, which we are permitted to here present. They will be read with great interest, no matter what the views of the reader upon that great theme may be. Continued from preceeding issue.]

THE REMEDY.

EDITOR HARDWARE: Now, has not the time come for our nation to have a fixed financial policy based on that which is of greater value to the American people than gold or silver—a currency of fixed value that never would change, but be of uniform value, so that we could exchange our labor, products and property rights. How can this be done? Go at it as a great life-insurance company would, to see how much currency we need per capita. Issue government bonds bearing 2½ per cent., payable in fifty years, amounting to say $26 per capita, not to be increased except as we increase in population. Its value would be based on the integrity of our government and every man who had a dollar would have an interest in the government and would be a defender. Bonds to be divided up among the States in proportion to the population.

Let the government sell the bonds to bankers and issue currency $100 for $100 worth of bonds. Bonds sold only to legitimate bankers. Bankers are as necessary to conduct exchanges of the people as railroads are to carry its products. Put a tax of one-fourth per cent. on the circulation so the government could have the absolute supervision over the banks. Currency would be at par all over the United States. No foreigner could buy these bonds and no speculator could buy them to reduce the volume of the circulation. Sell only to legitimate banking institutions. Divide them up in each State, town and county according to the population. Have a fixed financial policy—not these congestions and panics breaking the enterprising man. Give our people work and keep them busy and we will have the gold we produce to lend to foreign nations. All our industrious people would soon have homes of their own, and we would be the most prosperous nation on the globe.

What is necessary for this nation to do? Let Cleveland call Congress together; let Republicans and Democrats forget sectional interests and go to Washington with patriotism; restore the tariff based on the difference in the value of labor in this and the old world. Let the importers of foreign goods pay gold on imports; pass a new national banking law; issue $1,600,000,000 of bonds; sell these bonds to bankers; issue currency at par with bonds; sell the bonds for silver certificates, national bank notes, gold certificates, treasury notes and greenbacks, and retire them. Give us a uniform currency based on the integrity of the nation. Let the government sell its silver bullion. Let the present coinage of silver remain for small change. On all foreign goods imported duty must be paid in gold; let the rich who want to wear silks and drink fine wines and smoke foreign-made cigars, pay duty in gold; let the government agree to take up the gold certificates and every clearly-made promise that they have agreed to redeem in gold—redeem in gold; or issue a gold bond payable in gold, bearing 2½ per cent. in small denominations and the gold hid in stockings would come out. Gold would be at a premium for a few years, but would find its level with wheat and corn. Stop furnishing gold to the importer, the traveler who goes abroad, to rich corporations and all the individual schemes that have issued gold bonds—the government would soon accumulate gold. If the men at the head of our government realized that this government is for the people, not for a party or a rich corporation, or for the money-changers of New York and Europe, we would soon get back prosperity.

OBJECTIONS—REDEMPTION.

The honest, conservative man, will say: What will you redeem this currency with? My answer is: Does progress in advancing manhood, confidence in each other and in the integrity of this great nation of liberty-loving people, need redemption? Our trouble has been and is now that we are on a false basis, trying to redeem $1,600,000,000 currency with $100,000,000 of gold. This false position makes the government weak and money-changers are in a position to dictate terms to this great nation.

COULD NOT SELL OUR SECURITIES ABROAD.

The gold men will say that we could not sell our securities abroad and trade with other nations. Well, if we could not get in debt, that would be a good thing for us, and when our rich people wanted to travel abroad and buy gewgaws they could afford to buy gold and silver; it would make a demand for it. Let Europe have the gold and silver and pile it up; we have untold millions in the mountains to supply them as they need it to inspire confidence in themselves and their government. We would be an independent nation as we should be. As God designed men to be individual, so should a nation be individual. Other nations would realize what a great liberty-loving people were and the confidence we placed in the principles of a free government.

NO ELASTICITY.

They say that this currency would have no elasticity, could not be expanded and contracted. This is true, and that is why we need just such a currency. Contraction and expansion are what the gambler likes, and we would avoid these great contractions and expansions, which are the elements of a panic. It is not rich men who build up the country, but the enterprising men who expect to borrow and do something to better their condition, and this system of contraction and expansion produces a panic that breaks this class of men and makes the rich richer and the poor poorer. Money is only the motive power to exchange our labor, products and property. Gold and silver are relics of barbarism, the lack of confidence among men. Gold and silver should be in our country like corn and wheat.

FIAT MONEY.

It may be said that this system of issuing government bonds and issuing bills therein would be fiat money; what is our money now but fiat money? One per cent. gold and fifteen per cent. fiat money, and only so long as foreigners will lend us gold by buying our bonds, demanding each and every time a greater interest, can we continue to redeem our paper money in gold. The people are all right; they show their confidence. Take silver, greenbacks, national currency; they will buy anything to-day we have to sell or exchange; yet the high men in official positions think they are at a discount of ¾ of one per cent.

The inflationists—the men who want something for nothing, an unlimited issue of greenbacks—will say, why have the government 2½ per cent. interest on bonds. The government takes up all its obligations with the issue of these bonds, and should give the value back in return. If we have manhood, we must be fair to all and do that which is just to all. There is no necessity for our government borrowing a dollar from foreign nations; we should borrow only from our own people; labor is the wealth of the nation; let the government furnish the motive power or a uniform value, never to contract or expand; our people will earn $7,000,000,000, if they can be employed.

Digitized by Google

OVERPRODUCTION.

You will hear it said by some of our most intelligent men that our trouble is overproduction of cotton, wheat, wool, coal, iron, but not a word about the surplus of idle labor, hungry men wanting clothing, boots, shoes and homes. England buys $2,500,000 of raw cotton, sells $9,000,000 worth of cotton goods. The Southern States possess a fine, healthy climate, pure water, fine timber, produce fine fruits, a country well adapted for manufacturing. With a sound financial policy, a revenue law not to be changed, but kept uniform, the enterprising man could go ahead in the South with the certainty that he would not be bursted with a panic produced by causes not known to him. The South would soon manufacture all its cotton; our surplus of cotton, wool, coal, iron, wheat, would be in demand; that which we now claim is our depression would be as it is—God's blessing. Our idle labor would be at work earning $7,000,000,000 per year. When we wanted to build a railroad or a manufacturing plant our people would take the bonds if made in small denominations, their money would pay for labor, buy the material and be the motive power to exchange our labor and our commodities. Our industries would commence to move. Farm products would be in demand, railroads would be employed, the life and energy of our people come back to activity. Prosperity, like the rays of the morning sun, would penetrate every part of our country, south, north, east and west, and the cry of hard times and inactivity would be heard only from the croaker whose heart is so small that he cannot enjoy the prosperity of all our people.

INCREASED CIRCULATION.

It may be said that Congress would want to increase the circulation, but when the people realize the blessings of a uniform currency, good all over the United States, that neither expands nor contracts, and always has a fixed value, the man who would attempt to disorganize the existing system would be as dead politically as the stone at the bottom of the well.

I am not a populist, believing that you can make something out of nothing, nor a green-backer, desiring to issue unlimited amounts of currency, but wish to have a fixed policy, equal and just to all.

HOW GET GOLD FOR INTEREST ON BONDS.

It may be asked how will the government get the gold to pay interest on its bonds? Restore the tariff so the balance of the trade will not be against us. Collect gold from all foreign imports. The government would not have to furnish the rich $100,000,000 of gold to travel abroad. How could we trade with other nations? All our products we ship abroad would be sold for gold. The gold and silver we produce would be sold to go abroad which would form the exchange to pay our balances. If not, we could not get in debt. As a nation, we would have to live like an individual—within our means. Under our present financial policy, the government is to furnish gold to pay the balance against us; for the rich to travel abroad; to pay the interest on the indebtedness of rich corporations and for the balance of the trade against the government. How does the government do it? It issues every six months fifty millions of gold bonds. The present administration has already in two years issued one hundred and sixty-two million and will have to continue to issue bonds for gold with its treasury filled with paper money. If we continue on our present tariff plan and our people continue to travel abroad and the government continues to furnish gold to pay the interest on securities, it may have millions in currency in the treasury and yet have to saddle a debt of many millions on the people that the industrious will have to pay by labor.

HOW TRADE ABROAD?

You no doubt will hear the man with the large stomach, a bald head, and a gold cane say: Tut, tut; you cannot trade with the nations of a world. You will be like Mexico—you would put a Chinese wall around America. Reciprocity should be restored. The Democrats said that was tending to free trade, yet they repealed it. What is reciprocity? Allowing what we cannot produce at home to come in free of duty, provided our products go into other countries free of duties. What we can produce at home, put a tariff on to protect American industry. Because, with our free schools, when we educate the people we increase their wants; they want to be men and women in the broadest sense of the word and should not be obliged to work at the same price as the masses of Europe who are held in submission by a great standing army. How would we trade with the world? The products we produce they must have; the merchants of Liverpool, London, Paris, and Berlin will only buy what they want and will buy it in the cheapest market of the world whether we have tariff, free trade, currency, gold or silver; they will buy nothing to favor us, only as it makes a per cent. in their favor. Now the banks in our country would furnish money and buy these bills of exchange and have foreign exchange to sell. The rich corporation that owes interest abroad would have to buy the exchange. The foreign importer would have to buy these bills. The rich man and his duteous children who wanted to travel abroad to loaf and toadyize after dukes no doubt would say a free government was a failure because the government did not furnish the gold to them to travel abroad, and if exchange were pretty high they would have to stay at home and associate with American citizens, which, no doubt, would be very hard on them, but I think better than to have this government get into debt billions to make the industrious and future generations pay for our folly.

RETURN OF OUR SECURITIES ABROAD.

Should our nation adopt this finance policy, issue currency for government bonds for a medium of exchange, would they not send their securities back to be sold? How could we pay them? They are not national securities, but securities against corporations and individuals. They would be in the same condition as a merchant who had sold goods demanding pay; if the buyer could not pay the seller would have to extend the time or take the goods. The foreigner would know if he forced his securities on the market he would not receive half their value, and if they all did it and wanted gold no doubt they would have to pay a premium on gold. They would hurt no one as much as themselves.

PERPETUAL NATIONAL DEBT.

It may be said that the nation would always have a national debt. The government is for the people; taxes and revenue could be reduced by the government so we would always need this government debt.

FALSE GODS.

The heathen Chinee has a wooden god for the salvation of his soul. I was recently at a banquet; a stalwart young man from Iowa, a master of eloquence, spoke; his god was a gold god; a young man from Utah, eloquent in his honest convictions and belief also spoke; a silver god was his idea of the salvation of this great nation's finances. Now, is it not better for a great nation to have a god of manhood, confidence in the integrity of a great nation, than to idolize a wooden god, a gold god or a silver god?

HONEST DOLLAR.

The honest dollar is the dollar that never changes in value and always has a fixed value all over the United States. A gold dollar that changes in value necessarily cannot be an honest dollar, for gold is at a premium to-day, and the gold dollar will buy more of the products of labor; necessarily labor gets less pay than it would three months ago. The silver dollar changes in its value and is only said to be worth fifty-cents to-day, so it is a self-evident fact that

Digitized by Google

a dollar based on gold or silver cannot be an honest dollar, but a dollar made by the government of a fixed value based on government bonds, with all the higher attributes of manhood, confidence in a nation of liberty-loving people, made uniform, limited to much per capita for every man and woman living in America, only increasing as we increase in population, would have a uniform value which could not change—must be an honest dollar.

SUPERIORITY AND ADVANTAGES OF OUR BASIS.

What the industrial people want is a fixed financial policy. The young man who has nothing but his hands and brain to start in life with wants a fixed financial policy, because after he has worked and accumulated a few thousand dollars on a gold basis, the inflationist gets into power; he could not buy a blind old mare to start in life with with his hard-earned savings. What we want is a fixed policy, a currency that never changes, which we never can have with gold and silver; for gold is sure to leave us in time of need. The idea of this great nation having to borrow of foreign countries to pay the running expenses—to be dependent upon other nations! Look at our present condition. This great nation dependent on foreign capital that has been drawing out gold so we would have to issue bonds and pay three and three-quarters per cent. interest; that this foreign capital could dictate terms to this great nation. What we lack in this country is true Americanism—men with national pride and individuality. This must be an individual nation—must take care of itself. England, France and Germany will never take care of us; but if we have not the brains to have a fixed policy, independent of other nations, England will dictate to us, and we will be the hewers of wood, and continue to pay tribute to foreign nations because we lack the brain to take care of ourselves—blessed by the Creator with the richest country on the globe.

REPUBLICAN PRINCIPLE.

Has the time come when this great republican government will advance in the policy of the greater good to the greater number, or shall its policy be the greater good to the lesser number? One standard, gold, is clearly in the interest of the lesser number, and as I love the true principle of a republican government, I am opposed to the one standard, gold. I have always been in favor of bimetallism, but when I see the impossibility of keeping two metals on a parity with each other, it is evident that our money must be either on the gold or the silver standard. Now, the real question is, have we advanced in civilization to a point where manhood, confidence, integrity, faith, hope, universal justice to all, shall be superior to confidence in an inanimate object? If not, I am wrong. Then we must sink the higher attributes of manhood and still put our faith in gold or silver.

FINANCIAL REVOLUTION.

My friends say this is a revolution in financial systems. The answer is: Am I right in this simple statement of facts? My conviction is that I am; so I give to the American people these few ideas for what they are worth. I hope I have injured no one, being guided with the one thought that I love my country and its prosperity more than gold or silver.

It is reported that the Racine (Wis.) Hardware Mfg. Co. have contracted for the construction of several hundred motor cycles for a party in Cleveland.

The B. Roth Tool Co., St. Louis; incorporated with a capital of $4500 to manufacture tools, supplies, etc.

The Missouri Lamp & Mfg. Co., St. Louis; capital, $30,000; to manufacture lanterns, lamps, etc.

The Tale of a Broken Lock.

CHAPTER I.

It was but a few minutes after breakfast when Mrs. Belton told Mr. Belton that he would have to send for a locksmith, because the lock on the library door was broken.

"You'd better go for him right away," said Mrs. Belton.

But Mr. Belton was a handy man about the house.

"Nonsense!" he said. "The idea of giving up fifty cents to some apprentice when you can do the work yourself in five minutes."

CHAPTER II.

It was eleven o'clock when Mr. Belton, kneeling before the library door with a kit of tools scattered around him, ordered his son to go to the Hardware store and buy a new screwdriver.

"What's the matter?" inquired Mrs. Belton. "Can't you get at the lock?"

"Of course I can," said her husband. "You just keep quiet, will you?"

"Johnnie!"

CHAPTER III.

Mr. Belton with his coat and vest off and his hair touseled, was gouging into the woodwork around the keyhole.

"Johnnie! Go over to the Hardware store and buy me a file and chisel."

Meantime Mrs. Belton ran out to the drug store for some arnica, for her husband had bruised his finger while experimenting with the lock.

"I've most got it fixed now," said Mr. Belton as she left.

CHAPTER IV.

It was about seven o'clock in the evening when Mr. Belton, with a rent in one trouser leg and his face covered with grime, arose angrily, and, throwing down his tools, ordered Johnnie to go for a locksmith.

"Somebody's been tampering with that lock or I'd have fixed it!" he said, glancing with angry suspicion and reproach at each member of the family in turn.

Then he sat down and glanced over the bills from the Hardware store, which included $1 for a chisel, seventy-five cents for a screwdriver and eighty cents for two files. In addition there was twenty-five cents for arnica, and it would cost $8 for a new pair of trousers and at least $5 to repair the gouged places in the door.

CHAPTER V.

Five minutes after the locksmith's boy came he was rattling the key in the lock to show that it worked all right.

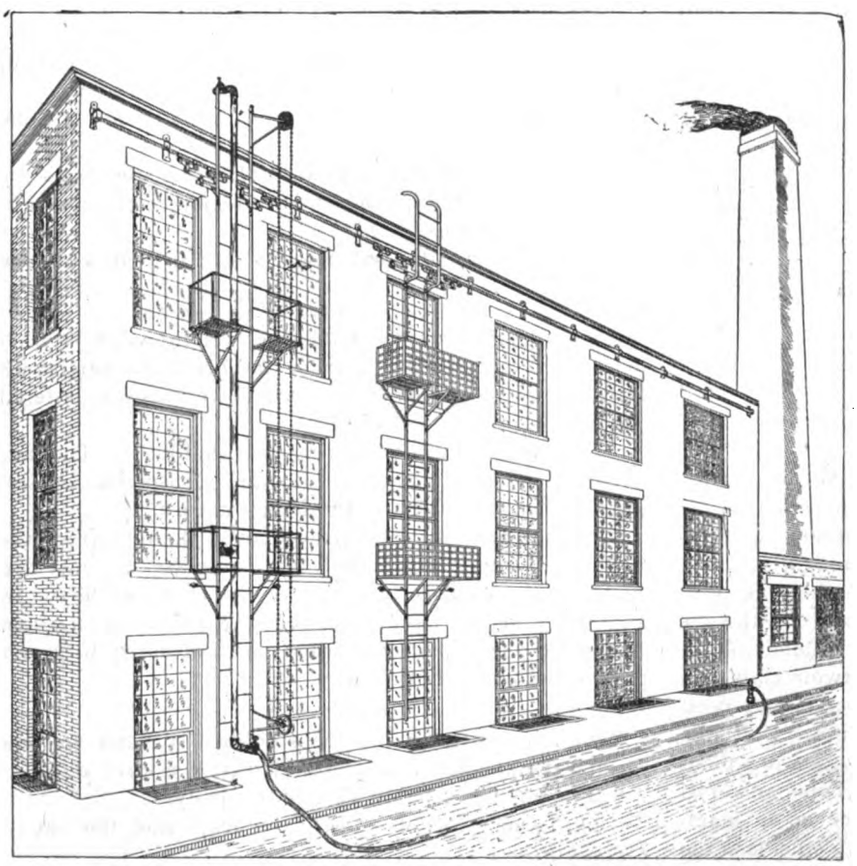
"How much?" said Mr. Belton brusquely.

"Oh, I guess the job's worth a dime," said the boy.—*Chicago Record.*

Ogburn & Petty, dealers in general merchandise North View, Va.: Hardware Pub. Co. Enclosed we hand you our check for $1, to pay subscription to your HARDWARE journal for twelve months. We like your journal very much.

"If a man be gracious and courteous to strangers," said Lord Bacon, "it shows that he is a citizen of the world, and that his heart is no island cut off from other lands, but a continent that joins them."

The Leeds Stove Foundry & Casting Works is to be the name of an institution lately organized for the purpose of manufacturing stoves and castings at Leeds, Iowa.



A fire in the works of the Unique Mfg. Co., Coopersdale, Pa., manufacturers of pipe and monkey wrenches, has caused a loss of $4000; partly insured.

A nail machine is at work in the window of Hoff & Raymond's Hardware store, Middletown, Pa., and makes an attractive feature.

Coburn Co.'s Fire Escape.

The Coburn Trolley Track Mfg. Co., Holyoke, Mass., are successfully placing upon the market a Fire Escape, the construction and method of application of which may be seen from the accompanying illustration. In describing it, and in speaking of fire escapes in general, the company say: "While this device is truly a practical fire escape, yet it has strong points in its favor as a device to fight fire at the very first start, and will be brought to attention of owners of factories who desire to get the very best fire protection as well as lowest insurance rates. Why not have factories employing labor have such means of escape at hand in case of a sudden fire as will save all lives? Why not have factories equipped with a portable fire ladder and stand pipe for water connection, so that any story from the lowest to the highest may be reached with a short or long hose the entire length of the building? One or more ladders may be used according to how long the building may be. We furnish our heavy large No. 13 gauge track for this work

with wrought and malleable iron fittings all galvanized. The ladders, balconies and water pipes being made of standard material constructed to fit plans and specifications that may be furnished us. A careful examination of this system is solicited. An ounce of prevention is worth a pound of cure."

Bissell Sweepers and Fans.

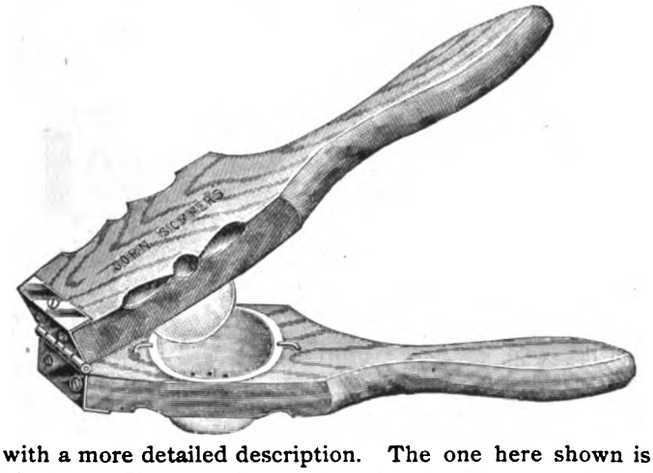
The Bissell Carpet Sweeper Co., Grand Rapids, Mich., who are always in the van when enterprise is considered, have made a special offer which is certainly tempting in every respect. They wish to make a special push of their Bissell Grand Carpet Sweeper, and to do so, have suggested to dealers the following plan: "There has never been a special effort made to place this sweeper in churches, lodge rooms, hotels and other places where there is a constant demand for one or more large size sweepers, and, as during the hot summer months, there is nothing more acceptable at such places than a number of good noiseless fans, we have decided to include free with each Bissell Grand ordered for prompt shipment, fifty Japanese flat fans; an attractive decoration on the front of each, and a neatly printed ad. on the back. It will pay you well to push this sweeper at this time, for by selling the Grand at its regular price—$4.50 each—you make a good profit on every one sold and the special offer of fifty fans free of cost with each sweeper, cannot fail to secure orders from every church, hotel and lodge room in your city, and give you a good permanent ad. gratis. The price of the Grand is $36 per dozen (our usual price) and we make no charge whatever for the fans, and also include a liberal supply of circulars and neatly typewritten letters, already for you to sign and mail to your customers. We only request that any orders placed with us, be mailed promptly to insure reaching us before our supply of fans is exhausted."

The Bradley Bracket.

The Bradley Steel Shelf Bracket, manufactured by the Atlas Mfg. Co., New Haven, Conn., is in its improved form, more than holding its own in the market into which it has been so successfuly introduced. In its new double form, with screw holes side by side, it gives all the needed strength with lightness—a feature to be considered when sending by freight. It is made wholly of steel; is described as not brittle nor breakable. "The position of the screw-holes is most convenient and secures a wide lateral bearing. In the Bradley Steel Bracket the full strength of both wires is retained, and it is further strengthened at this important point by the steel clasp; metal is put where it is needed, and the bracket is made light by moving it where it is not needed. The U-shaped brace in this Bracket is swelled as it approaches its middle portion, increasing its power of resistance in all directions, and is the strongest form that metal can be put into. Bradley Brackets are all highly polished before they are japanned, and for finish, durability and true artistic merit cannot be excelled." Write for prices to the Atlas Mfg. Co., New Haven, Conn.

Congratulations from Across Sea.

We offer our congratulations to our New York contemporary, HARDWARE, on the attainment of its fifth birthday. HARDWARE was, we believe, the first journal in the States issued entirely in the interests of the Hardware trade, and the enterprise which prompted its introduction has been rewarded by a wide-spread exhibition of appreciation and support. The current issue, the birthday number, contains a large amount of useful matter, and, as befits the interesting occasion, is prettily bound in a specially designed cover.—*The Hardwareman, London, Eng.*



The W. Bingham Co., Cleveland, Ohio, have issued a handsome little leaflet, which speaks for itself in these words: "Jessop's Steel. We have handled it for *forty-eight years*, and have always found it uniform in quality, and sure to give satisfaction. It is made of the best Swedish iron, and has a world-wide reputation. It furnishes a standard for comparison, and 'as good as Jessop's' is as large a claim as others can make—and larger than they can fulfil. It is the cheapest steel produced, quality considered. Highest Award, Chicago, 1893. Twenty Highest Exhibition Awards."

HARDWARE costs only One Dollar a year.

"Boss" Wood Lemon Squeezers.

Attention was called in our last preceding issue to the line of Wood Lemon Squeezers manufactured by John Sommer's Son, Nos. 355-365 Central Avenue, Newark, N. J. In this connection we are permitted to illustrate the same,

with a more detailed description. The one here shown is his Fancy Shape with porcelain bowl. These goods are described as "far superior to iron, tinned or japanned; will not break or crack, and no danger of parts rusting or corroding, as they are all wood." Mention is also made of the fact that they can easily be kept clean. In detailed description of the line, the manufacturer gives the following information as to prices, etc.:

No. 1.—$7.00 per. doz. Body fancy shape, made out of selected sugar maple, finely finished. Hinges brass, nickel-plated, and overlapping ends, very strong. Bowl rosewood or lignum-vitæ wood, extra large, round bottom, highly polished.

No. 2.—$6.50 per doz. No. 2, same as above, but not graded as fine.

No. 3.—$6.00 per doz. Body fancy shape, made out of sugar maple, smoothly finished. Hinges brass, nickel-plated, and overlapping ends, very strong. Bowl maple, extra large, round bottom, highly polished.

No. 4.—$5.50 per doz. No. 4, same as above, but not graded as fine.

No. 5.—$5.00 per doz. Body fancy shape, made out of sugar maple, smoothly finished. Hinges brass, overlapping ends, very strong. Bowl maple, extra large, round bottom, polished.

No. 6.—$4.50 per doz. No. 6, same as above, but not graded as fine.

No. 7.—$4.00 per dox. Body fancy shape, made out of sugar maple. Hinges steel, overlapping ends. Bowl maple, extra large, round bottom.

No. 8.—$3.50 per doz. No. 8, same as above, but not graded as fine.

Any of the above grades we will furnish with porcelain bowl (as Fig. A) if so ordered, at the same price, but do not warrant porcelain bowl.

No. 9.—$6.50 per doz. Body plain, made out of selected sugar maple, finely finished. Hinges brass, nickel-plated, and overlaping ends, very strong. Bowl rosewood or lignum-vitæ wood, square shape, highly polished.

No. 10.—$6.00 per doz. No. 10, same as above, but not graded as fine.

No. 11.—$5.50 per doz. Body plain, made out of selected sugar maple, smoothly finished. Hinges brass, nickel-plated, and overlapping ends, very strong. Bowl maple, square shape, highly polished.

No. 12.—$5.00 per doz. No. 12, same as above, but not graded as fine.

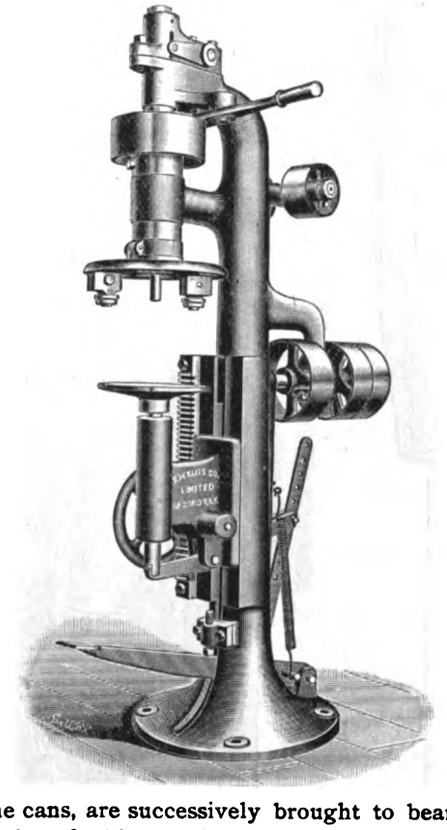
No. 13.—$4.50 per doz. Body plain, made out of sugar maple smoothly finished. Hinges brass, overlapping ends, very strong. Bowl maple, square shape, polished.

No. 14.—$4.50 per doz. No. 14, same as above, but not graded as fine.

No. 15.—$3.50 per doz. Body plain, made out of maple. Hinges steel, overlapping ends. Bowl maple, square shape.

No. 16.—$3.00 per doz. No. 16, same as above, but not graded as fine.

"Eureka" Lemon Squeezers. No. 17.—$6.00 per doz. Body hard sugar maple, finely finished. Hinges brass, nickel-plated, overlapping ends, very strong. Without bowl the inner surface is grooved, as per cut, to bring the juice to the center; side or top is protected with cover. Indispensable for quick work; it is not necessary to take any portion of the lemon in your hand, but use it as you would a pair of tongs.



No. 18.—$6.00 per doz. No. 18, similar to the above, but handles turned and cut so as to stand apart.

"Eastern Pattern" Lemon Squeezers. No. 19.—$4.50 per doz. Body plain, made out of maple or birch. Hinges steel, handles turned. Bowl porcelain.

"Common Wood" Squeezers. No. 20.—$1.00 per doz. Body plain, made out of maple or birch. Hinges sheet steel. Bowl frazed in body.

No. 02 Double Seaming Machine.

In Double Seaming Machines for round cans, as ordinarily constructed, the can revolves while being seamed, and the arm which carries the double seaming rolls is a stationary part of the machine. This method, however, will not answer for cans which have to be filled before the lid is seamed to the body, such as paint cans, some kinds of condensed milk tins, etc. The No. 02 Bliss Double Seaming Machine, E. W. Bliss Co., Brooklyn, N. Y., shown in annexed illustration, is designed for cans of this kind, which have to stand still during the seaming operation. The hand lever, shown on top, is used for actuating the two double seaming rolls, which revolve with the large disc around a stationary spindle. The pressure plate fitting the lid of can, is attached to this spindle. The can is raised against it by means of the foot treadle, and the two double seaming rolls revolving

around the cans, are successively brought to bear against the edge, thus double-seaming the lid very rapidly. Adjustments are provided for adapting the machine for any size within its range. The principal dimensions are:

Size of driving pulley on main spindle	8x3¼
" " " " back shaft	8x3
" T. & L. " " "	8x3
Distance from center to frame	7¼ in.
Size of disc carrying double seamer rolls	12 in.
Largest diameter of can with regular disc	6 in.
" " " " special disc	9 in.
" height of cans	9 in.
Total height of machine	65 in.
Size of base plate (round)	20 in.
Weight	550 lbs.

The contract for the iron work on the Kansas City government building has been awarded to the Fred. J. Meyers Mfg. Co., Hamilton, Ohio, for $20,990.

An extension is being built to the works of the Waterbury Brass Co., Waterbury, Conn.

A nine-foot vein of aluminum of superior quality has been found on a farm in Kansas.

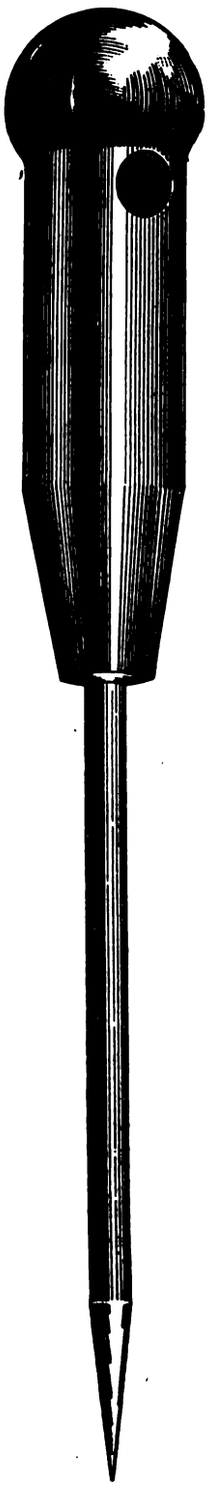
NEW GOODS IN THE MARKET.

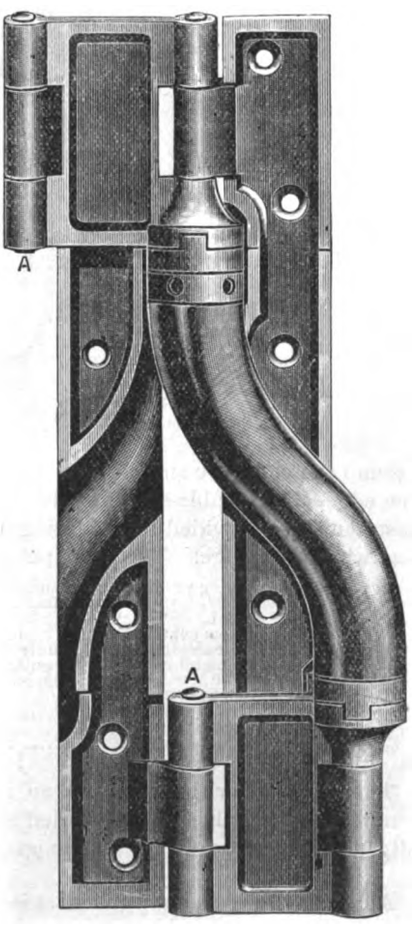
If you have anything NEW, let the world know it by illustrating it in these columns.



NO CHARGE WHATEVER is made, direct or indirect, as our interest lies in showing the readers of "HARDWARE" where the LIVE manufacturers and wholesalers are, and what they are doing.

When your NOVELTY or SPECIALTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

The Hardwaremen everywhere read this department; it is to your interest to make prompt use of it.



Polar Ice Pick.

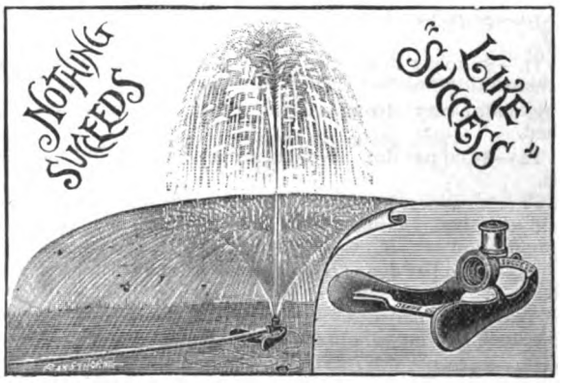
The Dana Hardware Co., Boston, Mass., as selling agents for Estes & Co., Nashua, N. H., are putting on the market the Polar Ice Pick. The action of this pick is similar to that of a nail puller. The head, which is heavy cast-iron, slides down the steel awl 2¾ inches, thus making a slight arm force all that is necessary to be put into the blow. The pick is finished in nickel and japan.

Payson's Oblique Double-Acting Spring Hinge.

The Payson Mfg. Co., Chicago, Ill., have recently put on the market the Spring Hinge, illustration of which is given here. This Hinge has an outside adjustment. The spring is concealed from view at all times, being thus protected from rust, and it is impossible for it to stretch out. The makers state that "it is a strong, reliable hinge, adapted for all classes of work, from the cheapest to the best. It is quickly and easily applied, has a soft but positive action, and cannot get out of order." It is well proportioned, neat in appearance and is finished in all styles from japanned to silver-plated.

The Griswold Coffee Mill.

The Griswold Mfg. Co., Erie, Pa., are introducing the Coffee Mill here shown. The mill is cast all in one piece, as to hopper and box, and is fastened on a neat wooden base.

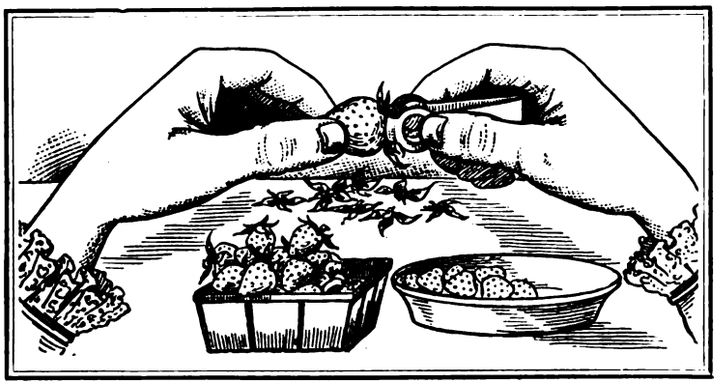


The hopper has a neat revolving cover which entirely covers up the hopper while grinding the coffee. The mill is provided with a stamped tin cup for receiving the ground coffee, which the makers claim is an advantage over wooden boxes or draws, as it collects no dust or dirt. These mills are furnished in black japan finish, striped neatly with gold bronze.

The Austin & Eddy Sash Hanging Attachment.

Austin & Eddy, Nos. 115 to 119 Broad Street, Boston, Mass., have introduced a new Sash Hanging Attachment. This was designed to secure sash ribbon to the weights and sash, in hanging balance windows. It is claimed that in this attachment all previous faults have been overcome; that it is simple and convenient to apply; that no injury is done to the ribbon, weakening its holding power, and the hold on the ribbon is positive. Sash hung according to this plan should last in satisfactory use the life-time of the builder.

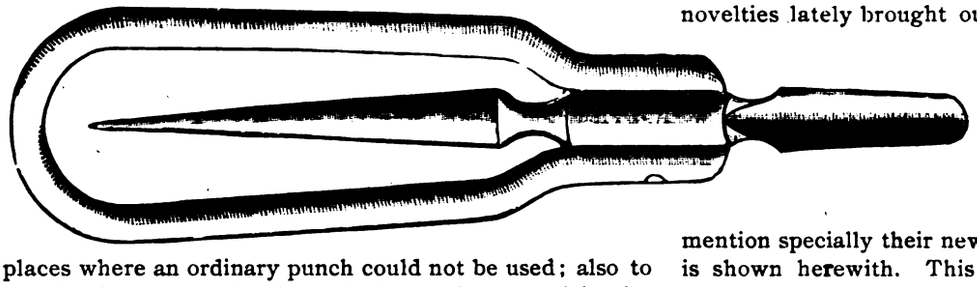
The Success Lawn Sprinkler.



The Deming Co., Salem, Ohio, are introducing the Success Lawn Sprinkler, illustration of which appears here. This Sprinkler, the manufacturers state, throws an umbrella-shaped spray from 15 to 30 feet in diameter, according to pressure of water. It has no revolving parts to get out of order, and can be moved from one place to another by means of a cord and ring, without shutting off the water at the street washer. It is described as neat, durable and convenient. The nozzle and hose connections are brass nickel-plated and the sled is japanned malleable iron. Price, complete with cord and ring, packed in a neat box, $1.00.

Digitized by Google

The Boston Strawberry Huller.



The Union Athletic Goods Co., Somerville, Mass., are putting on the market a Strawberry Huller, illustration of which is here shown. This little article works on the plan of the ordinary candy tongs, the pressure of the fingers

supplying the necessary force to draw out the hulls. The makers state that it saves all crushing of the ripest fruit when hulling, and keeps the berry in perfect shape intact for table use, and prevents that disagreeable soiling of the hands and nails when hulling the ordinary way. It is described as light, graceful, neat, easy to handle and perfect in operation. Price 15 cents, silver-plated.

The Coe Combined Belt Punch and Awl.

The accompanying illustration represents a combined Belt Punch and Awl offered by C. H. Sawyer Mfg. Co., St. Louis, Mo. The tool is made of Stubbs steel, well tempered and finished and of suitable size for the vest pocket. The design of the tool is to enable belts to be laced in

places where an ordinary punch could not be used; also to permit of a system of lacing belts by cutting a semicircular hole without cutting away any of the stock of the belt. It is explained that the lace will not come loose, that the joint is stronger and that the work can be accomplished quicker than in the ordinary manner. Round holes can also be made with the tool from ⅛ to ⅜ inch in size, combining three sizes of the old style. The awl is used for enlarging the holes for double lace and for all purposes for which a scribe is usually used.

Britton's Patent Combination Haft.

Horace E. Britton, Stoughton, Mass., is offering a Combination Haft, illustration of which is here shown The

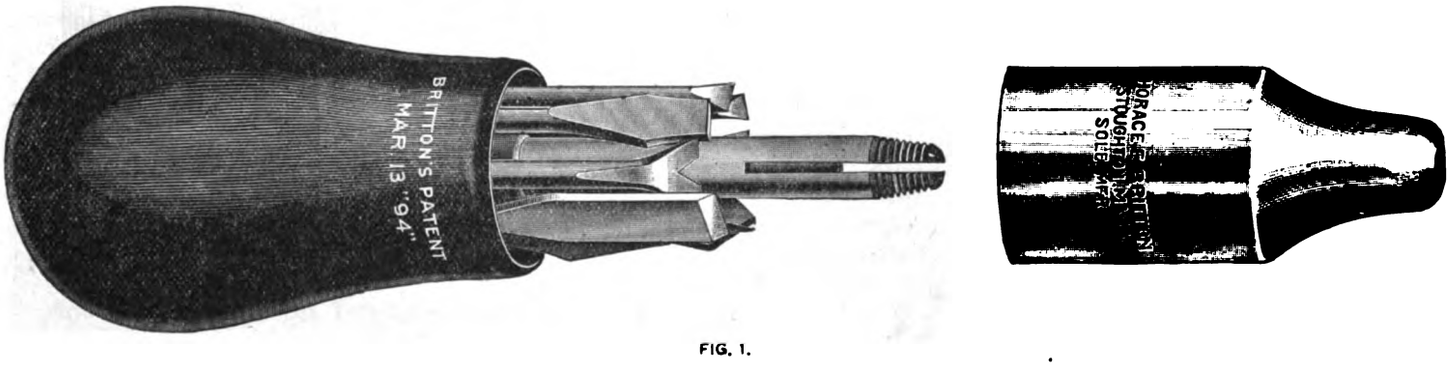


FIG. 1.

Haft contains eight tools including three brad awls, one chisel, reamer, screw driver, tack puller, and counter sink. These tools are made of large size tempered steel. The maker explains that the Haft has all the advantages of other hafts, "with the further advantage of its increased capacity for containing longer bladed tools in the receptacle and of their being more exposed, rendering them easy to

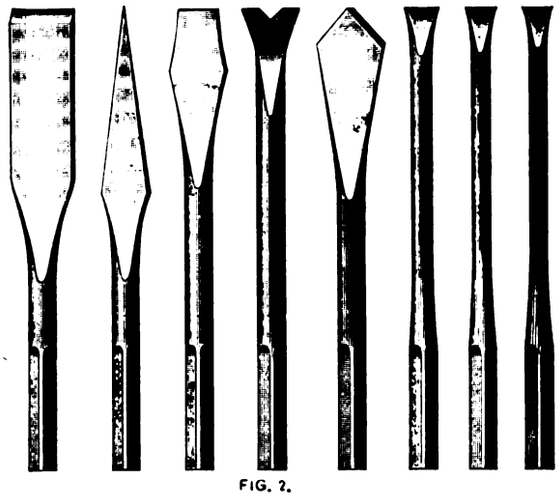

FIG. 2.

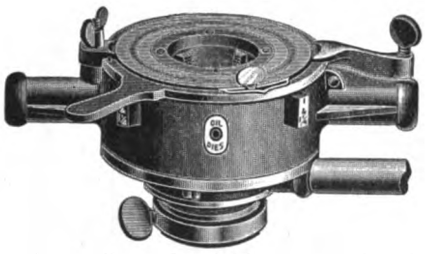
get at, and of closer wear, but is designed specially for large size tools." The metallic cap is nickel-plated and the handle is of rosewood.

Cream City Mug.

The Geuder & Paeschke Mfg. Co., well known manufacturers of tinware at Milwaukee, Wis., are compelled to largely increase their facilities on account of the rapid increase in their business. Plans are now being drawn for a new shop for the production of some of their sheet metal specialties, and as soon as this is completed the tinware factory proper is to be altered and enlarged, so as to give them much needed room for a larger output. Among the novelties lately brought out by this enterprising firm we

mention specially their new Cream City Mug, a cut of which is shown herewith. This article is well made and low priced, and will undoubtedly have a large run during the picnic season.

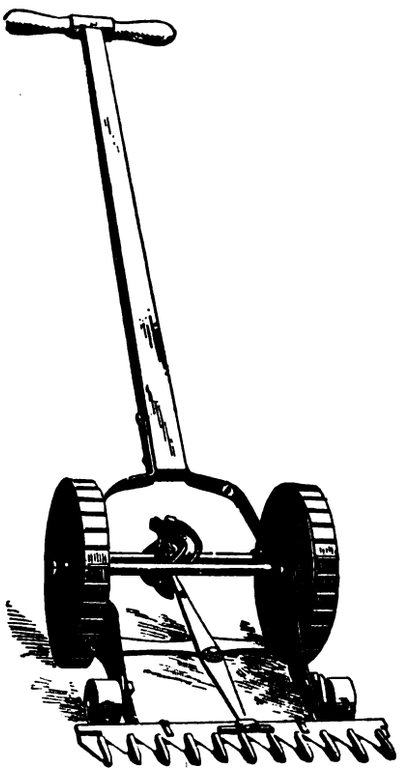


The Oster Adjustable Ratchet Die Stock.

The Adjustable Ratchet Die Stock here shown has just been brought out by the Oster Mfg. Co., Cleveland, Ohio. The adjustable principle is the same as that in use in the company's die stocks, which are already so well known. The new tool is intended for plumbers and steam fitters, pump fitters and other mechanics who have any occasion to thread pipes. It is arranged for use with two handles released from ratchet gear or with one handle as a ratchet tool. This enables it to be used as the regular shop tool

and also out of the shop for work in ditches and close corners where there is but little room to operate the handles. A simple but effective device enables it to be adapted to cutting either a right or left hand thread. It is fitted with

Digitized by Google



a leader screw to start the thread so that it can be operated satisfactorily by an unskilled workman. A positive stop enables the operator to thread any number of pieces of one size without resetting. There are no pockets in which chips or dirt can accumulate to clog the tool or retard the work.

The dies can be easily and quickly removed and sharpened on a grindstone. Oil holes are provided to admit oil to the cutting edge of the dies. Three sizes of this tool are made. No. 7 weighs 22 pounds and will cover 1 to 2 inches; No. 8, 60 pounds, 2½ to 4 inches; No. 9, 80 pounds, 4½ to 6 inches. These sizes the manufacturers expect to have ready for delivery on the following dates: No. 7 about June 1st; No. 8 August 1st, and No. 9 September 1st.

Pioneer Lawn Mower.

The Pioneer Lawn Mower Co., Norristown, Pa., are offering the Lawn Mower as herewith shown. The cutter bar of the mower is directly in front of the wheels. The wheels travel over the ground where the grass is cut, never rolling down the standing grass, while the small wheels at the side are to gauge the height one wishes to cut the grass. It is stated that nothing escapes the finger bars and fingers of the mower, as it progresses; that it gathers in the grass in nearly an upright position, and the vibration or reciprocating motion of the knives shears off the grass with a degree of uniformity; also that weeds, dandelion and plantain are

cut as closely and evenly as grass. It is explained that it only requires the same power to cut grass two feet high as it would to cut two inches, and cuts more closely to the moving of irregular surface and spaces, such as between posts of fences, walks and shrubbery, and that there is no use for the sickle or shears where the mower has been used. The mowers are made in 12, 15, 18, 21 and 24 inches.

Success Garden and Spray Pump.

The Deming Co., Salem, Ohio, are putting on the market the Garden and Spray Pump herewith illustrated. The pump can be used in greenhouses, gardens, vineyards and orchards; for washing windows and buggies, extinguishing incipient fires and for spraying poultry houses with whitewash, etc. The air chamber-cylinder and all working parts coming in contact with the liquid are made of brass. The bucket foot-rest is malleable iron. This pump has large air chamber space and is double-acting, throwing an absolutely continuous stream, either solid or in fine spray. The end of the hose connecting to pump is coiled with brass spring wire to prevent kinking. It is described as simple and durable. Price, $6.00.

The A. B. C. Can Opener.

The A. B. C. Can Opener Co., No. 111 Battery Street, San Francisco, Cal., and No. 256 Church Street, New York, are putting the Can Opener herewith shown, on the market. The blade of the opener is of tempered steel, and the whole is nickel-plated to prevent rust or corrosion. When used

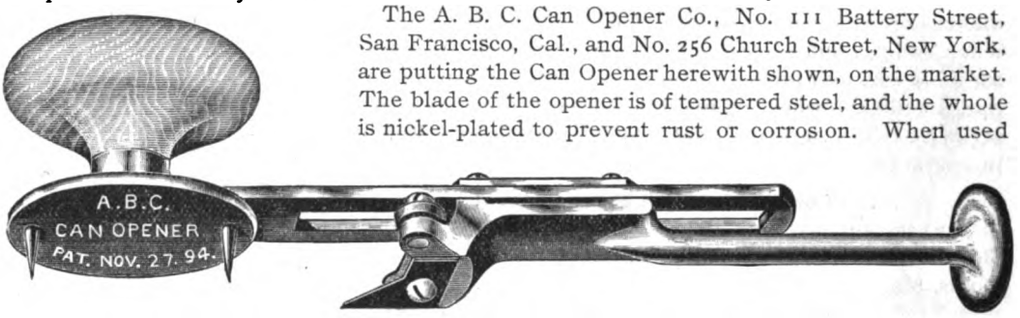


FIG. 1.

the prongs are forced into the top of the can, see Fig. 2; with one hand on the knob the blade is made to enter the can at the left of the seam, and a circular movement is described with the lever, keeping the friction roller against the can. The opener has a capacity from a 1-gallon can down to the smallest sized one, and may also be used to open elliptical-shaped cans as well, as the friction roller permits of the adjustment of the blade. It is explained that if the prongs are not within ½ inch of the center of the top of the can the opener will work equally as well for the above reason. The blade may be taken off for sharpening or for replacing it with a new one. The makers refer to the sim-

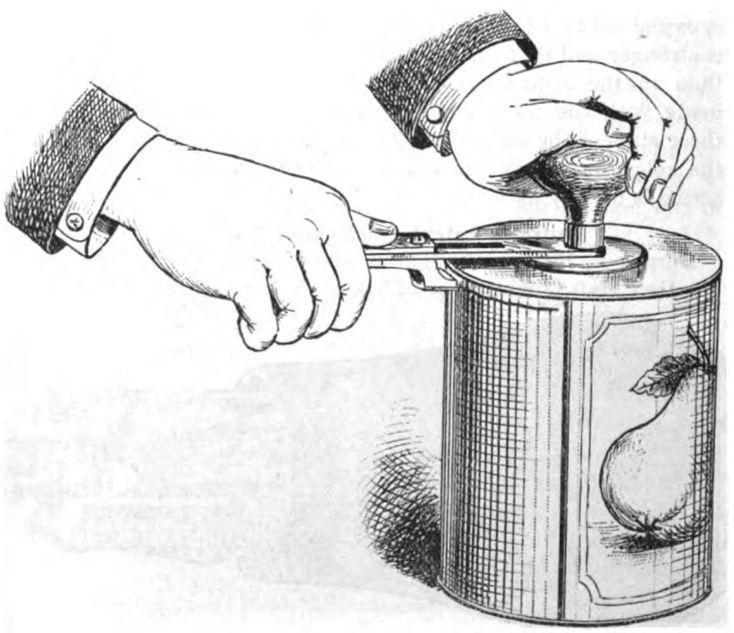

FIG. 2.

plicity of the opener; to the fact that there is no risk or danger connected with the use of the opener; stating that injury is impossible and that it takes off the top of the can, leaving the edge smooth and allowing the contents to be easily removed.

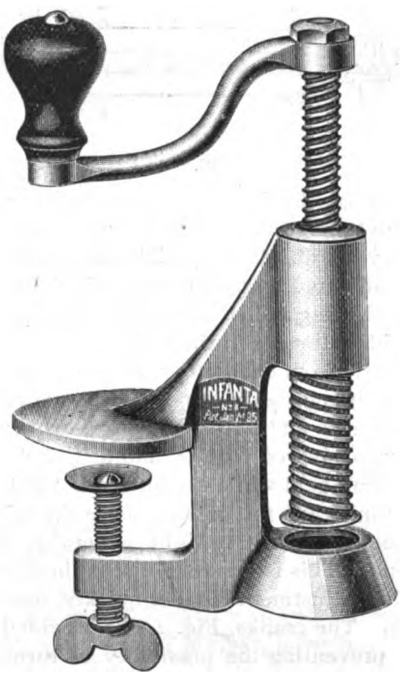
Ashley's Patent Ball Top Steam Whistle.

The Ashley Engineering Co., No. 136 Liberty Street, New York, are placing on the market the Steam Whistle herein illustrated. The bell is supported from its lower inner radius by the branching arms which is cast in one piece with the body of the whistle. The band upon which the bell or top of the whistle is screwed, is split between the arms, and when the bell is screwed over the split portion it compresses the band, which acts as a spring, and holds the top or bell in a firm position. By this arrangement the lower preffery of the bell is held in good alignment with the steam aperture. The makers explain that the most noticeable feature of this whistle is the top of the bell, which is cast spherical in form and gives the whistle a deep and pleasant tone which can be heard at a great distance. The valve can also be disjointed from the body of the whistle and used without the whistle valve as an ordinary whistle. They are made in all sizes.

Vise Jaws for Tubing.

The Newark Machine Tool Works, Newark, N. J., are offering the trade a small and effective device for holding tubing or any cylindrical which is too highly finished, or too delicate to be held in a pipe vise. The clamps are made of vulcanized fibre, rivetted to a backing piece of malleable iron. Half-round grooves are cut lengthwise and crosswise in the fibre, so that each pair of clamps will hold various sizes of tubing. A little projection is cast on the malleable iron piece to prevent the clamp and the work from falling out of the vise, when the vise pressure is relaxed. When the vise is loosened to take out or shift the work, the jaws open out, following the motion of the vise. The paper jaws nearly encircle the tubing, holding it so firmly that it cannot

slip, with no danger of distorting the tube, or marring the finish of the surface. The grooves in the jaws are made to order, to suit any required diameter up to and including 1½ inches.



An impression has been gained by some that E. L. Haley & Co., Boston, are simply manufacturers' agents and carry no stock; that any goods ordered through them would have to be sent for, with consequent delay. This is entirely erroneous. The concern carries a full stock, and is prepared to fill all orders promptly.

Fuller & Christensen of Torrington, Conn., have begun work on the new knife shop. The shop is to be a two-story brick building 26x80.

The Northampton (Mass.) Cutlery Co. are to make an addition to their works. It will be 32x72 feet, and two stories high.

A Modern Cork Puller.

The Meriden Malleable Iron Co., Meriden, Conn., who are so well known as manufacturers of Cork Pullers, have introduced with great success the attractive and excellent article here shown. It is the Infanta No. 8, patented January 1st, 1895. All its parts are made of malleable iron and steel, and are described as having sufficient strength to stand any strain from ordinary use, thereby overcoming all liability of breakage. In reference to its particular mission, the company say: "There has been for some years a demand for a reliable Cork Puller of convenient size for family use at a reasonable price, and the Infanta has been carefully constructed to meet that want. The size and strength is all that could be desired, and at the same time it works so perfectly that any cork can easily be removed, even by a child." A better idea of its usefulness can be gained by a glance at the instructions appended for its operation: "With

the machine in position as shown in cut, turn handle to the right until the cork screw has entered the cork, and the elevating screw has drawn the cork from the bottle. Then turn to the left until the top washer on the elevating screw is locked against the top of the body, and the handle is at its highest point with cork screw inside of elevating screw, as shown in cut. The cork will then have dropped off and the machine will be ready for use again. In case a screw breaks or is worn out, it can be easily removed from the spindle with pliers, and a new one screwed in." Among the other articles made by the company, are their Rapid Cork Puller and Rapid Lemon Squeezers, designed for use in hotels, restaurants, drug stores, clubs, bars, families, etc. Full information as to the above goods, with prices, will be gladly sent by the manufacturers, upon application.

John W. Moore, a Hardware dealer at No. 369 West Madison Street, Chicago, was viciously assaulted by thieves early in the morning at Lake and May Streets. He was twice knocked down, but succeeded in beating off his assailants. After he had fired a shot at the highwaymen, two of them ran away, but a third remained and stabbed Mr. Moore seriously in the arm, shoulder and chest. The latter wound missed the heart by a sixteenth of an inch.

U. J. Ulery, London manager Clauss Shear Co., London, Eng.: "Your Fifth Anniversary number, gotten up in attractive and new clothes, is received, and I assure you, as your paper always is, proved very interesting to an American abroad."

ILLUSTRATED BICYCLE NOVELTIES.

MANUFACTURERS and DEALERS are invited to make FREQUENT USE of these columns.

Anything NEW in BICYCLES or BICYCLE NOVELTIES should be sent us immediately. NO CHARGE, direct or indirect, is made, as our interest lies in SHOWING THE HARDWAREMAN what is going on in THE BICYCLING WORLD.

When your NOVELTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

Frazier Bicycle Features.

The illustrations here given represent some of the special features of the Frazier wheels, as used on the bicycles manufactured by W. L. Frazier & Co., Aurora, Ill. The

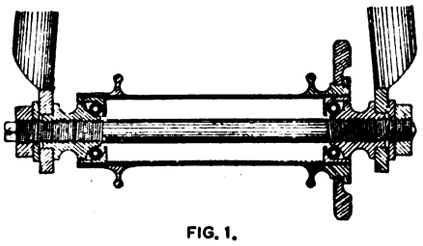

FIG. 1.

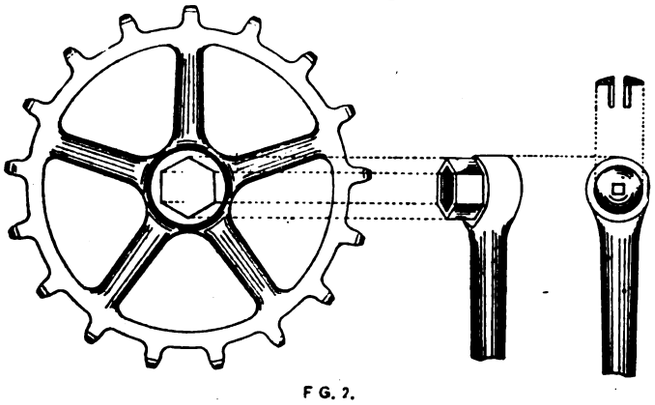
hub, Fig. 1, is of the large barrel pattern, "harmonious with the large tubing, and the ball cups are so placed in the hubs that they are absolutely parallel with each other. The bearings are adjusted by turning the spindle instead of the cones, one end being milled square for that purpose. The cones are held stationary in the forks and are made to approach or recede from each other by revolving the spindle. This obviates the necessity of poking the fingers down between the fork-side and hub in an effort to turn the cone which is always covered with oil and dirt, and it permits of the spindle being held while the nuts are tightened. It is well known that when the nuts jar loose the balls are liable to grab a cone and run it up tight, generally crushing the balls and cone. This is impossible with these bearings. A more sensitive adjustment is more quickly made than with the old style. The cranks, Fig. 2, are provided with hexagonal holes, preventing the possibility of turning or working loose and the usual key for attaching the cranks is dispensed with, making a much neater finish at the junction of the crank and shaft. The tubing in the frame is exceed-



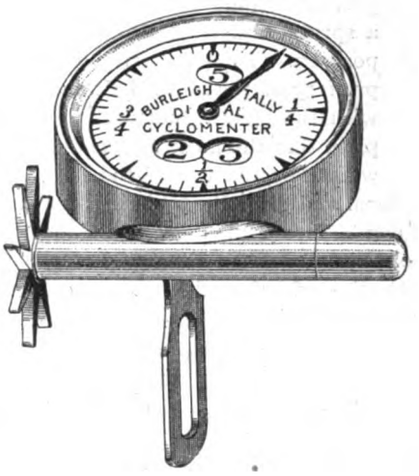


FIG. 2.

ingly stiff and strong. The main tubes are 1¼-inch, the horizontal tube 1⅛-inch and the rear forks ⅞-inch. The cranks and crank shaft, as well as cones and bushings, are made of the very finest steel and are carefully hardened."

Burleigh's Tally-Dial Cyclometer.

The Tally-Dial Cyclometer Co., Tilton, N. H., and Newport, R. I., are putting on the market a Cyclometer, illustration of which is here given. The manufacturers state that it is light, small, noiseless, accurate. It has a dial which can be read at a glance and can be set back by the holder of the detachable key only, therefore, the user of this instrument has no fear of those who would tamper with his record. It has another special feature, a tally-dial on the reverse side which can be used supplementarily for recording distances between special points,—hours, days, miles, or other items necessarily requiring written memoranda. Retail price, $2.00. This Cyclometer and the

watch carrier sold by the same firm, with a watch or chronograph, makes a speedometer which is referred to as "absolutely without the least friction, and a pace-maker which one can can have at hand and before his eyes at all times."

National Crank Hanger and Chain Adjustment.

The accompanying illustrations represent two features used by the National Cycle Mfg. Co., Bay City, Mich., on their 1895 National wheels. The crank hanger shown in Fig. 1 has a 5½-inch tread with 3½ inches between the ball races. The cups are ground inside and out after tempering, and joined by a threaded connecting tube, insuring their retention in a perfectly parallel position after being put into the machine. The cones are a part of the axle, ground to size after tempering. The distance between center of pedals and ball races is reduced to a minimum, and for ease of examination—the entire bearing being independent of the frame, it can be taken out and replaced in a few minutes by anyone. The balls are constantly running in oil, which, on account of the shape of the end of connecting tube, cannot escape

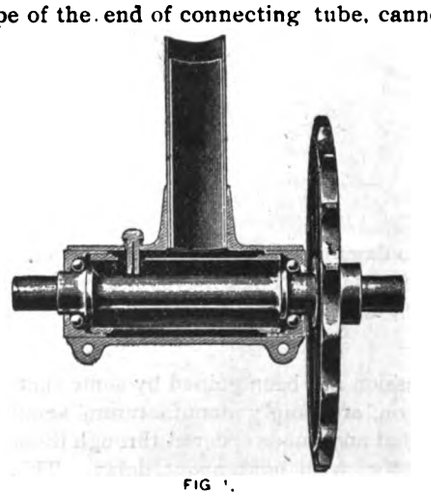

FIG 1.

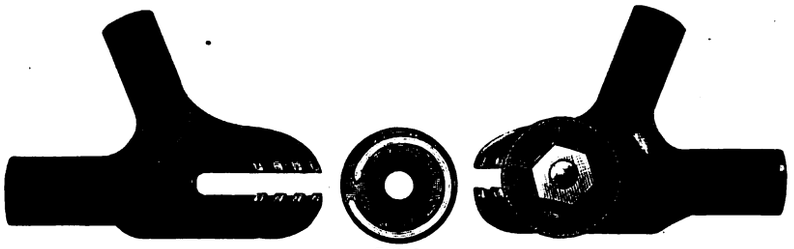
from the cups and there is no opening into inside of hanger except through their specially designed dust-proof oiler, and the construction is such as to permit of lateral adjustment. It is explained that the sprockets can be lined up by slipping the entire bearing through the hanger in the direction required. The value of this point will be especially appreciated by anyone who has had his chain refuse to track as a result of an accident far from home. The entire bearing is independent of the hanger itself. The

Digitized by Google

cups are neither pressed nor screwed in. The heat used in brazing cannot affect the position of the cups relative to each other, and by this method they are at all times parallel, all threads being absolutely true with ball races, permitting of no variance. In the chain adjustment shown in Fig. 2 the sides of the rear forked ends have teeth over which the scrolls on the inner side of the disk screw. These disks,



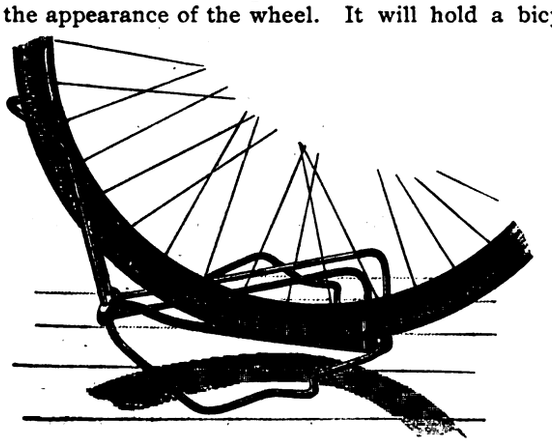


FIG 2.

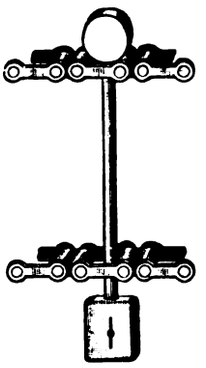
by this motion, travel either forward or backward, as desired, carrying with them the axle which passes through them. The cones on axle are of the same size as these disks. Thus, when the wheel and sprocket are in a line, and the axle nuts are screwed to place, the entire rear end of the frame is securely locked. It is pointed out that the rear axle is locked on both sides of frame, and also that the engagement of the scrolls with the teeth locks it perfectly against both forward and backward strains. Absolute quality of adjustment of both sides is obtained by anyone, as the wrench is only used to loosen the axle nuts. An adjustment of one-thousandth of an inch may be made if desired. In making an adjustment, the operator turns both disks at the same time, and is in such a position as best to enable him to obtain a perfect alignment of his wheel and sprockets by sighting through the frame. A very important point of advantage is the possibility of removing the rear wheel without disconnecting the chain. By disengaging the scrolls from the teeth referred to the axle can be moved forward to the end of slot in the fork end, the chain can then be lifted from the larger sprocket, and the wheel left free to be taken from the frame. It works easily, quickly and accurately, and lends rigidity to the entire rear end of the frame.

The Diamond Cycle Stand.



C. C. Finneran & Co., Painesville, Ohio, are putting on the market the Diamond Cycle Stand. Lightness, strength, durability, compactness, beauty, simplicity and self-adjustment to any size tire or wheel are some of the qualities claimed for this stand. It is movable, holds the bicycle perfectly rigid without being fastened to the floor, allows a clear view of the wheel; no part of it crosses or interferes with the appearance of the wheel. It will hold a bicycle

without inflating the tires. It is made of spring steel rods and is indestructible; weighs only four pounds, and occupies less width of space than the handle-bars. It is neatly japanned and is sold at $1, or in nickel, $1.50. Special prices are quoted to the trade.

Thief Proof Bicycle Lock.

The Anglo-American Iron & Metal Co., No. 213 Pearl Street, New York, are offering the trade a Bicycle Lock, which they claim is thief proof. In describing their lock they say: "Of the many so-called bicycle locks on the market there are none that are entirely free from defects and objections. The Thief Proof Lock is extremely simple; its method of fastening is through the links of the bicycle chain, making it utterly impossible to move the wheel. It

does not mar the enamel on the frame. Both ends of the lock revolve as on a swivel and thus make it impossible to obtain any grip in an attempt to wrench or twist it off. The lock proper is a strong lock on the Yale principle, and snaps on to the rod without the use of a key, the key only being required when unlocking. Neat and compact—of a shape easily carried in the pocket—being handsomely nickeled on copper, it is a quick seller and a good leader." For the trade, put up on attractive colored cards. Three locks on a card. Retail price, 75 cents each. Liberal discounts to the trade.

The Bills Were Gone.

J. P. Jaudon, who keeps a Hardware store at Fourteenth and Summit Streets, had a call from a stranger Wednesday afternoon and it cost him just $10.

It was about 4 o'clock. A man dropped in and said Dr. Brady, whose office is close by, "wanted a $10 bill for ten ones." He said he wanted the ten to send away in a letter.

Mr. Jaudon knew Dr. Brady well and was eager to accommodate him. He had no $10 bill, however. The best he could do was two fives. The man said this would do, took the two bills, folded them, and, drawing an unsealed letter from his pocket, he apparently put them in. At the same time he threw down a roll of $1 bills. Mr. Jaudon picked these up and counted them. The stranger moved toward the door, sealing his letter as he went.

"Hold on there," cried Mr. Jaudon. "You're a bill short."

"Eh!" said the man.

He counted the bills.

"Sure enough," he said. "Here, you keep the $10 till I see Dr. Brady."

He threw down the letter, gathered up the roll of $1 bills, and before Mr. Joudon could think twice was gone.

Jaudon looked at the letter. It was sealed up. It was addressed to Mrs. Jane S. Miller, 176 Lombard Street, Cincinnati, Ohio. It had the fullness that might be made by two $5 bills. Mr. Jaudon threw it in the cash drawer and went on attending to customers.

The stranger was gone a remarkably long time. In fact, he never did come back. Mr. Jaudon waited some time and then grew suspicious. He opened the letter—it contained two pieces of green paper. He had been "flimflammed."—*Kansas City Times.*

S. A. Haines, of the S. A. Haines Co., Indianapolis, Ind., has been appointed general sales agent for the Bryan Mfg. Co., Bryan, Ohio, manufacturers of the Champion Wheelbarrow. He has, with his accustomed activity, paid a visit to the leading cities of the West, and in June will be seen moving down upon those of the East.

RECENT TRADE PUBLICATIONS.

The Clauss Shear Co., with headquarters in Fremont, Ohio, have issued from their English office, No. 34 Snow Hill, London, a new catalogue expressly prepared for the English trade. It is fully six times in size of that issued in 1893, and is an attractive presentation of a fine line of goods. It fully illustrates and describes their scissors, including the pocket, telescope, folding, embroidery, button hole, manicure, and other varieties; nail nippers, nail knives, nail files; shears of all kinds; tinners' snips; Clauss razors; serrated bread and other knives; meat saws; steels, choppers, potato mashers, bicycle and satchel locks, etc., etc. In a note, the company say: "We believe our resources to be unsurpassed. Our factory is practically new; was designed and built for making shears exclusively, and with the combination of ample capital, practical experience in the business, and an accurate knowledge of the best manner in which to use these resources, we feel we are beyond present competition in our ability to manufacture really good shears and scissors that will cut. While the best evidence of the excellence of our product is our constantly increasing and far reaching trade, still the award of medals and diplomas at the World's Columbian Exposition sets a seal of official approval upon our goods, both as regards their quality and finish. Our present factory was erected in 1890, and was built and equipped exclusively for the manufacture of shears, scissors, razors, tinners' snips, and constitutes the largest shears factory in the world as well as the one having the greatest capacity. On the back cover of this catalogue we show a bird's-eye view of our extensive factory. The floor space under roof is nearly 70,000 square feet. The entire plant is fitted with the most modern and expensive machinery, much of it especially designed by ourselves and built for our own work."

W. & B. Douglas, Middletown, Conn., with branches in New York and Chicago, have issued a handsome new special catalogue and price list of their Spraying Pumps, Knapsack and Garden Engines, and Insecticides. In addition to full descriptions and illustrations of these various lines of goods, it also contains much valuable information of a related character, standard formulæ, etc. As a specimen of fine typographic work it will hold its own with the finest catalogues of the year, being artistically printed upon heavy calendered paper. This old established concern—founded in 1832—manufacture two thousand varieties of pumps, hydraulic rams, water work supplies, and hydraulic machines for every use. In a prefatory note to this catalogue, the company say: "In presenting this special catalogue to the trade, we would say that we have been specialists in the manufacture of pumps and hydraulic machines for over sixty years, and following close upon the track of the scientific agricultural investigations of the past decade, we have given much attention to the subject of constructing Pumps for the purpose of meeting a growing demand of horticulturalists and agriculturalists for the best and simplest article to throw solutions of chemicals to destroy insects and the numerous pests that are making yearly havoc with the crops of the husbandman, and believe no better investment can be made by any person interested in this department of labor than by buying one of the Spraying Machines shown in this publication. It will pay ten times its cost."

The Meriden Cutlery Co., Meriden, Conn., have prepared one of the most artistic and most attractive trade publications of the season in their Illustrated Catalogue No. 8, of Table Cutlery, in pearl, stag, etc., with sterling silver trimmings. It contains thirty-nine full-page albertype plates, nine by thirteen inches in size, printed upon heavy card paper, and finished in first-class manner. These show their rubber handle knives, celluloid handle knives, ivory handle knives, solid steel knives plated, etc.; sterling silver ferrules, fruit knives, orange knives, nut picks, lemon knives, butter knives, children's knives, cheese scoops, pie knives, fish carvers, French cook knives, scale tang carvers, bird carvers, game carvers, ham carvers, etc.; steels, butcher knives, hunting knives, bread knives, and a line of elegant boxes for holding the goods described above. In a note the company say: "In presenting Catalogue No. 8, we feel confident that we show the largest and most complete line of fine goods ever grouped in one catalogue. We call especial attention to the goods in pearl, stag, etc., with sterling silver trimmings, .925 fine. The designs are patented, and we confidently recommend them as meeting the demand for an article which is first-class in every particular. It is our aim to constantly improve in style, quality, finish, and in methods of packing, and all goods bearing our name are fully warranted. With greatly increased facilities we are prepared to fill orders promptly. Our common goods are shown in Catalogue No. 7."

The Manhattan Electrical Supply Co., No. 32 Cortlandt Street, New York, have issued their illustrated catalogue No. 7, describing their Electrical Supplies. It contains over two hundred well filled pages, showing about everything that could be asked for under the descriptive title. The company say: "We make a specialty of open circuit batteries, nothing but the best retort carbon being used. All of the carbon used in our batteries is manufactured by ourselves, at our own works, and none but the very best as regards conductivity, etc., will be found in our batteries. We do not undertake to compete in prices on carbon battery electrodes, but confine ourselves to making a superior quality at a moderate price. Our carbon cylinder batteries are equal to the best imported, and we invite the most skeptical to make comparative tests. Our prices speak for themselves."

T. W. Root Publishing Co., No. 97 Charlotte Avenue, Detroit, Mich., are sending out a circular describing and pricing their new Hardware Price Books and cards up to date. They have mailed 10,000 of these to Hardware and other dealers interested. The leaflet furnishes an immense amount of valuable information to parties who are interested in the above lines of publication. The company state that terms will be promptly furnished, covering the cost of an edition of Hardware and tool catalogues. Eleven price books and forty-three price cards are described, and will be sent by mail or express, charges prepaid. They are referred to as simple and practical, as in very general use, and that their sale is rapidly increasing.

Thomas Slaight, Nos. 113 and 115 New Jersey Railroad Avenue, Newark, N. J., has sent out a leaflet showing his patent Railroad Locks, Brass Knobs, Keys, etc. He says: "Having been established since 1849 and continually increasing our floor space until now we occupy the spacious buildings located at 113 and 115 New Jersey Railroad Avenue, and 119, 121, 123 and 125 Green Street, Newark, N. J. We have confined ourselves principally to the manufacture of Locks, Knobs and Keys for Railroad uses. All of our goods are made of the best of material, and workman ship is unequalled."

The Wm. Frankfurth Hardware Co., Nos. 116–118 Clybourn Street, Milwaukee, under date of April, 1895, have issued a large and comprehensive catalogue of the extensive lines handled by them. These include oil stoves,

Digitized by Google

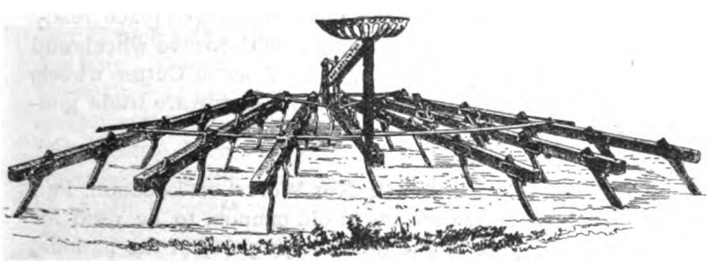
refrigerators, farming tools, shovels, spades, scythes, cradles, screen doors, screen windows, lawn mowers, children's express wagons, baby carriages, etc. etc.

The Brooklyn Lock Co., Brooklyn, N. Y., are sending the trade a sheet showing in detail their Reversible Upright Rim Dead Locks, escutcheons, knobs, bolts, etc. They state that their latches have the improved swell in plug and key. Samples will be furnished jobbers for inspection, if desired.

We have received from the George Worthington Co., Cleveland, Ohio, a handsome new catalogue of more than one hundred and fifty pages, showing their full line of Sporting Goods. About everything that can be enumerated under the heading is shown therein.

The Buhl Stamping Co., Detroit, Mich., have issued a revised list and condensed catalogue of their factory and railroad Milk Cans, Can Stock and Dairy Supplies. It is a neat and handy work, and easy of reference for those interested in these lines.

"Nubian, the best black on earth," is the old familiar inscription on a little book just received from the Nubian Iron Enamel Co., Cragin, Ill. It is filled with interesting matter which amplifies the text upon the title-page.



The Enterprise Mfg. Co., Akron, Ohio, have issued a large and handsome catalogue showing their full line of Fishing Tackle. Everything that any fisherman could ask for seems to be described and illustrated within it.

The Horton Mfg. Co., Bristol, Conn., have issued a catalogue of their Bristol Steel Fishing Rods. It gives full descriptions and prices of their well known line.

The Hamblin & Russell Mfg. Co., Worcester, Mass., have issued a catalogue showing in full their lines of Hardware specialties and wire goods.

The Heller Riding Harrows.

Among the tools used in agricultural and horticultural work, it is a generally conceded fact that a harrow is of great value in the preparation of ground. A harrow to be efficient must have good cutting power, and must thoroughly pulverize the ground to a depth of four or five inches, so that the dampness of the earth can reach the tendrils of

the plant. A cut is herewith shown of the Heller Riding Harrow, which is constructed on principles which have proven very satisfactory. Its cutting power is great. The draft is light, and it leaves the ground in a perfect state of pulverization. The construction of the teeth is slanting backwards, thus riding all trash under for manure, as well as facilitating its cutting power and making the draft light. The harrow is perfectly flexible and no two teeth follow in a direct line, so that every clod of earth is thoroughly worked and turned. It is made of the best of steel and "is indestructible as far as use is concerned. Has the cutting power of the disk harrow, and leaves the ground pulverized and level, which the disk does not do; will also work in any kind of soil, stony or otherwise. It can be turned in a very short space, and is easily adjusted." Is sold with or without a seat, and at a surprisingly low figure by the Heller Mfg. Co., Montclair, N. J.

Simmons Co.'s New Building.

The Simmons Hardware Co.'s new building on the southeast corner of Ninth and Spruce Streets, St. Louis, is rapidly nearing completion, and will be ready for occupancy in October. It is a massive pressed brick and stone structure, and will tower above the buildings at present composing the Cupples block. The Cupples Realty Co. is erecting the building, at a cost of almost $600,000. When completed it will far surpass any business block of its kind in that city. It is being erected on a strictly modern plan and specially arranged to suit the future occupants. By means of an iron bridge the new structure will be connected with the warehouse of the Simmons Hardware Co., located to the rear of the new building, fronting on Poplar Street. It will have a frontage of 150 feet on Spruce Street and will be eight and a half stories in height. The first and second floors will be used as offices and salesrooms. Heavy arched windows will give the structure a massive appearance. The cornice work will be of red granite, as are the trimmings on the lower part of the building. The structure will be strictly fireproof. The Simmons Hardware Co. have leased the building for twenty years, with the privilege of releasing at the expiration of that time.

Cleveland Twist Drill Co. Removal.

The following announcement carries its own explanation:

On June 1st we will remove from our present quarters, No. 102 Reade Street, to No. 99 Reade Street, New York city, where we shall place in charge of our Mr. C. I. Markham, a new and complete stock of our Twist Drills and tools; together with complete samples of our manufactures. By reason of our improved facilities and enlarged quarters, we hope to serve our patrons more satisfactorily than ever before.

Respectfully,

CLEVELAND TWIST DRILL CO.

Cleveland, Ohio, May 8, 1895.

The death is announced of James M. Hamilton, who was for many years prominently identified with the Hardware interests of Nashville, Tenn. He was born in Russellville, Ky., September 5, 1821, his father being Joseph Davie Hamilton, a leading member of a famous Kentucky family. He was fifteen years old when he went from Russellville to Nashville. He engaged in the mercantile business and continued in it with success until his death. He was the head of the firm of J. M. Hamilton & Co., Hardware dealers, and was probably the oldest merchant in Nashville. In all his long years of dealing he maintained a reputation for absolute purity and fairness in all business relations, and dies with a record in every sense worthy of emulation.

Says a Baltimore special: The boys in Wallace & Neitz's tin can factory struck because of a reduction in the wage scale. Strikers and proprietors met and the latter proposed a way to settle the matter. "We will toss up a penny," they said; "If you call it two out of three we will continue the 2½-cent scale until the last week of May, then we will give you the 3½-cent scale back again. If we win we will not raise the scale until the last week of June." The boys accepted the offer. Mr. Wallace tossed the penny. "Heads," called the strikers. Heads won. The next throw was "tails," but the third brought heads again and the boys won. The factory is in full operation.

On page 5 of this issue, the Mossberg Wrench Co., manufacturers of novelties at Attleboro, Mass., call especial attention to their American Knife and Scissors Sharpeners. These are articles very highly spoken of, and are sold with great success by Hardware dealers who have commenced handling them. Others who have not investigated will do well to write to the company for prices, particulars, etc.

THE HARDWARE CLERK'S CORNER.

EDITOR HARDWARE: In reading an item on page 79 of your edition of April 10th, there is revealed an interesting feature which should command the attention of every Hardware clerk, because in it conveys a possible future for each and every one. To think of a house of many years' standing, going through changes as the years may compel (through death and other causes too numerous to mention) and still retain the clerks with a record of from twenty to fifty years' service. What does it say? In the mind of a young man of honest integrity, as he peruses the lines, he utters these words: "That's the kind of a house I want to work in." It gives a reputation and standing to such a house, as to create a desire among others outside to watch for the first opportunity to gain an entrance? There is another house which deserves attention, and which is a pleasure to watch, as the routine of business is carried on. The head of the firm can be seen moving in and out among the clerks, attending to duties the same as the clerks, and it makes no difference who comes in—all are treated in the same cordial spirit. Some of the clerks, who some years back were holding minor positions, are now holding those of trust, with the same bright look depicted upon their countenances and the same earnest endeavor to increase the interest of the firm who employ them. Hardware clerks what does this mean?

First: Stability of character.

Second: Unanimity of interest.

Third: Attention to business.

Any house having a number of clerks bearing the qualifications above stated, can without doubt stand the storms of many winters and in years to come show a history worthy to be envied. There is another interesting point connected with the clerk which is sometimes lost sight of, and that is that the firm should see to it that their clerks are educated up to the requirements their business demands, and fit them for the part they are to take, thus creating that mutual confidence which forms the basis of every good concern.

It is hoped that the above few lines will be of interest and will do the good intended. Fellow clerks, read HARDWARE, for it contains many things of interest to you.

Chambers Street, New York, May 15. HARDWARE CLERK.

LESSON TO A CLERK.

A seafaring man who was in Boston for a brief stay had a few purchases to make, one of which was a straw hat. Noticing a store where hats were displayed in the window, he went in.

"Have you a pretty good quality of straw hat that will fit me?" he inquired of the young salesman who came forward to wait upon him.

"Yes, sir," responded the clerk; and after a sharp look at his customer he brought out a straw hat of rather coarse braid. "This is about your size," he said, "and it's a good hat; rain won't hurt it."

The old man tried it on and then examined it carefully.

"Kind of coarse straw, ain't it?" he asked. "I wouldn't look much dressed up in it, would I?"

"Oh, it's a very fair braid; it's a hat you won't have to be careful of. You can stay out in the rain with it if you want to."

"Well, young man," said the would-be customer, laying the hat on the counter, "folks where I live know enough to go in when it rains, so you'd better keep this hat for some of your friends and relations, and show me a hat that I'll have to be a little careful of. I generally have an old hat I can wear if need be."

The young man accepted the lesson, and showed his customer a hat of the quality he had asked for in beginning. *Youth's Companion.*

CATCHES THE MEN, TOO.

The proprietor of a Fifth Street house yesterday told the new clerk to try his hand at window dressing.

"I want you to fix that window up so that every woman on the street will look into it," he observed.

The clerk was one of those clever little fellows that you read about in the city papers. He went at it. He made a curtain of solid black velvet and suspended it from the top of the plate glass close to the inner surface. "What on earth are you doing?" cried the senior member, happening to come along that way.

"Making a mirror of the window," complacently answered the clerk, as he shook out a fold very carefully. "If the women won't look at that then I'll miss my guess."

The clerk drew $3 more in his envelope at closing time.—*Cincinnati Tribune.*

Adjustable Glass Cutter.

The M. F. Hollow Handle Adjustable Glass Cutter here shown is being placed upon the market by the Millers Falls Co., Millers Falls, Mass., and No. 93 Reade Street, New York. In describing it the makers say: "The Handle to this Glass Cutter is hollow to receive extra cutters and pins, and is made from cocobolo, handsomely polished. The metal head is brilliantly polished and nickel-plated. The post in which the cutter wheel runs is made from hardened

steel, while the cutter wheels are made from the finest steel. Every part of this tool, except the wheels and arbor pins, will last a lifetime, and these parts can be bought for much less than the ordinary glass cutter. The handle contains twelve cutter wheels and three arbor pins. These wheels can readily be inserted by loosening the screw upon the face of the head and drawing out the post, when a new wheel may be put in and the post returned to place ready for use. Price of Handles complete with twelve wheels and three pins in each, per dozen, $12. Price of Cutter wheels per dozen, 40 cents. For sale by the Hardware trade generally."

The Pennsylvania Bolt & Nut Works of Lebanon, Pa., have received three carloads of old cannon, to be used for scrap. They were at one time the property of the national government, but now unfit for use. Some of them are very ancient in appearance.

The New York State Association of Hardware Jobbers, held their recent meeting in Utica, and were entertained at dinner at the Butterfield House by Charles Millar & Son, David S. Foster, and Wright, Dana & Co.

Herbert A. Hodgdon, Dover, N. H., is versatile in his business dealings. He has opened a combined Hardware and "gent's" furnishing store. If his customers don't want Hardware they can purchase neck wear.

At a recent meeting of the New England Hardware Dealers' Association, at the United States Hotel, Boston, a committee were appointed to investigate and report upon the question of prices.

They Make Pneumatic Wheels, Etc.

The Crawford Wheel & Gear Co., Hagerstown, Md., have issued a neat catalogue describing their manufactures in the shape of pneumatic wheels, steel tabular gears, ball-bearing axles, fifth wheels, shaft attachments, complete running gears with pneumatic and cushion tires, etc., etc.

Speaking of ball bearing axles they say: "There is a demand for easy running vehicles. The sulky has demonstrated that ball-bearing axles and pneumatic tires reduce the draft fully 60 per cent. and many claim 72 per cent. The adjustment of the bearings in sulkies being exactly like the bicycle adjustment, was not to be thought of (owing to its complications), in connection with ordinary vehicles when cared for by inexperienced men. In designing this ball-bearing axle, the aim has been to construct the best adapted for all kinds of wheels. Realizing that ball bearings are comparatively new to the trade every effort has been made to produce 'a ball-bearing axle' simple in adjustment. The following advantages are claimed for the Crawford axle: It is adjusted by screwing in the cap screw the same as any ordinary axle. It is dust and water-proof; the latter is very important, as the water must be excluded while washing or the balls will rust and wear. All parts are interchangeable and can be duplicated. All wearing parts are thoroughly hardened. It requires less cutting of hub than any other ball-bearing axle. The axle is carefully adjusted before leaving the factory. All that the user is required to do is to screw in the cap screw until it bottoms in the recess in end of spindle, and the adjustment is perfect, positive and practical. The annoyance of adjusting nuts to a nicety is done away with. The wheels can be taken off in the ordinary manner; the balls cannot fall out or become displaced. We sum up our claims as follows: Simplicity of construction; ease in handling, cleaning and repairing; freedom from wear; water and dust proof qualities; last, but not least, the manner of adjustment or rather the absence of it. We manufacture the following sizes: ⅝, ¾, 13-16, ⅞, 15-16, 1, 1 1-16 and 1⅛ inches."

Pneumatic tires are discussed in the following minute manner: "After a long series of experiments, we arrived at the conclusion that the Hartford Single Tube Tire is the best so far produced, for use on vehicles, and have therefore adopted it as the base of our special non-creeping tire. The Hartford Rubber Works Co. are manufacturing it for us, with our special non-creeping device, in three different weights under our own brand, 'The Crawford.' No. 1.—Our 28-inch sulky tire will weigh approximately 3½ pounds per pair. Each tire is made of pure sea island fabric, an inner layer of pure rubber and an outer layer best adapted to give strength and wearing qualities combined with speed or resilience. This tire being made with a view to speed for track use alone, combines all resilience that it is possible to obtain, together with sufficient strength to insure perfect reliability. No. 2.—Our 28-inch sulky and cart tire is composed of two layers of nineteen ounce fabric, square weave, put in on the bias; a heavy inner layer of pure rubber to form the air tube. Also, a very much heavier outer layer of rubber than used on the sulky tire, being considerably thickened up on the tread. These will weigh seven pounds per pair, and are especially adapted for use on training sulkies and carts, and careful road work such as driving to and from trains or track. No. 3.—Our carriage tire is composed of three layers of twenty-six ounce fabric, with a still heavier pure rubber inner layer and a complete outer coating of heavy rubber, two inches in diameter, and is made any size from 28 to 46 inches. Our 34-inch tire will weigh about seven pounds, and is practically indestructible for general road use, being strong enough to withstand a bursting pressure of five hundred pounds to the square inch, and will not be hurt by driving over either macadamized or country roads, as we tested them up to thousands of miles during the past year without their becoming punctured or deflated. One set which has been in constant use for six months has not required the slightest attention, although having been driven through mud and over rough, frozen roads. All the above tires are fitted with our special non-creeping device which has entirely overcome the greatest objection so far known to the use of pneumatics, namely, that *creeping on the rim*, causing the valve to pull out or become inoperative." Several other articles are described in a like interesting manner.

"Sootene" 26156.

The word Sootene has been registered as a trade-mark with the above number. Mr. Givens informs us that the demand has been so great he has been compelled to enlarge the plant for making it. Orders have come to him from every part of the country and from abroad. "Sootene used every week day and Sundays as well brings peace and prosperity. A spoonful sprinkled on the hot coals will make them glow with increased fierceness. No clinkers, no pipe full of soot, and no worry over a stove that will not bake. It is an indispensable article in a family that has tried it once. Sootene can be sold at a good profit by all general merchants. Once introduced it will take care of itself." See the advertisement on another page and write the manufacturer, Royall Givens, Corpus Christi, Texas, for a sample box.

The following announcement, under date of Nashville, Tenn., April 25th, carries its own explanation: "The purchase of the hoe factory at Nashville, Tenn., formerly owned by the Lewis & Babcock Mfg. Co., is announced. These works will be started up about June 1st, next, and will be operated by the Withington & Russell Co. The officers of this company are as follows: W. H. Withington, president; T. H. Russell, vice-president; P. H. Withington, secretary and treasurer. Mr. Thos. H. Russell, for twenty years connected with the Withington & Cooley Mfg. Co., will take the general management of the works at Nashville, and will have under him competent and experienced men. These works will be run with especial reference to the needs and wants of the Southern trade, and the management hope to win the good will and patronage of the buyers of Handled Hoes and other Steel Goods throughout this section of the country."

A dispatch from Portland, Me., says: A contract has been closed whereby the John P. Lovell Arms Co., of Boston, purchased the unused Portland plush mill at Cape Elizabeth, through ex-Gov. Robie, the president of the First National Bank. This big brick factory will be utilized, first for the manufacture of ether launches, and ultimately the Lovells are to build another large factory for the manufacture of bicycles. It is expected that several hundred men will be employed.

The Hitchcock Lamp Co., Watertown, N. Y., have placed a contract with Haley, Ward & Burns for the erection of a new brick building on Factory Street, south of the Hitchcock Lamp Co.'s present works. The building will be two stories high on Factory Street and three stories in the rear. It will have a frontage of 126 feet and will be 36 feet deep.

A company has been formed at Webster City, Ia., to utilize the barbed wire fences with which that State is covered for telephonic purposes. The experiment was tried on a line of fencing twenty miles in length, and was a success.

The Berlin Iron Bridge Co., of East Berlin, Conn., are putting up a new car barn for the Wilkesbarre & Wyoming Valley Traction Co., at Wilkesbarre, Pa. The building will be 73 feet in width and 233 feet in length.

SOUTHERN HARDWARE JOBBERS' ASSOCIATION.

A. D. Langstaff, Memphis, Tenn., president of the Southern Hardware Jobbers' Association, has issued a call for the annual meeting of that great body, to be held in Louisville, Ky., on June 11th, 12th and 13th. In the call, the president says:

While we very fully appreciate the generosity of the Pittsburgh Chamber of Commerce in extending invitation, it is very evident that there will be a larger attendance of members at Louisville, because of its more central location, than could have occurred at any other city, and for this reason better results will follow.

I therefore announce that the next annual meeting will be held in the city of Louisville, Ky., on June 11th, 12th and 13th.

I have been watching with great interest the course of events since our last meeting, and am not surprised that the results have not been as beneficial as we then expected.

A powerful influence beyond the control of the members, beyond the control of the manufacturers, beyond the control of any human agency, prevented some of the plans there formulated from being fulfilled. I refer to the depreciation of values that has during the past three years has irresistably swept away our hard earned profits, as the avalanche sweeps away the homes of the dwellers on the mountain side.

It has been possible for us to reduce the expenses of our business; it has been possible for us by increased watchfulness and investigation to prevent losses by declining orders from doubtful customers; it has been possible for us to change our methods of business from the inherited plan of selling goods on long time, and when due, frequently settling that indebtedness by note, which in many cases was renewed, and which like all things human decreased in strength as it increased in age; substituting therefor improved methods and removing the factor of "long time" and "renewable notes" and appointing instead "short time" and "prompt payments."

The prices made to-day based on the values of to-day had to be reduced to meet the depreciated values of the succeeding day, hence it was impossible to permanently hold agreements in reference to prices. These conditions have been very discouraging.

It is evident, however, that this profit-consuming element "depreciation" has "struck bottom," and that advancing values as evidenced by reports received daily from manufacturers, have "called the turn." This changed condition will enable the Association to successfully accomplish many things that have been impossible and impracticable.

I will first submit for your consideration the subject, "Relations of Manufacturers and Jobbers," and request that you thoughtfully consider in what way these relations might be improved, and that you transmit to me within four days a full and complete report of same, giving names of manufacturers interested.

I will compile this information and will arrange it for ready reference to be submitted to a committee in Louisville.

I will invite the manufacturers whose names you may mention in this connection, or whose names you may suggest, to attend the meeting in Louisville, to confer with the committee and the Association for the purpose of removing any conflict of interests that may exist. There is no question but that the manufacturers are anxious to attend and confer with the Association. I have already received inquiries from them relative to time and place of meeting. I know that you are alive to the vast importance of this subject.

May I, as your president—willing to do all in my power to make the meeting beneficial—urgently request that you do not postpone answer to this letter, but that the several members of each firm confer together *at once* and advise me as suggested within the time specified.

As soon as I have your responses, I will submit other subjects, the discussion of which will undoubtedly be of great advantage to the members. Let us each put our shoulder to the wheel with all the intelligence and earnestness that characterized our efforts at former meetings and greater benefits will follow.

Will you do it?

I am now speaking direct *to you* and not in a general way, as is sometimes understood by a circular of this character.

Will you *encourage* me to feel that you are *interested* in the Association, and that you will do all you can to make this a business convention?

Very truly yours,

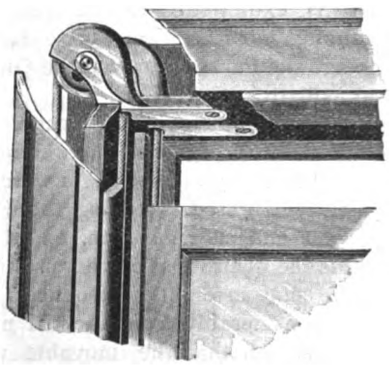
A. D. LANGSTAFF, President.

Peters Nitro Shells.

The Peters Cartridge Co., Cincinnati, Ohio, whose agents are J. C. McCarty & Co., No. 97 Chambers Street, New York, are putting on the market a new Paper Shell especially adapted for use with nitro powders. From the accompanying illustrations, it will be seen that it has special features of construction. "Instead of being strengthened by a wide metallic rim on the outside, as such shells have heretofore been made, this shell is reinforced with paper specially prepared for the purpose, being made exceedingly tough and strong. This reinforcement is inside the shell, as indicated in Fig. 1, the sectional view showing the manner in which the shell is made. The manufacturers call attention to the fact that the paper reinforcement, while giving all requisite strength, yields slightly under the stress of the explosion of the powder without injuring the shell in the least. We are advised that tests have been made in regard to the strength and durability of the shell, and with such satisfactory results that the company recommend it without reserve."

FIG. 1.

FIG. 2.



N. P. Hayes, Hardware dealer, New Bedford, Mass., is opening a new store at No. 382 Acushnett Avenue, directly opposite the side entrance of his present store, in which he will have a full line of heavy Hardware and mill supplies. He will build a conduit under the street connecting with his present store through which he will run a cash system, speaking tubes and electric calls, so that business from both stores will be attended to in one office.

Benjamin S. Alder, late of Surpless, Dunn & Alder, New York, announces under date of May 8th, that he has severed that connection, and associated himself with J. C. McCarty & Co., New York.

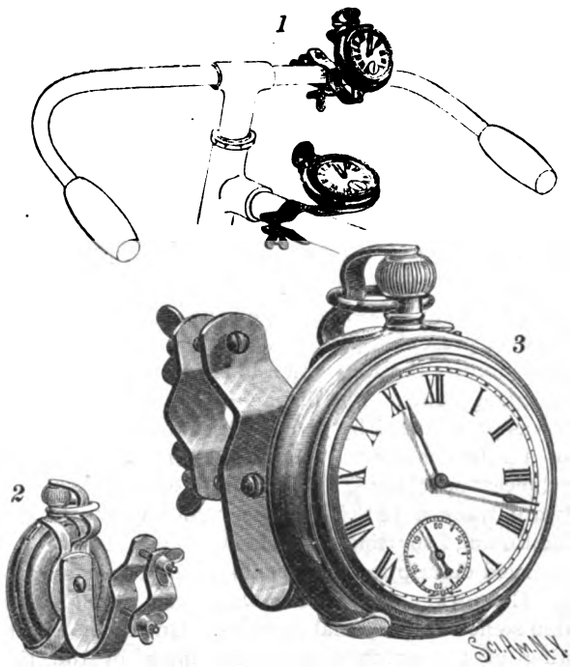
Shull's Overhead Axle Pulley.

The cut here shown illustrates a pulley for windows cut through the head of the frame and resting direct on the end of the pulley stile. The makers claim that "this pulley has a number of advantages over any other now used. The housing resting square on the end of the pulley stile cannot be displaced by the weight of the sash and balance, the screw only serving to hold the pulley in position when not loaded. By the rigid bearing secured, the pulley runs steady and noiseless. From six to ten inches more room is secured for the weights, frequently obviating the use of lead for weights. When the upper sash is closed and the inside stop-head extended to meet the upper sash, the pulleys are entirely concealed and not required to correspond in finish with the balance of trimmings. Insects and air are prevented from passing the pulley. Opening for pulleys in the frame are cut without the use of special machinery, and in one-fourth the time required to cut in any standard high grade pulley applied in the usual manner. Different sized pulleys get the same opening. Pulleys can be taken out and replaced more readily than pulley cut into pulley stile. Sashes do not have to be plowed to pass over the pulley. Weight can be attached near the top of the sash, securing a steady easy movement of the sash. Housing extends over the pulley so the cord cannot get off. Cord can be applied without the use of a mouse." This pulley is manufactured by F. W. Stevens & Co., No. 146



Franklin Street, Boston, in the following sizes: 2 inches, 2¼ inches, 2½ inches and 3 inches for both cord and metal tape, 2½ inches and 3 inches for metal tape with anti-friction bearings specially for large windows. Special pulleys for Mullion frames by which the sashes are operated from one side of the frame and special pulleys for segment and circle top frames are made. All their wheels "are drilled, then rimmed to a standard size, then turned from this centre, insuring perfect workmanship. Face of wheel of special design to prevent cord from chafening. All pulleys have large steel axles tumbled in plumbago, before used to give a smooth bearing and prevent cutting. No time or money spared to secure first-class goods. Prices sent on application."

Numerous Bicycle Sundries.

Robt. H. Ingersoll & Bro., No. 55 Cortlandt Street, New York, have demonstrated what an immense number of things come under the heading of Bicycle Sundries, in their spring catalogue just issued, and devoted to that line of goods. It contains sixteen pages of closely printed matter, amply illustrated, and showing everything that a bicycle dealer would care to handle, or a bicycle rider use. Among the many things may be noted bicycle watches and watch holders, cyclometers, drinking cups, lamps, lamp brackets, bells, screw-drivers, locks and chains, oilers, wrenches, trouser guards, toe clips, handles, repair outfits, tire tape, cement, lubricants, knives, pocket cook stoves, luggage ties and carriers, belts, caps, whistles, skirt holders, oils, etc., etc. It is a catalogue that should be in the hands of every dealer who is liable to have calls for anything in this line.

Among these many things, special attention may be called to the Climax Bicycle Watch and Holder, illustration of which is here shown. The makers describe it as "an indispensable companion to your cyclometer—a silent pacemaker right before your eyes." In further description of it they say: "The very latest, and, in every respect the best time-telling outfit for bicyclers, for two simple reasons. First, the watch is the best, and, barring our other watches, the only one, regardless of price, that will keep time on a bicycle. Second, the Holder is the most secure, simple, practical and light. Our Watches are the best, because they have no fine adjustments, heavy wheels, nor fine pivots. They will stand any amount of banging and shaking without losing or gaining a minute a day. We strictly guarantee them to keep accurate time on any road. The Climax is stem wind and stem set; regular 18 size (diameter, 2⅛ inches); weight only five ounces complete; can be wound and set without removing from holder. The movement is American lever, and the same as used in over one-half million of our watches sold in the last three years. May be

had in gilt or nickel, plain or fancy cases; Roman or Arabic dial. The Holder in plainly illustrated in cut. It attaches quickly to any part of the handle-bar or frame. The two lower fingers reach well over to the crystal, holding the bottom of the watch firmly. The upper fingers straddle the stem, preventing all side play and holding the watch firmly in the clutch of the lower fingers; the upper spring holds ring at a good tension, locking the watch firmly in at every point and preventing the slightest noise or rattle. There is no getting out for a watch placed in this holder; but by releasing the ring, which takes an instant, every obstruction is removed and the watch drops out. The advantage of quick removal is great, enabling the owner to carry watch in pocket whenever not in use on wheel, and for this use the multitudes now carrying them will attest their merit. With a pair of pliers this holder may be fitted to any case. Holder may also be fitted to any part of frame. Retail price, complete, $2.50; net trade, $18.00 per dozen."

It is reported from St. Albans, Vt., that "the Montpelier Hardware Co. are negotiating with other towns in the State regarding the moving of the business from Montpelier. The company considers itself unjustly taxed, and other towns are offering it strong inducements, so far as taxation is concerned. This company is one of the largest of its kind in the State."

THE FIRST SPORTSMENS' EXPOSITION.

The First Annual Sportsmen's Exposition has come and gone, and in every particular was a bright and shining success. The attendance figures footed up the grand total of 55,000 and, to use a slang expression, the management are financially "ahead of the game." Certainly a most instructive form of amusement has been inaugurated, and it should be a matter of local pride to Gothamites to know that the project took root and was fostered in this great city of ours. There has been too much of a tendency to make the words "Sportsmen" and "Sportingmen" synonymous. This confounding of the two words is a rank injustice to the lovers of sport at large. The true meaning of the word Sportsman is "a person who is fond of, patronizes, or participates in honorable field sports, especially hunting and fishing." A Sportingman is essentially a gambler. As soon as these two words are thoroughly divorced in the minds of our people, the true loyal sportsmen, a class, forming the backbone and sinews in a good many of the States, will be more thoroughly appreciated.

There were no complaints from the exhibitors, as to the treatment accorded them by the management, and they all say with one accord, that they will make the next show "a daisy." It is but fair to say that the projectors should receive a great amount of praise for bringing the Exposition to a successful termination. The only accident of any kind that occurred to mar the serenity was the breaking loose of the packhorse from the wild and woolly West. The exhibits were so well arranged that it is doubtful if the Garden ever presented a more attractive appearance. As an annual fixture the Exposition bids fair to rival either the Horse or Dog Show. The display of mounted animals and heads was pronounced by good judges to be the best outside of a public museum. Many wealthy sportsmen lent their choicest specimens. But of far more interest to the Hardware trade were the displays made by the firearms, ammunition and sporting goods companies.

A detailed description of the exhibits appeared in a recent issue of HARDWARE, and we have but space enough now to mention some of the special features. One of the most interesting of the exhibits was that made by the Union Metallic Cartridge Co., of Bridgeport, Conn. and New York. It occupied a large space, and displayed in an attractive manner the articles made at Bridgeport. At one end of the space was an old cannon of the Revolutionary War period, that bore marks of having done good service. It was dug up in Germantown, Pa., where for many years it had been used as a hitching post. Close beside this antiquated gun was a pyramid of cannon balls, piled arsenal style. At the other end of this space was to be found one of our modern death-dealing contrivances, one of the famed Driggs-Schroeder breech-loading six-pounders. The piece of four-inch Bessemer steel near this gun, silently, but conclusively attested to the penetrative force of the projectiles hurled from this modern wonder. A comparison between the Revolutionary gun and the armor piercing monster will show the merest tyro what gigantic strides science has taken. In the middle of this exhibit stood an octagon-shaped base from which rose four slender pillars, which in turn supported a crown-shaped top. The whole was constructed of ebonized wood decorated in gold. Within the case thus formed was an eight-sided column which gradually tapered toward the top. On the sides of this column arranged in straight lines, were the products of the Bridgeport company. In this manner were displayed wads, primers, shells and cartridges of all kinds, some having transparent celluloid insertions in sides to show the size of the load used and the kind of powder. The center column was flanked on two sides by cases of a similar kind, only smaller, but filled with articles of a like nature to those in the center one. The busy man of this company, J. A. H. Dressel, was occasionally seen, and he was greatly pleased with the attention the display excited.

The Remington Arms Co.'s display was one of the largest and finest in the whole show. In a long case were shown the celebrated Remington shotguns. These guns are noted for their accuracy and power, coupled with a low price which puts them in the reach of all. They are patterned after the most approved English models, which are admitted to be as good as any. Besides guns, the Remington Co. showed a full line of military rifles, supplied to the United States for both army and navy, also to China, Turkey, Spain and other countries. These arms were arranged on revolving racks, which method made inspection easy.

The Ideal Mfg. Co. were on hand with a handsome case filled with their well known loading tools for guns, revolvers and rifles. They also exhibited their new closer.

The gun exhibit made by Parker Bros. attracted an unusual amount of attention, and lovers of guns fairly gloated over the specimens exhibited. In the case were some seventy guns, ranging in price from $50 to $400. It was but a short time ago the Parker gun won the Grand American Handicap at Willard's Park, N. J.

The Bridgeport Gun Implement Co. occupied spacious quarters and exhibited in a large case the different loading implements manufactured by them, and for which the company are so justly celebrated. Among these tools was seen the new powder and shot measure, called the Micrometer. It registers the quantity of powder used in fractions of drachms and the shot in eighths of ounces. The new contrivance differs considerably from the old powder and shot measures, inasmuch that the movable cup works in a circular manner on a screw thread, which is moved up or down by a circular movement upon the screw thread. When at the proper point for the charge desired, a turn of a set screw holds it firmly in place. This avoids the possibility of an increase or decrease in the load, which was liable to happen in using the old up and down sliding motion of the cup. The New Rapid Machine Loader was also to be seen. It has been adapted for loading nitro as well as black powders. The great number of cleaning rods made by the company were a display in themselves, the ebony ones being particularly handsome.

The powder manufacturers were well to the front. The display made by E. L. Du Pont de Nemours & Co., Wilmington, Del., was a striking one, and did not fail to catch the eyes of all. In the rear of this space was a huge mirror, before which were arranged, in a highly artistic manner, powder kegs of various colors. In glass bottles were to be seen the ingredients of powder, including saltpetre, charcoal, sulphur and willow wood. In the showcase in the front of the space were shown rifle, shotgun and cannon powders manufactured by this enterprising company; also a smokeless powder for the 36 calibre Government cartridge, and one for use in the 22 calibre cartridge. A 44-40 Winchester rifle was conspicuously placed on the top of the showcase. A hundred shots had been fired from this arm with the Dupont smokeless rifle powder, and to the ordinary observer the barrel looked as if it had but recently been cleaned.

The articles shown by Hulbert Bros. & Co., New York, embraced a wide field. One of the novel features of this exhibit was the Kenwood sleeping and camping bag.

Digitized by Google

Sportsmen were favorably impressed with the qualities inductive to the comfort of a user when exposed to the weather. This firm also showed a complete line of athletic goods that delighted the hearts of our sport-loving people. The cameras, fishing tackle and revolvers shown were also very fine.

The features of the Colt Patent Fire Arms Co.'s display consisted of two specimens of the annihilating machines of modern warfare—a Gatling gun of the same model as the one used with such deadly effect in the Turko-Russian war, and a new weapon known as the Colt automatic gun. This gun is of a peculiar mechanism, and of small calibre. It has stood some wonderful tests. This weapon is mounted on a tripod. The grip is similar to that of a revolver and the gun is discharged by pulling a trigger. The cartridges used are very small, and are fed into the gun on strips of canvas. The gases released by the explosion open the chamber again. This is brought about by the gas escaping through a small opening near the muzzle. A continuous pressure on the trigger makes an uninterrupted discharge.

Perhaps the display that excited more real curiosity than any to be seen was the pneumatic ducking boat exhibited in a tank by A. G. Spalding & Bros. These unique contrivances are made of rubber, and resemble a tub in shape, with a huge pair of rubber boots extending from the bottom, in which the occupant's feet and legs are incased. This gives the user's body an upright position, and leaves his arms entirely free to handle his gun. One the side of the boots are flaps which close up when the legs are moved forward, but which open when a backward kick is made, thus offering a resistance to the water and supplying the motive force. One of the boats would be of great use in reedbird shooting as well as ducking.

An exhibit that aroused the enthusiasm of all loyal Americans and made the Englishmen who visited the Exposition devoutly hope the *Valkyrie III* will take back the Americus Cup this year, were the trophies won by the *Vigilant* in English waters, and displayed by the Meriden Britannia Co.

A large crowd was always in attendance at the stand of the Victor Athletic Goods Co. Fair visitors all displayed interest in the process employed in the manufacture of tennis balls, etc., which were made here.

New York is the home of many strong and influential gunning clubs, and around the temporary home of the Cleveland Target Co., Cleveland, Ohio, could be found many of the crack shots. The space occupied by this company was artistically draped in black and yellow. A novelty introduced here was in the form of the company's celebrated trap targets, with the pictures of representative shooting men placed on the center of the targets. Traps were also shown.

The old and well known firm of Schoverling, Daly & Gales, No. 302 Broadway, New York, had a large and well assorted exhibit. The firm represents several concerns.

The Chas. Daly three-barrel guns attracted a good deal of attention, as did the picnic baskets shown at this space. But to the writer's mind the case containing the rifles and revolvers displayed by the Marlin Fire Arms Co., for whom Schoverling, Daly & Gales are agents, bore off the palm. The beautiful appearance of some of the rifles, especially those with the birdseye maple stocks, was calculated to awaken the greed of possession in one's soul.

The five cycloramic groups arranged by Frederic S. Webster, the secretary of the Association, very justly came in for their share of admiration. It is needless to say these groups represented realistic scenes and aroused pleasant memories in the breasts of some of the hunters and fishermen.

The log cabins of the United States Cartridge Co., and the Maine Central Railroad, were as a general thing, crowded with visitors. At the first-named establishment were to be found the most celebrated guides and trappers from all parts of the country, and at intervals during the silence of the orchestra could be heard the weird though not unmusical moose call given by some of the guides for the edification of the visitors. Two well-dressed gentlemen were heard to remark "that there must be something alive here that we have not seen."

The stuffed specimen of the largest grizzly bear ever shot seemed always to call for the query, "how would you like to meet him on Thirty-third Street on a dark night?"

One rather amusing incident noticed by the writer was the earnest effort of a hayseed Jerseyman to arouse the stuffed lioness that seemed to be calmly resting in her cage. The deception was heightened by a sign—"People will please not feed the animals."

Two charming young ladies from Harlem, in the innocence of their hearts, asked the gentleman who was distributing samples of Club cocktails, for some of the "cologne" he was giving away. They got a bottle.

The space occupied by the Anker Bullion Capsules Mfg. Co. resembled a free lunch counter, so well was it patronized.

The two naptha launches exhibited by the Gas Engine & Power Co. made a fine show and drew large crowds.

Trade journals and sporting publishing companies were largely in evidence.

Section 14 was occupied by HARDWARE, published by the HARDWARE PUBLISHING CO. This space was arranged as an editorial office with desk, ohairs and a complete file of HARDWARE. The floor was covered with a handsome rug which excited the admiration of many a fair housewife. On the wall were two handsome pictures, one of representative Hardwaremen and the other containing the "dummy" of HARDWARE, a publication of 52 pages, and the handsome anniversary number, containing 150 pages. The whole was surmounted by a handsome sign, done in maroon and bronze, as follows:

ALL THE NEWS. HARDWARE HARDWARE EXCLUSIVELY.

A Review of the American Hardware Market.

Many visitors availed themselves of the welcome tendered them here. The official catalogue, in speaking of HARDWARE, said:

"The exhibit in space 14 by the Hardware Publishing Company, New York, publishers of HARDWARE, an organ of the trade described in its title, is naturally confined to the presentation of a newspaper alone.

"The booth is tastefully arranged, something after the manner of an editorial office, with desk, chairs, etc., sample copies of the regular editions of HARDWARE, and of its handsome Fifth Anniversary edition of April 10, 1895, which is very tastefully displayed. A feature of the display is the showing of an oak frame in which is found exhibited the 'dummy' of HARDWARE or the first advance number of March 1890. This was a sheet of 52 pages. Beneath it is the word 'Anticipation. The "dummy" of HARDWARE, 1890—52 pages.' Elsewhere upon the picture appears a copy of their Fifth Anniversary number, under which are the words 'Realization. HARDWARE, the organ of the trade, 1895—150 pages.' Among the notable contributions by HARDWARE to the good of the trade, was the suggestion of the annual dinners which have now become a marked feature of the trade, and the outcome of which is the prosperous Hardware Club of over 600 members."

The Tie Co., Unadilla, N. Y., made an attractive exhibit in their space, of their well-known Holdfast Luggage Carrier, ties, etc. Their tasteful booth was continually surrounded by crowds of people who were interested in bicycles, and other things in which the "tieing up" process

Digitized by Google

is involved. A courteous attendant was at work constantly, showing the "whys" and "wherefores" of their handy little articles.

Section 70 was occupied by the *Iron Age* of New York. The booth was tastefully arranged somewhat after the manner of an editorial office, with desks, chairs, etc.

The *Sporting Goods Dealer*, *Forest and Stream*, *The American Field*, *Shooting and Fishing*, *Outing* and Chas. Scribner's Sons also displayed books and pictures of interest to sportsmen.

The shot tower exhibited by Tatham & Bros. was one of the centers of attraction.

Two lady shooters, becomingly attired, electrified the crowds by their marvelous marksmanship. The visitors were good-natured and inquisitive, and it is safe to say that they departed with greater respect for the sportsman than ever before. All voted the show far ahead of their expectations.

S. F. Heath Cycle Co.'s Victory.

A decision recently made in the Circuit Court of the United States for Indiana, will prove of interest to all who have the making or handling of pneumatic tires. A point touching the inflation of the same was under judicial investigation. The case was that of the S. F. Heath Cycle Co., of Minneapolis, vs. Hay & Willits, Indianapolis, and the suit was one in equity by the complainant against the defendants for the alleged infringement of letters patent No. 507,224, granted to complainant October 24, 1893, as assignee of Hastings H. Johnson, for improvements in inflating devices for pneumatic tires The invention relates to means for inflating pneumatic tires for bicycles and other vehicles. A report of the findings says:

The object of the invention was to provide a universal air pump, hose and couplings, which could be employed for inflating the tires of any machine. The defences interposed are, that the patent is invalid, and that in view of the prior state of the art, the claims, if valid, ought to be limited, so that the defendants' device would not be held to constitute an infringement. The defense of invalidity is bottomed upon the three following grounds: 1. That neither of the claims discloses a patentable combination of elements, but only what is known in law as an aggregation. 2. That the devices display no invention. 3. That the devices, in view of the prior state of the art, are not novel or patentable, but have been anticipated in all their essential features.

The invention described and claimed in the patent is a combination of devices arranged to be used for inflating pneumatic tires in common use upon bicycles. Such tires are generally provided with a rubber covered metal nipple, having within a valve that is adapted to open inward and held to its seat by a suitable spring or other device, and by the pressure of the air within the pneumatic tire, thus preventing the escape of the air through the nipple. The device, which forms the subject of the invention described and claimed in the patent, consists of an air pump provided with a flexible hose or tube having an open end, into which the nipple of any pneumatic tire may be inserted. With the air pump having this particular arrangement of hose there is combined a device for forming an air-tight joint between the hose and the nipple inserted therein, consisting of a loop arranged to encircle the hose, a follower arranged to slide along the sides of the loop, which thus forms guides to keep the follower from shifting out of place, and a screw connected to the follower and adapted to be used to force the follower in against the outer surface of the hose, thereby clamping the hose around the nipple by compressing it between the curved inner surface of the lower part of the loop and the curved surface of the under side of the follower. By this means the hose is equally compressed at all points around its surface, and an air-tight joint is formed between the inner surface of the hose and the outer surface of the nipple.

There are two claims in the patent:

First. The combination, with an air pump hose within the end of which the pneumatic tire nipple may be inserted, of means for compressing said hose about said nipple to form an air-tight joint between the tube, said means consisting in a loop, a follower and a device for forcing in said follower, substantially as and for the purpose specified.

Second. The combination, with an air pump hose wherein a pneumatic tire nipple may be inserted, of a loop surrounding said hose, a follower or gib adapted to operate within said loop, pressing on the end of said gib, whereby said hose may be tightened on said nipple, substantially as and for the purpose specified.

It is earnestly contended that the claims of complainant's patent are void, because they do not cover patentable combinations. "Blake vs. Robertson, 94, U. S. 728; Parks vs. Booth, 102, U. S. 96; Loom Co. vs. Higgins, 105, U. S. 580; Lake Shore & Mich. Sou. R'y Co. vs. National Car Brake Shoe Co., 110, U. S. 229; Yale Lock Mfg. Co. vs. Sargent, 117, U. S. 536."

It seems clear that the claims in the patent in the suit come within the rule laid down in these cases and cover a patentable combination. A single unitary result, that of inflating a bicycle tire, is produced by the co-operation of all the elements of the claims, and it is immaterial whether the operation of the elements is simultaneous or successive. I perceive nothing in any of these devices which ought to be held to anticipate the complainant's combination. None of them would suggest to a mechanic the combination in suit. It is to be borne in mind that the complainant is not claiming the clamping device alone, but is claiming it in combination with other elements, the entire combination producing a single unitary result, namely, the inflation of any bicycle tire. The claims are for a combination whlch can be readily and economically used for the inflation of any bicycle tire without regard to size, shape or kind of nipple used upon it. The complainant was the first to discover a combination capable of producing this new and useful result, by means of a simple and inexpensive device. In my opinion, it involved invention to change the form of the choker device and provide it with a concave, instead of a convex follower, and combine it with an air pump, having a hose with an open end adapted to slip over any bicycle nipple, and by this means form an air-tight joint between the inner side of the hose and the outside of the nipple. It remained for complainant's assignor to show that by his combination a device had been discovered which would provide simple and economical means for the inflation of any pneumatic tire, regardless of size, shape or style of nipple, or the kind of valve used in the rein. To one who has accomplished this result the quality of inventor should not be denied.

Applying these principles to the patent in suit, I am of the opinion that the device covered by it constitutes a patentable invention, and that is had not been anticipated by any prior patented device. It is not seriously contended but that if the complainant's patent is valid the defendant's device is an infringement of it. In my judgment it is so palpable an infringement that it is needless to point out the coincidence of structure aud operation of the two devices. It is apparent upon the most casual inspection. There will be a decree for the complainant.

A Great Clincher.

Under this suggestive heading, the Clendenin Bros., Baltimore, present on page 49 of this issue, the claims of their Copper Corrugated Shoe Nails. This is an entirely new article that has just made its appearance upon the market. It is intended to supplant the use of the brass corrugated Shoe Nails, which, it is said, "are supposed to clinch perfectly and as a general rule do so, yet, occasionally they do not." In making these goods out of copper, the firm above named have remedied their weak point. This important feature, together with the fact that they are sold at the same price as the brass, is duly appreciated by the trade; and we are informed that wherever the Copper Nails have been introduced they have given perfect satisfaction. Clendenin Bros. will be pleased to give details and prices upon application.

William H. Williams, of the Van Wagoner & Williams Hardware Co., and president of the New York Hardware Club, has been appointed a Commissioner of Elections for Brooklyn, by the mayor of that city. The term is for five years, and the duties are such as will not interfere with Mr. Williams' business connections. No better official in a position of such high trust could be found. On the organization of the board, on May 23d, Mr. Williams was elected president.

The St. Joseph Pump Co.

The St. Joseph Pump Co., St. Joseph, Mo., have met with an unfortunate temporary interruption of business, which their enterprise and energy will overcome, so far as may be possible. A fire some days since almost entirely destroyed their works, at a time when their order books were full, and business in most excellent condition. They have gone to work with the same energy that has made their business what it is, and will rebuild at once, and hope to be in condition for business before long. Meanwhile their friends everywhere will wish them abundant success in their renewed efforts, and will hope that the time may soon come when they will be as active in the market as heretofore.

In reference to the above, the St. Joseph *News* speaks as follows:

"The destruction of the works of the St. Joseph Pump Co. in St. George was extremely unfortunate, coming as it did at the very busiest season. The company was operating its works to their greatest capacity, and had orders far ahead of its output. Many improvements had also been made in the plant lately, and it was in the best working condition. Secretary King has received a number of offers of bonuses as an inducement to rebuild the factory elsewhere, but it is gratifying to know that the company will turn a deaf ear to all such propositions, and will build a new plant on the site of the old one in St. George just as soon as the losses on the destroyed factory are adjusted. The company is a St. Joseph institution in every sense of the word. Its stock is owned by St. Joseph gentlemen and it is operated by St. Joseph men in every department. The factory began business nine years ago, and since that time its product has been steadily increasing and has been distributed to the four corners of the earth. Everywhere are seen St. Joseph pumps, and they are one of the best advertisements the city has. It would be a serious blow, indeed, if the works were not rebuilt."

The Philadelphia Association.

The gentlemen who have in hand the management of the Hardware Merchants' & Manufacturers' Association of Philadelphia, have mastered in an admirable degree the art of combining business and pleasure in the right proportions. Their business meeting and supper at Boldt's Cafe on the evening of Tuesday, May 21st, was an illustration of this point. There came first the business meeting at 6 P. M.; a collation at 7; a reassembling at 8, and the presentation of the following attractive and comprehensive programme:

INTRODUCTORY REMARKS,	By the President, Wm. W. Supplee.
BASS SOLO, "Selected,"	Wm. S. Lloyd.
ADDRESS, "Hypnotism,"	Mr. Alfred C. Rex.
TENOR SOLO, "Selected,"	Paul A. Griffith.
DECLAMATION, "Laska,"	Mr. Harry M. Einwechter.
BARITONE SOLO, "Selected,"	Mr. Jno. R. Griffith.
ADDRESS, "Commercial Veracity,"	Mr. Wm. H. Bennett.
SYMPOSIAC, "Gold vs. Silver,"	
Frank H. Taylor.	Fayette R. Plumb.
John W. Boughton.	Wm. C. Peters.
James H. Ritter.	William W. Supplee.

The following have been appointed Judges to sit during the above and are pledged to render their decision on the merits of arguments presented, regardless of personal opinion on question discussed.

JUDGES.

William W. Allen. Charles M. Biddle.
T. James Fernley.

James L. Pollitt, the London manager for the Bissell Carpet Sweeper Co., has just been presented with a twenty-foot naphtha launch, containing a one-horse power motor, which will enable him to derive considerable pleasure in his trips on the Thames during the coming season, between his house at Richmond and the Bissell Co.'s London office.

Review of the Markets.

Money: The chief event affecting finances during the past fortnight, has been the decision of the United States Supreme Court that an income tax is unconstitutional. The results that will flow from this decision will have great effect upon the future movement of money toward the government vaults, and very little effect upon the return of that already paid in, as this was relatively of so small an amount as hardly to be noticeable. There has been great activity in the stock market, especially in relation to wheat, and just when and where the flurry will end, can hardly be guessed at present. There is a good supply of time money, borrowers finding accommodation at from two to three per cent. There is also a good demand for mercantile paper at three and four per cent. The general business outlook is improving, and the opinion seems to be that the tide has turned, and that things are upon the mend. The country seems to have been started on a boom, which is something more than a mere speculative movement. We hear of increased manufacturing, advanced wages, and better business.

Hardware: The tendency during the week has been to stiffen prices. Orders are given more freely, with a tendency to dip deeper in. There is no doubt a return of confidence. The volume of business steadily increases, and manufacturers are correspondingly elated. The tendency of the market is toward a still further improvement with a possibility of the large trade of the "good old times" returning. A large portion of the orders come by mail and are not solicited. These classes of orders are for goods that have apparently reached rock bottom prices, jobbers preferring to place their orders while the goods are still at low figures, rather than run the risk of a raise in prices. But few restocking orders have been booked. The rise in prices is due to the facts that material is rather scarce, and that higher wages are being paid mechanics. Also to the fact that agreements have been reached among manufacturers.

The prices quoted below are for small lots. Round lots, except Tobin Bronze, can be purchased at lower prices:

Wire Nails: There has been a tremendous advance in the price of Wire Nails during the past week, and it is almost impossible to get quotations on these articles. The advance is due to the increased cost of material, and an understanding between the manufacturers. One large concern, we are advised, has been unable to fill orders for 30,000 kegs, not being able to secure the steel to manufacture them. Lots out of store in New York are quoted at $1.30. The market is practically bare of Nails. Manufacturers are all wearing broad smiles and hoping that this condition of affairs will continue.

Cut Nails: The upward movement in Wire Nails had a corresponding effect on the Cut. The ruling quotation for lots out of store New York is $1.10 on a 60 cent average. The condition of the market is considered excellent.

Nuts and Bolts: An advance in prices is looked for, as there is a strike on in Cleveland.

Hinges: There is but the ordinary demand for Hinges.

Digitized by Google

But Hinges in the Hardware trade are like sugar to the grocery trade.

The following quotations, subject to change without notice, are given in the paint market. White Lead, dry or in oil, red lead and litharge in kegs; in quantities of less than 500 pounds 6c. net; in lots of 500 pounds and over 5½c.; Red Lead and Litharge in barrels and half barrels, ¼c. per pound less than price in kegs. Zinc: Values remain unchanged for jobbing lots at 3¾@4¼c. Barytes: No. 1 is quoted at $15@$16 per ton. No. 2 at $12@$13, and No. 3 at $9@$11 per ton. Linseed Oil: The crushers price is 56 cents.

Clapp & Co., bankers and brokers, New York, in their weekly letter, say: "No commodity affects the value of any other, except sympathetically and relatively. Intrinsic values always stand firmly related to supply and demand. Unnatural and abnormal demand may be temporarily caused by extraordinary consumption, undue speculation, human whims, contracts and laws. Temporary apparent advantage may be gained by agriculturalists and their dependants against manufacturers and their employees by change from gold to silver standard; the outcome might mean loss to all classes. It is estimated the silver production of 1895 will not exceed 100,000,000 ounces, and Chinese indemnity will require more. Imports of textile fabrics and other fibre goods average 76% more than under the former tariff. Total imports for seven months are $54,000,000 more than in 1894. The United States minister says banks in Paraguay, South America, will not take American silver, or handle American exchange not specifically payable in gold. The bond syndicate are reported as paying a small premium for gold in gold-producing states, and offering 4 per cent. bonds in other states at less than New York quotations. It is reported the French people own all their government securities and some three and one-half billions of Russian and Spanish securities."

THE CLEVELAND TRADE.

During the last two weeks the improvement for the better which we foreshadowed in our last letter has come about, and there is a very decided improvement in prices of all staple articles such as Wire, Wire Nails, Steel Billets, etc. It seems to us that we have reached the turning point in the lane that we have been trying to find for the past two years, and that with this advance in prices will come an increased degree of prosperity to everybody. We sincerely hope that all classes, from the workingman to the capitalist, may share in this prosperity.

We believe that the present advance is a substantial one, and will be well maintained, as the value of all staples in the iron line had fallen far below what it should be. This advance, it must be borne in mind, is made up almost entirely of additional cost for labor, for the advances in iron and steel billets and all articles of that class are distinctly the result of a change in wages.

We think that all classes, manufacturers, jobbers, retailers and consumers are perfectly willing to see the higher plane of values, and that no discouragement would be placed in the way of an honest effort to increase present prices.

Going somewhat more into detail: The prices on Wire Nails during the past week have been wery unsettled; mills have made sharp advances, and the majority of the trade are caught without any large stock on hand. In sympathy with this movement in Nails, an advance has also been made on Smooth and Barb Wire, although not to the same extent. From all that we can learn, the mills are snowed under with orders, and such being the case, there is little probability of any falling off in prices, but on the contrary a very strong probability of further stiffening, so that by the time this article appears before your readers, we have little doubt that values will be higher than they are at present.

In sympathy with these advances it must naturally be expected that other staples, such as Sheet Iron, Galvanized Iron, Wire Cloth, Poultry Netting, Tin Plate, etc., will share in the advance. The time seems to have arrived when it is a wise thing for dealers to carry a well assorted stock that will meet their requirements, and they can feel confident in doing so that they will not be subject to sharp reductions in values, and consequent loss, but that on the contrary probabilities are strongly in favor of the merchandise being worth fully as much, and possibly more, at the time it is sold, than at the time it was purchased.

In our immediate section we have been visited by heavy frosts, which have done considerable damage, but as usual in all such cases the damage has no doubt been very much over-estimated, and we can only hope that further developments will show that fruit and grain have not been injured to the extent that it is now supposed.

Seasonable goods are in active demand, and the warm weather which ruled during the first week of May and the last week of April brought a heavy demand for such articles as Refrigerators, Ice Cream Freezers, Garden Hose, Screen Doors and Windows and Oil Heating Stoves.

Bicycles are still in active demand, and the orders received daily are in excess of the quantity that the factory are able to ship. It is probable that this condition of affairs will continue for the next three or four weeks, at least, and by that time it is to be hoped that the excessive demand will be met, and that after that buyers can obtain their supplies immediately upon requiring them.

Collections are satisfactory, and the general outlook fair. Trade is good. MCINTOSH-HUNTINGTON CO.

THE BALTIMORE TRADE.

In the past fortnight trade in this section has been remarkably good, when we take into consideration the rather unsatisfactory spring weather which has prevailed. While the sale on certain lines of seasonable goods has been somewhat restricted, there has been a fair amount of staple Hardware moving in moderate quantities. What are known as strictly summer goods have not been much in demand, as yet; but with the first appearance of warm weather, we may safely count upon a full volume of business in this line. There is a confidence manifested in all sections of our territory that prices have surely begun the upward ascent and that any changes, which are likely to occur, will be in the nature of advances.

The recent action of the Wire Nail manufacturers has given a certain amount of backbone to the stiffening process, although advances of a moderate nature would likely be more lasting. By a sort of sympathetic relationship, plain and Barb Wire have also advanced several points. It is more than probable that the next few weeks will bring about many advances on those lines of staples closely related to the raw material. Screw Hook Hinges, as also Strap and T Hinges, will probably come in for early attention. Wood Screws, which have been, prior to this, a demoralized factor, will advance to a point which will justify the manufacturers. Taking all together we look forward to a general return of prices to a normal level, and it is safe to say the fall business will justify all moderate expectations.

THE TABB & JENKINS HARDWARE CO.

THE DAVENPORT TRADE.

A letter just received from a well-known manufacturer, excusing lack of promptness in shipping, seems to voice the conditions of many of the Hardware manufacturers at present. It reads: "As we expected, when business would pick up, it would begin with a rush, everybody wanting the same goods, and we have found this to be the case."

As soon as the retail trade finds that the day of low prices has passed, that confidence is restored, and it is the *seller* and not the *buyer* who has the advantage now, there will be

Digitized by Google

My dear, dear Lord,
The purest treasure mortal times afford
Is spotless reputation---That away
And wheels may be painted iron or gilded clay;
An honest cycle that has stood the test,
Is the famous one with the Humber crest;
In quality is its fame; both grow in one;
Take quality from it and its fame is gone.

HUMBERS have been the favorite Bicycles of two generations of riders. They are still the - - STANDARD.

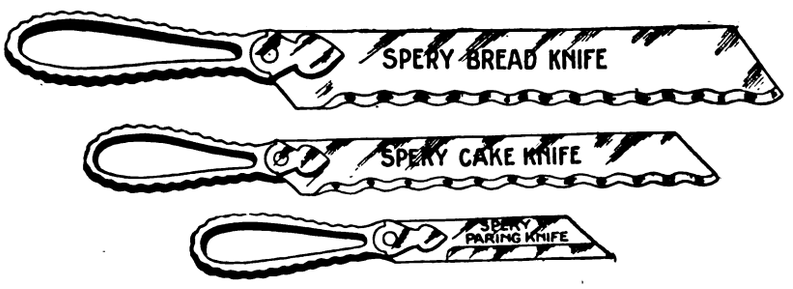
Humber & Co., America, Ltd.,
No. 318 Broadway,
New York.

an unprecedented demand for goods. Buyers are always slow to purchase on a declining market, and as the downward tendency has obtained so long, the stocks are very much depleted. It will require the full capacity of the factories to fill up the empty shelves and put the stocks of the retail dealers into their normal condition again. It may be that jobbers who are slow to realize the changed conditions and do not place their orders for fall trade early, will also find it difficult to get goods in time to supply the urgent wants of their customers. Complaints are already being made on account of tardy shipments.

April trade was far in excess of the business done in April, 1894.

Prices are firmer all along the line, the most notable advances being in Fruit Jars, Strap and T Hinges, Screws, Sheet Iron, Cut and Wire Nails, Wrought Goods, Sheet Zinc, Steel Squares, Tin, Solder, Rope, Binder Twine and Barb Wire. The "good times" that have been coming so long and so slowly, appear to be very near us, and if we have the abundant harvest which looks now so promising, a large crop of Hardware orders will be gathered in Iowa this fall.

The nail war between Joliet and its suburban city by the lake is over; normal prices have been restored. Collections are only fair.



SICKELS, PRESTON & NUTTING CO.

THE BOSTON TRADE.

The signs of business prosperity are too manifest to admit any doubt of existence. Every department of productive trade is receiving some benefit from the improved condition of things. Throughout New England the most encouraging evidence is the more constant employment of the working classes, as well as the upward tendency in rates of wages.

Since the opening of the spring there has been a steady increase in the volume of trade compared with previous years, and from the nature of the improvement we have every reason to believe it is something more than a seasonable boom, and the stride that it has already made has every tendency of continuance. The increased demand of

Digitized by Google

merchandise in our line has its effect upon the manufacturers, and they have been forced to make some advances which are fully warranted. The average merchant welcomes any advance that is reasonable and can be maintained.

The demand for builders' Hardware is very promising, and those houses which make a specialty of this line report an unusual activity, and the sale of this class of goods for the coming months will be larger than for some time.

The sharp advance in nails is nothing more than was expected, when it has been a conceded fact that this commodity has for some time been sold at less than actual cost.

Seasonable goods are selling rapidly, and the demand is such there is no disposition to cut prices. Collections are much better than last month. Frye, Phipps & Co.

THE AUSTRALIAN TRADE.

The past month has proved a disappointment to many who looked for the improvement foreshadowed by the operations of the previous month. Still, although reports generally indicate that returns for the month have been below expectations, a more cheerful note is not altogether wanting.

Never before were so many minor industries developed as at the present time. Diversity of production, which for some years past has been accepted as correct in theory by producers, has now been put into active practice. The wheat-grower has turned his attention more largely to sheep and to the dairy; and fruit growing and canning are being developed very satisfactorily.

This altered condition of things, backed up by determined perseverance on the one hand and strict economy on the other, has rather a depressing effect on the actual turnover of stock for the time being, but the good effects will be felt in the near future in no slight degree.

McLean Bros. & Rigg, Ltd.,
Walter J. Travis, Mgr.

Nos. 52 and 54 New Street, New York.

Model Garden Pump.

C. E. Jennings & Co., No. 79 Reade Street, New York, are having great success in the sale of their Model Garden Pump and Fire Extinguisher, a view of which is here shown. The uses to which it is put are so numerous, and its effective working so certain, there is little wonder that it has met with a great and increasing sale. It can be used for extinguishing fires, washing carriages and windows, sprinkling gardens, lawns and flowers, destroying insects on trees, syringing cattle, blowing out water pipes, etc. It is made of the very best mandrel drawn brass tubing, with hard round stone rubber balls for valves, hard metal plungers, Bessemer steel plunger rods, which obviate the annoyance of swelling and shrinking of wood, which is experienced in many of the pumps made for this purpose. The makers say: "There is, at the present time, a great and growing demand for some appliance for distributing evenly and economically a solution for destroying insects on fruit trees. We supply with each and every Pump a formula for solution; also nozzle of our own invention, which does the work to perfection. We also furnish an extra appliance for watering flowers and shrubbery, and besides that a wooden plug to be used in blowing out water pipes and syringing cattle. To show that it is no cheap squirt-gun arrangement, we warrant to force a continuous stream of water sixty feet, in quantities equal to any other Pump in the market which retails at twice or three times the amount." Sample Pump sent to any address upon receipt of retail price, $3.

Spery Serrated Bread Knives, etc.

The Spery Cutlery Mfg. Co., St. Louis, for whom David Eastman, No. 64 Reade Street, New York, is Eastern manager, are placing upon the market a number of attractive articles in the cutlery line. Among these, special mention should be made of their Serrated Edge Bread Knives, some

FIG. 1.

samples of which are illustrated upon page 45 of this issue. They make them in curved or straight blade.. They also make the Combination Grater and Slicer, shown in Fig. 1, the utility of which will be understood at a glance. The Grater can be detached from the Slicer, making a desirable kitchen utensil. In Fig. 2 may be seen the Spery Parer and Slicer, of which they say: "This knife has had a large sale for the past four years, and its success is the foundation of the Spery factory. The Parer and Slicer is now nickel-plated and more attractive than ever. Its merits are soon appreciated by a good household, being a most valuable kitchen necessity." Among the other articles of their manufacture is the Spery Meat Tenderer, which has a keen

FIG. 2.

cutting edge, which cuts the fibres of the meat and allows the juice to escape, and cannot clog; the Spery Paring Knife, which is plain, finely tempered, with a malleable iron handle, nickel-plated; a Slaw Cutter, Can Opener, etc. The prices, etc., in full, can be obtained by application to Mr. Eastman in New York, or the home company in St. Louis.

New York Hardware Club.

At a meeting of the board of governors on May 23rd, the following gentlemen were unanimously elected; that of the resident members having become possible by the occurrence of two vacancies in that list:

Harlan Page, No. 235 Race Street, Philadelphia.
Frank W. Oliver, Niagara Falls, N. Y.
John H. Parsons, No. 253 Broadway.
James M. Bell, No. 21 Warren Street.

The following resolution, offered by Mr. Hayden, was unanimously adopted:

"*Resolved*, That due notice be given, in accordance with the requirements of the constitution, that the resident membership of the Club be increased to six hundred."

It was decided to call a meeting of the Club for June 20th, at 12 M., to act upon this proposed amendment.

It is evident that Cleveland's reputation as a convention city is deeply impressed upon the National Association of Tire Bolt Manufacturers. They have met in that city several times, and twenty members of the association from Providence, R. I., to the Mississippi River, met some days since at the Weddell House. The meeting was held purely for the purpose of discussing trade matters, and the members agreed that the improvement in business was very noticeable. No change in prices was made at the meeting.

The fifth anniversary number of Hardware was a notable exhibition of what a trade paper can do when it bends its efforts to produce a "special." From very small beginnings Hardware has in five years grown to large proportions and now ranks among the leading trade journals of the day. The anniversary number, issued last month, contained 150 pages—the advertising department showing up in elegant style.—*Profitable Advertising*.

When selecting a bicycle to represent during the coming season, consider ultimate results.

The "DORSETT" is here to stay. It represents every feature of the best wheels on the market with added points of novelty and merit that are bound to make it a "seller."

Interchangeable methods of cycle propulsion presented in the simplest and most efficient mechanical constructions, and perfectly independent of one another.

With the principles exhibited in a practical manner, and construction "special" in every part, the "DORSETT" represents the highest perfection in the art of bicycle making.

Send for catalogue which tells you all about details.

100%

The above figure represents the increase in the sales of the

Cream City Flour Bin

during the first four months of 1895 over those made in the corresponding time in 1894.

They are not as cheap as other similar devices, but they are so much better, that the people will buy them. An article that has merit, and is sold at a reasonable price, should commend itself to the attention of progressive dealers.

Respectfully,

The Geuder & Paeschke Mfg. Co.,

The Conroy patented New Automatic Refrigerator Door Fastener, with lock and key.

THIS FASTENER is the most complete one ever invented. The door will push to more easily with this Fastener than any in the market. The Fastener will tighten the door by the door closing. It is the most substantial; nothing about it to get out of order. By lifting the handle quarter circle the door will open, and if it sticks it will release it. It has a new and improved lock, absolutely secure. Made for flush or raised doors, composed of brass or bronze metal in any finish desired, plain or ornamental.

MERIDEN, CONN., U. S. A.

A friend in England writes: "The fact of the matter is, there is not much trade here. However, we are living in hopes. Scotland has not recovered from the bad effects of the coal strike last year, and a strike which has been in force in the boat trade, is just settled. These two facts, coupled with a backward season, have no doubt had their influences upon trade."

WOOD MANTELS.

PERSISTENT

Enterprising people are beginning to learn the value of advertising the year round. The persistency of those who are not intimidated by the cry of "dull times," but keep their names ever before the public, will surely place them on the right side in the end. Think over the persistent advertisers you know.

BEST AND CHEAPEST
STONE WATER FILTER
ON THE MARKET.
Tripoli Stone Block System.

Set up ready for use. There are two crocks, each of four gallons capacity—an upper one holding the Filter Block, and the lower one, which can be used as a water cooler if desired. This Block is four inches in diameter by the same in height, and is hollowed out on inside. This fits on a metal tube, which fastens by means of a nut to bottom of Filter Jar. Block can be lifted off tube, cleaned and replaced in two minutes, and with no trouble at all. Water passes from outside of block, through the walls, into the hollow chamber, and from thence, by the means of the Drip Tube, into the lower receptacle.

"Excellent Cream!"

WHITE MOUNTAIN FREEZER

Improved for 1895

With which the finest quality of cream can be produced in Four Minutes.

As features of especial merit we claim:

A STRONG, waterproof tub, bound with heavy, galvanized iron hoops that fully protect the tub, and do not fall off; the gearing completely covered, so that nothing can get between the cogs. Cans full size and made of the very best quality of charcoal tin plate; beaters of malleable iron and tinned; all castings attached to the tub nicely galvanized to prevent rusting. It is the only Freezer in the world having the CELEBRATED DUPLEX DASHER, WITH DOUBLE SELF-ADJUSTING WOOD SCRAPING BAR, by the use of which cream can be frozen in less time, yet finer and smoother than can possibly be produced in any other Freezer now in use.

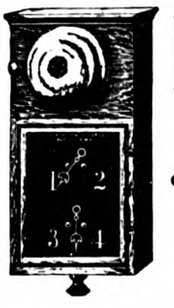
Get the Best. All Leading Jobbers Sell Them.

THE WHITE MOUNTAIN FREEZER CO., Nashua, N.H.

The BEST FREEZERS Made

HAVE
Electric-Welded Wire Hoop Pails,
MADE OF
Best Virginia White Cedar,
AND
Drawn Steel Bottom Cans.

SOLD BY LEADING JOBBERS.



HAVE YOU SEEN THE DRAWN-STEEL BOTTOM CAN ?

STRONGER. LAST LONGER. HANDSOMER. EQUALLED BY NONE

IN PERFECTION OF DESIGN AND CONSTRUCTION AND PRACTICAL RESULTS IN USE.

Manufactured Exclusively by

North Bros. Mfg. Co., Philadelphia, Pa.

House... ...Goods Supplies.

OHIO ICE CREAM

A high-grade Freezer.
Mechanically Correct.
Fittings Accurate.
Easily Cleaned.

"THE RESULT OF 25 YEARS' EXPERIENCE."

Thoroughly mixes the Cream from bottom to top. Neither Salt nor Oil can reach the Cream. It has all the good points of other makes, and many more of its own.
